We believe that the reactionary insurgent movements spoken of as having manifested themselves in various parts of the Neapolitan dominions, have not yet assumed any importance. But if not promptly and vigorously repressed they may become formidable. Notwithstanding the apparent unanimity, and the unquestionable preponderance, of the popular vote in favour of Victor Emanuel, it cannot be doubted that there does exist, not only a Bourbon party, but an anti-annexation party, as well as a few Republicans. These parties, singly insignificant, might give much trouble were they to unite. The Neapolitan Administration must be prepared to act against them instantly and vigorously by flying columns. But the most essential matter of all is to reduce Gaeta, and expel the dethroned monarch without an hour's delay. As long as that fortress holds out, and Francis II. keeps his ground in any portion of his territory, so long will partial disturbances and reactionary outbursts prevent the consolidation and tranquillity of the New State from being complete. The prolongation of the siege, to which these disturbances are owing, is, we must not forget, in reality *the work of Louis Napoleon;* and on every ground, therefore, the strongest influence that our Government can bring to bear upon him should be exerted to induce him to rescind his incomprehensible and inconsistent instructions warranting the interference.

THE REPUBLICAN PRESIDENT'S CREED.

The success of the Republican candidate for the Presidency in the United States will prove one of the greatest events of modern times, if it indicates, as we trust, no mere accidental fluctuation of public opinion in the direction of the Anti-Slavery cause, but the commencement of a permanent and sustained movement. It will be impossible to say how far this will prove to be as we should wish, till we see the details of the popular vote. It is a discouraging fact that the Republican President will not at first be supported by a Republican majority in either House of Congress, but there is good reason to hope that, now the tide has fairly turned, this defect may be remedied at the next Congressional elections.

It would be a great mistake to suppose that Mr Abraham Lincoln is an extreme man. His views seem to us to fall far short of what may fairly be termed even a statesmanlike Anti-Slavery creed. Few in England have the smallest sympathy with the extreme party of Abolition,—those who maintain that to hold a serf for a single day in slavery after you have the power to release him is a deadly sin,—that Washington and Jefferson deserve infamy for holding slaves themselves, and admitting any compromise on the subject into the Constitution of the United States. This kind of fanaticism is a species of political insanity. The statesman will believe that the order of the most imperfect Government is better than anarchy, especially if it contain within it principles by which it may be gradually purified and improved. He will accept his position and use all the means within his reach to improve it. He will not throw away

the only political instruments within his power because they are indelibly marked with traces of the evil he wishes to remove. It is not, therefore, because Mr Abraham Lincoln is very far from representing the extreme party of Abolition that we call his views moderate *within* the limits of statesmanlike moderation. But few Englishmen, only knowing that the Anti-Slavery candidate for the Presidency has at last triumphed, would be prepared to hear what his views really are. That they have roused the South to threats of immediate secession, which in some cases at least may not improbably be in part carried into effect, will scarcely be credited when we lay before our readers what the new President's creed on the Slavery question really is.

He is not opposed to a Fugitive Slave Law, though he would modify the one actually in operation. He thinks it would be impossible to uphold the Constitution as between Slave States and Free States without *some* Fugitive Slave Law, so long as Slave States exist at all. He has not, we believe, declared himself as yet even in favour of prohibiting the internal Slave Trade between the different States, —a measure which is the only efficient step towards the extinction of slavery that is constitutionally within the power of Congress to effect. He has declared himself in favour of abolishing slavery within the Congressional district of Columbia (in which the capital Washington stands), but only under conditions which would entirely obliterate all the revolutionary character of the measure,—namely, that it should be done *gradually*,—that it should be done only with the consent of a majority of the qualified voters within the district, —and that compensation should be made to unwilling owners.

We have enumerated the three principal articles of a statesmanlike Anti-Slavery creed,—and in two of them Mr Lincoln declares himself either uncertainly, or only in favour of very modified proposals, while on the third he attaches such careful conditions to his adhesion that all its terror to the slaveowners ought to be obliterated. About two years ago he stated, in his controversy with Mr Douglas :—

"I do not now, nor ever did stand in favour of the unconditional repeal of the Slave Trade Law." "I have never hesitated to say, and I do not now hesitate to say, that I think, under the Constitution of the United States, the people of the Southern States are entitled to a Congressional Fugitive Slave Law. Having said that, I have had nothing to say in regard to the existing Fugitive Slave Law further than that I think it should have been framed so as to be free from some of the objections that pertain to it without lessening its efficacy."

With regard to the abolition of the internal Slave Trade between the different States, Mr Lincoln says :—"I am pledged to nothing about it. It is a subject to which I have not given that mature consideration that would make me feel authorised to state a position so as to hold myself entirely bound by it.....I must say, however, that if I should be of opinion that Congress does possess the constitutional power to abolish the Slave Trade among the different States, I should not be in favour of the exercise of that power unless upon some conservative principle, as I conceive it, akin to what I have said in relation to the abolition of slavery in the district of Columbia."

Hearing this, some of our English politicians will be tempted not only to wonder at the dismay of the South, but to ask where is the gain to the Anti-Slavery cause in the election of so very moderate and cautious a Republican.

But, in truth, the gain is incalculable. Whatever compromises Mr Lincoln may concede to the South with respect to the limits and the right use of the Congressional or Presidential power, he stands irrevocably pledged to the principle that slavery is *wrong*, and that the national power, so far as it can be fairly used at all, must be used to limit, to repress, to promote its extinction. These are his words :—"I think we want and must have a national policy in regard to the institution of slavery, that acknowledges and deals with that institution as being wrong. Whoever desires the prevention of the spread of slavery and the nationalisation of that institution, yields all, when he yields to any policy that either recognises slavery as being right, or as being an indifferent thing. Nothing will make you successful but setting up a policy which shall treat the thing as being wrong. When I say this, I do not mean to say that the General Government is charged with the duty of redressing or preventing all the wrongs in the world ; but I do think that it is charged with preventing and redressing all wrongs which are wrong to itself. This Government is expressly charged with the duty of providing for the general welfare. We believe that the spreading out and perpetuity of the institution of slavery impairs the general welfare. We believe—nay, we know, that that is the only thing that has ever threatened the perpetuity of the Union itself. The only thing which has ever menaced the destruction of the Government under which we live, is this very thing. To repress this thing, we think, is providing for the general welfare." And he stands explicitly pledged to exterminate, so far as he can do so, the external Slave Trade,—and on the coast of Cuba a co-operation of English and American cruisers will effect this. He stands pledged to abolish slavery in Colombia (the district round Washington) under the conditions we have shown. He stands pledged to oppose and prohibit, so far as he can, the introduction of slavery into the Territories. And though he has refused to pledge himself to resist the admission of new Slave States, his whole influence will be exerted to give the free party in such States ample means for the fair expression of their wishes on the subject.

Yet, on the whole, no doubt the great importance of the election is less in its immediate results than in showing that the tide of public opinion is turning against slavery in the States. We must remember what this means. It is far more significant than the expression of conviction which an English election gives. The most bitter opponent of pure democracy,—and none regard its evils in a graver light than ourselves,—must admit that when the least enlightened, the *worst* opinion of a nation, at last after a long hesitation, declares against a national crime, the victory is more complete than it would be where the best intelligence and culture of a nation declares against it. The more absolutely we are convinced that universal suffrage in America drowns the voice of the best educated and most refined classes in the North, the better satisfied must we be to learn from the elections there that the public opinion is turning against slavery. It shows that the dread and opposition to it has become general at a social level which might remain comparatively unaffected in England, in spite of a perfect unanimity amongst the electoral classes here. The strength of a chain is tested by its least reliable links,—and the least reliable links of the social chain in the Northern States have proved to us that they are strong enough now to resist the bribes and menaces of the Southern party.

THE CLEAR POINTS IN THE NEW ZEALAND *CASUS BELLI.*

The New Zealand statesmen have fairly frightened English editors by the mass of their published evidence with regard to the origin of the Maori war. The English politicians here who represent the Bishop of New Zealand's party found their argument mainly on their own perplexity. 'Can it have been right,' they say, 'to declare war on a 'question so intricate that an Englishman gets lost in the 'maze?' Even those, on the other hand, who incline to support the New Zealand Government and to justify the war, declare that they cannot see their way through the particular dispute, and profess themselves obliged to found their argument on the broader ground of the false relations that have arisen between the settlers and the Maoris, and the necessity for a more rational system of dealing with them.

The question, however, is too important to settle in this summary manner. If the ecclesiastical party in New Zealand are right in asserting that the war has originated in a clear and gross injustice, the Home Government ought to send out not only troops amply sufficient to restore order, but a preremptory recall to the present Governor by whose authority the war has been declared. The result would of course be a change of Government in New Zealand, and a temporary triumph to the ecclesiastical party. We say that this ought to be done if it be true that the policy of the Governor has been either unjust or reckless. We in England are *bound* to study the question at issue sufficiently carefully to resolve this doubt. Politicians here cannot with any decency thrust off the responsibility of weighing a question on which the character of Great Britain for equity and mercy undoubtedly

depends. It is one of the gravest responsibilities of a constitutional system in a great empire, that those who form and guide public opinion should wade through much tedious evidence in the interests of justice. If public opinion is in any useful way to check our administration, it must be willing to follow the history of many a political crisis which is too much encumbered with novel difficulties to be, on the surface, attractive.

The salient points of the New Zealand war are by no means so intricate as they are often represented. After a very careful study of many of the voluminous documents before us, we can at least present some certain conclusions which seem to us to clear the policy of the ablest Colonial Government we have almost ever had from the charges brought against it. It has been the great misfortune of that Government that it has been served by most incapable military subordinates,—and we have much reason from the evidence before us to fear that General Pratt is but little if any improvement on Colonel Gold. We believe that had the military leaders been competent to their task, the policy of the Government would have been not only strictly just, but eminently merciful to the natives. The disastrous military result must not be allowed to measure the merits of the civil policy.

We proceed then to lay before our readers such points as we deem clearly established concerning the origin of this war. They will, we think, justify the Colonial Government of New Zealand in the course which it has pursued.

In the first place, the pretended conspiracy, the special seeking after a particular and long-coveted piece of land, which has been imputed to the New Zealand Government by its ecclesiastical adversaries there, and by one of our own contemporaries here, seems to be without the slightest foundation. It has been intimated that the Governor went to Taranaki with his eye upon a particular piece of valuable land, long desired by the settlers there, and which he was determined to attain for them; that for this purpose he held a meeting explaining to the natives the wish of the Government to buy any land which the native proprietors were willing to sell, in case they could make a good title to it and not otherwise; that one proprietor of the coveted block was in attendance, and eager to make an offer of sale which was as eagerly accepted; that no scrupulous examination into the claims of others ever took place at all; and that, in short, the whole proceedings of the Governor were *aimed* at this one purchase, and conducted on a previous understanding with the native vendor. Now this is certainly not true. It is established with absolute certainty, by the debates in the House of Representatives in New Zealand, that the Governor was pursuing no new course at Taranaki,—that he had previously announced exactly the same policy with regard to a sale of land at Auckland,—that he did no more in this case than in that,—that the Prime Minister was absolutely ignorant of the intention of any native to offer land for sale at Taranaki,—that scarcely two or three Europeans were aware of it even in the colony; in short, that the special offer in question was quite an unpremeditated *result* of the Governor's general land policy, and was not an *arrière pensée* in his mind at the time he announced that policy in Taranaki. This, which vitally affects the moral colour and *good faith* of the Governor in the matter, is put beyond all doubt by the evidence which is transmitted and the debates in the New Zealand Assembly.

Next, it is put beyond all doubt that the purchase of the land in question was effected by the same officers, the same methods of inquiry, on the same principles, and with even greater care, than previous purchases of blocks of land in the same neighbourhood. The Waitara block, now in dispute, was bought after precisely the same kind of investigation as the Bell block, of the purchase of which the Bishop expressed his formal approval in a pastoral letter to his churches at New Plymouth in 1855. Yet on this block also the rebel chief Wiremu Kingi made some claim, demanding a money compensation, which, as he could make out no title, was disallowed,—with the consent apparently of the ecclesiastical critics of the Government, since this purchase had the Bishop's full approval. The title to the land now in dispute, though exactly of the same kind, and investigated with even greater care, is condemned by the same parties not merely as inadequately made out in detail, but as resting on the authority of officers of the Crown, instead of on the decision of an independent Court. That the Government has long been anxious to establish a Court expressly for investigating native land questions, has been known ever since 1858. The difficulties in the way are not of its making. But why should the jurisdiction of officers which was quite satisfactory five years ago, be suddenly disputed as wholly unjust now?

Thirdly, it is certain that not only all the occupying tenants of the land in question, but many others beside, have been made parties to the sale. The land is for the most part quite uncultivated, in many parts of it "the thistles standing so "thick that a horseman cannot pass,"—and no title is set up to it by *any one living upon it* which has not been satisfied. Many of the emigrant Ngatiawa in Queen Charlotte's Sound, at Wellington, and elsewhere, have also been consulted, and their agreement to the sale obtained. The challenge to all claimants was printed, eight or nine months previous to the sale, in the native paper the *Maori Messenger*, and the claims of all claimants carefully examined, and this by the very officers who have hitherto been regarded as fast friends to the natives,—and who have effected the purchase of from 20,000,000 to 25,000,000 of acres in New Zealand, with no important subsequent dispute.

Fourthly, in spite of Archdeacon Hadfield's assertion to the contrary in his recent pamphlet, it becomes abundantly evident that W. Kingi has never asserted, and does not now assert, any individual proprietary right to the land in question. No one can read Archdeacon Hadfield's cross-examination before the New Zealand House of Assembly, nor the letters put in from W. Kingi to himself in which such a claim was said to be made, without being fully satisfied of this. No personal claim is anywhere made. A *tribal* claim is apparently asserted, but nothing more. Such a tribal claim had never been pressed in the previous purchases of the Bell block and other blocks of land. The Land Commissioner went over the land in the first instance with a brother of W. Kingi's, and heard from him the statement of the different claims to the land. And, according to the express statement of the brother of the present rebel leader, his own claims were chiefly North of the Waitara river, and not in the present block. At all events, sixty acres of land were excluded from this purchase on the express ground that Kingi had some doubtful claims to it, and even Archdeacon Hadfield admits that he cannot say how far Kingi's claim was or was not limited to these sixty acres.

Fifthly, Archdeacon Hadfield's assertion that only ten or twelve natives with any valid claim to the land had agreed to the sale, while perhaps 90 or 100 others with valid claims had not agreed to it at all, is not supported by a particle of evidence. There may, no doubt, be more than that number of emigrant natives willing to make a claim, if they thought they could get any good by it. But this is all. It is clear from his cross-examination that Archdeacon Hadfield is supremely ignorant on all the local details of the question,—that natives who knew him to be friendly to Kingi and opposed to the British Government had assured him that there were that number of claimants, that they themselves were claimants, and so forth. But such declarations from absentee natives who only vaguely assert that some of their ancestors had lived there, and had thus transmitted them a right, goes for very little. From the evidence of the Chief Land Commissioner, it is clear that native land-claims to distant waste lands are the vaguest things in the world. Mr Maclean mentions one case in which a native told him that he thought he had a claim to some of the disputed land, and asked him to investigate it for him. He did so, and the Maori was disappointed to find how trivial it was. The only value that these absentee claims really have is derived from the desire of the English to purchase. Otherwise they would never be remembered at all. There is absolutely no evidence to show that the recent purchase was made with any less care or justice than any other purchase on the New Zealand soil.

Lastly, it is demonstrated that the real opposition made by W. Kingi was grounded on his general dislike to the encroachments of the English. A letter from him to the Governor, dated 11th February, 1859, distinctly lays down the boundaries beyond which he will not *permit* the English to buy land. There is no question of title in this letter; it is a question of the limits of the English settlement. After tracing the division line through a long list of places, he proceeds:—"The

"boundaries of the land which is for ourselves is at Mokau. "These lands will not be given by us into the Governor's "and your hands, lest we resemble the sea-birds which perch "upon a rock; when the tide flows, the rock is covered by "the sea, and the birds take flight, for they have no resting "place." This letter makes perfectly clear the true ground of W. Kingi's opposition. And we must say that, after an anxious examination of Archdeacon Hadfield's position, we do not believe that it is substantiated by any one tangible fact.

Agriculture.

LAND; FACILITY OF TRANSFER.

It has ever been a subject of wonder that the owners of land in England should be the chief opponents of every measure proposed for the emancipation of land from the feudal trammels by which it is encumbered. Indeed, with the exception of the lawyers, the attornies more especially, the landowners may be said to be the only opponents of improvement in the law of real property. Indirectly the whole community suffers from the barbarous state of our real property law, but the most direct sufferers are the landowners. If the title to land was simple, and its transfer easy, the value of all landed property would be prodigiously increased. To a certain extent the obscurity of the subject has prevented the owners of land from fully appreciating the evils incident to the existing system, and has alarmed them at the prospect of changes they do not quite comprehend. The attornies form an active body of opponents to legal improvement, and every landowner is more or less influenced in his opinions on the subject by the suggestions of his attorney. These gentlemen are notoriously astute in raising doubts and difficulties on questions of title—so much so indeed, that their objections are not unfrequently found quite untenable when submitted to the more instructed conveyancer, or if they come for decision before the equity judges. Complex and absurd as our system of conveyancing is, its difficulties are usually most unmanageable whilst in the hands of that branch of the legal profession which on matters connected with landed property come most in contact with the landowners. Signs are not wanting, however, that landed proprietors are emancipating themselves, and are beginning to see their own strong interest in the cheap and easy transfer of land. At an agricultural meeting lately held in North Lincolnshire, Sir M. Cholmeley, after commenting on various rural matters, said:—"There was one subject relating to the interest of agriculture which he thought the general body of agriculturists would be sufficiently alive to. It was with regard to the Bill introduced by Sir H. Cairns, the Solicitor-General in Lord Derby's Government, and continued this year by the Attorney-General, which in his opinion would be a great boon to the agriculturists; it was the simplification of the titles to land. He thought that no question was of greater importance to the yeomen and farmers than this, for when it was a policy or necessity of landlords to sell their farms the tenants were often the bidders, and frequently became the purchasers. It was therefore of great importance to them that there should not only be a simplification of the title, but also a diminution of the expenses of the transfer. He recently bought a considerable property in the neighbourhood, and also about 40 acres in the South of Lincolnshire, and the cost of the law expenses in the transfer was nearly as much in the one as in the other, although in the former case the purchase was to the extent of 1,100 acres. It had always been said that they were so aristocratic that they did not wish their land to fall into the possession of tenant-farmers. Such was not the case, for they were only too happy to see tenant-farmers become landed proprietors, because it gave them a greater interest in the welfare of the State." This, though just and sound enough, was a limited view of the subject. It is quite true that the cost of conveyance and the investigation of title to land falls far more heavily on the larger than the smaller properties, because the difficulties of title arise from circumstances altogether unconnected with the magnitude of the transaction. Every title must in strictness be traced for 60 years or upwards, and in that period as many dealings with the property may occur with respect to a small property as a large one, and as each transaction forms a step or item in the title which has to be investigated, questioned, and vouched for after long periods of time have elapsed, the chances of blots—real, technical, or imaginary—may easily be conceived. Nay, the titles to small properties often passing through less skilful hands, and the transactions being less able to bear expense, serious defects are, perhaps, more frequently found in the titles to the smaller estates than in those of the larger. The main questions arising on titles are occasioned by the feudal and barbarous character of our law of real property, and the system of settlements and entails which unhappily for the owners of land that law permits. Great as are the merits of Sir Richard Bethell's and Sir Hugh Cairns' measures for simplifying titles to land, they necessarily partake more of the character of palliatives than of complete remedies. A complete remedy must some day be sought in a thorough revision of the law of real property and its adaptation to the wants and the intelligence of the present age.

"Whether farmers would avail themselves of opportunities to purchase farms so generally as Sir M. Cholmeley appears to suppose may be a question, though doubtless in many cases the more wealthy members of the class would do so. It must be remembered, however, that farmers are traders, or rather manufacturers, seeking to make a living by the employment of their capital and their personal exertions, not persons living on revenue derived from land, and therefore it is generally more advantageous to rent land and employ the whole of their capital in its cultivation, than to sink so large a portion in purchasing farms as would be necessary to enable them to carry on businesses of any considerable extent. It would be better for the farmer that his farm should be purchased by some person who desires to derive a permanent income from it, and who is both able and willing to make such outlays in permanent improvements as will justify the farmer in giving a high rent. The man of business, or the man of moderate fortune of which part only consists of land, is usually the best landlord a farmer can have, and it is into such hands that land would more frequently go, if there were greater facilities for its purchase and sale.

This subject was the other day also recommended to the attention of an agricultural meeting at Maidstone, by Mr Charles Buxton, the member for that town, who said,—"Most, if not all present, probably knew by experience what an immense amount of money was obliged to be expended, what a dreary waste of time was necessitated, in order to convey a piece of land from A to B. If Smith wanted to sell Jones a house, a ship, or 20,000*l* in stock, the transaction could be effected in a few minutes; but the purchase of half an acre of meadow land was an arduous, expensive, tedious enterprise, not to be undertaken without much forethought and consideration.....The effect of this was not only to render the sale of land a very slow and costly operation, but to prevent its changing hands at all except in large masses, so that in England more than in any other country the acquisition of land was a luxury confined to the capitalist class. He believed that was a serious grievance, and that any measure which made the sale of land easy and cheap would enhance the well-being of England. It was an evil to every class in the community, and especially to the landowners themselves, for it had been shown that if landed property could be transferred with greater facility, its increased value in the market would be equivalent to three years' more purchase." He then referred to the measure of Sir Hugh Cairns as one calculated to effect a great improvement. We hope and believe that a measure of at least equal efficacy will be passed in the next session through the exertions of the Attorney-General, Sir Richard Bethell.

LOOKING FORWARD.—THE ALMANACKS.

The farmer having no grateful recollections of the year now rapidly passing away, may turn with more hopeful expectation to 1861 which is approaching. Amongst the signs of a coming new year are the two farmers' almanacks upon our table, viz., "Johnson and Shaws' Farmer's Almanack," and "Morton's New Farmers' Almannck." Both these works contain many and various subjects connected with the business of husbandry, and the every-day affairs of the farmer's life. The general monthly notices on farming matters and the Kitchen Gardener's Calendar are very useful portions of the contents of the "Farmer's Almanack"; while the agricultural history of 1860 which we find in the "New Farmer's Almanack" is an addition at once useful and interesting. There is also a very concise yet comprehensive calendar of farm operations.

Literature.

COMMERCIAL LITERATURE.

The Cotton Trade of Great Britain: its Rise, Progress, and Present Extent. By James A. Mann, F.S.S., M.R.A.S. London: Simpkin, Marshall, and Co. Manchester: Joseph Thomson and Son.

The object of the author of this important work is to furnish the merchant, manufacturer, political economist, and historian, with the statistics bearing on the Cotton Trade of Great Britain in a concise and comprehensive form, and this he has done by means of statistical tables, which have every appearance of reliability and authenticity, and are most certainly compiled and arranged with great care, and also by an historical account, which he divides into three chapters, the contents of which may be thus defined:—

No. 1 traces the ancient history of the cotton manufacture; its introduction and progress in India, China, Africa, America, and Europe; its tardy development in Great Britain; the mechanical inventions of Wyatt, Paul, Kay, Hargreaves, Arkwright, Crompton, and Watt; their causes and effects; and the progress of the trade to the close of the eighteenth century.

Book, No. 2, treats of the progress of economy in the manufacture, with a view of the actual effects thereby produced on the trade; glances at the present expense or cost of the several departments of manufacture as compared with that under the old and rude systems; traces the progress of the trade during the present century and the effect it has produced on places and people; and exhibits its present extent and greatness.

Book, No. 3, is almost devoted to the question of supply of the raw material, giving a review of the more prominent facts in regard to supply from the United States, East Indies, Brazil, Africa, West Indies, &c., with a summary of the extent of the home and export trade of Great Britain.

More than one thousand years before the Christian era we certainly read in the Bible of linen being manufactured in Egypt, but we believe that before that date the manufacture of cottons was known in India, for in one of the hymns of the Rigveda reference is made to "cotton in the looms" in India. Muslins we know take their name from Mosul in Mesopotamia. Those manufactured by the natives of Dacca are of that fineness of texture that a single pound of cotton was spun into a length of 250 miles. It remained for Messrs Houldsworth, of Manchester, to spin a yarn from a pound of cotton nearly 400 miles in length. One word more as to the antiquity of the cotton manufacture and we have done. Herodotus, writing in the fifth century n. c., speaking of the usages of India, says "the wild trees bear fleeces for their fruit, surpassing those of the sheep in beauty and excellence, and the natives clothe themselves in cloths made therefrom." We think we have said enough to prove that the manufacture of cotton is an ancient institution, and by no means so upstart in growth as some imagine when they sneer at cotton lords. We must now leave all those who wish to trace the growth of this mighty manufacture to consult Mr Mann's account of it from the time when Edward the 3rd, in 1328, invited some Flemings to emigrate to this country, and who, in settling at Manchester, laid the basis of the British woollen manufacture in the manufacture of what were then called "*Manchester cottons*," up to the last two centuries, when the imports of cotton have increased from 1,976,359 lbs in 1697, to 1,225,989,072 lbs in 1859.

In 1738 commences the history of those wonderful inventions which, giving the power of almost unlimited production to our people, have revolutionised the manufacturing world. The distaff had been laid aside for the spinning wheel—the spinning wheel for a machine for *spinning by rollers*, which forms the basis of all the spinning machinery in our present stupendous factories. In 1743, Mr John Kay, of Bury, invented the *fly shuttle and picking peg*, which enabled one man unaided to weave double the quantity he had hitherto done. Next followed Mr Earnest Earnshaw in 1753, who, it is said, invented the *spinning machine and cotton reel*, which he destroyed, on the plea that it would be the ruin of the working classes. In 1758 a second patent was taken out by Lewis Paul for the improvement in the *carding process*, which formed the basis of the great improvement made and patented afterwards by Arkwright, by which the carding or roving was made continuous. The period thus embraced from 1738 to 1760 might be called the transition state of the cotton trade. Legislative enactments endeavoured to foster the home trade by levying a duty of 4d per lb on cotton yarn imported from India, but with this "protection" the total value of cotton manufactures was only about 200,000*l*. In 1762 the art of dyeing "Turkey red" was discovered. The art of printing calicoes was introduced in 1675, and in 1764 was first practised in Lancashire, but it was not until the year 1764 that James Hargreaves discovered the *spinning jenny*. In 1769, Mr, afterwards Sir Richard Arkwright, patented the *spinning or water frame*. Mr Peel, the father of the late Sir Robert Peel, was one of the first to adopt it. In 1779, Samuel Crompton, of Bolton, invented the admirable machine which, combining Hargreaves and Arkwright's inventions, came to be known by the name of the *mule jenny*, and which was so universally adopted as to supersede the spinning jenny and to be employed to a far greater extent than the water frame.

But let it not be supposed that all these vast discoveries for the economising both human labour and the cost of production went on without the most violent opposition on the part of those who thought machinery would supersede human labour altogether. Mobs rose and destroyed the machines and jennies which Hargreaves and others had supplied to spinners and weavers. Arkwright's mill near Chorley was destroyed in the presence of a large sympathising police and military force. Mr Peel (Sir Robert's father) had his machines at Oldham thrown into the river! This was in 1779. Now this mighty manufacture employs directly 1,500,000 people, and indirectly gives employment to ten times that number, to say nothing of those whom it clothes. But still the cotton trade progressed. In 1782 an Act was passed with the view of protecting it, by prohibiting the exportation of engraved copper plates, and to punish the enticement of any workman employed in printing calicoes to go beyond the seas, under a penalty of 500*l* or twelve months' imprisonment, and these penalties were in several cases enforced. In 1783, Arkwright's machinery for spinning, assisted by the atmospheric engine, was first used at Manchester; and in the same year bounties were given on the export of British printed and dyed calicoes. What should we think in these days of allowing—

Under the value of	5d	per yard before printing,	¼d per yard
Over 5d and under	6d	— —	½d per yard
Over 6d —	8d	— —	1½d per yard

besides the drawback of Excise duty.

In order to show the immense effect that the introduction of machinery had on our trade, we have only to refer to Mr Mann's table No. 1, and it will be seen that whereas the importations of cotton of the first 50 years of the century (1700 to 1800) only increased 50 per cent., in the later half its increase was equal to 1782 per cent., or nearly 36 times as great. From 1771 to 1780, before Arkwright's patent was thrown open, the increase was 71¾ per cent.; from 1781 to 1790, when Arkwright's patent was thrown open in 1785, it was 319½ per cent.

But let us trace the effects of machinery on the cost of production. In 1780, Crompton received 42s per lb for his No. 86 yarn, which was equal to about 60s for No. 100's, which at that period it was impossible to spin in this country. The prices received for those same 100's in 1800 was 9s 5d, or about one-sixth of the value of 1780—and in 1859, 2s 4d. The following table will, however, illustrate this more clearly:—

Count.	Cost of Spinning, &c.	Raw Material, 18 ounces.	Total Market Value.
	1779.		
	s d	s d	s d
40	14 0	3 3	20 9
60	25 0	3 3	34 0
80	42 0	3 3	54 3
	1859.		
40	0 6	0 7	1 1
60	0 8½	0 8	1 4½
80	0 11	0 10	1 9

But if machinery has had this marvellous effect in lowering the cost of the manufactured article, what shall we say of the effect which demand has had in stimulating the production of the raw material?

In 1782 a panic was produced in Manchester, in consequence of 7,102 bags, or about 1,400,000 lbs, having been imported between December and April: the price then was 31d per lb. America had not then commenced supplying us with cotton. The price fell in 1790 to 17d per lb, but rose again in 1799 to 37d per lb, and in 1800 it was 29d per lb; in 1859, 6¼d for United States Uplands, and 4¾d for East India Surats.

According to table 1, the quantity of cotton—

Years.	Imported. lbs	Consumed. lbs	Exported. lbs
1781	5,198,778	5,101,990	96,788
1859	1,225,989,072	976,600,000	175,143,136

It will be remarked, that whereas in 1781 the amount of cotton consumed and exported tallies exactly with the amount imported in 1859 the quantity imported exceeds that consumed and exported by 74,245,936 lbs. Mr Mann appends a note stating that all the figures in this table (No. 1) are from official sources except the quantity consumed since 1845, in which year the duty was finally repealed, and consequently no official record has since been kept: the figures given in the table are furnished by Messrs George Holt and Co., of Liverpool, and are those adopted by the trade. In referring to table No. 8, which shows the annual stocks of each year beyond the quantity exported and consumed, we find on hand on the 31st December, 1858—

	lbs.
In the ports	153,255,760
In dealers' and spinners' hands	37,800,000
	191,055,760
Add excess of imports 1859	74,245,936
	265,301,696

whereas Table No. 8 gives on 31st December, 1859,

	lbs.
In the ports	192,500,000
In dealers' and spinners' hands	37,757,000
	230,257,000

There certainly seems a discrepancy in the amount that ought to be on hand on the 31st December, 1859, of 35,044,696 lbs, but when we consider that the amount of cotton imported in 1859 amounted to 1,225,989,072 lbs, the discrepancy hardly amounts to 3 per cent., and very possibly is explained away by the note Mr Mann appends to his table to which we have referred. We mention this apparent discrepancy not as a matter of consequence, but in order to be able to speak with unqualified praise the accuracy of the tables which Mr Mann appends to his valuable work. It is a work which, apart from its statistical value, will be read with unfeigned interest by all those who wish to trace step by step the progress that has been made in the production, cultivation, and manufacture, of this mighty plant, this clothier of mankind.

GENERAL LITERATURE.

The Imperial Atlas of Modern Geography: an Extensive Series of Maps, Embracing the Most Recent Discoveries, and the Latest Political Divisions in all Parts of the World. Compiled and Engraved from the Most Authentic Sources, under the Supervision of W. G. Blackie, Ph.D., F.R.G.S., Editor of the "Imperial Gazetteer." London: Blackie and Son, Warwick square, E.C.; Glasgow and Edinburgh. 1860. Parts 16 to 36, concluding the Work.

This is the concluding portion of a very beautiful Atlas, of which we reviewed the earlier numbers several months ago. The size is convenient, and the engraving exquisitely clear, with judiciously varied type. The value of the work is much enhanced by an Alphabetical Index, which purports to contain every place in every map, with its latitude and longitude, and the number of the map in which it is to be found. The Editor states in his preface

that "special prominence is given in this work to Great Britain and her colonies, which occupy no less than nineteen sheets, being about a fourth of the whole Atlas. The maps of the Isthmus of Caucasus, Arabia, and Independent Tartary, are new features, as are likewise some of those of the seas and oceans, and the series of maps devoted to illustrating the Islands of the Indian Archipelago, a region rich in almost every description of useful product, whose importance is becoming daily more and more recognised." We may remark that more than one branch of study is facilitated by the large scale on which the Indian, Pacific, and Atlantic Islands are here delineated. The peculiar forms assumed by the mountain ranges are often very striking, as for instance in the Island of Tahiti, which looks like two circles joined together, each containing a central point from which the mountains radiate to the sea.

The Editor lays great stress on having aimed to make this Atlas "fully abreast of the present advanced state of geographical information," but there are several details in which he can scarcely be held to have made good his claim. The map of New Zealand, for instance, is full of defects. Although each of the two chief islands has, since 1853, been divided into several provinces (possessing separate local legislatures), no hint of the fact is given in this map, except that the name of Canterbury is printed across the eastern part of the Canterbury Province (that part which formed the original "Canterbury Settlement). Again, the little river which runs through Christchurch, the capital of Canterbury, is here called the "Shakspeare," although that name was exchanged in the earliest days of the colony for the "Avon," under which name it appears in two maps in our possession. Dr Blackie, however, appears to be still less acquainted with the Heathcote, a river which is met by the Avon just before flowing into the sea, and which, being a much larger river, and only two miles distant from Christchurch at one point, is of more importance to the colonists, as it brings up heavy goods to the capital in vessels too large for the navigation of the Avon. Now the Heathcote river is set down in the map before us without any name at all, and being half hidden by the name of Christchurch, can scarcely be seen without a microscope. Indeed, the scale of this map ought to have been very much larger. It is considerably less than the scale on which the Sandwich Islands and Port Natal are given,—places of far less interest to the English public. Very many names are consequently omitted for want of room, which are well known both in public and private. Among the omissions is that of Napier, the capital town of Hawke's Bay Province, but perhaps it was not built when this map was designed, which (from a note on the same sheet relative to the interior of New Guinea) appears to have been in 1856. The same reason, however, will not account for the omission of the fact that Mount Tongariro is a volcano, and one of quite recent activity.

In the maps of Africa, we cannot of course expect to have the very latest corrections, seeing that every year brings us fresh information. It may be as well to remark, however, that the large lake in South Africa, here marked at its northern extremity as Lake Taganyika, and at its southern end as Lake Maravi or Nyanja, is now known to be, not one, but *two* lakes, the northernmost of which really bears the name here given to it, while the name of the southern lake is *Nyassa*,—Lake Nyanza (as Captain Burton spells the name) being the name of a *third* lake to the north of Lake Taganyika. Great confusion has hitherto prevailed concerning the relative names and positions of these lakes, a confusion from which Livingstone himself was not exempt; but all readers who wish to have clear ideas on the subject may be referred to Captain Burton's recently-published "Lake Regions of Central Africa," on whose authority we have here spoken.

Another objection we have to make is that no regular system is followed in the delineation of mountains. In the American maps, the heights of the chief mountains are given, and the volcanoes are usually distinguished by the added "V." But the heights of the Alpine peaks are never stated, not even in the case of Mont Blanc, and Etna and Vesuvius are not marked as volcanoes, either in the map or the Index. In the map of the Indian Archipelago, the excellent plan is adopted of colouring with red the active volcanoes; but why Europe and America are not similarly treated, does not appear. Why, too, we would ask, are the Cordillera de Anahuac and the Sierra de la Madre, in the map of Mexico, shorn of their names? Why is the noble peak of the ever-burning Orizaba, "the Mountain of the Star," not only deprived of the characteristic "V.," but set down as Mount Citaltepetl? Why is Uxmal the only site of Central American ruins which is indicated as such? the well-known names of Copan (here spelt Capan), Palenque, and Ocosingo (here spelt as Ocacingo) being left undistinguished, and the Pyramids of Cholula unnamed? (All these antiquities were marked in the maps published by the Society for the Diffusion of Useful Knowledge, about twenty years ago.)

In the maps of Italy, we find, of course, no trace of the recently-changed political boundaries, the delineation of which may well be suspended for the present. But we may remark in passing, that we never before heard that the Italian name of Florence was *Florenze*.

In conclusion, we should remark that we have spoken only of such details as we have closely examined, and shall be glad if the investigations of other critics show that the proportion of errors in these beautiful maps is small in comparison with the wide ground over which they range.

OVER THE CLIFFS. By CHARLOTTE CHANTER, Author of "Ferny Combes." In Two Vols. London: Smith and Elder. 1860.

It is not often that one family contains three novelists of genuine merit, but such is certainly the case with the vigorous stock of the Kingsleys. The author of "Westward Ho!" still remains the representative type of the race; but his brother and sister, though of lesser range and brilliancy of genius, are, in their own spheres, quite as real as he. Mrs Chanter is already favourably known by her pleasant little hand-book of the "Ferny Combes" of Devonshire, and in the tale before us she still treads the old familiar ground. One might say, in German phraseology, that the beauty of Devonshire was "wrought into the consciousness" of the Kingsleys, so frequently and so vividly do they delineate the varied fascinations of its scenery, and the fresh, stirring life of its inhabitants. The chief centres of the present tale are a lonely old country house, named Harscourt, on the North coast, and the inland town of "Torford," on the river Tor. The author has mostly avoided giving the names of real places; whether to avoid poaching on the ground of "Westward Ho," or to obtain a license in geographical matters not compatible with strict accuracy, is best known to herself. But the speciality of the descriptions, at once picturesque and minute, leave but little doubt that most of the localities are real, and that every foot of ground described is well known to the writer.

The action of the story turns upon the practice of smuggling, and its deteriorating influences on the habits and characters of those concerned in it. There is no very clear skeleton of plot,—artistic construction is not a Kingsley characteristic. The book may be said to consist of the lives and adventures of the Dawsons and Mountjoys, with occasional episodes about their friends and enemies. The heroine, Gratiana or Grace Dawson, familiarly called "Tye," is a well-conceived and well-delineated character. With a brutal father and a weak brother, her home is destitute of all hopeful or refining influences, and her only sunshine is derived from her playmate, Edward Mountjoy, and his mother. Of course she partakes in all the boyish sports of her brother and Edward—riding, fishing, and scrambling "over the cliffs"; but the native pride and grace of her character preserve her from any taint of the hoyden, and she gradually develops into a loveable specimen of womanhood. Reginald Dawson, her unstable and self-indulgent brother, is equally well drawn; Edward Mountjoy, though a pleasing sketch, is less clearly worked out. Lily Fowler, Reginald's first love, is decidedly a failure. There has been quite an over-supply of Lilys and Lilians in the novels of the last few years, and we are getting rather tired of them. The race first came in with Tennyson's "Airy, fairy Lilian," who is undoubtedly the "typical form" underlying them all, though modified variously according to the taste of each separate writer. The Lillian of "Alton Locke" was a nearer approach than any we have seen to the original character suggested by Tennyson's poem. Mrs Chanter's Lily, on the contrary, is tender-hearted,—"the spirit-child, the spirit-woman"; but does not impress us as being drawn from life. Perhaps a character of the sort here intended could only be drawn successfully by such rare and exceptional geniuses as those who gave us Ariel and Mignon. In less gifted hands, the "spirit-woman" is apt to sink into a piece of mere generalised sentimentality.

We should have liked to present some of the stirring scenes of adventure, but they are too long for extract. We therefore select the following, the opening scene of the story, as a specimen of the author's style. Perhaps, in the adventures of Gratiana and her companions, she has retraced some of the wanderings of her own childhood, by the rocks and waves of her favourite Devonshire* :—

"Let us go home over the cliff, Edward; the tide is rising fast." The speaker was a girl about ten years old, tall for her age, and slender, with light brown hair, bleached from exposure and neglect, streaming over her shoulders. Her eyes were hazel-coloured, with long black lashes, and her complexion, naturally dark, was rendered many shades darker by the sun. Her small, well-formed bare feet, as they pressed the short turf, were the fairest thing about her. She was dressed in a coarse sort of smock frock, of no particular fashion, and a hood with a deep cape hanging down to her waist. She had two companions—lads—one three or four years older than herself, a sturdy, handsome fellow, the other much about her own age, and greatly resembling her.

"Oh, Tye!" exclaimed the younger boy, "the cliff is so much farther round, and the hill is so steep, and I'm so tired, let us go the shorter way, by the beach;" and seating himself on the turf, he laid a string of speckled trout beside him. "If you go by the beach," said the elder lad, "you must come at once. Put on your shoes, Tye, and make haste. If you are quick we may manage it, but the waves run high." In a few moments they were sliding down a low part of the cliff, over which the stream they had been rifling fell splashing into a deep pool on the beach. The slide was composed of large round pebbles, no very easy walking for those weary little feet. But the girl kept up steadily by the side of her elder companion, in spite of many a stumble. Presently they came to where the cliff rises into a precipice, and vast blocks of stone jutting out into

* For the convenience of intending readers, we add the following result of a careful textual criticism. Chap. 32 properly ends on the 9th line of p. 296 (vol. 2), and the paragraphs which follow (pp. 296-8) ought to be inserted at the close of the concluding chapter of the tale, immediately before the final paragraph there given.

the sea seem to prevent all further progress; but the children knew the coast well, and climbed like goats. See! now they stand all three on a great rock, pause, and look where next to spring. The eldest springs first, and calls to the girl to follow. She is over, her arms round the boy to steady herself. They totter for a moment, then regain their footing, and she slides off the rock to make room for Regie. Another spring, another totter, and they are over that danger in a little cove, where, instead of rough stones and rugged rocks, small white pebbles form their path. However smooth the path, there is no time for loitering. "We must run; we shall thus gain a few moments," said Edward, "and moments are of importance to us; the tide is higher than I thought." They run as well as they are able, and now they reach another barrier, higher and more jagged than the first. They climb, they scramble, keeping as near the cliff as they can, for the tide is close upon them.

"The Blower!" muttered Edward, if the tide is in it, we are in danger." The younger boy caught the word: "The Blower, Edward! oh, let us go back" "Impossible!" was the reply. "We could not pass the Foot now. Courage! steady! be as quick as you can; we must leap the Blower!" "We have leaped it before, you know, Edward," said the girl. "Yes," thought Edward; "but not in such a tide as this." They stood at the edge of the dreaded Blower, which is formed by several gigantic masses of rock thrown together. Under one of these, the sea forces its way; it is not above three or four feet across, and about eight feet deep, and may easily be crossed at low tide; but it is a different thing when the sea, boiling and surging in the narrow channel, renders the head giddy and the foot unsteady. Edward leaned over; the water was gurgling at the bottom. "We have time!" he cried, "quick!"—but as he spoke there came a booming and hissing, and a volume of water rushed up through the aperture, drenching them in a moment. "Jump between the waves!" he cried, and suiting the action to the word, in a moment he was over. "Come Regie," and he held out his hands: the boy jumped clear and was safe. "Now, Tye, quick!" The child was over-tired, she paused, she trembled, she let the favourable moment pass, and then she jumped—jumped short, and was in the Blower. The wave receded: Tye stood supported by a small ledge of rock, clutching a projecting angle with both hands. She could not hope to buffet many waves—certain destruction seemed to await her. "She must be saved, she shall be saved!" cried the frantic boy. But only the helpless children heard him, and the sea-birds started from their nests at his cries.

Poor Tye! the seconds were like years to her! All the little incidents of her short life rose up before her, and in a moment she thought how sorry Edward and Regie would be, and how they would miss her. A wave came: fortunately for her, not a strong one; but as it was, she only retained her hold by creeping closer between two of the rocks, while the water nearly suffocated her: as the wave went back, Edward was at her side. "Put your foot on my hand, and spring." The child obeyed, and in a few seconds she was on the top of the rock; but her deliverer was still in the Blower. "Lie down, Regie, and put your hands over the rock, with the backs downwards;" and Tye called on Edward to hook his hands in theirs. The ready wit of the girl saved the life of her friend; a violent wave at that moment burst through the Blower, and Edward was lifted by its force on a level with the rock. "Pull towards you, Regie,—pull hard!" And in spite of that dreadful surf, in a moment Edward was by their side.

THE ART-JOURNAL. November, 1860. Arthur Hall, Virtue, and Co.

IT is well known to all who have studied the fine collection of Turner now in the possession of the country, that that artist, before yielding himself up to the style which is peculiarly his own, trained his brush by the assiduous imitation of many great masters in very varied schools of painting. The success which attended his efforts in so many dissimilar styles is, perhaps, a unique instance in the history of art. Stimulated by the admiration that Wilkie's "Village Politicians" excited, Turner painted in 1807 the "Country Blacksmith," an engraving of which is in the Art-Journal before us. The picture is devoid of the delicate finish and the numerous little touches of humour that Wilkie would have given in treating the subject, but it is full of character and life, and stands high as a *genre* picture. The other steel engravings in the present number give us "Killarney; the Lower Lake," by Mr Anthony, a picture in the Royal collection at Osborne, and J. Durham's group of "Paul and Virginia." The latter subject is very simply and gracefully treated, though the head and countenance of Virginia are rather too massive and heavy. The chapter entitled "Rome, and her Works of Art," is peculiarly worthy of notice as containing remarkably delicate engravings of some of Raffaelle's best works. The "Hudson River" and "South Wales" pursue the even tenor of their way, and a few interesting illustrations are copied in a notice of Mr Atkinson's work, "Travels in the Regions of the Upper and Lower Amoor." A small engraving of the statue of Luther from Rietschel's monument at Munich speaks well as to the grand and imposing qualities of that work.

A WIFE TO ORDER. By FREDERICK GERSTAECKER, Author of "The Two Convicts," &c. Translated by EDMUND ROUTLEDGE. London: Routledge. 1860.

THIS is a story of life in Batavia, written by one who seems to be well acquainted with its various features. To our taste it is tedious and disagreeable, the main action consisting of the adventures of fast young merchants, with groups of miserable and degraded natives in the background. Nearly the only respectable individuals in the book are two German couples, who change lovers with a facility which, happily, does not find much favour on this side of the German Ocean. We cannot recommend "A Wife to Order."

Foreign Correspondence

(FROM OUR CORRESPONDENT.)

PARIS, Thursday.

Contrary to general expectation, the directors of the Bank of France did not on Thursday last augment the rate of discount. It was, however, not without a great deal of hesitation, and after, I believe, holding two meetings, that they came to that resolution; and most probably they would not have adopted it at all if the Government had not exercised pressure on them. Since then the matter has been under daily consideration, and at the weekly meeting held to-day it was fully discussed; but the previous resolution was adhered to. In keeping the discount at 4½ per cent. when that at London is at 6, the Bank of France of course acts in violation of sound rule and of the teachings of experience. But it is not at liberty to comport itself according to rule when the convenience of the Government lies the other way, for it is, though a private concern, a Government instrument; and the Government fears that an increase of interest would give such a check to commerce as to cause a sort of crisis, and that it is most anxious to avoid. Perhaps, however, the very step it has taken may contribute greatly to bring on the evil it wishes to prevent. In the meantime, one of the directors of the Bank of France, M. Mallet, has gone to London to endeavour to negotiate with the Bank of England for an exchange of 50,000,000f silver for the same sum in gold. Whether he will succeed or not, you will know better than we do here; the belief is that he will, and if so the Bank of France will be relieved for a time, for it is gold that it wants, its stock of silver being large.

The Bourse has been a good deal agitated during the week, but it closes higher to-day than last Thursday. The shares of the Bank of France have in particular undergone great fluctuations: on Thursday last they were 2,905f; on Friday they rose to 2,935f; on Saturday to 2,950f; and on Monday to 2,980f; but on Tuesday they came down to 2,945f; yesterday they remained at the same figure, and to-day they have fallen to 2,910f. This is 5f more than last Thursday, and 70f less than last Monday. What "reasonable reason" the Bourse had for sending them up so high, under present circumstances it would be difficult to state. The following are the general quotations of the week:—

	Thursday, Nov. 15. f	c	Thursday, Nov. 22. f	c

The shipping interest has been thrown into considerable agitation by the statement that negotiations are now going on between the English and French Governments for the purpose of effecting a thorough revision of, that is a large reduction in, the differential duties in favour of French shipping. The Chambers of Commerce of Bordeaux and Nantes have addressed long and earnest remonstrances to the Government on this subject; and it is expected that the Chambers of Havre and Marseilles will follow their example. As the matter is of considerable importance, I give an analysis of the Bordeaux and Nantes documents.

The Bordeaux Chamber, after a few preliminary observations, says:—

No one can allege that our merchant shipping is able to struggle even on equal terms against that of England. The most decisive experience to that effect has long since been obtained.

In support of this sweeping assertion, it says:—

When the treaty of 1826 was concluded, a treaty by which the same treatment was accorded to the English as to the French flag in direct intercourse, the share of our shipping in the direct navigation was 56 per cent. But this situation has greatly changed since. Under the *regime* of assimilation, out of a total of 2,491,465 tons, to which in 1858 the navigation between France and England, Gibraltar and the Ionian Islands (entries and clearings) amounted, French shipping figured for 703,183 tons and English for 1,716,282, that is to say, we had a little more than 29 per cent. and the English nearly 71.

The Chamber then asks :—

May we not fear that if this competition, now limited to direct commerce, were to be extended to indirect commerce, much graver and perhaps mortal consequences to our merchant shipping would ensue ?

It next goes on to explain why French shipping is inferior to English. In the first place, ships in France, it says, cannot be built so cheaply as in England,—timber, iron, sheet iron, copper, hemp, and anchors being dearer : iron in particular is so, and that is a great disadvantage, seeing that the tendency is to construct vesse's entirely of that material, or to employ it more extensively in wooden ones than heretofore. In the second place :—

A host of regulations weigh on French shipping from which that of England is exempt. The number and the composition of our crews is imposed on us. A vessel which might be navigated by a smaller number of men is obliged to carry the number fixed by the regulations. Exigency in this matter has been carried to such an extent that we have been obliged to employ an extra cabin-boy for every ten men. When a vessel, in returning to France, enters a different port to that from which she sailed, her owner must carry back her crew to that place, or pay the expenses of their journey. He is not allowed, as the English are, so to fix the wages of his seamen as to emancipate himself from this charge. Lastly, frequent levies of sailors are made for the service of the Government, and by them the shipowner is at certain moments deprived of the sailors he requires, and this obliges him to pay wages all the more excessive, from the fact that the law of the 2d of December, 1792, requires that the captain, the officers, and three-fourths of the crew, shall be French.

The Chamber admits that many of the preceding evils may be removed, and it expresses a hope that the Government will endeavour to get rid of them. But it says that there is a still graver one which the Government cannot touch :—

That evil is the want of exports as freight for our vessels. In addition to the productions of their manufactures with which they supply all the markets of the globe, the English possess coal which they transport everywhere, for it is everywhere necessary. Assured of a freight to carry to every destination, they have only to occupy themselves with seeking a return freight; and that freight, even when taken at a moderate rate, gives them for the whole voyage a sufficient remuneration.

We are very far from enjoying the same advantage. Our vessels on leaving have only wines as the bulk of their cargoes. Wines are not in all countries objects of large consumption, and they can consequently only be imported into them in small quantities. Our vessels have consequently to remain a long time in our ports awaiting their complete freight in articles of our manufacture, or in agricultural productions which are less demanded than wines. These delays occasion expenses of all kinds: wear and tear of vessels at anchor, interest on capital, assurances, wages of the crews, &c. Often to avoid these expenses vessels leave with half cargoes, and sometimes even in ballast. Arrived at their destination they find themselves in presence of English vessels with which they cannot dispute the freight which may be offered for any other country than France; for their competitors content themselves with a price which is much lower than that which is necessary to them to compensate the deficit in their out-going freight. It is only by the differential duties which strike direct importations under foreign flags, that our vessels slowly succeed in obtaining cargoes and in effecting their return to France.

It results from these difficulties and embarrassments that in the same space of time our vessels only make two voyages where the English make three. Let people judge of the difference which this fact creates between the position of English and French shipowners.

The Chamber mentions yet another cause of inferiority for the French :—the English have vast colonies, and their vessels convey to them great numbers of emigrants and passengers, native and foreign. As regards Australia for example, their vessels take out passengers as well as merchandise, and bring back wool at a cheap rate; but French vessels take no passengers to Australia, and no other merchandise than wines and brandies, and to return they only get small quantities of wool. One consequence of all this, says the Chamber, is that French shipowners cannot think of employing large vessels; those of 500 or 600 tons at the outside alone suit them; but this causes a large increase in general and other expenses.

In conclusion, the Chamber, after some observations as to the importance of merchant shipping in a national point of view, admits that the differential duties require revision, they being in some cases 100 per cent., and in others only 30 or 40. It offers, if required, to lend its aid in effecting such a revision, but it repeats that French shipping cannot compete with the English on equal terms; it says that the Treaty of Commerce has established *reciprocity*, but not *equality*, between the two countries, and that as in that treaty England admitted that her manufactures are so superior to those of France, that she could receive the latter without any duty and allow her own to be taxed 25 or 30 per cent. in France, so "in a treaty of navigation she ought to accept a similar principle; that is to say, confine herself to asking that the differential duties in France shall cease to be prohibitive of her navigation in order to become moderately protective of French shipping in the proportion of its inferiority to that of England." The Chamber adds a complaint that in certain English ports duties are levied on French vessels from which the vessels of those ports are exempt; the consequence of which is to subject the former to a great disadvantage, and even to violate the treaty of 1826.

The Chamber of Commerce of Nantes, in its address, begins by making an important admission :—

The Chamber does not disguise from itself that in its present situation, when all branches of manufactures have seen the protective duties they enjoyed lowered in a proportion more or less considerable, the complete and absolute maintenance of the *statu quo* solely in favour of shipping would be illogical.

It even adds that such maintenance might be dangerous, inasmuch as England, repenting of making concessions without getting any return, might make reprisals which would be prejudicial to French shipping. Nevertheless, it says, there must be protection.

The protection to our flag may be restricted within reasonable limits, *but it must be maintained*. That is the principle which the Chamber does not hesitate to proclaim as essential to the prosperity and even to the existence of our merchant shipping. Our shipping is, in fact, of all branches of industry, that which can least be abandoned to the free competition of its rivals, principally those of England.

The Chamber then goes on to enumerate the causes of the inferiority of the French shipping to the English. What it says on these points is naturally the same in substance as what was urged by the Bordeaux Chamber. But it describes as the "first and principal" cause of inferiority, the absence of sufficient out-going freights. It admits, however, that French vessels get coal in England which serve as such freights, but that this subjects them to heavy expenses for assurance, wages, pilotage, commission, &c., also to loss of time and risks, all which it says cannot be estimated at less than 30f a ton; and it cries "it is with this heavy charge that we have to enter into competition with our rivals, who are not only more favoured than we are, but find their freights at home." As a proof that French shipping is dearer than the English, the Chamber alleges, among other things, that in Canada the English can get vessels constructed 30 or 40 per cent. cheaper than they can be made in France. It admits that the Treaty of Commerce will diminish the price of iron used in shipbuilding, but then it says, it must not be forgotten that French vessels at present afloat were constructed of materials which paid the old duties. Another point of inferiority—not noticed by the Bordeaux Chamber—is that the French have none of those "establishments of credit" which the Dutch, and particularly the English possess in the principal markets of India and China.

The Chamber of Nantes, then, insists that the shipping interest must have protection; and as to the amount thereof it says :—

The maximum protection to French manufactures stipulated in the Treaty of Commerce with England of the 23rd January is 30 per cent. We do not think that we have the right to demand more for shipping, but we think that any less protection would be insufficient.

In the analyses which precede, your readers have the case of the French shipping interest. They will doubtless think that the removal of the Governmental restrictions and impositions of which that interest complains would be fair and just; but that its representations about the dearness of building ships, the difficulty of procuring freights, the impossibility of competing with the English, &c., &c., are of no more value than the arguments by which other branches of commercial enterprise in France endeavour to prove that they are entitled to protection.

An Imperial decree just issued allows the importation into Corsica of stockfish on the same terms as into France, and the export of fire-wood, timber, and certain descriptions of bark also on the same terms as from the Continent.

A serious misprint in my last letter requires correction : the subvention proposed to be allowed to the Transatlantic Steam Navigation affair, taken up by the Compagnie Generale Maritime under the auspices of the Credit Mobilier, is 9,000,000f, not, as printed, 29,000,000f.

The Customs returns brought out to-day show that the import duties for the month of October last were 10,278,000f; whilst in the corresponding month of last year they were 15,429,577f, and in that of the year before 12,952,112f: for the first three months of the present year they were 110,873,000f; same period last year 157,680,174f; and same period of 1858, 154,737,688f. The decline is no doubt large, but it is owing to the abolition and reductions of duties effected in the past year. In the *quantities* of goods imported, however, there is not only no falling off but a large increase; and this proves that the reforms have perfectly succeeded. In my next I will give the customary details of the goods imported, and also of those exported. Want of space prevents me from doing so to-day.

Subjoined is the market report :—

FLOUR.—The quotations at *Paris*, yesterday, were 61f to 64f the sack of 159 kilogs; they were lower than those of the preceding week, but were firm. Of four marks, disposable was 61f 50c, and the current month 61f to 61f 25c; for December, for which some large sales were made, 60f 25c, and some 60f 50c; for March and April, 60f 75c and 61f were given.

WHEAT.—At *Paris*, yesterday, the offers were not large, and the quotations varied from 34f 50c to 37f and 37f 50c the sack of 120 kilogrammes, according to quality. Of the provincial markets, 30 present a rise from 10c to 1f, 72c the hectolitre, 65 a fall of from 14c to 2f, 40 have undergone no change, and 16 are reported firm.

COTTON.—Business at *Havre*, in the week ending Friday, was less active than in the two preceding weeks, the sales having been not more than 9,149 bales. Prices fell 2f to 3f for very low qualities, 3f to 4f for low, and 2f to 3f for very ordinary and other qualities. Low New Orleans was consequently 90f the 50 kilogs, and very ordinary ditto, 98f The arrivals of the week were only 692 bales. This week, business has been dull, and yesterday low New Orleans was 90f.

COFFEE.—At *Havre*, in the week ending Friday, business was not very animated. 221 sacks Hayti Port-au-Prince disposable went at 79f the

50 kilogs in bond; 100 ditto Cape, 82f; 75 ditto Gonaives, 84f; 145 sacks Rio not washed disposable, 77f; 1,400 ditto for delivery, 75f to 77f; 294 sacks Rio washed disposable, 83f to 92f. Some lots of damaged Ceylon were also sold by auction. The arrivals exceeded 6,000 sacks. This week, various lots Hayti have been sold at 78f to 79f; Gonaives, 84f; Santos, 75f. At *Bordeaux*, last week, 250 sacks Mysore went at 112f 50c; a small lot of Santiago at prices kept secret; and 100 sacks Guayra at established rates. Some large lots of damaged Mysore and Salem were also sold. This week, nothing has been done. At *Nantes*, last week, no business was transacted, and the same has been the case this week. At *Marseilles*, last week, 5,800 sacks Rio went at 70f to 78f. As the vast quantity of 70,000 bales Rio are expected to arrive in this port before the end of January, a fall in prices is considered probable.

SUGAR.—At *Havre*, in the week ending Friday, transactions were limited. 161 casks French West India went at 50f 50c the 50 kilogrammes. Nothing was done in foreign sorts. The arrivals were unimportant. This week, some small large lots of French West India have been sold at 50f 50c, and one of "usine" at 53f; some damaged Havana has also been disposed of. At *Bordeaux*, last week, 950 casks French West India went at 49f 50c to 50f. Nothing was done in foreign. No sales have been made this week. At *Nantes*, last week, 437 casks French West India went at 49f; 2,672 sacks Mayotte, 45f 25c; 126 sacks Reunion, from a wreck, 50f. Nothing done this week.

INDIGO.—At *Havre*, in the week ending Friday, the business was languishing;—only 15 cases Bengal having been sold at prices kept secret. The arrivals were 51 cases direct from Calcutta, and 27 from England and Rotterdam. This week, 10 cases Bengal have been sold at 10f the kilog. At *Bordeaux*, last week, 24 cases Bengal, 6 Kurpah, 12 Madras, 6 Caracca were sold. The quotation of Bengal was 12f 50c to 25f 50c the kilog; Kurpah, 10f 21c; Madras, 6f to 11f; Caracca, 14f to 18f. This week, only 2 cases Bengal have been sold—prices not stated.

HIDES.—At the great public sales which took place at *Havre* last week, out of 133,000 pieces offered, 54,250 were disposed of: Valparaiso, 46f to 72f 50c the 50 kilogs duty paid; Monte Video dry, 110f to 127f 50c; ditto salted, 57f to 119f; Rosario, 110f to 119f; Buenos Ayres salted, 59f 50c to 60f; ditto dry, 110f to 135f; Hayti drysalted, 71f to 79f; Irish salted, 48f to 50f 50c; Roi Grande salted, 74f 50c to 75f; Minas dry, 410f 50c to 111f; Pernambuco drysalted, 62f to 92f 50c; Martinique, 48f 50c to 55c 50f; New Orleans salted, 48f 56c; Guadeloupe salted, 50f; Entre Rios salted, 79f 50c; Rio Janeiro dry, damaged, 26f 50c to 57f; Texas salted, 48f; Lisbon drysalted, 65f to 70f. Among the skins, horse Buenos Ayres dry went at 6f 25c to 9f 50c each; Monte Video and Buenos Ayres salted, 62f to 99f the 100 kilogs; La Plata ditto, 97f 50c to 98f. These prices were generally lower than those which had previously prevailed. Apart from these sales, which were made for the Compagnie Generale Maritime, 1,838 Buenos Ayres dry went partly at 120f the 50 kilogs, partly at prices kept secret; 900 Minas dry, 115f; 3,000 Valparaiso salted, 70f ox, 65f cow; 1,500 Pernambuco drysalted, 94f; 734 ditto, prices kept secret; 3,600 Rio Janeiro salted, 62f 50c; and a small lot of damaged New Orleans. The arrivals were numerous, exceeding 20,000. This week, business has been active: Pernambuco drysalted, 74f to 90f; Monte Video salted, 80f; Buenos Ayres dry, 105f to 120f, ditto horse, 10f each.

WOOL.—At *Havre*, in the week ending Friday, 55 bales Chili unwashed went at 1f 27½c the kilog, and a lot of Portugal unwashed, 1f 80c. The arrivals exceeded 800 bales. No sales have been made this week.

TALLOW.—At *Havre*, in the week ending Friday, no sales were made, and the arrivals were unimportant. Nothing done this week. At *Paris*, yesterday, the 100 kilogs were 149f 20c, a rise of 1f on last week's prices.

SPIRITS.—At *Paris*, yesterday, 3-6 of 90 deg. was 98f, the hectolitre; Montpellier of 86 deg., 140f. At *Bordeaux*, 3-6 Languedoc was 135f; and beetroot, first quality, 110f.

COMMERCIAL AND MISCELLANEOUS NEWS.

Statement of the clearances of the principal articles from Calcutta for Great Britain, from the 7th to the 17th October, 1860, inclusive, compared with the corresponding period in 1859:—

A letter from Bombay by the present mail says:—Our import market continues very dull, the trade being still but partially opened. Our export market for cotton has become more brisk, owing to the news received by the mail, with a further tendency to rise in prices: we now quote Dholleral at rupees 112 to 115; Broach, rupees 118 to 120; and Oomrawuttee, rupees 100. A slight decline has taken place in freights: for London, 2*l* 7*s* 6*d*; and Liverpool, 2*l* 5*s*; and China, rupees 20 per candy. The money market is very easy.

We take the following from a review of the hog crop in the *Cincinnati Gazette* of October 30th:—"The failure of the corn crop in the South must diminish largely the production of hogs in that section, and there will consequently be a heavier demand than usual in those States for the hog products of the West. At the outside, the Southern States, including Kentucky, have not this year more than half an average crop of corn, although the yield has proved better than was expected at the close of harvest; but it is to be remembered that the Southern States, with the exception of Kentucky and Missouri, have never packed hogs to any great extent, at least not recently, though they have furnished a considerable number for home consumption—the latter, however, never appearing in the crop reports. The following table shows the number of hogs packed in the several States last season:—Ohio, 689,858; Indiana, 404,046; Illinois, 504,935; Kentucky, 322,487; Missouri, 190,260; Iowa, 166,936; Wisconsin, 54,500; Tennessee, 26,800; total, 2,350,822. The only States in which any falling off can be claimed as a consequence of the failure of the corn crop are Kentucky, Missouri, and Tennessee. In the other States the crop of corn is very large. It is not expected, we believe, that there will be any falling off in the number of hogs in the States where corn is plenty and cheap, while an increase in weight of ten per cent. is admitted, We then have 1,811,275 hogs, on which an increase in weight of ten per cent. is conceded. The increase is equal to 181,000 head, making the total for the five Northern States, in round numbers, 1,992,000. Deduct this from last year's total crop, and there is a deficit of 358,547 to be made up in Kentucky, Missouri, and Tennessee. These States packed 539,547 head last year. Allowing a falling off on this number of 33 per cent., which is a liberal estimate, there would be a deficit of 178,771 against the increase in weight in the North of equal to 181,127.

The production of gold in British Columbia is just now of some little importance. The following is the latest return of the shipments to San Francisco from the discovery of the British Columbian mines in 1858:—

	dols.
1858.

The following report shows the state of the Albany lumber market during the week ending Nov. 7:—Lumber comes in slowly from all quarters, the high freights being almost prohibitory, except on the shorter routes. Hemlock and spruce are received daily, and are taken up as fast as they arrive. The sales for the week have been fair only, the political excitement keeping dealers at home till after the election. Shipments have been large, employing all the craft coming to this port. The stock on hand of most kinds is good, and dealers are selling at the ruling prices of last month. The Chemung Canal is again navigable, and a small addition to the supply from there may still be expected. The receipts by the Erie and Champlain Canals, during the fourth week in October, in the years named were as follows:—

	Boards and Scantling, ft.	Shingles. M.	Timber. C. ft.	Staves. lbs.
1858	9677430	1141	4100	5171430
1859	10146000	857	... .	1510000
1860	9731000	307	... .	7546600

The receipts for the week exhibit a slight falling off compared with the same period of last season. The receipts of boards and scantling for the first five days in November sum up 3,638,000 feet.

The somewhat less favourable European advices, combined with the recurrence of the Presidential election, has produced a dull market for this staple, and transactions have therefore been on a limited scale, amounting, in the aggregate, to 3,500 bales, of which a small portion was in transitu, the market closing quiet. We re-insert our previous quotations, but remark that they are somewhat nominal. We quote:—

NEW YORK CLASSIFICATION.

	Upland.	Florida.	Mobile.	New Orleans and Texas.
	c	c	c	c
Ordinary	8	8	8	8¼
Good ordinary	9	9	9¼	9¾
Middling	11⅛	11⅛	11⅜	12⅛
Good middling	12⅜	12¾	13	13½
Middling fair	12⅞	13	13½	14

The arrivals have been from Texas, 1,271 bales; New Orleans, 1,349; Florida, 970; Georgia, 3,652; South Carolina, 2,189; North Carolina, 471; Virginia, 74—total, 9,947 bales. Total import since 1st inst., 17,787 bales. Total import since 1st September, 88,360 bales. Export from Jan. 1 to Oct. 31, 1860, 160,155 bales, against 191,951 in 1859. Export from Nov. 1 to 6, 5,444 bales, against 2,496 in 1859.

NEW YORK, Nov. 10.—The general features of the cotton market remain about the same as at the date of our last, though holders having submitted to the reduction demanded by purchasers, have been enabled to effect sales to a fair extent, amounting in the aggregate to 7,000 bales.

The cotton market has been again depressed this week. The business has been small, and the greater part has been at irregular prices, and in favour of the buyers. Yesterday, however, there was some reaction, and considerable sales were made at much steadier rates, and not much below our last week's quotations. We have, however, slightly reduced some of these for American. Egyptian and Brazil are nominally without change, but little business has been done in them. East India are slightly lower during the week. The sales to-day are 10,000 bales. Market closing firm. The reported export amounts to 4,120 bales, consisting of 1,230 American, 240 Brazil, and 2,650 East India.

MARKETS IN THE MANUFACTURING DISTRICTS.

The demand for goods in the manufacturing markets held this week has fallen off, and, in some instances, prices have had an drooping tendency. The stocks have rather accumulated, owing to the present high range in the value of money in the discount market. Wool has changed hands slowly, but we have no alteration to notice in its value. On the whole, the iron trade is healthy, at about previous rates. Coals have continued in demand, at very full prices.

MANCHESTER, Nov. 22.—Business has this week been extremely limited, though generally at the reduction reported at the end of last week. To-day there has been rather a better feeling, arising chiefly from less distrust of the money market, and partly from the anticipations held out in yesterday's mail from Calcutta that some material modification of the Indian tariff is contemplated. Otherwise, advices from the East have still been on the whole unsatisfactory. The home trade houses, this being as usual their dullest season, are much occupied in taking stock, and accordingly are not buyers. Yarns have generally been lower, in sympathy with cotton.

BRADFORD.—There is a more cheerful feeling in the demand for wool, and what buyers there are find prices exceedingly firm. There is but a quiet market for yarns. Things are, however, certainly not worse than last week. The business doing in the merchants' warehouses is below an average of former years for Bradford-made goods. Fancy manufacturers are becoming better employed. We hear of a few considerable American orders, but the German buyers operate very sparingly.

BIRMINGHAM.—The trade of this town continues steady, and is not, upon the whole, in an unsatisfactory state. There is a regular flow of orders on account of the country trade, and as these are given out by the factors as rapidly as they are received, the manufacturers are enabled to keep their men at work average time, though the actual number of orders on the books is small, except in the case of the largest establishments.

LEEDS.—The cloth halls have had a moderate attendance of buyers, and in seasonable goods a fair amount of small purchases was made.

ROCHDALE.—The flannel trade has been a little more animated, still there has not been a great deal of business done. The demand is confined almost entirely to seasonable articles, and fancy flannels are greatly in request. Yorkshire goods, unless it be linseys, meet with fair sale. Prices in general are well maintained. Wool is very firm in price, but purchases are made only to supply immediate wants.

HALIFAX.—The worsted trade of this district has shown some signs of improvement, and the tone of business is more cheerful. The demand for yarns for the home market has been more lively, and spinners are better employed. In the piece department also there have been more inquiries, and it is said that the trade with the East has rather revived by the Chinese intelligence. In wool there has been a tolerably large business done, at very firm rates.

HUDDERSFIELD.—Our market is still very quiet. Stocks are still on the increase, but there is very little disposition on the part of the manufacturers generally to give way in prices to any extent.

LEICESTER.—Many branches of the hosiery trade are quiet, but the tone of business generally is healthy, and, although the demand for goods is by no means active, there is confidence in the market. At Loughborough, Hinckley, and other country districts, there is not much change to notice. Wools are firm, and continue high in price. Yarns also are stiff.

NOTTINGHAM.—The foreign buyers who are in the lace market are not purchasing in large quantities, and the trade generally is in a very dull and unsatisfactory state. The Americans are operating only sparingly, and the home trade is extremely flat. There is not much change to report in the hosiery trade.

BELFAST.—The improved aspect of the foreign markets has given more animation to general business; and, with firmness of value and the existence of only light stocks, prospects are favourable for the finished goods department. In the home trade, a more active inquiry has been experienced; this, however, chiefly in the lines well known as the principal sources whence consumers draw their supplies. Sanguine bleachers look forward to a considerable increase in the demand for goods by continental houses at the opening of the new year. Buyers have been taking stocks of linens in the brown state with more prudence, and the quantities of cloth left unsold at the close of each day's market have been comparatively small. The immense consumption of prime warps now going on at the steam-loom factories has kept down stocks so much, in particular counts, that spinners of such yarns look for higher prices; and in most cases these have been obtained.

WOLVERHAMPTON.—The official list of prices of Staffordshire finished iron is as follows:—Common Staffordshire bars, 7*l* 10s, at the works; best bars, 8*l* 10s; sheets, 9*l*; doubles, 10*l* 10s; nail sheets, 8*l* 10s; latten, 12*l*; boiler plates, 9*l*; best and best best in proportion; common rods, 7*l* 10s; hoops, 8*l* 10s; gas strip, 8*l*; Canada plates, 12*l*; and all other sorts in proportion. Welch bars, 5*l* 7s 6d to 5*l* 10s. The nominal price of rails in Wales is 5*l* 10s.

TO READERS AND CORRESPONDENTS.

Communications must be authenticated by the name of the writer.

THE SON OF AN OLD SUBSCRIBER cannot do better than get Mr Nassau Senior's Introduction to Political Economy, reprinted from the Encyclopædia Metropolitana, price three and sixpence, and published (we believe) by J. W. Parker, West Strand.

We believe that the project has been abandoned.

The Bankers' Gazette.

BANK RETURNS AND MONEY MARKET.

BANK OF ENGLAND.

(From the GAZETTE.)

AN ACCOUNT, pursuant to the Act 7th and 8th Victoria, cap. 32, for the week ending on Wednesday, the 21st day of November, 1860.

ISSUE DEPARTMENT.

	£		£
Notes issued	27,010,995	Government Debt	11,015,100
		Other Securities	3,459,900
		Gold Coin and Bullion	12,535,995
		Silver Bullion	...
	27,010,995		27,010,995

BANKING DEPARTMENT.

	£		£
Proprietors' Capital	14,553,000	Government Securities (including Dead Weight Annuity)	9,490,273
Rest	3,205,625	Other Securities	20,298,016
Public Deposits, including Exchequer, Savings Banks, Commissioners of National Debt, and Dividend Accounts	6,073,597	Notes	6,613,480
Other Deposits	12,665,022	Gold and Silver Coin	821,136
Seven Day and other Bills	725,661		
	37,222,905		37,222,905

Dated the 22nd November, 1860. W. MILLER, Deputy Cashier.

THE OLD FORM.

The above Bank accounts would, if made out in the old form, present the following result:—

Liabilities.	£	Assets.	£
Circulation (including Bank post bills)	21,123,176	Securities	29,710,289
Public Deposits	6,073,597	Coin and Bullion	13,357,131
Private Deposits	12,665,022		
	39,861,795		43,067,420

The balance of Assets above Liabilities being 3,025,625*l*, as stated in the above account under the head REST.

FRIDAY NIGHT.

The preceding accounts, compared with those of last week, exhibit—

A DECREASE of Circulation of	£314,891
An INCREASE of Public Deposits of	269,575
An INCREASE of Other Deposits of	61,230
No change in the amount of Government Securities.	
A DECREASE of Other Securities of	12,499
An INCREASE of Bullion of	42,320
An INCREASE of Rest of	13,907
An INCREASE of Reserve of	304,075

The present Bank returns are the most favourable that have been presented for some time past. The circulation has decreased 314,891*l*. For the first time for some weeks past the bullion shows an increase, although only of 42,320*l*, and there is also an increase in the reserve of notes 304,075*l*. Altogether the position of the Bank is strengthened.

Subjoined is our usual weekly table, affording a comparative view of the Bank returns, the Bank rate of discount, the price of Consols, the price of wheat, and the leading exchanges, during a period of four years, corresponding with the present date, as well as ten years back, viz., in 1850:—

At corresponding dates with the present week	1850.	1857.	1858.	1859.	1860.
Circulation, including bank post bills	£ 19,877,074	£ 22,156 143	£ 21,188,667	£ 21,980,731	£ 21,123,176
Public deposits	9,040,581	5,788,998	7,671,799	8,062,071	6,073,597
Other deposits	3,558,819	14,951,516	12,820,861	13,662,550	12,665,022
Government securities	14,228,901	5,807 447	10,808,591	10,925,157	9,490,273
Other securities	11,719 370	31,850,717	15,323,774	19 058,503	20,298,016
Reserve of notes & coin	11,618,673	2,398,367	12,896,580	10,295,709	7,434,616
Coin and bullion	16,220,443	7,263,672	13,780,330	16,985,664	13,357,131

Price of Consols	96⅞	90	96⅞	96⅝	93¾
Average price of wheat	39s 11d	51s 3d	41s 2d	43s 1d	38s 1d
Exchange on Paris (shrt)	25 0 7½	25 40 50	25 7½ 15	25 10 15	25 15 22½
— Amsterdam ditto	11 14½ ½	11 13 19	11 14 15	11 13½ 13½	11 14½ 15½
— Hamburg (3months)	13 6 7	13 14	13 7 7½	13 4½ 5	13 6½ 7¼

In 1850, the stock of bullion in the Bank of England kept increasing, notwithstanding the exchanges were adverse. This evidently arose from the desire manifested by some countries on the Continent to get rid of their gold, in consequence of the Californian discoveries.

In 1857, the prominent features were the panic at Hamburg and the failure of numerous German houses here, as well as of the Northumberland and Durham District Bank; but, although the rapid increase in the "other" securities in the Bank of England denoted a continued panic-rush for money, the relodgment of the proceeds as other deposits had at last led to an increase in the Bank's reserve. The notes and coin in the Banking Department represented a total of 2,398,367*l*, so that the over-issue of 2,000,000*l* was virtually covered. The drain of gold to the United States had subsided. In India, the King of Delhi had been brought to trial. The first reinforcements of troops from home had reached Calcutta.

In 1858, the prosecution of M. Montalembert was watched with great interest. The prospectus of a Chilian 4½ per Cent. Loan of 1,554,800*l* at 92 had just been issued.

In 1859, the final instalment of the Indian Loan of 5,000,000*l* had been paid; French funds were 70.20, precisely the price they are now; and English funds were 96⅜, or 3 per cent. above the present price.

The amount of the "other" deposits, as compared with the "other" securities, showed, in 1850, a deficiency of 2,160,551*l*; in 1857, a deficiency of 16,399,201*l*; in 1858, a deficiency of 2,502,913*l*; and in 1859, a deficiency of 5,395,953*l*. In 1860, the deficiency is 7,632,994*l*.

The past week has been one of more than usual interest. At one period the withdrawal of gold on the part of the Bank of France seemed about to assume alarming proportions, when it was announced that an arrangement had been made between the Bank of France and the Bank of England for the exchange of 2,000,000*l* of gold for 2,000,000*l* of silver.

The effect of this measure was to give immediate ease to the money market, and to cause long-dated paper, for which 6½ to 7 per cent. was charged last week, to be eagerly sought after at 6 per cent., and paper of short date to be taken at from 5 to 5¼ per cent.

We noticed last week that, notwithstanding money had been in great demand at high rates, there had throughout been a most abundant supply, and that abundant supply still exists; but the great question of the drain of bullion still continues to occupy men's minds, and, although all agree that the exchange of 2,000,000*l* of gold for 2,000,000*l* of silver was an admirable measure as far as it went, still the question remains—Will the drain that has been going on for so long a period both from France and England be arrested?

As there seems some doubt as to the amount of silver the Bank of England can hold, we quote the clause of the Act:—

Clause III. And whereas it is necessary to limit the amount of silver bullion on which it shall be lawful for the Issue Department of the Bank of *England* to issue Bank of *England* notes, be it therefore enacted, that it shall not be lawful for the Bank of *England* to retain in the Issue Department of the said Bank at any one time an amount of silver bullion exceeding *one-fourth part* of the gold coin and bullion at such time held in the Bank of England in the Issue Department.

It is easy to understand why the Bank of France wishes to retain the silver in her possession—viz, because it is at a premium of 15f to 16f per mille, and of course if the Bank of France were to make payments in silver, a general run to obtain it for the sake of the premium would take place.

The advices received from America this morning state that a very heavy fall has taken place in all descriptions of securities; and also that the exchanges on England and France are falling—say 107½ to 8. The excitement caused by the election of a Republican President is immense; and it is thought that the fall in the funds has been brought about for electioneering purposes. We mention this circumstance, as the low price might cause investments in American securities, which might still further unfavourably influence the exchanges against this country.

The discount market to-day presents a somewhat unsettled appearance. Singular to state, there has been a very fair demand for discount at the Bank of England at the Bank rate. In Lombard street the rate of discount is from 5 to 5½ per cent., and considerable transactions have taken place at both those rates. We also can state that six months' bills have been discounted at 5⅛. The rate of money on the Stock Exchange is 3 per cent. on Government securities, and very abundant. We may also state that money is very abundant at Paris, Brussels, and Amsterdam. The exchanges this afternoon are generally lower.

	Bank Rate. Per cent.	Open Market. Per cent.
Paris	4½	4
Hamburg	...	2¾
Vienna	5½	5¼
Brussels	3	3
St Petersburg	6½	for 3 months' paper
Ditto	7	for 6 months' paper

and in the open market from 8 to 9, which latter figure applies to bills from 9 to 12 months to run, which is very common in Russia.

ENGLISH FUNDS.—The public have certainly been investing in the English funds during the week, and large purchases have also been made on account of the Courts of Chancery and Bankruptcy, but the impetus given to Consols has chiefly arisen from the arrangement made between the Banks of France and England. Consols, which in the early part of the week were 93¼ ⅜, improved on that arrangement being made known to 93½ ⅝ for money, and 93⅝ ¾ for the account, at which prices they close this afternoon.

FOREIGN FUNDS.—The principal feature in foreign funds has been the rise in Turkish Bonds—the New Loan from 57 to 58¾ 9, the Old Loan from 72 to 73¼ ½.

The cause of this rise is that it is generally credited that M. Mirès and Co. have contracted a loan for 16,000,000*l* sterling at the price of 53¼. A portion of the 3,000,000*l* of Hazine Tavilis, which falls due in December, is to be received in payment. An absurd report is in circulation that this loan will be offered to the public at 60, or some say 65. We presume it is the French public who are to be thus favoured, for as Turkish Bonds are selling at from 58½ to 59—the dividends on which are secured on quite as good if not better security than the new bonds can possibly offer—it is not likely that the English public will subscribe for the New Loan at 60 or 65, which is stated to have been contracted for at 53¼, merely to put an enormous profit in the pockets of Messrs Mirès and Co.

We deprecate this loan as ruinous to Turkey, and, if we may judge from the state of public feeling here, it will be very difficult if not impossible to place it on the English market; and considering the drain of bullion that has been going on in France, we almost wonder that the French Government does not withhold its sanction to have it introduced on the Paris Bourse, as a loan of this magnitude must tend to augment a drain of bullion, which, if continued, may be attended with very serious results to France, who may find herself placed in precisely the same position as England was in 1825 when she advanced so freely to the South American States. French Rentes close 70.15. The market for other foreign securities is rather firmer.

Subjoined is our usual list of the highest and lowest prices of Consols every day, and the closing prices of the principal English and foreign stocks last Friday and this day:—

BULLION.—We subjoin Messrs Pixley, Abell, and Langley's circular, which gives an account of the bullion transactions of the week, and also those in India Government loan notes:—

Gold.—Since our last circular (15th instant) we have to report the arrival of the Sussex and Water Nymph, from Melbourne, bringing, together, 571,000*l*; and the La Plata, from the West Indies, with 61,000*l*. These amounts, although large, have not proved sufficient for the wants of the exporters; and about 90,000*l* in bar gold and sovereigns have been taken from the Bank. The withdrawals would probably have continued, in the absence of further Australian arrivals, but for an arrangement made between the Banks of England and France, whereby the former has agreed to lend the latter the sum of 2,000,000*l* in gold, a similar amount of silver being deposited with the Bank of England as security. There is at present no fixed time for the repayment of this loan. As regards the Bank of England, a clause of their charter empowers them to hold one quarter of their reserve of bullion in silver, should they deem it desirable. Considerable difference of opinion prevails as to the ultimate beneficial effect of the arrangements alluded to. The Anglesea, with 230,000*l* has now been out 72 days, and the Suffolk, with 293,500*l*, 56 days; both vessels are from Melbourne. The Seine has taken 1,320*l* to the West Indies, and the Pera 78,000*l* to the East—50*l* of which was for Malta.

Silver.—Our market continues very inactive. The bars per La Plata have been sold at 5s 1½d per ounce standard—a decline of ⅜d from the last fixed price. The arrivals have been 32,000*l* per La Plata, from the West Indies; 1,344*l* per Tagus, from Lisbon. 10,380*l* has been shipped per Seine for the West Indies.

Mexican Dollars.—There is nothing doing in Mexican dollars, and quotations are nominal, at 5s 2⅛d. The next arrival from Mexico may be expected about the 29th inst. The Borussia, from New York, has brought 5,000*l* in Mexican dollars.

Exchange on India remains the same as at date of our last. Bank drafts at sixty days' sight on Bombay and Calcutta are selling at 1s 11⅞d to 2s 0⅛d; bills with documents, 1s 11½d to 1s 11⅝d; Madras drafts at sixty days' sight (Bank), 1s 11⅞d to 2s.

India Government Loan Notes have improved the last few days, but transactions are on a very limited scale, and any slight demand or supply immediately affects the market. The rise may be considered equal to about 1 per cent., and we quote 5 per Cents. 95, and 5½ per Cents. 101.

Quotations for Bullion.—Gold—Bar gold, 77s 10d per oz std; bar gold, fine, 77s 10d per oz std; bar gold refinable, 78s 1½d per oz std. Silver—Bar silver, 5s 1½d per oz std; bar silver, containing 5 grs gold, 5s 1½d per oz std; fine cake silver, 5s 5⅝d per oz; Mexican dollars, 5s 2⅛d per oz; Spanish dollars (Carolus), 6s 2d per oz, last price.

FAILURES.—About 40,000*l* claims on the estates of Messrs Laurence, Mortimore, and Schrader have been proved. The dividend meeting is fixed for the 14th proximo.

A meeting of the creditors of Mr Charles Hallowell Carew, who failed some time since, has been held, to consider a proposal made for the payment of the creditors' claims. It was mentioned that in about two years the whole of the debts, 26,000*l*, are likely to be paid in full. It was proposed to insure Mr Carew's life for 22,500*l*, and from sums already in hand to pay 4s or 5s in the pound about February next, and further dividends as the assets are realised. All legal proceedings against Mr Carew are to cease for twelve months, upon satisfactory arrangements being carried out to effect the liquidation as proposed.

In the Bankruptcy Court there has been an examination sitting in the case of Mr George V. Jackson, described as a commission merchant of New Broad street, who has unsecured debts and liabilities to the amount of 18,092*l*, and whose case presents some peculiar features, including numerous transactions in accommodation bills.

A meeting has taken place of the creditors of Messrs J. and E. Williams, sugar agents, of Fenchurch street, who stopped payment on the 10th instant. The balance sheet presented by Messrs Theodore Jones and Co., accountants, estimates the liabilities at 42,281*l*, and the assets at 33,620*l*. The cause of the suspension was the failure of Messrs H. Holmaear and Co., sugar refiners, who owed 10,000*l* to this

estate. Some discussion took place with reference to certain goods *in transitu*, and to the probability of the assets being diminished in connection with them. The advisability of further information on this point was urged by several creditors. It was proposed on behalf of the firm to pay 15s in the pound, viz., 5s at one month, 5s at two months, 2s 6d at four months, and 2s 6d at six months, the last instalment to be secured. This offer was not agreed to, a committee of investigation being appointed, which will report to an adjourned meeting. The attendance was somewhat numerous, and comprised partners in some of the first firms in Mincing lane.

A dividend of about 6d in the pound is about to be declared in the Bankruptcy Court among the joint creditors of Messrs A. J. and H. Jacobs, glass merchants, of Finsbury and Australia, who failed in 1855, with liabilities to the amount of 17,109*l*. This estate, under inspection, has already yielded 5s 6d in the pound.

Assets to the amount of 1,000*l* will shortly be divided amongst the creditors to the amount of 30,000*l* of George Montagu Evans, solicitor, of Farnham, who absconded.

Mr Blackwell, of Dudley and Bilston, who lately failed, has expressed a desire to pay his creditors 20s in the pound, but the two largest claimants, the Birmingham Banking Company and the Northampton Banking Company, at a meeting held on Tuesday last, objected to this, as they thought that it would be more to the advantage of the creditors, and to Mr Blackwell himself, that he should attempt to pay only half that sum. On condition that a proposal to that effect should be made, the banks would consent to stand by while Mr Blackwell liquidated to this extent the claims that all the other creditors had upon him. Mr Blackwell's proposition, therefore, was to pay his creditors 10s in the pound in two years, in instalments of 1s 3d every three months. This composition being paid to the general creditors, then the banks were to take, *pro ratâ*, half Mr Blackwell's profits until their claims had also been met. Mr Blackwell himself then stated that this was the best proposition that he could make; but if he lived to liquidate the claims which the banks had upon him, he should feel a pleasure in making up to the general creditors the other 10s in the pound. Ultimately the proposition was adopted unanimously, and the gentlemen present agreed to assist Mr Blackwell to carry it out.

Miscellaneous.—The committee of the London shareholders of the Geelong and Melbourne Railway have issued a circular, announcing the repayment of the share capital, with all arrears of interest, on the 1st of December, and of the debentures due on the 1st of January next. Mr Cooke, the London agent of the Company, though his arrears of salary are not yet paid, has delivered over to the bankers the share registers of the Company and all documents in his possession, and has proffered his services to facilitate the distribution of the payments on account of the share capital and interest. The committee have appointed three trustees —the chairman (Mr Richard Potter), Lord Alfred Churchill, M.P., and Mr Robert Brooks, M.P.—to receive the contributions of shareholders and bondholders towards a fund for the purpose of paying the debt due to Mr Cooke, for his untiring energy, his determined stand in opposition to all attempts to damage the claim of the English proprietors against the Colonial Government, and for his unrequited and, of late, gratuitous services in bringing about this final settlement. It is suggested that every shareholder should subscribe one shilling upon each share of 20*l*, and five shillings upon each bond of 100*l*.

In Mr E. F. Satterthwaite's circular, it is observed that at the latest date the reports of business throughout the United States were very favourable and money easy, with low exchange on Europe. The improved state of things is perhaps best evidenced by the trade reports at the port of New York for the first ten months of the present year. They show an increase of exports of 25,537,000 dols, a decrease of imports of 10,074,000 dols, and a decrease in export of specie of 17,815,000 dols. These returns show conclusively the advantage America is gaining from her large crops of cotton and corn, and clearly account for the adverse state to England and France of the exchanges.

A special general meeting of the shareholders of the London Discount Company has been held for the purpose of deciding upon the proposition of a section of the directors, that the Company be voluntarily wound up. The chairman (Mr Bevan) detailed the reasons which had guided them in coming to the decision they had, namely, the losses the Company had experienced lately. The directors were afraid of the future, and hence their desire to wind up. It was left to the member for Hull to show what was the great impediment to its future success, namely, the refusal of the Bank of England to rediscount for the discount houses, which was not the case when the undertaking was started. It was shown that the Company in the course of its four years' operations had discounted commercial bills to the extent of 33,000,000*l*, had made gross profits of 83,000*l*, and net profits of 60,000*l*, of which 40,000*l* was absorbed in losses, namely, 22,000*l* by the exceptional failures in the leather trade, and 18,000*l* in the ordinary course, leaving about an equal amount divided amongst the shareholders in the shape of dividend; that at the present moment the balance of loss against the Company was 7,000*l*. A resolution was finally carried by a large majority that the London Discount Company be voluntarily wound up, and two of the directors and the secretary were appointed to see the same carried into effect.

Two new Indian banking establishments have been formed, viz., the Bank of Kurrachee, with a capital of 250,000*l*, with power of increase to 1,000,000*l*. The direction is composed of native end European residents at the port of Kurrachee. The other project is that of the Central Bank of Western India; a Mr Gordon has been appointed the manager, and Mr R. Davidson, of the Mercantile Bank of India, has been appointed agent in London.

It is understood that Mr Kirkman Daniel Hodgson, of the firm of Finlay, Hodgson, and Co., is the Bank director who will be recommended in March next to succeed Mr Latham as Deputy-Governor.

With regard to the position of the Bank of Upper Canada, the last advices from Toronto mention that a meeting had been held between representatives of that institution and of some of the other leading banks of the province—namely, the Bank of Montreal, the Commercial Bank, and the Bank of British America. The object apparently was to obviate any feeling of uneasiness that might have been created by the recent allegations against the management of the Bank of Upper Canada, and to devise measures of mutual support in case of necessity. An arrangement is stated to have been come to under which they will sustain each other with specie on any emergency. "The banks," it is observed by the Toronto *Leader*, "are in the habit of receiving one another's notes as a matter of course, but the mutual confidence is henceforth to lead to a more extended mutual support. Under the new arrangement nothing but a universal panic, such as sometimes takes place during a period of commercial crisis, can deprive any one bank of a supply of specie that is for all practical purposes unlimited." The same journal refers to rumours bearing on the probability of the Government deposits being withdrawn from the Bank of Upper Canada, and announces that they are totally without foundation. At the same time a denial is given to an assertion that the Government have become responsible for the advances made by this bank to the Grand Trunk Railway. The security for those advances consists of property belonging to the Grand Trunk Company in three States of the American Union—Vermont, New Hampshire, and Maine, and which "is of the most undoubted character and ample in amount." The question whether such security, however ample, can in any case be regarded as strictly suitable for banking purposes is not discussed, but a declaration is put forth that "not a dollar of the amount advanced by the bank to the Grand Trunk Railway Company is in peril."

COMPARATIVE EXCHANGES.

The quotation of gold at Paris is about 3 per mille premium, and the short exchange on London is 25.27½ per 1*l* sterling. On comparing these rates with the English mint price of 3*l* 17s 10½d per ounce for standard gold, it appears that gold is about 1-10th per cent. dearer in London than in Paris.

The course of exchange at New York on London for bills at 60 days' sight is 108 per cent., which, compared with the Mint par between the two countries, shows that the exchange is against England; but, after making allowance for charges of transport and difference of interest, the present rate leaves no profit on the transmission of gold between the two countries.

The Commercial Times.

POSTAGE ON LETTERS FOR MONTE VIDEO, BUENOS AYRES, AND PARAGUAY.—On the 1st January next and thenceforward, the former British rate of postage between the Republic of the Uruguay (including Monte Video) and the United Kingdom, namely, one shilling for a letter not exceeding half an ounce in weight (which postage was reduced last year under a postal convention which the Legislature of the Uruguay has refused to ratify), will be reimposed. From the same date the British postage upon letters for Buenos Ayres, or any other part of the Argentine Confederation, as well as upon letters for the Republic of Paraguay, which was reduced simultaneously with the postage to the Uruguay, will in like manner be raised from sixpence to one shilling for a letter not exceeding half an ounce, and will thus be made uniform with the British rate to the Uruguay and Brazil. For heavier letters the postage will increase according to the usual scale. The postage must, as heretofore, in all cases be paid in advance, or the letters cannot be forwarded.

Imports of the week ..... 234,172 qrs.

COMMERCIAL EPITOME.

FRIDAY NIGHT.

The imports of foreign produce, this week, having been on an unusually large scale—viz., 57,760 quarters of wheat; 15,680 barley; 20,040 oats; 7,830 sacks and 12,250 barrels of flour—the demand for all kinds of English wheat at Mark lane, this morning, was heavy in the extreme. Scarcely a sample changed hands, and, to have forced sales, 3s to 4s per quarter less money, when compared with Monday, must have been submitted to. The present high range in the value of money seemed to have a depressing influence upon the market generally. Foreign wheat was nominal in price, and nearly all kinds of spring corn gave way 1s per quarter. Country flour was 1s per 280 lbs cheaper. At Liverpool to-day, most articles of grain were taken off at about Tuesday's currency.

Advices from New York to the 10th inst. state that both wheat and flour continued in good request for export purposes.

Messrs Briggs and Co., of Alexandria, writing on the 10th inst., observe:—

The demand for breadstuffs of all descriptions has been exceedingly active, and notwithstanding the continuance of excessive stringency in the money market, we have to report a fresh advance in prices, caused by the favourable intelligence from the English markets as well as by the diminished scale of supplies. The following are sales since our last, with present prices free on board, viz.:—Wheat—Saide, private trade produce, 8,280 qrs, 38s 8d to 40s 4d; ditto, Pacha's produce, 2,980 qrs, 38s 10d to 40s 6d; Behira, red, 1,540 qrs, 36s 6d to 37s 6d; ditto, white, 60 qrs, 38s 6d to 39s 6d: beans—Saide, 4,550 qrs, 28s 4d to 29s; Behira, 160 qrs, 26s 6d to 27s 6d: Indian corn, 400 qrs, 29s 10d to 30s 2d; barley, 1,890 qrs, 23s to 24s 10d; lentils, 1,060 qrs, 26s to 27s; linseed, 1,450 qrs, 46s to 46s 6d per qr. Freights—Owing to the scarcity of

tonnage in port, freights are firmly maintained, say at 7s 3d to 7s 9d per quarter for beans to the United Kingdom for orders, and other grain and seed in proportion. To a direct port, 6s 6d to 7s for beans or wheat. Charter parties for vessels to arrive are offering on easier terms. By steamer to Liverpool rates have been reduced to 7s 3d per quarter.

The business transacted during the week in the Liverpool cotton market has been again on a very limited scale, and the sales amount to 33,000 bales only, of which 25,000 bales have been taken by spinners, 4,000 on speculation, and 4,000 bales for export. Quotations are about ⅛d per lb lower than on Friday last. At the commencement of the week the market was very depressed, but in the last few days the money market having become somewhat easier, there has been an improved demand, and the sales yesterday and to-day have amounted to 10,000 bales each day.

In reference to the new crop of cotton, Messrs Neill Brothers' of New York, write thus:—"The weather continues favourable for picking, and there is less disposition to indulge in the extreme low views occasioned by the recent frost. We regard the circumstances as unchanged. The more forward portion of the second growth having matured before frost, has partly retrieved the previous damage by drought. The upland crops, however, still show a material deficiency compared with last year, particularly in Georgia and Alabama. In Texas and Louisiana there has been no killing frost, and in the former State the yield will result better than at one time expected. The swamp lands and river bottoms promise well and may even equal last year, while the overflowed lands which produced little then, will this year make full crops. The weather is still an important feature in crop calculations, and much will depend upon the remainder of the picking season. Hitherto it has been excellent on the whole, and the bulk of the upland crop has already been secured in good condition, but proves very deficient in staple. On the rich heavy lands, however, which, as usual, are producing the best crops this year, the yield will be mainly dependent on the weather henceforward for gathering, and it is, therefore, too early to form a reliable estimate."

Cotton exports from Bombay from the 1st January to the 27th October, 1860:—

	1860. bales	1859. bales
To Europe	389,140½	508,856½
To China, &c.	192,518	132,750
Total	581,658½	641,606½

Showing a gross decrease of 59,948 bales; but the falling off in exports to Europe, as against last year, is 119,716 bales. The Chinese have, on the contrary, taken nearly 60,000 bales in excess of their purchases in 1859.

The tea market has been in a very inactive state, and prices have shown a tendency to give way. New Monings have changed hands at 1s 9d to 2s 1d per lb. The show of samples is tolerably good.

Throughout the week the demand for all descriptions of sugar has been in a most inactive state, and the quotations have ruled somewhat easier.

Coffee has commanded about previous rates, but the demand has been wholly confined to immediate wants. The cocoa sales have gone off heavily.

Very little business has been passing in rice; however, no quotable change has taken place in prices.

Most descriptions of fruit have commanded rather more attention, and the quotations generally have been well supported.

A circular from Zurich, forwarded by Messrs Rognin and Hoffmann, states that the silk trade was tolerably active. Steady purchases had been made on English and Russian account. The quantity of silk that passed condition was, in September, for Zurich, 52,587 lbs in 1860, 48,376 lbs in 1859, and 48,166 in 1858: for Bâle, 22,976 lbs in 1860, 16,205 lbs in 1859, and 20,315 in 1858. Since the 1st January, for Zurich and Bâle, 618,922 lbs in 1860, 651,986 lbs in 1859, and 553,512 lbs in 1858.

The result of the Liverpool rag sales is thus reported by Messrs W. Greame and Co.:—

We had a large attendance of buyers, and notwithstanding the sudden and extraordinary rise in the rate of discount by the Bank of England, the competition, with few exceptions, was active throughout. The total quantity offered consisted of 3,144 bales. Woollens, of which there was a very choice selection, were eagerly competed for, particularly the finer qualities, and prices ruled on an average about 5 per cent. higher than at our June sales; but for inferior and low qualities there was less demand, and on these, prices must be quoted about 5 per cent. lower. For the best qualities of Italian, Spanish, and American cloth the biddings were very spirited: superfine tailors' clippings realised 55s to 55s 6d, fine blues 53s to 60s, do. blacks 40s 6d to 46s 6d, do. browns and greens 31s to 38s, do. reds 51s 6d to 56s, ordinary and low blacks, browns, greens, and greys 16s 6d to 22s, as to quality. The Americans being held above their market value were withdrawn. Fine white flannels were eagerly competed for, and realised 44s to 51s, ordinary and low do. 26s to 22s 6d, white Tunis 16s to 17s 6d, coloured knitted 18s 6d to 20s; Australian woollens part sold at 12s; Turkey common woollens neglected and all withdrawn for want of competition. Cottons were in fair request; some parcels of Egyptian were eagerly competed for by Scotch buyers; there was also a very active demand for a mixed parcel of Australian, which realised 12s to 12s 9d, being the highest price ever obtained for this class. The following are the prices obtained for the leading descriptions:—Italian PC 21s, SC 16s, TC 13s 6d; Australian white 15s 9d to 17s, coloured and mixed 10s 3d to 12s 9d; Egyptian whites 14s to 15s, blue 11s 6d to 12s 3d, coloured (one lot) 10s 6d; Turkey coloured (one lot) 11s 9d; East India white 15s, coloured withdrawn.

The saltpetre market has continued heavy, on rather easier terms.

The public sales of wool continue to be well attended by buyer from the manufacturing districts. Sydney and Port Philip qualities have changed hands at the opening quotations; but Cape parcels have ruled somewhat lower in price. Hemp has moved off slowly, at late rates.

No business of importance has taken place in rum. Brandy and grain spirits have supported previous rates.

We have very little change to notice in the value of either oils or metals.

The tallow market has continued steady. To-day, P. Y. C. on the spot has sold at 60s 9d. All the year, the price is 60s 3d; for December, 60s 6d; January to March, 61s; April to June, 59s; October to December, 58s 6d per cwt, sellers. Town tallow is 60s net cash. A telegram from St Petersburg states that the season's shipments are rather over 128,000 casks.

STATEMENT of TALLOW SHIPPED at ST PETERSBURG.

	1860. casks.	1859. casks.	1858. casks.

France	3540	14	2885
	120767	84744	112012

"The money market exhibits few or no new features," observes the New York *Shipping List* of the 7th inst. "Though there is nothing like stringency, it is extremely difficult to pass long-dated paper at the ordinary rates. We quote:—

	Per cent. per annum.
Loans on call, stock securities	6 to 7
Do. other good securities	7 8
Prime endorsed bills, 60 to 90 days	6½ 7
Do. 4 to 6 months	7 ...
First class single signatures	7 8
Other good bills	9 12
Names less known	12 15

The Bank statement, contrary to general expectation, shows a heavy increase in the discount line, mainly on account of accommodation extended to Southern and Western Banks during the week, and to loans to other parties, on the strength of the new federal loan. The foreign trade of the port continues active, both imports and exports, last week, showing a material increase upon the business of the corresponding season last year. The shipments of domestic produce and merchandise are steadily increasing, and keep the market well supplied with sterling exchange.

IMPORTS.

	1859. dols.	1860 dols.
Dry goods	1,510,982	1,169,249
General merchandise	1,108,024	2,924,690

For the week	1,305,990	2,168,781
Previously reported	53,737,077	77,506,431
Since January 1st	55,043,067	79,675,212

The market for domestic goods has been unusually quiet, and trade has therefore been on a very limited scale, though transactions have been at prices substantially the same. Foreign goods have also been in light demand at unchanged prices."

CORN.

AMERICAN GRAIN AND FLOUR MARKETS.

NEW YORK, Nov. 7.—FLOUR AND MEAL.—With a fair demand for the local and Eastern trade, as also for export, the market for State and Western flour was firm on Saturday, and on Monday, under the influence of the favourable European advices, holders were enabled to establish an advance 5 to 10 cents per bbl. The extreme firmness in freights served to materially restrict operations for shipment, however, and the aggregate sales are, therefore, comparatively small. The market opened less buoyantly yesterday, and, before the close of 'Change, became dull and heavy, and the improvement realised the previous day was partly lost. The busi-

ness transacted was light, amounting to 36,000 bbls, and the aggregate sales are 10,000 bbls, the market closing heavily at our adjusted quotations below, but with a tendency to a further reduction. Canada flour has been in light request, and the sales for the three days foot up to 1,200 bbls, including 400 yesterday. We quote:—State, superfine brands, 5.35 to 5.50 dols; State, extra brands, 5.55 to 5.60 dols; Michigan, fancy brands, 5.35 to 5.40 dols; Ohio, common brands, 5.45 to 5.50 dols; Ohio, fancy brands, 5.55 to 5.65 dols; Ohio, fair extra, 5.80 to 5.85 dols, Ohio, good and choice extra brands, 5.90 to 7.25 dols; Michigan, Wisconsin, Indiana, &c., 5.60 to 5.85 dols; Genesee, fancy brands, 5.65 to 5.85 dols; Genesee, extra brands, 5.90 to 7.50 dols; Missouri, 5.80 to 7.50 dols; Canada, 5.75 to 7.50 dols per bbl. Southern flour has been in limited request, though prices are without marked decline.

EXPORT, from 1st Jan. to 31st October.

	barrels		barrels
1860	1,501,021	1859	616,074

EXPORT, from 1st to 6th November.

	1860 barrels	1859 barrels
Wheat Flour	23,565	22,340

GRAIN.—The market for wheat was without important alteration. Transactions since Friday comprise 306,000 bushels; 3,100 Canada Club, 1.28 dol; 6,000 winter red Western, 1.33 dol to 1.35 dol; 23,000 amber Wisconsin, 1.27 dol to 1.28 dol; 4,500 white Ohio, 1.45 dol; and 21,000 Milwaukee Club, 1.25 dol to 1.26 dol, closing heavy. Corn has met with ready sale, chiefly at slightly improved prices: the sales aggregate 255,000 bushels, closing heavy at 71c to 72c for Southern mixed, 72c to 74c for round yellow, 71c to 72c for Western mixed, and 70c to 71c for unsound; other kinds are unchanged.

EXPORT, from 1st Jan. to 31st. Oct.

LONDON MARKETS.

STATE OF THE CORN TRADE FOR THE WEEK.

MARK LANE, FRIDAY EVENING.

The leading markets held since we last wrote have been rather scantily supplied with home-grown wheat, chiefly in poor condition; nevertheless, owing to the continued influx of foreign produce, the accumulation of stock in our warehouses, and the prospect of large arrivals during the remainder of the year, the demand has ruled heavy, and prices have not been supported. The best wheats have given way 1s to 2s—other kinds, 2s to 3s per qr, at which decline millers have operated with great caution. There has been much less activity in the sale for both English and foreign barley, and the currencies have declined 2s to 3s per qr. There has been a fair, but by no means active, sale for malt at previous quotations. Oats, though in but moderate supply, have met a dull inquiry at 6d to 1s per qr less money. Very little change has taken place in the value of beans, but peas have receded 2s per quarter. The best English and foreign flour has commanded former terms; but inferior parcels have sold at 1s per 280 lbs beneath previous rates.

The future range in the value of produce is now regarded with much anxiety by the home-growers. According to the last return, the total imports of foreign and colonial grain into the United Kingdom in October amounted to 1,345,513 qrs; of flour and meal to 818,302 cwts. To show the great excess in the arrivals, we insert the annexed comparison of arrivals in October in the four previous years:—

COMPARISON OF IMPORTS.

	Oct., 1856.	Oct., 1857.	Oct., 1858.	Oct., 1859.
Wheat ....qrs	434,691	389,977	285,491	355,894
Barley	113,482	121,587	168,580	177,600
Oats	139,870	187,187	246,347	180,927
Rye	6,084	13,864	20,948	1,626
Beans	6,197	14,557	36,930	32,316
Peas	4,105	4,959	20,024	34,652
Indian corn	150,166	156,983	282,363	208,504
Flour ....cwts	161,213	122,492	179,835	94,832

From the above comparison, it would appear that the arrivals of both wheat and flour, last month, were on a scale of great magnitude—the increase in them, compared with the four previous years, being as follows:—

	Wheat. Quarters.
Increase compared with 1859	489,235
— — — 1858	559,638
— — — 1857	455,152
— — — 1856	410,438
	FLOUR, cwts.
Increase compared with 1859	716,607
— — — 1858	631,604
— — — 1857	688,947
— — — 1856	650,226

Considering the great excess in the importations last month, together with the present state of the money market, we are not surprised at the present inactive state of the trade.

The demand for wheat on the Continent has been far from active, but no change of importance has taken place in the quotations. Most other articles have sold to a fair extent on former terms. In the United States, large quantities of wheat and flour still continue to find buyers for export purposes.

In Scotland, wheat has been disposed of on rather easier terms, and the demand for spring corn has fallen off, although the shipments to the South continue on a full average scale.

The Irish markets have been extremely inactive, and prices generally have ruled lower. The quantities sold for England have been comparatively trifling.

Very little English wheat was received fresh up to our market to-day; nevertheless, the demand was heavy in the extreme, and to have forced sales, 3s to 4s per qr less money must have been submitted to. All foreign wheats were lower to sell, and spring corn gave way 1s per qr. Flour was rather cheaper.

Mr Ed. Rainford reports the state of the floating trade as follows:—Since the 14th inst. up to last night 56 grain-laden vessels have arrived at ports of call, consisting of 31 cargoes of wheat, 17 maize, and 8 miscellaneous, viz:—Wheat, 1 from Berdianski, 6 Odessa, 1 Sulina, 5 Marianople, 10 Taganrog, 1 Galatz, 2 Alexandria, 1 Messina, 1 Venice, 2 New York, 1 Bordeaux; maize, 5 Mazagan, 1 Saffi, 3 Ibraila, 4 Constantinople, 3 Sulina, 1 Galatz; wheat and flour, 1 Santander; rye, 1 Taganrog; barley, 1 Ibraila, 2 Constantinople, 1 Sulina, 1 Odessa; beans, 1 Mazagan. About 12 of the above had changed owners previously. The demand for cargoes afloat has been slow and rather drooping since this day week, till to-day, when a fair business has been done at improving prices. The following are the transactions of the week to the close of the market; prices according to quality, condition, &c.:—Wheat, arrived, Marianople, 56s 3d and 57s 6d; Odessa Ghirka, 55s 6d and 55s; Taganrog Ghirka, 52s 6d, 51s 9d, 53s; 2 cargoes at 52s, 53s, 53s 6d, and 54s; hard Taganrog, 52s 6d and 53s 6d; new Mantua, 58s 3d, all per 492 lbs; Polish Odessa, 53s (part damaged) per imperial quarter; and another cargo, 53s 3d per 480 lbs. Maize, arrived, Ibraila, 37s 6d, 38s (2 cargoes), 37s 6d, 37s; damaged, 36s, heated and discoloured, all per 480 lbs. Barley, arrived, Barbary, 30s per 400 lbs.

The London averages announced this week are:—

COLONIAL AND FOREIGN PRODUCE MARKETS.

TRANSACTIONS OF THE WEEK.

For Report of This Day's Markets, see "Postscript."

Mincing Lane, Friday Morning.

Sugar.—There has not been any revival of the demand this week, but the importers generally refrain from pressing sales at lower prices. On Wednesday some soft Penang sold rather under the previous value; otherwise quotations exhibit no change, and West India remains firm on account of its scarcity. By auction, 204 casks Barbadoes realised 41s to 46s for low to fine yellow, including which the transactions to yesterday evening amounted to 484 casks. A cargo of Mauritius, the first of the new crop, has arrived. The landings last week did not exceed 870 tons, while 4,565 tons were delivered; consequently, the stock shows another important falling off, being 56,500 tons, against 65,700 tons in 1859. The Netherland Trading Company's Java sale held yesterday went off at 1 gilder advance.

Mauritius.—There were not any public sales yesterday, and scarcely any business done by private contract.

Bengal.—Small sales are reported by private contract.

Penang.—Of 5,732 bags, two-thirds found buyers at, and after the sales: brown, 35s to 38s 6d; low to good yellow, 39s to 43s per cwt.

Java.—556 baskets 48 bags about one-third part sold at 41s for low soft yellow; the remainder bought in at 41s to 44s 6d for low to fine.

Madras.—3,100 bags have sold privately at 32s 6d for low soft dark brown sorts; a small portion native, 34s 6d to 35s 6d per cwt.

Foreign.—At auction, yesterday, 200 cases Bahia were withdrawn, there being no offers made at the previous value: low to fine brown, 35s 6d to 40s. A floating cargo of Havana, No. 11 to 11½, is reported for the United Kingdom at 28s.

Refined.—Several sales have been effected upon terms rather favourable to the buyers: common grocery goods cannot be quoted under 50s 6d; crushed, 48s to 49s 6d per cwt.

Molasses still meet with inquiries at full prices, but the market is very barely supplied. 50 puns Trinidad have sold at 21s per cwt.

Rum.—Very few sales have taken place this week, but former prices are maintained. A small parcel of fine Demerara is reported at 2s 1d per proof gallon.

Cocoa.—Cocoa is exceedingly dull, and 330 bags Trinidad by auction yesterday, consisting of small lots, only partly sold at 64s to 71s 6d per cwt for low grey to good mixed red, being barely previous rates.

Tea.—The trade have bought to a moderate extent from the recent arrivals within the past two days, prices occasionally ruling rather lower. No further public sales were announced this morning.

Coffee.—The demand is by no means active, and general quotations remain about the same as before. Fine qualities of East India have not quite sustained their late extremely high value with increased supplies, while plantation Ceylon went off steadily. 176 casks 283 barrels and bags chiefly found buyers: fine fine ordinary to middling, 68s to 72s. 167 cases Neilgherry brought 64s to 70s 6d. 1,702 bags Cannon's Mysore: good to fine, 87s to 103s. Of 2,227 bags Rio, nearly half sold at 59s to 63s per cwt for good to fine ordinary.

Rice.—The week's business has been smaller than for some time past, but former prices are supported. A floating cargo of pinky Madras found buyers at 12s. Sales on the spot have been exceedingly limited. By auction, 10,960 bags Java partly sold; middling broken to good middling white, 13s to 14s. 3,630 bags Necrancie Arracan, damaged and repacked, obtained 10s to 11s per cwt.

Imports and Deliveries of Rice to November 17, with Stocks on hand.

	1860.	1859.	1858.	1857.
	tons	tons	tons	tons

Stock	39500	73000	88400	61150

* The deliveries of duty-free goods for export are not given now, and the total will be shown under the head of home consumption.

Spices.—Black pepper is dull with a large stock. By auction, 4,062 bags partly sold at 3¾d to 4d per lb for common to fair quality. White has been less readily saleable. 537 bags Singapore partly found purchasers at 6d to 6¼d for middling to good. 12 casks bold limed nutmegs sold at 1s 9d per lb. 60 bags Bengal rough ginger went at 31s. 400 cases Cochin sold rather dearer towards the latter part of the sale: wormy qualities, small to middling, 38s to 49s. A few lots Jamaica went at 71s to 120s per cwt. Zanzibar cloves are still in demand, and sales have been effected at 4d per lb cash.

Saltpetre.—A few contracts have been made in Bengal at irregular prices, and the market is still inactive. The last transactions were at 40s cash for refraction 7½, and 39s 3d per cwt for refraction 10¼ per cent.

Imports and Deliveries of Saltpetre to November 17, with Stocks on hand.

	1860.	1859.	1858.	1857.
	tons	tons	tons	tons
Imported	11610	16600	9150	16100
Delivered	11300	13650	12650	11150
Stock	4150	2000	2650	7000

Deliveries last week 315 tons.

Sago.—1,602 boxes in public sale partly found purchasers: medium grain at 18s to 18s 6d, and middling bold grain at 17s per cwt. Some business is also reported by private contract.

Cochineal.—The market has been quiet. 359 bags in the public sales about half sold at prices showing little alteration, excepting for black Teneriffe at 3s 3d to 3s 8d, which went cheaper; Teneriffe silvers brought 2s 11d to 3s 1d; Honduras, low to good, 3s to 3s 6d; dead grain, 2s 4d to 2s 8d; blacks, 3s 3d to 4s 7d per lb.

Lac Dye.—166 chests common marks were chiefly taken in at 4d to 5d per lb this week. The sales in other kinds have been of moderate extent.

Shellac.—D C orange has sold for arrival at 11*l* 10s to 11*l* 15s per cwt. The small quantity sold on the spot does not establish any change in quotations.

Rubber.—Para is lower, selling at 1s 11d to 2s 5½d for common to fine quality. No business has transpired in East India.

Metals.—Few sales of importance have been effected this week. Scotch pig iron closes at 52s 6d for mixed Nos. Manufactured descriptions are quiet. Contracts to a moderate extent occurred in spelter, at 19*l* 17s 6d to 20*l*, and 20*l* 2s 6d for arrival. Tin has sold at 131s for good Straits; Banca quoted at 134s. No change in British. Copper remains the same as before. Lead presents no change.

Hemp.—Russian is quiet. By auction, 530 bales chiefly sold: superior roping, 25*l* to 26*l* per ton. Privately, the sales are limited. The jute market has not improved. 2,100 bales, by auction, on Wednesday, partly sold irregularly at 13*l* 10s to 22*l* 5s per ton for low middling to fine quality.

Hides.—The public sales yesterday went off at lower rates by ⅜d to ½d per lb.

Linseed.—Arrivals keep light, and the demand active. Calcutta, 60s; Bombay, 65s. A large business has been transacted for arrival: Odessa, &c., 58s for the United Kingdom, 1s more for the Continent; Calcutta afloat, 59s per quarter.

Oils.—Sperm dull at 101*l* to 102*l* 10s. Pale seal commands 40*l*. Cod, 37*l* to 38*l*. Olive continues to sell very slowly: Gallipoli, 60*l*; other sorts, 55*l* to 57*l* per tun. Stocks of cocoa-nut are much reduced: Cochin commands 56s; Ceylon, 54s. The market for palm was lower in the early part of the week, but it has since recovered, and fine quality cannot be obtained under 48s. The market for linseed oil is freely supplied, and the present quotation is 29s 6d to 29s 9d; 30s to 30s 3d for monthly deliveries, January to March. Large arrivals of rape oil have unsettled the market: foreign refined, 44s to 44s 6d; brown, 42s per cwt.

Turpentine.—Rough is quoted at 11s. Spirits sell very slowly: American, 33s per cwt.

Tallow.—There has not been much business done for actual consumption, and the market continues quiet, the quotations ruling 6d lower. This morning, 1st sort Petersburg Y C closes at 60s 9d for delivery to the end of the year, 60s 6d to 60s 9d; spring, 61s per cwt.

Particulars of Tallow.—Monday, November 19.

POSTSCRIPT.

Friday Evening.

Sugar.—The market was dull to-day, but not lower. West India commands extreme rates, and the week's business amounts to 763 casks. 1,300 bags low Madras were bought in above the value.

Coffee.—115 casks 793 bags plantation Ceylon sold at steady prices. 377 cases 62 bags Tellicherry brought 68s 6d to 69s. 204 bags Malabar were bought in at 64s 6d to 65s. 274 bales 190 quarter bales Mocha of indirect import were bought in: small berry 105s to 110s. A cargo of St Domingo has sold at 63s 3d per cwt for the Mediterranean.

Rice.—3,452 bags Necrancie Arracan partly sold: new rather heated, 10s 6d; damaged, 9s 6d to 11s; old bought in above the value. 500 bags new Bengal were taken in at 14s 6d for good middling; and 240 bags old low middling broken at 12s 3d per cwt.

Saltpetre.—600 bags Bombay chiefly sold: refraction 33 to 30¼, 38s to 38s 6d per cwt.

Cochineal.—A large portion of 360 bags found buyers: Honduras silver, 2s 3d to 3s 5d; Teneriffe silver, 2s 10d to 3s; black, 3s 4d to 3s 8d. Mexican and Honduras blacks bought in.

Gambier.—1,514 bales were bought in at 17s 6d per cwt.

Oil.—Cochin cocoa-nut, by auction, sold at 55s 3d to 55s 6d; Ceylon, 53s 6d to 53s 9d. 467 casks palm part sold at 47s 3d to 47s 6d per cwt. Japan fish oil brought 29*l* to 31*l* 5s per tun.

Tallow.—Town was reduced to 61s 9d. Y.C, 60s to 60s 6d; January to March, 61s. By auction, 35 chests South American were bought in. 107 casks Australian part sold at 56s 6d to 58s 6d. 254 casks Petersburg unbracked taken in at 59s 6d per cwt.

ADDITIONAL NOTICES.

Refined Sugar.—There is no alteration worth noting in the home market for refined sugar.

Green Fruit.—Change of wind has brought arrivals. A parcel of Madeira oranges, sold by Keeling and Hunt at public sale, brought fair prices, quality being good. A cargo from Fayal will be offered this week. Messina lemons 2s per case lower. Black Spanish nuts without alteration; Barcelona held for an advance, stock reduced; Para 2s per barrel higher. Almeria grapes, 30s to 40s per barrel, in accordance with quality and condition.

Dry Fruit.—In new currants nothing can be bought under 27s, and in old 25s seems to be the only price for all qualities. For fine new, 34s has been paid for about 50 tons. The principal trade of the week has been in Gulf, which at 32s to 33s seems a very favourite description with dealers, being black and clean bold fruit. Valencias are quiet, but 42s continues the price. Figs have been offered at auction largely during

the week. They are selling in large quantities, the quality being better and prices lower now than they have been for some years, with prospect of little or no supply for after Christmas trade.

SEEDS.—The supplies of seed have been moderate, and prices have been well supported.

ENGLISH WOOL.—There is more inquiry this week for English wools, prices remaining the same as last week.

COLONIAL AND FOREIGN WOOL.—The sales continue firm at opening prices for Australian wools. Some large lots of Cape of inferior description have been withdrawn, as this sort is heavy, at a decline of 1d on last sale's rates.

FLAX.—Market firm.

HEMP quiet at the quotations.

SILK.—The large anticipated arrival of Chinas having taken place, there has been a good deal of business done at a reduction of about 9d to 1s 3d per lb. Good fine silk is very scarce. Bengal silk is still heavy.

TOBACCO.—A fair demand has existed for home trade descriptions, and prices have remained unchanged. For exportation, sales have been effected to some extent.

TIMBER.—A very heavy supply of wood cargoes has filled the docks almost to overflowing, and with great delay in the discharging of ships. There is not much business to be expected before the year ends, and meantime the London prices do not admit of variation. Shipbuilding timber continues high in price, and the supply of it is very limited. Staves are little noticed.

LEATHER AND HIDES.—There is again no alteration to notice in the leather market. The transactions are still restricted to the immediate wants of buyers, and prices show very little change. On light English butts lower prices are accepted, but good heavy English butts are scarce, and command previous rates. The supply of heavy foreign butts of best tonnages and prime growth is also limited. At the public sale this week far less than the usual portion was sold, and that generally at a reduction of ½d per lb. 612 only of the River Plate hides were sold: Monte Videos, 80 lbs, at 6½d. 2,000 Australian at 4d to 4½d; seconds, 3½d to 3¾d. 1,000 Buenos Ayres horse hides, 29 lbs, at 10s. Of 150,000 East India kips, 84,000 were sold, also at a reduction of ½d to ¾d per lb. The only article which has made an advance is Singapore buffaloe, which may be quoted ½d higher. By private contract there have been sold 300 Buenos Ayres hides: heavy ox, 7¾d to 7¾d; 300 light ditto, 43½ lbs, at 6¾d; and 3,000 Australian ditto at former quotations.

METALS.—Copper—We have no change to note, the market still being inactive, but the standard price of ore continues very high. Iron—The state of the money market caused a slight reaction in pig iron, but to-day the accounts represent the market as again firm. Tin—The market is inactive. Lead—No change. Steel in moderate inquiry. Tinplates continue hard of sale, except at low prices.

TALLOW.—Official market letter issued this evening:—

	s	d
Town tallow	51	9
Fat by ditto	3	2
Yellow Russian	52	0
Melted stuff	44	6
Rough ditto	27	6
Graves	20	0
Good dregs	7	0

Imports this week 2,817 casks.

PROVISIONS.

There has been a rapid fall in the bacon market; trade very dull, and a further depreciation may be expected. Friesland quality very inferior; prices much lower.

METROPOLITAN CATTLE MARKET.

THURSDAY, Nov. 22.—Only a moderate supply of beasts, chiefly in middling condition, was on offer in to-day's market. The few prime breeds on sale were disposed of somewhat freely at Monday's currency. Otherwise the beef trade was heavy, at barely late rates. We were scantily supplied with sheep, which moved of slowly at about previous rates. The condition of the sheep was by no means prime. The best calves were the turn dearer, but inferior veal was a dull inquiry.

Per 8 lbs to sink the offal.

	s	d	s	d		s	d	s	d
Coarse and inferior beasts	2	6	2	8	Prime Southdown sheep	5	2	5	4
Second quality ditto	2	10	3	4	Large coarse calves	3	8	4	0
Prime large oxen	3	8	4	4	Prime small ditto	4	2	4	8
Prime Scots, &c.	4	6	4	10	Large hogs	4	0	4	6
Coarse and inferior sheep	3	4	3	8	Small porkers	4	8	5	0
Second quality ditto	3	10	4	6	Suckling calves...each	19	0	22	0
Prime coarse-woolled do.	4	8	5	0	Quarter old store pigs	23	0	29	0

Total supply—Beasts, 1,060; sheep and lambs, 4,150; calves, 312; pigs, 360.
Foreign supply—Beasts, 440; sheep, 930; calves, 194.

NEWGATE AND LEADENHALL.

FRIDAY, Nov. 23.—Our markets continue to be well supplied with each kind of meat. Generally speaking, the demand is heavy at our quotations:—

Per 6 lbs by the carcase.

	s	d	s	d		s	d	s	d
Interior beef	2	6	2	10	Mutton, inferior	3	4	3	6
Middling ditto	3	0	3	4	— middling	3	8	3	10

Prime small	4	0	4	2	Large pork	3	6	4	6
Veal	3	6	4	4	Small pork	4	8	5	2

HOP MARKET.

FRIDAY, Nov. 23.—There is a better trade for all hops since the postponement of the payment of hop duty, and many planters have withdrawn their new hops from sale, fine samples of which are very scarce.

POTATO MARKET.

SOUTHWARK WATERSIDE, Monday, Nov. 19.—During the past week the arrivals coastwise have been moderate, but large both foreign and by rail, and a further decline in prices has been the consequence. The following are this day's quotations:—York Regents, 110s to 130s; Lincolnshire ditto, 100s to 115s; Dunbar ditto, 120s to 140s; Perth, Forfar, and Fifeshire ditto, 100s to 115s; French whites, 100s to 110s; Belgian ditto, 90s to 95s; Dutch ditto, 80s to 90s per ton.

THURSDAY, Nov. 22.—Since the wind shifted, large supplies of potatoes have come to hand by water conveyance, and by rail average quantities continue to arrive. The market in consequence is amply stored, and there is no improvement in trade in consequence, and prices have a lowering tendency, although there is no material change from Monday last. York Regents, from 110s to 130s; Kent and Essex ditto, 110s to 140s; Scotch ditto, 100s to 120s; Dunbars, 120s to 150s; French, 90s to 105s; Belgian, 80s to 85s; Prussian, 85s to 95s per ton.

HAY MARKETS.—THURSDAY.

SMITHFIELD.—Meadow hay, 2*l* 10s to 5*l* 10s; clover, 3*l* 10s to 5*l* 15s; and straw, 1*l* 10s to 1*l* 16s per load. Trade dull.

CUMBERLAND.—Meadow hay, 2*l* 10s to 5*l* 10s; clover, 3*l* 10s to 5*l* 12s; and straw, 1*l* 10s to 1*l* 18s per load. A slow trade.

WHITECHAPEL.—Meadow hay, 2*l* 10s to 5*l* 10s; clover, 3*l* 10s to 5*l* 15s; and straw, 1*l* 10s to 1*l* 16s per load. Supply good and trade dull.

COAL MARKET.

FRIDAY, Nov. 23.—Wall's-end Hetton 21s 3d—Haswell 21s 3d—South Hetton 21s 3d—Russell Hetton 20s—Cassop 20s 6d—South Durham 19s 3d—Woodhouse Close 18s—Thorpe 20s—Harton 19s—Lyons 17s 6d—Tunstall 20s—Hedley 18s 9d—Carway and Duffryn Steam 23s 6d—Holywell 18s—Wylam 18s 6d—Hastings' Hartley 17s 9d—Lambert's Hartley 17s 9d. 40 ships at market.

LIVERPOOL MARKETS.

WOOL.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, Nov. 23.—Although we cannot report a very active demand there is nevertheless a fair amount of business doing in all useful kinds of foreign, and prices show great firmness generally, and an upward tendency for such descriptions as are rather scarce.

CORN.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, Nov. 23.—The corn market was moderately attended. Fair consumptive inquiry for wheat at late rates. Flour dull and without change. Indian corn and beans in moderate request, and a turn easier. Oats and oatmeal rather lower.

The Gazette.

TUESDAY, Nov. 20.

BANKRUPTS.

F. Ansell, South street, Manchester square, draper.
A. Aubert and C. Powell, St Mary axe, ship brokers.
W. O. Jennings, Uggeshall, Suffolk, horse dealer.

W. Binks, Kingston-upon-Hull, painter and paper hanger.
T. Rees, Swansea, ironmonger.
W. J. Smith, Newcastle-upon-Tyne, commission agent and dealer in machinery.

DRURY LANE THEATRE.—The neat little comedy "Les Pattes de Mouche," which met with so favourable a reception when performed by the French company in the summer, was on Monday night produced in English guise at this theatre, as a two-act comedy, entitled "The Billet Doux." The peculiar quality of the original French piece was its extreme neatness, and the quiet manner in which the little complicated dilemma upon which it was based was developed. In the English piece a livelier vein has been introduced, and the part of the leading female agent, which in the hands of Mlle. Delphine Fix was of the highest order of comedy, while Mr Charles Mathews assumed the smart intriguing vein, more appropriate to comedietta or farce.

SOCIETY OF FINE ARTS.—The lecture-session of the Society for the Encouragement of the Fine Arts was commenced on Thursday evening. The programme of the lectures of this society for the season embraces every branch of the fine arts—painting, sculpture, architecture, music, &c.

COMMERCIAL TIMES
Weekly Price Current.

EPITOME OF RAILWAY NEWS.

TRAFFIC RETURNS.—The traffic returns of railways in the United Kingdom for the week ending Nov.10 amounted to 514,020*l*, and for the corresponding week of last year to 480,750*l*, showing an increase of 33,270*l*. The gross receipts of the eight railways having their termini in the metropolis amounted to 214,476*l*, and for the corresponding week of 1859 to 208,898*l*, showing an increase of 5,578*l*.

THE NEW RAILWAY STATION AT PIMLICO.—The opening of the Victoria station at Pimlico is a most desirable event in connection with the railway accommodation of the metropolis. The station is 1,000 feet long, its extreme width being 480 feet.

RAILWAY AND MINING SHARE MARKET.

LONDON.

MONDAY, Nov. 19.—The railway market was steady, but very inactive, business being generally suspended, owing to the uncertainty respecting the future course of the money market. In the colonial market the principal fluctuations were in Grand Trunk of Canada stock, which, after receding to 23½, rallied to 24 to ¾. The ordinary bonds left off at 47 49, and the preference 77 to 79. Atlantic and St Lawrence shares were heavy, while Great Western of Canada improved. Few transactions occurred in foreign descriptions. South Austrian and Lombardo-Venetian remained at ⅜ to ½ dis., while Pernambuco were a fraction better, at 4 to 3¾ dis. In American securities there was a considerable rise in the shares of the Illinois Central and New York and Erie. Mines were dull and occasionally lower. Joint stock bank shares, on the other hand, continued firm. In miscellaneous descriptions a reduction took place in Mediterranean Extension Telegraph and Royal Mail Steam.

TUESDAY, Nov. 20.—The railway market opened steadily, but a decline soon took place, from which there was no recovery. Nearly all the leading stocks closed ¼ to ⅜ per cent. lower. North-Eastern descriptions, however, and Sheffield slightly advanced. In colonial descriptions, a fall of 1 per cent. occurred in Grand Trunk of Canada stock, the last price being 22¾ to 23¼. Great Western shares also receded to 11½ to ¾. Foreign railways generally closed without change. South Austrian and Lombardo-Venetian, however, were heavy at ⅜ to ⅝ dis., and Pernambuco at 4½ to 3¾ dis. Nova Scotia Government bonds were quoted lower. In American securities, the shares of the Illinois Central and New York and Erie again advanced. Mines were steady at an occasional rise. Joint stock banks closed about the same as yesterday. In miscellaneous descriptions there was an improvement in London Discount, and a further decline in Royal Mail Steam. Victoria debentures, new, were last quoted 106 to ¼; Canadian Five per Cents., 103 to ¼.

WEDNESDAY, Nov. 21.—British railway stocks were flat in the morning in sympathy with the provincial markets, but afterwards rallied with Consols. After official hours, however, there was again a tendency to heaviness, and the final prices were in some cases lower than yesterday. Lancashire and Yorkshire and South-Western, especially, receded ⅜ to ½ per cent.; South-Eastern and Eastern Counties slightly improved. In colonial descriptions, Grand Trunk of Canada stock was again heavy, closing at 22½ to 23. Great Western shares remained at 11¼ to ⅜. Foreign railways were in little demand, and almost the only change was a recovery in Lombardo-Venetian to ⅜ to ½ dis. In American securities the bonds of the Michigan Central improved. Mines were quiet, but in several instances showed an advance. Joint stock banks were also firmer. In miscellaneous descriptions, Royal Mail Steam shares again declined, while Mediterranean Extension Telegraph partially rallied.

THURSDAY, Nov. 23.—The railway market to-day showed increased firmness, and several stocks closed at an advance. Midland was chiefly in demand, and improved 1½ per cent. The only fluctuations of importance in the colonial market were in Grand Trunk of Canada stock, which was to-day a fraction higher, at 22¾ to 23¼. Great Western shares were also in better demand. In foreign descriptions, South Austrian and Lombardo-Venetian improved to ½ to ⅝ discount. American railway securities were generally steady; Pennsylvania Central bonds and shares, however, were slightly weaker. Mines were again firm. Bank shares continued with an upward tendency; Ottoman were quoted 18¾ to ½. In miscellaneous descriptions, Canada Land receded, while Royal Mail Steam recovered 1*l*. Victoria debentures, new, 106¼ to ½; Canadian Five per Cents., 102¾ to 103½.

FRIDAY, Nov. 23.—The railway share market to-day was inactive. Prices generally steady. Caledonian stock were advanced ⅛ per cent., Great Western and South-Eastern were firm, and Lancashire and Yorkshire and Midland dull. London and North-Western stock was quoted 99⅛ to ⅞; Great Western, 72 to ¼; Midland, 132 to ½; Lancashire and Yorkshire, 114⅛ to ¼; South Eastern, 84½ to ⅝; Caledonian, 83½ to 84; and Great Northern, 111½ to 112½. Lombardo-Venetian Railway shares were a little flatter, at 9-16 to 7-16 dis. The Canadian and Indian lines were quiet, with little change in prices.

66 Queen street, London, 23rd August, 1860.

MESSRS R. WOTHERSPOON and CO., 46 Dunlop street, Glasgow,

DEAR SIRS.—I have, as requested, to-day visited the Royal Laundry, with reference to the advertisement of the Nottingham firm, who state that their starch has been used for many years in the Royal Laundry, and have been assured by Mr Thompson, the superintendent, that none but yourselves have any right to state that they supply starch to Her Majesty's Laundry, as no other starch is there used, nor has been used for some years, but the Glenfield Patent Starch. I have been further assured that your starch continues to give complete satisfaction, and that though trial has been made of samples of various starches, none of these have been found nearly equal in quality to the Glenfield.—I am, dear Sirs, your obedient servant, WM. BLACK.

PIANOFORTES.—CRAMER, BEALE, and CO. NEW MODEL OBLIQUE GRAND PIANO, and every description, warranted. List of prices and terms for hire, post free.—201 Regent street.

FREDERICK DENT, Chronometer, Watch, and Clock Maker to the Queen and Prince Consort, and maker of the Great Clock for the Houses of Parliament, 61 Strand, and 34 Royal Exchange.

MR LEWIS AND SON, 113 Strand.—The Royal Lewisian Systems of Writing, Arithmetic, Bookkeeping, and Shorthand, as taught for upwards of fifty years by Mr Lewis, the real inventor and first teacher of these world-renowned and only infallible systems, insures perfection in any of the above branches after a few easy and interesting lessons Persons unable to take the lessons may obtain the inventor's works for self-instruction at his only Institution, 113 Strand.

DINNEFORD'S PURE FLUID MAGNESIA has been for many years sanctioned by the most eminent of the Medical Profession, as an excellent remedy for acidities, heartburn, headache, gout, and indigestion. As a mild aperient it is admirably adapted for delicate females, particularly during pregnancy; and it prevents the food of infants from turning sour during digestion. Combined with the Acidulated Lemon Syrup, it forms an effervescing aperient draught which is highly agreeable and efficacious.

Prepare by DINNEFORD and CO., Dispensing Chemists (and General Agents for the Improved Horse Hair Gloves and Belts), 172 New Bond street, London, and sold by all respectable Chemists throughout the empire.

VOLUNTEER PIPE.—RIFLE BORE.—The most delightful, economical, and permanent medium for the enjoyment of tobacco ever invented. This new pipe only to be had of the patentee. Sample pipe in case sent post free for 23 stamps.—EDWARD PILLINER, 53 Great Queen street, London, W.C.

AT HAMBLY HOUSE ACADEMY, Streatham Common, Surrey, Young Gentlemen are carefully Educated for the Public Schools, Military Colleges, Professions, or Commerce, by Mr R. S. TROUSDALE, L.C.P., aided by highly qualified assistant masters.

The domestic arrangements are on the most liberal scale; and the house is very delightfully situated. The terms for pupils under ten years of age, 30 guineas per annum; ten and under fourteen, 35 guineas per annum; fourteen, 40 guineas per annum. The above amount includes board and instruction in the Latin, Greek, French, and English Languages, Writing, Arithmetic, Merchants' Accounts, History, Geography, the Use of the Globes, Astronomy, Geometry, Algebra, and the other branches of the Mathematics. A library is devoted to the instruction and amusement of the pupils during their leisure hours. Religious works are provided for Sunday perusal; and lectures on various popular subjects are occasionally delivered. German Drawing, Dancing, and Music, on the usual terms. Washing, half-a-guinea per quarter. Drilling during the summer months, at a trifling charge; and board during a vacation, four guineas. All accounts are expected to be settled quarterly. Excellent accommodation for foreigners or gentlemen of neglected education. A quarter's notice of removal is required.

STERLING SILVER.—WILLIAM S. BURTON has added to his extensive STOCK of GENERAL FURNISHING IRONMONGERY and HOUSE-FURNISHING REQUISITES, a selection of STERLING SILVER SERVICES for the table or for presentation. His prices will be found considerably below those usually charged.

THE PERFECT SUBSTITUTE FOR SILVER.—The real NICKEL SILVER, introduced more than twenty-five years ago by WILLIAM S. BURTON, when PLATED by the patent process of Messrs Elkington and Co., is beyond all comparison the very best article next to sterling silver that can be employed as such, either usefully or ornamentally, as by no possible test can it be distinguished from real silver.

A small useful set, guaranteed of first quality for finish and durability, as follows:—

	Fiddle or Old Silver Pattern	Thread or Brunswick Pattern	Lily Pattern	King's or Military, &c.
	£ s d	£ s d	£ s d	£ s d

ADOPTED LARGELY BY HER MAJESTY'S GOVERNMENT.

CHEAP, LIGHT AND DURABLE ROOFING.

CROGGON'S PATENT ASPHALTE ROOFING FELT has been extensively used and pronounced efficient and particularly applicable for warm climates

1st. It is a non-conductor.

2nd. It is portable, being packed in rolls, and not liable to damage in carriage.

3rd. It effects a saving of half the timber usually required.

4th. It can easily be applied by any unpractised person.

5th. From its lightness, weighing only about 42 lbs to the square of 100 feet, the cost of carriage is small.

INODOROUS FELT, for damp walls and for damp floors, under carpets and floor cloths; also for lining iron houses, to equalise the temperature.

Price ONE PENNY PER SQUARE FOOT.

CROGGON and CO'S PATENT FELTED SHEATHING for Covering Ships' Bottoms, &c., and

DRY HAIR FELT, for Covering Steam Boilers, Pipes, &c., preventing the radiation of Heat, and saving 25 per cent. of Fuel.

Samples, testimonials, and full instruction on application to CROGGON and CO, 2 Dowgate hill, London and at 2 Goree Piazzas, Liverpool.

DR DE JONGH'S
(Knight of the Order of Leopold of Belgium)

LIGHT-BROWN COD LIVER OIL. Prescribed by the most Eminent Medical Men as the safest, speediest, and most effectual remedy for CONSUMPTION, CHRONIC BRONCHITIS, ASTHMA, COUGHS, RHEUMATISM, GOUT, GENERAL DEBILITY, DISEASES OF THE SKIN, RICKETS, INFANTILE WASTING, AND ALL SCROFULOUS AFFECTIONS.

Extensive experience, and the recorded testimony of numberless eminent medical practitioners, prove that a half-pint of Dr de Jongh's Oil is far more efficacious than a quart of any other kind. Hence, as it is incomparably the best, so it is likewise unquestionably the cheapest.

Palatableness, speedy efficacy, safety, and economy, unitedly recommend this unrivalled preparation to invalids. NO OTHER OIL CAN POSSIBLY PRODUCE THE SAME BENEFICIAL RESULTS.

Opinion of Sir HENRY MARSH, Bart., M.D., T.C.D., Physician in Ordinary to the Queen, in Ireland; President of the Royal College of Physicians in Ireland; Visiting Physician to Steevens' Hospital; Consulting Physician to the City of Dublin, St. Vincent, and Rotunda Hospitals, &c., &c.

"I have frequently prescribed Dr de Jongh's Light Brown Cod Liver Oil. I consider it to be a very pure Oil, not likely to create disgust, and a therapeutic agent of great value.

"Merrion Square, Dublin,
"September 6, 1860."

Sold ONLY in IMPERIAL Half-Pints, 2s. 6d.; Pints, 4s. 9d.; Quarts, 9s., capsuled, and labelled with DR DE JONGH'S stamp and signature, WITHOUT WHICH NONE CAN POSSIBLY BE GENUINE, by respectable Chemists.

SOLE CONSIGNEES,
ANSAR, HARFORD, and CO., 77, STRAND, London, W.C.

CAUTION.—Beware of Proposed Substitutions.

LE SOMMIER ELASTIQUE PORTATIF.

HEAL AND SON have patented a method of making a Spring Mattress portable. The great objection to the usual Spring Mattress is its being so heavy and cumbersome.

The "SOMMIER ELASTIQUE PORTATIF" is made in three separate parts, and when joined together has all the elasticity of the best Spring Mattress. As it has no stuffing of wool or horse hair, it cannot harbour moth, to which the usual Spring Mattress is very liable; the prices, also, are much below those of the best Spring Mattresses, viz:—

			£	s	d
3 ft wide by 6 ft 4 in.	long	.....	2	5	0
3 ft 6 in.	—	—	2	10	0
4 ft	—	—	2	15	0
4 ft 6 in.	—	—	3	0	0
5 ft	—	—	3	5	0
5 ft 6 in.	—	—	3	10	0

The "SOMMIER ELASTIQUE PORTATIF," therefore, combines the advantages of elasticity, durability, cleanliness, portability, and cheapness.

An Illustrated Catalogue of Bedsteads, Bedding, and Bed-Room Furniture sent free by post on application.

HEAL and SON, 196 Tottenham court road, W.

DR BUCHAN'S PATENT SUGAR-COATED VEGETABLE PILLS, VEGETABLE SKIN OINTMENT, and CONCENTRATED VEGETABLE ESSENCE, for Purifying the Blood, Regulating the Bowels, and Removing Vitiated Humours, Bilious and Liver Complaints, Rheumatism, Gout, Scorbutic Affections, Costiveness, Skin Eruptions, deep-seated Ulcers, and all Diseases of the Nervous System, from whatever cause, &c., affording at once a new lease of life to the sickly and aged of both sexes, whilst in addition imparting a beautiful and clear complexion, so anxiously sought for by all. Proved by the sworn testimonies made before the Lord Mayor of London, and sitting Magistrates. Sold by Buchan and Co., Patentees, 22 Newman street, Oxford street, London, W., and all chemists in town and country. Prices:—Pills, per box, 1s 1½d, 2s 9d, and 11s; Ointment, per pot, 1s 1½d, and 2s 9d; Essence, per bottle, 11s, or family bottle containing four times that quantity, 33s. Agents:—Barclay, 75 Farringdon street; J. Sanger, 150 Oxford street; Hannay, 63 Oxford street; Butler, 4 Cheapside; Hooper, 43 King William street, London Bridge; R. Howden, 78 Gracechurch street; Prout, 229 Strand, &c., &c.

Just published, gratis, or post free for one stamp, to be had of all agents, and at 22 Newman street, Extracts from Dr Buchan's Work, entitled BUCHAN'S DOMESTIC MEDICINES, being a Book of Reference, containing instructions for the cure of every ailment incidental to man, woman, or child.

A BOON TO NERVOUS SUFFERERS.—Twenty Thousand Copies of a Medical Book for gratuitous circulation. HENRY SMITH, Doctor of Medicine of the Royal University of Jena, &c., who has devoted fifteen years to the study and treatment of Nervous Debility, Loss of Memory, Dimness of Sight, Lassitude, and Indigestion, will send free, for the benefit of Nervous Sufferers, a copy of the New Medical Guide, containing his highly successful mode of treatment, with necessary instructions by which sufferers may obtain a cure. Post free on receipt of a stamped directed envelope. Address Dr Henry Smith, 8 Burton crescent, Tavistock square, London, W.C.

RUPTURES.—BY ROYAL LETTERS PATENT

WHITE'S MOC-MAIN LEVER TRUSS is allowed by upwards of 200 Medical Gentlemen to be the most effective invention in the curative treatment of HERNIA. The use of the steel spring, so often hurtful in its effects, is here avoided, a soft bandage being worn round the body while the requisite resisting power is supplied by the MOC-MAIN PAD and PATENT LEVER, fitting with so much ease and closeness that it cannot be detected, and may be worn during sleep. A descriptive circular may be had, and the Truss (which cannot fail to fit) forwarded by post, on the circumference of the body two inches below the hips being sent to the Manufacturer.

Mr WHITE, 228 Piccadilly London.

Price of a single Truss 16s, 21s, 26s 6d and 31s 6d; Postage, 1s. Double ditto, 31s 6d, 42s, and 52s 6d; postage, 1s 8d. Post-office orders to be made payable to John White, Post-office, Piccadilly.

ELASTIC STOCKINGS KNEE CAPS, &c., for VARICOSE VEINS, and all cases of WEAKNESS and SWELLING of the LEGS, SPRAINS, &c. They are porous, light of texture, and inexpensive, and are drawn on like an ordinary stocking. Price from 7s 6d to 16s each; postage, 6d

WHITE, MANUFACTURER, 228 Piccadilly, London

VALUABLE INFORMATION.—GRATUITOUS EDITIONS of the following LECTURES, delivered at the Royal Institute of Anatomy Science, and Medicine, 369 Oxford street, London, by W. B. MARSTON, the Principal, are being issued, with plain directions for SELF-TREATMENT and CURE in each of them.

No. I.—NERVOUS DEBILITY (the result of youthful error), loss of memory, shortness of breath, dimness of sight, exhaustion, and general incapacity. Addressed specially to Young Men.

No. II.—MARRIAGE: Its Obligations and Impediments. Addressed to those who contemplate Marriage, and to the Married who desire Children.

No. III.—THE BRAHMIN'S ELIXIR OF LIFE: Its History—Secret Remedies of the Hindoos no Fable—Full Particulars of this Extraordinary Specific—Its Amazing Powers as a Reinvigorator of the Impaired Functions, and in all Cases of Nervous Debility.

No. IV.—THE DISEASES INFLICTED UPON MANKIND BY THE GREAT SOCIAL EVIL. With a simple means of complete Cure without Mercury.

Each Lecture, neatly printed and bound, will be sent GRATIS, on receipt of two stamps to prepay postage, or THE WHOLE FOUR, SOUND TOGETHER, with numerous additions, and full directions for SELF-TREATMENT and CURE, 160 pages, 8vo, post free, for Six Stamps. Address, Treasurer, Royal Institute, 369 Oxford street, London.

KEATING'S COD LIVER OIL. Just Imported. The Pale from Newfoundland, and the Light Brown from Norway. The supplies of the present season have never been surpassed, the fish being unusually fine, and the oil nearly tasteless. Professors Taylor and Thompson, of Guy's and St Thomas's Hospitals, have analysed, and pronounced the PALE NEWFOUNDLAND OIL the best and most desirable for invalids of very delicate constitution. The Light Brown being more economical in price, is brought within the reach of all classes. NO HIGHER PRICE NEED BE PAID than the following:—Light Brown, 1s 8d per pint, or 3s per quart. Pale, 1s 6d half-pints, 2s 6d pints, 4s 6d quarts, or in five-pint bottles, 10s 6d, imperial measure, at 79 St Paul's Churchyard.

ASTHMA.—ANOTHER IMPORTANT Testimonial in favour of Dr LOCOCK'S PULMONIC WAFERS. From Mr W. J. Cooper, surgeon, Maidstone:—"Having heard the Wafers very highly spoken of by persons who have taken them with decided benefit, I have recommended them in several cases of confirmed Asthma, and their good effects have been truly astonishing. I now recommend them in all obstinates cases.—W. J. COOPER, Surgeon." Dr Locock's Wafers give instant relief, and a rapid cure of asthma, pulmonic consumption, coughs, and all disorders of the breath and lungs. To singers and public speakers they are invaluable for clearing and strengthening the voice. They have a most pleasant taste. 1s 1½d, 2s 9d, and 11s per box. Sold by all chemists.

HOLLOWAY'S OINTMENT AND PILLS.—Sudden Changes.—Changes of temperature constantly occurring during the winter are prone to produce rheumatism, neuralgia, and other painful disorders of the muscles and nerves. For upwards of twenty years Holloway's remedies have been particularly celebrated for curing this class of complaints. The parts affected by the pains should be fomented twice a day in warm salt and water, and immediately after drying well rubbed with this inestimable Ointment. The Ointment penetrates through the skin to the affected tissue, which it first soothes, and ultimately relieves from all pain, visibly reducing both redness and swelling, and healthfully balancing both circulation and secretion. Holloway's Ointment and Pills likewise cure spinal affections, weakness of the limbs, and scrofulous diseases.

Just published, cloth, 8vo, lettered, price One Shilling, or free by post for eighteen stamps,

DR. KAHN'S PHILOSOPHY OF MARRIAGE.

Published and sold by J. Allen, 20 Warwick lane, Paternoster row; or from the Author's Address, 17 Harley street, Cavendish square, W.

Just published, 71st thousand, price 1s, post free for 13 stamps. Sold by Mann, 39 Cornhill, or direct from the Author.

DR LA'MERT ON SPERMATORRHŒA; an Original Essay on the Treatment and Cure of NERVOUS and PHYSICAL DEBILITY, resulting from pernicious habits contracted in Youth, excesses in Manhood, or residence in Tropical Climates. With Cases and Engravings from Life, representing the various Organs in Health and Disease.

CONTENTS.

SECTION I.—The Physiology of the Generative Organs.

SECTION II.—Puberty—Manhood—The Morals of Generative Physiology—True and False Morality.

SECTION III.—Marriage in its Moral, and Physical Relations—Happy and Unhappy Unions—How to secure Healthy Offspring.

SECTION IV.—Youthful Abuse—The Secret Causes of Nervous Debility, Impotence in Man, and Sterility in Man and Woman.

SECTION V.—Spermatorrhœa, or Chronic Impotence: its History, Causes, and Moral Consequences—The Sterility of Age.

Dr LA'MERT, Honorary Member of the London Hospital Medical Society, Registered Licentiate of the Royal Society of Apothecaries, &c., is the only legally qualified practitioner who, for 20 years, has devoted his attention to the treatment of these disorders, which are so frequently aggravated by the unskilfulness of ignorant empirics, either self-styled physicians or surgeons, sometimes assuming names of eminent medical men, &c. At home for consultation daily, from Ten till Two, and from Six till Eight.

37 Bedford square, London.

TO THE NERVOUS AND DEBILITATED.

Just published, the 125th thousand, with numerous plates, in a sealed envelope, price 1s, sold by all booksellers, or post paid, by the Author, for 12 stamps,

MANHOOD: THE CAUSE AND CURE of PREMATURE DECLINE, with Plain Directions for Perfect Restoration to Health and Vigour. By Dr J. L. CURTIS, 15 Albemarle street, Piccadilly, London.

CONTENTS.

INTRODUCTORY CHAPTER on the Physiological Structure and Functions of the Reproductive Organs.

CHAPTER II.—Causes of Spermatorrhœa and Impotence; Early Vicious Indulgences; Dangers of Neglect.

CHAPTER III.—A Review of the Disqualifications of Marriage; whether resulting from the Youthful Abuse, the Follies of Maturity, the Effects of Climate, or Infection.

CHAPTER IV.—Plan of Treatment, Medical and Moral, with observations on a new and successful mode of detecting Spermaterrhœa and other Urethral discharges by microscopic examination.

CHAPTER V. and VI. on the modern Treatment of Gonorrhœa and Syphilis.

The Book concludes with numerous interesting cases, to which is added the Author's receipt of a preventive Lotion

MR CURTIS, author of the above Medical Treatise, may be consulted from 10 till 3, and 6 till 8. Sundays from 10 till 1.

Sold by Piper and Co., 23 Paternoster row and Mann, 39 Cornhill, London.

HUBBUCK'S PATENT WHITE ZINC PAINT.

By their process, which is patented, Pure White Zinc Paint is cheaper than White Lead. It is the most durable and beautiful paint known, and does not stain or discolour with the London atmosphere.

CHEAPNESS.—Two hundred-weight of this Paint, with six gallons of Oil, covers as much surface as three hundred-weight of White Lead and twelve gallons of Oil. It is cheaper in the first instance, as well as desirable on every consideration.

ADULTERATIONS.—Prejudice is caused by some Paint Grinders selling Zinc Paint adulterated with Sulphate of Barytes, some even to the extent of thirty per cent. Whether this is sold under the name of "Improved Zinc Paint," or is candidly sold as Number Two or Three qualities, no Painter can produce good work with it. He naturally condemns Zinc Paint altogether.

That Painters have never seen the best Zinc Paint is evident, or they would not use any other paint for their best work. To prevent the prejudice which the inferior article must produce, each Cask of Pure White Zinc is stamped

"HUBBUCK, LONDON, PATENT."

THOMAS HUBBUCK and SON, WHITE LEAD, OIL, PAINT and VARNISH WORKS, 74 LIME STREET.

FIRST-CLASS EDUCATION,

at the Royal Continental Collegiate Institution, Bushey heath, Herts.—In addition to all its qualities as a first-rate classical (preparatory to Harrow and Eton) and commercial school, it is also highly recommended for a thorough French education, and as preferable to going abroad. Some of the parents who are continually visiting France, and whose sons have scarcely been two years at this school, are most happy to assure those parents who are desirous that their children should acquire a thorough knowledge of the French language, without wishing them to neglect their English and classical education, that their sons speak far better and more grammatically than any of the sons of their friends who have spent two or three years in schools in France merely for the purpose of acquiring that language. No corporal punishment. Terms inclusive, and vary according to age and requirements, from £40, £50, to £60 per annum. Not one case of illness has occurred since the school has been established.—Address, stating age and requirements, Professor Vellère (late of the Harrow Preparatory School), Bushey heath, Herts. The pupils wear a uniform very elegant and becoming, but optional to parents.

NEW THEATRE ROYAL ADELPHI.

Sole Proprietor and Manager, Mr B. Webster.

Engagement for a limited number of nights of Miss Agnes Robertson and Mr D. Bourcicault, who will appear every evening in THE COLLEEN BAWN.

On Monday and during the week, THE RIFLE BRIGADE. Messrs W. Smith, D. Fisher, C. Selby; Miss Woolgar, K. Kelly, and Mrs Billington. THE COLLEEN BAWN. Messrs D. Bourcicault, D. Fisher, Billington, Falconer, Stevenson, C. J. Smith, Romer; Miss Agnes Robertson, Woolgar, Mrs Billington, Chatterly. And ICI ON PARLE FRANCAIS. Mr J. L. Toole. Commence at 7. Acting Manager, Mr W. Smith.

JULLIEN FUND.

Committee Room—50 New Bond street.

The Committee of the Jullien Fund, fearing that the subscriptions have been materially checked by the unfortunate death of Mons. Jullien, desire to explain that a widow and others, members of his family, can be protected from want only by the kind aid of those who appreciate the great services rendered by the late lamented maestro to the cause of the musical education of the English people.

The Committee confidently appeal to that benevolence for which their countrymen are so distinguished, for such prompt and liberal additions to the subscription list as shall enable them to do some justice to the memory of M. Jullien, and at the same time afford adequate relief to his bereaved family.

COMMITTEE for the DISTRIBUTION of the JULLIEN FUND.

Mr John Mitchel	Mr W. Duncan Davison
Mr W. R. Sams	Mr Jules Benedict
Mr Thomas Chappell	Mr A. Blumenthal

HONORARY TREASURERS.

Who, as well as the honorary treasurers, have kindly consented to receive subscriptions.

April, 25th, 1860.

EAU-DE-VIE.—THIS PURE PALE

BRANDY, though only 18s per gallon, is demonstrated, upon analysis, to be peculiarly free from acidity, and very superior to recent importations of veritable Cognac. In French bottles, 38s per dozen; or securely packed in a case for the country, 39s.

HENRY BRETT and CO.,
Old Fornival's Distillery, Holborn.
To be obtained only at their Distillery

BRITISH SYRIAN RELIEF FUND.

PRESIDENT—Lord Stratford de Redcliffe.
CHAIRMAN OF THE EXECUTIVE COMMITTEE—Sir Moses Montefiore, Bart

The Contributions of the benevolent throughout the United Kingdom are most earnestly solicited on behalf of the perishing multitudes, surviving victims of the late frightful massacres in Syria. The most recent official accounts received by the Committee are perfectly appalling, and unless the British public exert, in this emergency, their wonted beneficence, by contributing through the Committee money, and such material relief as must be required by the homeless, the naked, the starving, and the sick, the mortality among the sufferers, as winter approaches, will be frightfully extensive.

Donations of provisions, clothing, medicine, tents, &c., will be sent out free of expense, if addressed to the "British Syrian Relief Committee," at the Victoria Dock Warehouse, Steel yard, Upper Thames street, E. C.; or 4 York buildings, Liverpool Persons sending goods are requested to inform by letter, the Secretary, Mr Cyrus Edmonds, 12 York buildings, Adelphi.

Offers to undertake needlework will be thankfully accepted, and the cut out Syrian patterns or materials may be obtained from the Ladies' Committee, by application to their Honorary Secretary, 12 York buildings, Adelphi, London.

The following Bankers receive Subscriptions to the Fund:—Messrs Barclay, Bevan, and Co.; Glyn and Co.; Robarts, Curtis, and Co.; Smith, Payne, and Co.; Williams, Deacon, and Co.; Robarts, Lubbock, and Co.; Dimsdale, Drewett, and Co.; Heywood, Kennard, and Co.; Ransom, Bouverie, and Co.; Child and Co.; Praed and Co.; Drummond and Co.; Coutts and Co.; Cocks and Co.; Call, Marten, and Co.; and the following Banking Companies: The London and Westminster Bank, Lothbury, and all its branches; Union Bank; London Joint Stock Bank; London and County Bank; the National Bank of Ireland, and all its branches; the Ottoman Bank; the National Bank of Scotland, and all its branches; and Jones Lloyd and Co.

SIR C. E. EARDLEY, BART., } Hon. Secreteries.
SIR JAS. FERGUSSON, BART., }
J. P. KENNARD, ESQ., 4 Lombard street, Treasurer.
CYRUS R. EDMONDS, Secretary.
12 York buildings, Adelphi, W. C.

BOTH PLEASURE AND PROFIT

may be derived from a purchase at E. MOSES and SON'S Establishments, which are furnished with an immense stock of every description of Attire for Adults and Juveniles of every grade of Society, and where Comfort, Style, Durability, and Neatness are combined with a lowness of price which could only be remunerative on such an extensive scale as no other house in the trade can boast of.

The departments to which E. MOSES and SON invite particular attention are the READY-MADE and BESPOKE CLOTHING, the HOSIERY and DRAPERY, HAT and CAP, BOOT and SHOE, and GENERAL OUTFITTING Departments.

The BESPOKE TAILORING DEPARTMENT has been replenished with a splendid collection of the newest and choicest Home and Foreign Manufactures. Accuracy of fit, Elegance of style, and Promptitude in the execution of orders have gained for this department a large and daily increasing connection.

N.B. Should any article not be approved of, it will be exchanged, or the money returned.

E. MOSES and SON'S rules for self-measurement and lists of prices, with pamphlet on the Ready-made Clothing System (Past and Present), gratis on application, or post free.

The Establishments are closed every Friday evening at sunset until Saturday sunset, when business is resumed until 11 o'clock.

E. MOSES and SON,
MERCHANT TAILORS, WOOLLEN DRAPERS, HATTERS, HOSIERS, BOOT and SHOE MAKERS, and GENERAL OUTFITTERS.

London Houses:
Corner of Minories and Aldgate.
New Oxford street, corner of Hart street.
Corner of Tottenham Court road and Euston road.

Country Establishments:
Thornton's buildings, Bridge street, Bradford, Yorkshire.
Fargate, Sheffield.

SPECIAL NOTICE.

E. MOSES and SON take this opportunity of reminding their Friends and the Public, that their new Branch Establishment at the Corner of Tottenham Court road and Euston road was opened on the 6th instant.

INDIA OFFICE, S.W., 16th November, 1860.

THE SECRETARY OF STATE FOR

India in Council hereby gives notice, that he has received from the Government at Bombay, the undermentioned SCHEDULES, viz.:—

Schedule of all sums of money, bonds, and other securities received by the Administrator-General on account of each estate remaining under his charge, together with the payments made thereout, and the balances; prepared up to the 30th June, 1860, under section xxxiv. of Act No. viii. of 1855; and

Schedule of all administrations, whereof the final balances have been paid to the persons entitled to the same, specifying the amount of such balances, and the persons to whom paid. Prepared from the 1st January to 30th of June, 1860, under section xxxiv. of Act No. viii. of 1855.

And that the above Schedules are open to the inspection of the public, in the Department of the Agent to the Administrators-General, at this office.

S. W. SILVER AND CO.,

OUTFITTING WAREHOUSES, 66 and 67 CORNHILL, E.C.

Special Outfits for Australia, India, and China, for Naval and Military Officers, Cadets, Midshipmen, and Civilians. Clothing for Gentlemen's Home Use,—viz., Naval and Military Uniforms and Civilian Dress of the best Materials and Workmanship. Shirts, Hosiery, Gloves, &c. Ladies' Outfits. Furniture for Camp, Barrack, Cabin and Colonial use, embracing every variety of Cabinet Work, Canteens, Trunks, Portmanteaus, &c., portable and suited to all climates.

Manufactory, Silvertown, opposite H.M. Dockyards Woolwich.

DEANE'S TWO-HOLE BLACK PENS

which are unequalled for their durability and easy action, are adopted by the gentlemen at the Stock Exchange, and the principal bankers, merchants, and public companies of the city of London, besides several of Her Majesty's judges, the most eminent counsel, and the reverend the clergy. Their cheapness and popularity has induced many unprincipled people to put forth imitations of the genuine articles, which are equally useless to the purchaser, and disgraceful to the vender. The public are therefore cautioned, and respectfully requested not to purchase any as DEANE'S GENUINE TWO-HOLE BLACK PENS, unless each pen is stamped

"G. and J. Deane, London Bridge,"

and the box, which contains exactly twelve dozen, has thereon a variously coloured label, inscribed

"G. and J. DEANE'S Two-Hole Black Pens, 46 King William street, London bridge."

TRADE MARK.

BROWN AND POLSON'S PATENT CORN FLOUR.

The LANCET states,

"This is superior to anything of the kind known."

FIRST OF THE KIND

Manufactured and Patented in the United Kingdom and France, as explained with Engravings in THE ILLUSTRATED LONDON NEWS, of May 26th. Supplied by BROWN and POLSON, to Her Majesty the Queen, by order from Buckingham Palace. It is in great favour wherever it has been made known, for Puddings, Blancmange, &c., preferred to the best arrow root, and especially suited to the delicacy of Children and Invalids.—BROWN and POLSON, Manufacturers and Purveyors to Her Majesty; Paisley, Manchester, Dublin, and London.

NO MORE PILLS OR ANY

other Physic.—For Constipation, Indigestion (Dyspepsia), Palpitation, Nervous, Bilious, and Liver Complaints, Debility, Dropsy, Epilepsy, Paralysis, Cough, Asthma, Consumption, Bronchitis, Sore Throat, Fevers.

THIS WEEK'S BANK RETURN.

WHY SOME SILVER HAS BEEN RECEIVED, AND YET AN EQUAL SUM IN GOLD HAS *NOT* BEEN WITHDRAWN.

Our readers will see this week that the line marked 'silver 'bullion" in the return of the Issue Department of the Bank of England, which has for many years been blank, is now filled up. We last week showed at length that such must be the effect of the recent arrangement between the Bank of England and that of France. But there certainly is one peculiarity in the present Bank return which we did not prepare our readers to expect. The new silver bullion amounts to 336,496*l*; but the gold bullion which was to have been sent away in exchange for it does not seem to be gone. The gold bullion shows no corresponding diminution. The explanation we have reason to believe is this:—Before making the arrangement with the Bank of England, to which we have had occasion to refer so frequently, the Bank of France had purchased in this market considerable sums of gold which had been transmitted to the Continent. For these, therefore, the Bank of France stood indebted, and it has chosen to make use of the recent arrangement with the Bank of England to discharge the liability. For the silver deposited with the Bank of England she has obtained notes instead of gold, and with those notes she has paid the parties to whom she was indebted for gold supplied. So far as the substantial arrangement is concerned, the result is the same. The Bank of France has obtained from this country a certain sum in gold, and has sent hither a certain sum in silver; the time at which the gold was shipped or the silver sent is not material. And it is, of course, a matter of complete indifference to the Bank of England whether it gives gold for silver, or whether it gives for that silver notes convertible into gold at the option of the holder. In substance, the difference is not important. But as respects the Bank return of this week, the difference is material. If the silver sent hither had been simply exchanged for the gold taken away, the aggregate amount of bullion in the Issue Department would not have been affected; but now it is not so. For a portion of the silver sent, notes have been taken and not gold.

It is believed, however, that the remainder of the silver sent from France will be simply exchanged for gold in the vaults of the Bank of England.

THE FRENCH CONSTITUTIONALISTS STANDING IN THEIR OWN LIGHT.

Some of those who best understand the actual working of the present political system in France are not without hope that the recent decrees may be turned to good account by the Constitutional party, if they will but avail themselves cautiously and yet boldly of the concessions made. It is true that those concessions are not large. The right of free discussion in the *Corps Législatif* and the publication of the debates are the most important, and we are sedulously taught by the semi-official *Constitutionnel* that the change is not meant to sanction in any form, however modified, the theory of "responsible" government. The Emperor is to be his own master as before. The "Ministers without portfolios" who are to sit in the *Corps Législatif* are to be his agents and mouthpieces merely,—appointed and dismissed at his pleasure, and instructed in everything what they shall do and what they shall speak. But still, as we said, it is believed even by those who fully understand all the difficulties in the way, that some permanent hold might be gained out of the present concessions by a cautious, zealous, and united party, who should fully understand how to use every slight advantage they may gain. The power of discussion itself is something. And it is something that M. Persigny, with his liberal sympathies, is to replace at the Home Office M. Billault, who seldom lost a decent opportunity of warning, suspending, or suppressing obnoxious journals. The right of public discussion once secured for the Legislature and for the press, more may well follow, *if* the Constitutional party has eyes to see, and the resolution and singleness of purpose to use, the opportunities really open to it, as well as the equally necessary tact not to pass beyond certain limits.

But have the Constitutionalist party in France the courage, firmness, and public spirit to improve any advantage they may gain with a single aim to the interests of freedom? For our own parts we earnestly desire to believe it, but after their conduct during the last two years, we lament to say that we are not at all better persuaded of the disinterestedness and simplicity of their love for the cause, than of their power to serve it. Their opportunity may be at hand, but the opportunity will assuredly be lost, if the spirit which animates them is not high and single. And we have learnt to fear that it is neither. We will hope that we are false prophets. We will hope that they will yet see that if they are to serve the liberal cause in France, their first step must be to show their sympathy with the liberal cause out of France,—that they will recognise how foolish and insane it is for them, the friends of freedom and the advocates of popular self-government, to allow themselves to be outbidden by the Imperialists in the breadth and liberality of their foreign policy,—to allow it to be said of them that they are for constitutionalism only in the one country where they themselves would be gainers by it,—to justify the enemies who assert that their so-called political principles are easily dismissed except so far as they form the nucleus of party rancour, and the rallying cries of a party organisation. And yet, for two years back, the Constitutional party in France have done their best to justify such accusations, and unless they change their ground at once, they must surrender the cause of French political freedom into worthier hands.

It is to us,—probably to all unprejudiced spectators of French political life,—self-evident that the one opening at

which there is now some room to introduce the thin edge of the wedge, is the liberal foreign policy into which the Emperor of the French has been half involuntarily drawn. However reluctantly, and however unconscious of the ultimate tendency of what he was doing, the Emperor of the French has practically been the means of giving freedom to Italy and awakening the sentiment of nationality in the bosoms of a great and neighbouring people. This is now done, and cannot, we trust, be undone. Least of all should the Constitutional party in France wish to see it undone. It may be very well and very consistent for such politicians as Walewski and Thouvenel to frown upon the Emperor's proceedings,—to do all in their power to thwart them,—to insist on the conditions of the Villafranca arrangement,—to sustain the Pope, counteract England, and threaten Sardinia. It is not only in keeping with their own interest, it is consistent with their political principles,—if the mere tools of a *parvenu* Imperialist *régime* can be said to have any,—to prevent the Emperor from kindling hopes and sentiments in Italian breasts which cannot long be bounded by the Alps. But it is either pure folly, or the sure sign of a spurious liberalism, when men who claim such freedom for France are not ready to hail joyfully the moment when France, enslaved herself, offers this great boon to Italy. What line of action can bid fairer for success than the obvious line which such a chain of events at once points out as the true one for a French Constitutionalist,—to applaud with the most generous warmth the generous policy of the Emperor abroad, to point out its happy results, the glory that it has gained for the French name, the comparative shadow in which it has involved nations of less suspected liberalism such as England, and then to press the contrast home between the freedom which France has bestowed on others, and the severity of the rod by which she is herself ruled? Such a line of argument, if steadily and ably pressed, would in time be irresistible. 'Is not the nation 'which bestows freedom and the privilege of Constitutional 'Government worthy to share in the boon which it bestows? 'Can the Emperor expect that his own subjects will be 'content to remain in a condition of tutelary restraint, when 'they see those for whom they have just shed their blood, 'and whom they supposed to be generations behind them 'in the race of civilisation, enjoying proudly the privileges 'of freedom? Are they to be told that while France is the 'arbiter of Europe, while she has fairly surpassed England 'in the weight of her foreign influence, and absolutely 'created Italy, Frenchmen are less worthy not merely 'than the English, but than the Italians, to determine their 'own laws and their own policy?' The argument is so well calulated to impress the most superficial understandings, and to get a firm hold of the popular intellect, that it only wants a little eloquent exposition in the mouths of far less able writers or orators than many whom the Constitutional party contain, to become a moving power in France,—and when once any cry really reaches the popular mind of France, we know that the Emperor no longer turns to it a deaf ear.

If, then, the Constitutionalists wish to make any way in France, their only policy is to encourage, to admire, to applaud the Emperor's (voluntary or involuntary) generosity to Italy, and then to compare cautiously the results of that generosity abroad with the fruits of his policy at home. But has this,—has anything like it,—been the recent course of the party which boasts of the adherence of Thiers, Guizot, Odillon Barrot, Rémusat, and many others? On the contrary, we regret to say, they have for the last two years been doing their very best to throw away the sympathy that was felt for them in England,—to cut the ground from under their own feet,—to stand in their own light. There has not been a more melancholy spectacle in Europe than the wreck of this party of eminent and gifted men,—not so much because they have been driven out of public life, as because they have done their best to forfeit all their claim to the honours of the martyrdom they had won. Every measure which has tended to redeem the administration of the Emperor, and which in the hands of disinterested men might have been made to yield an important leverage for further reforms, has been distrusted, hampered, and even scouted by them. We have too often and too recently referred to their conduct in the matter of free trade, to refer to it at any length here. But we think a disinterested band of patriots, whatever might have been the objection to the original form in which the commercial treaty was negotiated, would have accepted the substance as a practical boon to France, as certain to strengthen her ties with constitutional England, and, by giving freedom and independent vigour to her commerce, to raise the influence and tone of her middle classes. Instead of taking this view, however, the Constitutionalist party have stood by in sullen silence, or opened their lips only to denounce the origin of the measure, and to stimulate the feeling that England for her own selfish purposes had drawn France into the engagement.

Again, there was one point in the Emperor's recent policy against which there was fair reason to expect that the Constitutionalists would have protested, however cautiously,—an act of despotic and unprincipled ambition. In the annexation of Savoy and Nice, and the delusive hopes held out to Switzerland, the French Liberals had real cause for offence. They might well have said that the noble cause of Italian liberty was desecrated by France when she forced the offer of such a bribe; and still more that the people of Savoy and Nice were cruelly oppressed by the unscrupulous transfer. But here, where their voices might fairly have been raised, they were not only silent, but it was no secret that they exulted in what had been done. They rejoiced over the aggrandisement of France; they rejoiced over it the more, because the aggrandisement of France was the mortification of Switzerland and the humiliation of Sardinia; nay, some of them even rejoiced because, while France was aggrandised and Italy was humiliated, the Napoleonic *régime* was endangered, and the Emperor likely to be embroiled with the other Powers of Europe!

It has been no secret that the Constitutionalists, as they call themselves, have been heart and soul with Lamoricière, the Pope, and the King of Naples in the recent struggle,—that they have mourned over Catalafimi and Palermo, and Reggio, Castelfidardo, and Capua, as they would over the defeat of their own allies,—that they speak with the most narrow and selfish horror of the rise of a second Prussia on their Southern frontier,—and regard the success of Victor Emanuel with far more grief than they would the success of Francis Joseph. If this is to be their policy in future, we can only say they have no right to represent the Liberal cause in France, and that they must inevitably lose all the sympathy of England. It will be said, not without justice, that the party who care for Constitutionalism only *within* the boundaries of France, who are not ashamed to advocate the most unblushing annexation when it conduces to the importance of France, care more for the aggrandisement of France than they do for the liberal cause in Europe, and more again for their own party interests than they do even for the aggrandisement of France. We do not say that this is so. We trust that it will not prove to be so. But we are sure that if it does, the regeneration of France must be intrusted to worthier hands than to those of men who, if they may be judged by their recent manifestations of sympathy, would deserve and prize the decoration of the Grand Cross of St Januarius at the hands of Francis II., as least as much as General Goyon or Admiral de Tinan.

WHERE THE GOLD GOES.

THE DISPERSIVE POWER OF TRADE.

We must not permit the phenomena of the money market at this moment, however interesting or however temporarily important they may be, to divert our attention entirely from the permanent agencies which tend to distribute the precious metals throughout the world. The effect of the latter is seldom at any one time very apparent; it is generally disguised in great part by temporary causes which have aided in producing it; it is only when we look at considerable intervals of time that we can detect the slow and steady causes which are concealed beneath the prominent perturbing influences.

We have an instance of this at the present moment. Various temporary causes are combining to create a drain of gold upon the Banks of France and of England. A deficient harvest *in* both countries, a large foreign expenditure *by* both countries, large investments of French capital in foreign countries, to some extent, perhaps, political apprehension abroad, are all tending to withdraw specie from the two Banks which contain the largest European reserves of

it. If we looked only to the most conspicuous phenomena of the moment, we might not think that any other explanation of them was required. Causes such as these might seem sufficient to account for the temporary effects which we see. It is only when we take a somewhat more extended view that we are struck by the traces of a more permanent agency.

We pointed out on a recent occasion that the two Banks of France and England have lost *twelve millions and a half sterling* in fifteen months; that the bad harvest can scarcely be the cause of this great diminution, inasmuch as the drain began before the harvest was known to be bad, and as it can hardly yet have produced all the effects we must expect from it; and that so great an absorption of bullion is much too great to be explained by the expenditure of the allied Governments in China, or by the remainder of the temporary causes we have mentioned.

On that occasion we likewise pointed out that within the last few years we have seen the reverse phenomenon. At that time the aggregate bullion in the Banks of France and of England increased nearly twenty millions in six months.

	£
On December 30, 1857, the bullion in the Bank of England was	8,788,000
On June 30, 1858, the bullion in the Bank of England was	18,162,000
On January 14, 1858, the bullion in the Bank of France was	10,400,000
On June 10, 1858, the bullion in the Bank of France was	20,400,000

—the most extraordinary augmentation of bullion, taking both reserves together, which the world perhaps ever saw.

The cause of this great diminution was at that time very apparent. The trade of the whole world had been suddenly impaired by the panic of 1857; it sank in a few months from an eager excitement to a dull quiescence. In consequence, the precious metals were no longer dispersed through the world by the constant instrumentality of an extending commerce, and they accumulated in the two Banks which keep a large part of our European reserve, to which coin no longer used by the public most easily finds its way—in which the bullion from Australia and California is for the most part first deposited. *Now* we have the reverse cause and the reverse effect; trade is now as active in distributing gold and silver through the world as it was inactive in the spring of 1858; accordingly the Bank reserves are diminished now, just as they were increased then. How trade employs the precious metals, is to us in this country rather a puzzling question. We have invented so effectual an apparatus of refined instruments for economising coin, that we hardly understand how more business requires more coin. At least it requires a careful exposition to explain it. We see so little more coin in a house of brisk than in one of languid business, that we hardly believe that any more is needed.

On looking carefully at the subject, we shall see that two great branches of the commerce of the world employ, as a rule, a great deal more gold and silver whenever they may happen to be suddenly augmented. These are the whole trade, speaking broadly, of rude countries, and the retail trade of all countries. Our imagination cannot easily represent to us these vast aggregates; and no figures can elucidate them completely. Still, if we dwell on the subject but for a moment, if we think how many rude countries there are in the world, and how great the retail trade of every country is, we shall then become aware that a rapid and simultaneous increase of these must be a most potent force, and since every such increase employs some money, a large increase must employ a great deal of money.

Again, we must be careful not to fix our attention too exclusively on the money which passes from hand to hand. This is greatly augmented by an increase of trade, but it is not the only money which is so augmented. The money which is hoarded is increased still more. In every great augmentation of trade, there is a certain augmentation of the currency "that clings to the public," and in every rapid increase of trade such is especially the case. On such occasions money is apt to come into the hands of persons who never expected it, who do not know how to use it, and who, in consequence, hoard it. The extent to which this practice is carried is necessarily uncertain; we have no means of measuring it. The small hoards of petty savings, great as is their cumulative amount, are, in detail, the most imperceptible of minute facts. They are small in themselves, and the only persons who know anything about them try to conceal what they know. But we have an analogous accumulation in our own country, the increase and diminution of which can be accurately measured. If we consult the returns of the savings banks in this country, we shall immediately see the instant effect of good times and bad times, of brisk trade and of quiescent trade. The funds deposited in the savings banks were—

	£
In 1846	31,743,000
1848	28,114,000
Showing a diminution of	3,629,000

whereas—

	£
In 1850 the deposits were	28,930,000
1854	33,736,000
Showing an increase of	4,806,000

Both the augmentation and the diminution in these remarkable cases are to be accounted for principally by the respective characteristics of the trade of the two periods. We have no similar information as to the fluctuations in the metallic hoards of rude countries or of any countries; but we may be sure that the fluctuations themselves are similar, for good trade brings new money to the poor in countries where savings banks are *not* found as well as in those in which they are.

Again, in computing the quantity of the precious metals actually employed in commerce, we must always remember that there is one very large department of trade in which bullion is the only coin. The balance of the account between nation and nation is of necessity settled in the natural and universal money—in the precious metals. The more rapidly international trade extends, the greater, other things being equal, will be the bullion employed in the settlement of the exchanges.

Lastly, a diminishing trade brings back to England, and also to Europe in some measure, though not in so great a measure, capital employed at a distance. We pay cash to a large part of the world for that which we buy, and we give credit to a large part of the world for that which we sell. In consequence, an extending trade always tends to turn the balance of trade against this country, and to some extent against Europe also; and a diminishing trade always tends to make it favourable to this country. In the former case, we are sending funds abroad to carry on new operations there: in the latter case, we are drawing home funds which we find on trial that we can no longer employ with profit abroad.

In these several ways, therefore, extending commerce has a *dispersing power* over the precious metals, and we must carefully bear this in mind, for it is a permanent cause steadily operating on the reserve of bullion in the great seats of commerce, though its effect is frequently concealed by that of more prominent, sudden, and temporary agencies.

GRAND TRUNK RAILWAY OF CANADA.

REPLY TO CANADIAN CRITICISMS AS REGARDS THE RESPONSIBILITY OF THE PROVINCE.

We fully expected that the two articles which appeared in this paper on the 6th and 13th October ultimo, on the history and present position of the Grand Trunk Railway of Canada, would excite criticism and discussion in Canadian newspapers and in Canadian circles. We wrote the articles with a deliberate view to such a result, and we have not been disappointed in the effects which have been produced. We have to express our sense of the tone of candour and moderation in which the newspapers of the Province have, with scarcely any exception, commented upon the statements and suggestions we put forward, and we have been particularly glad to find that scarcely any exception has been taken in any quarter to the general fairness and accuracy of the outline of the origin, design, and history of the Grand Trunk scheme contained in the first of the articles referred to.

As regards one portion of our statement, however, there has been in many of the Canadian newspapers the expression of decided opposition and dissent. We allude to those passages in which we contended that, considering the nature of the Prospectus under which the Line was originally launched in this country early in 1853; the Province is morally bound to stand by the concern in its present completed state until the gross traffic reaches 25*l* *per mile per*

week—that is, 25,000*l* per week upon the 1,000 miles at work. We coupled with this claim on the one hand, the fullest admission on the other that the Province has a right to call *at once and peremptorily* upon the shareholders to satisfy themselves and the official authorities that the Line in all its parts is managed with the skill, economy, and vigour of a purely commercial undertaking,—and we added that under such management, and with a reasonable supply of rolling stock and plant, we firmly believed that the Line contains within itself even at this moment resources capable of providing for the interest on all classes of bonds, and of affording something for the share capital and the postponed advances of the Province. At the time we wrote, viz., early in October last, the weekly traffic was 12,000*l* per week. It has since risen to say 16,500*l* per week, and has maintained that figure for several weeks. And not only has it maintained that figure, but it is perfectly notorious that with adequate rolling stock the returns would have approached 20,000*l* per week, or within 5*l* per mile per week of the Prospectus statements.

Among the most important of the criticisms which have appeared in Canada is an article in the *Journal de Quebec* (copied into the *Times* of 19th November ult.) by Mr Joseph Cauchon, at present a member of the Legislative Assembly of Canada, and in 1857 a member of the Ministry as Commissioner of Crown Lands. We have to thank Mr Cauchon for the tone in which he refers to ourselves, and while we attempt to vindicate our own views against the arguments he advances, we hope to do so in a manner which will indicate the respect we entertain for our opponent.

Mr Cauchon says, in substance, that the Province is in no way whatever committed to the promises of the Prospectus of 1853, inasmuch as that Prospectus was the result of private intrigues in Canada of certain persons from England who as contractors were desirous to get up a great Railway Company —that these persons formed exaggerated opinions of the traffic to be secured—that they imparted these opinions to official men in Canada and to leading capitalists in London —and that hence arose the original Prospectus. Mr Cauchon contends that with that document the Province has nothing and had nothing whatever to do. The intentions of the Province, he says, are to be alone gathered from the Acts of its Assembly, and those Acts confine themselves to promising the aid of 3,111,000*l* and no more.

The reply to this argument is threefold: first, as regards the alleged intrigues of the contractors; second, as regards the Prospectus itself; and third, as regards facts which have occurred since 1853.

In the first place, then, the intrigues referred to are, we submit, wholly beside the question. Very possibly they took place precisely as Mr Cauchon describes them. But when it is contended that the objectionable or mistaken proceedings of private adventurers, carried on privately, and kept, and intended to be kept, scrupulously secret from the general public, are to be held to supersede a solemn public document, the doctrine is so new and startling that we are persuaded that the first person to doubt its correctness will, on reconsideration, be Mr Cauchon himself.

In the next place, as regards the Prospectus. The two very first lines of that document announced as "Directors in "London" two leading names in their *official capacities* as "*Agents of the Province of Canada and Directors of the Com-*"*pany on behalf of the Canadian Government.*" Words have no meaning if that announcement does not implicate the Province of Canada as represented by its established and regular Government. Following the announcement are the names of six members of the then Canadian Administration. Attached to the Prospectus—and specially referred to as proving the fact of a traffic of 25*l* per mile per week—is an official despatch by Lord Elgin, signed by him as Governor-General of the Province. Mr Cauchon, we are sure, will not require us to say more on this part of the case.

Then, in the third place, as regards facts which have occurred since 1853, we invite Mr Cauchon's attention to the following particulars.

In March, 1856, a memorial was presented from the Grand Trunk Railway to the Governor-General (Sir Edmund Head) praying for further aid from the Province,—and in pursuance of that memorial further aid was granted by the Canadian Legislature by means of the Relief Act of 1st July, 1856.

Now what are the arguments put forward in this Memorial, and by the Relief Act of July, 1856, admitted as valid by the Canadian Parliament? Why in the second and third paragraphs of the memorial we read as follows. Speaking of the London Prospectus of 1853, the memorial says:—"Through the co-operation of the *London financial re-*"*presentatives* of the Province the British public were invited "to take part in the scheme—which was represented in the "Prospectus published at the time, and truly so, as pregnant "with the most beneficial consequences to the Province, as "well as offering a desirable investment to those who in "England were thus induced to subscribe to the undertaking. "*In this Prospectus the Premier and several of the principal* "*officers of the Provincial Executive appeared as Directors, and* "*a member of the Colonial Government is published as President,* "while the *co-operation and assent of the Legislature and* "*Canadian public generally* is clearly attested by the fact of "Provincial aid exceeding 2,000,000*l* being devoted to the "support of the enterprise.....Your memorialists consider "it of very great importance for the fair and equitable con-"sideration of their case that it should *be clearly and* "*distinctly understood that the Province of Canada—not merely* "*through its Legislature, but by the direct intervention of its* "*supreme Executive Officers*—assumed a very large share of "responsibility towards the individuals who embarked their "private means in the Grand Trunk Railway."

To the exceeding explicitness of these statements we will add only three short comments. (1) When this memorial was presented, we believe that Mr Cauchon himself was in the Ministry and in charge of the very Department to which the memorial would be officially committed. (2) We challenge him to produce any act or reply of the Canadian Legislature denying the truth of the statements of the Memorial to which we have drawn attention. And (3) we put forward the Relief Act of 1st July, 1856, itself, which without one single word of qualification or comment declares in the very first line of the first clause, "that it is expedient "to grant facilities in aid of the Grand Trunk Railway of "Canada."

But this is not all. In April, 1857, a Second Memorial was presented by the Railway Company to the Governor-General praying for further aid, and that aid was granted without any comment or qualification by the Second Relief Act of 27th May, 1857. The second memorial repeats in substance the arguments and statements of the first, but draws special attention to the facts—(1) That the Railway Company has been required by the Province to spend nearly 2,000,000*l* on Lines which on commercial grounds are indefensible. (2) That the effect of the Grand Trunk scheme had been already to establish "an enormous increase in the value of "land in the neighbourhood of the Line,"—that "Canada and "Canadians had profited largely by the expenditure of several "millions of English capital,—that private enterprise and "labour have been stimulated to an enormous extent, and "the producing power of the country largely increased,—and "that several of the chief towns of Canada have experienced "in a surprising degree the full benefit of an awakening "traffic yet only in its infancy."

This second memorial was also referred to Mr Cauchon's own Department,—and we again ask him to produce any official and conclusive denial of its statements.

We entertain no fear, however, either of Mr Cauchon, or the people or the Legislature of Canada contaminating themselves in the least degree by doctrines or conduct akin to repudiation. In the excitement of debate allegations are hastily adopted which on reflection are regarded with regret and surprise. We have full confidence in the integrity and good sense of our Canadian fellow-subjects. The reviving traffic of the Line has already dispelled no little of the alarm and irritation which prevailed a short time ago. The further aid required from the Province is not formidable, and will assuredly be given, and always subject to a *speedy, unsparing, and persistent* reform of everything unsound, extravagant, unskilful, and unwise in the administration of the Line from one end to the other; the Grand Trunk Railway will yet become as advantageous to the English investors as it is already beneficial and indispensable to the Province which it enriches, and through which for a thousand miles it fosters every element of prosperity and contentment.

LORD ROBERT MONTAGU AND HIS ANCESTOR.

That amiable enthusiasm for losing causes, that eagerness to disavow all respect for mere Success, which Lord Robert Montagu brought so reproachfully before the English public in the *Times* of Tuesday last, illustrating it by his philippic against Garibaldi as "a filibuster, murderer, and cut-throat "adventurer," can, we think, scarcely be hereditary. There are but few of Lord Robert Montagu's noble ancestors who are conspicuous in the history of their country, but it so happens that the only one who is, was that Edward Montagu, Lord Kimbolton, afterwards Earl of Manchester who led the forces of the Parliament on more than one occasion during the revolutionary war, and who was described by the Scottish Commissioner Baillie,—on account of his remarkable pliancy to the plans of Cromwell,—as a "sweet, meek" man. Indeed, so far was this illustrious man from partaking of his descendant's bitterness against success, that not only did he join in a successful revolution against the King, but subsequently his most doubtful act was, we will not say his concurrence in the restoration so much as the culpable weakness with which he consented to sit among the judges of the regicides whom, though he had never agreed in their policy, he assuredly did not think deserving of punishment or death. He had only too great a respect for the winning side. Surely Lord Robert Montagu has not been guilty of the impiety of covertly assailing, as in a figure, his own distinguished ancestor by those rather violent words "filibuster, "murderer, and cut-throat adventurer." No doubt, though Lord Robert's "language is coarse, his meaning is obscure," and it is perhaps possible to maintain that in the vehement but inarticulate and ungrammatical sentence which contains these words, he is drawing a distinction in favour of the home-made rebel, as compared with the foreign interloper. After apparently admitting that an invasion of Ireland might possibly be grounded on less certain evidence of misrule than the invasion of the Two Sicilies, Lord Robert proceeds:—"But even if we were to grant the "substance of this objection: yet if a man who did not "suffer from the oppression which we allow to have "existed,—who was not connected with the country "which he invaded, and whose Sovereign and people were "at peace with the State which he overturned,—I say that "the act of such a man is no better than the act of a fili- "buster, murderer, and cut-throat adventurer." This means, perhaps, that Lord Robert Montagu would condemn his ancestor's acts in less scurrilous terms than the Italian hero's; on the ground that whatever oppressions Charles I. practised, Lord Kimbolton shared the burden.

Still we doubt whether either Charles I. or Francis II. would quite agree to this extenuating plea for the home-made rebel. They might surely say that the crime of the men who invited intervention is worse than that of the men who disinterestedly obeyed the summons. The former have something to gain, the latter only something to lose by the adventure, so that the motive at all events is the purer in the latter case. Indeed, we are not left in doubt how Charles I. viewed this question as to Lord Robert Montagu's ancestor. The King did happen to suspect Lord Kimbolton of appealing for what he called "foreign" aid. It was only Scotch aid, it is true; but perhaps the Scotch were about as much of foreigners to the English, as the Sardinian volunteers are to the Neapolitans. Charles evinced his suspicion by articles of "high treason" against the noble Lord, and the celebrated five members of the House of Commons who were his colleagues in the supposed treason. These articles happen to be expressed in very much the same language in which Francis II., had he regained his kingdom, might have indicted Liborio Romano and other subjects of his whom he might suspect of having been in collusion with Garibaldi before his entrance into Naples. Charles accused them "that they "have traitorously endeavoured to subvert the fundamental "laws and government of this kingdom, to deprive the King "of his regal power, and to place in the subjects an arbitrary "and tyrannical power over the lives, liberties, and estates "of His Majesty's liege subjects." "That they have endea- "voured to draw His Majesty's late army to disobedience to "his commands, and to side with them in their traitorous "designs." "That they have traitorously invited and en- "couraged a foreign Power [the Scotch] to invade His "Majesty's kingdom of England." This was Charles's view of Lord Kimbolton's supposed treasonable correspondence with the Scotch; and we can scarcely doubt that he would have thought any Scotch leader who had answered the summons innocent in comparison.

For our own part, we do not expect to convince Lord Robert Montagu that Garibaldi is stainless, by showing that his ancestor was deeply involved in a policy of a far more debateable kind. He is an amiable politician, likely enough, no doubt, to prove that the "sweet, meek" qualities attributed to his great ancestor are hereditary, if he should ever come under the influence of a strong Tory leader, but at present showing a weakness for paradox which might make it an additional pleasure to him to disown the example of the only Montagu whose political repute is chronicled in English history. Still it may be a warning to him to be more careful in his use of eloquent denunciation. He may not scruple, perhaps, to condemn ancestral acts; but he would scarcely like to do so in ungentlemanly language. Whatever may be the motives of Garibaldi's conduct,—they have been the same in kind with those of the Earl of Manchester and his political colleagues, while probably capable of a more triumphant justification. And Lord Robert Montagu's high breeding would shrink at once from the vulgarity of applying such terms as "murderer" and "cut-throat adventurer" to the Earl of Manchester or any of his companions in arms.

THE INDIGO CRISIS IN LOWER BENGAL.

For some weeks past, each Calcutta mail has brought the serious intelligence that no indigo will be sown this autumn in those districts of Lower Bengal which are celebrated for producing the best indigo in the world. The Calcutta correspondent of the *Times* declares that this disaster, involving the ruin of a vast number of English planters and the loss of enormous property, is entirely due to the maladministration of the Civil Service. The *Times* itself adopts this view, and makes it the ground for demanding the entire reconstruction of a bureaucracy which, inheriting the traditions of the East India Company, obstructs the progress of commercial enterprise and the investment of British capital in India. It is strange that the *Times* should ignore the arrival in this country, more than a month since, of a Report drawn up by Commissioners appointed specially to inquire into this indigo question, and showing conclusively that the present crisis has been brought about by causes quite unconnected with the civil administration.

In consequence of the disturbances which broke out in the indigo districts last spring, and of which particular notice was taken in these columns,—the Government appointed five Commissioners to inquire into the whole system of indigo planting, and the relations between the planters and the ryots and landowners. The Commissioners sat for three months with open doors, inviting all classes to come forward and give evidence. They sat part of the time at Calcutta and part at the seat of the disturbances,—and examined 134 persons. The greatest interest was felt in their proceedings, and the natives came in crowds in the hope of being allowed to give their testimony. The body of evidence thus collected is of great and permanent value, as having reference not only to indigo cultivation, but to the various important subjects growing out of it, such as the state of the police, the tenure of land, and the general condition of the country. Unfortunately, the report is not signed by the Commissioner selected to represent the planting interest. However, he does not call in question the main facts alleged in the report, but only one or two minor points out of the great number adverted to.

With such a body of evidence at hand as we here possess, it would be most unjust to adopt opinions on the question from the *ex parte* statements of local correspondents who obviously write under the influence of violent partisanship. We shall endeavour to put our readers in possession of some of the main facts of the report, though at the risk of repeating almost word for word what we said on the subject, some months ago, when the indigo disturbances first broke out.

It must, in the first place, be carefully borne in mind that indigo cultivation is not in jeopardy throughout Bengal, but only in those districts where a particular system of growing it has prevailed. It must be borne in mind, too,

that there are several systems under which indigo is grown, and it is only one of those systems which has produced the present violent opposition on the part of the natives.

These systems may be classified under two main heads: 1st, (the *neej* or "own" system) where the cultivation is carried on like a "home farm," and where the planter cultivates, by hired labour, lands which he holds himself; and 2d, (the *Ryotee*) where it is carried on by ryots on their own lands, under contract with the planter. The first is of course unobjectionable, but unfortunately not the one prevalent in the districts which have been the seat of the recent disturbances. However desirable, it cannot be much extended from the want of hired labourers in a population which consists of tenant-proprietors.

1st. Indigo may be grown, like any other crop, in any other part of the world, viz., without any contract at all, but as a speculation on the part of the cultivator who sells his crop at the market rate to the planter, just as he sells his sugar cane or his rice to the dealer. In this way indigo is grown in some places.

2nd. The planter may make a contract with some substantial person, cultivator or not as the case may be, to deliver so much indigo by a certain date at his factory, and he may make an advance to the contractor to help him. The contractor makes his own arrangements with the villagers, and no disputes can possibly arise.

3rd. The planter may as in Behar (North Bengal), adopt the following system. He gives the ryot or peasant-proprietor an advance of 6s for every beegah* (one-third of an acre) which the latter undertakes to sow with indigo. If the crop fails, the ryot gets 2s more in addition to his previous advance, for his time and labour and the occupation of his land. If there is a crop, it is valued on the ground and paid for according to the estimate then and there made, the cultivator receiving 6s or 7s a beegah, besides the original advance. But above all, under this system, the transaction ends with the harvest, and the accounts are each year finally closed between the parties.

Now, even under this last system, although there may not be much gain to the ryot, there has been none of the intense and dangerous discontent, or the acts of violence and oppression which have characterised the system so generally prevalent in the indigo districts of Lower Bengal.

4th. Under this latter system, the planter, when his factory was first established (probably at a time when indigo was much more remunerative to the ryot than it is now), sent out to the ryots in the neighbourhood, and induced them to enter into contracts to grow indigo on a certain portion of their lands, *selected by the planter*, for a year or more. Before the sowing commenced, each ryot received an advance of 4 shillings for every beegah of indigo. When he delivers the plant at harvest time, he is credited with 2 shillings for every 4, 6, or 8 bundles (according to the custom of the factory—not according to the rate in the market). The manufacture then commences, and when completed, the accounts with the ryot are adjusted. To his debit are set down the advances made to him, the value of the stamp on which the contract is engrossed, the seed (generally at less than cost price), the expense of carting the plant to the factory, and the amount of any previous debt. To his credit is placed the value of the indigo, and a balance is struck. If he has an excess to receive, he has it paid down. If otherwise, the debt remains against him, and he receives advances for next season's operations,—not at the full amount of the lands for which he has engaged, but with a deduction proportionate to his debt. The same process is repeated from year to year.

Now, of many evils connected with this system, the one which is so intolerable is *the irremediable and permanent indebtedness of the ryot, arising out of the insufficient price given for the indigo.* As to the unremunerative character of the cultivation, the evidence is overwhelming. The planters themselves are obliged to admit the fact. The crop is one which, of all crops in the world, is most uncertain, and the whole risk is thrown upon the ryot. The price of all other produce has risen enormously in the last few years, so as to be more and more profitable, yet the planters refused to give an increased price for indigo. We believe, from information before us, that a ryot may make exactly ten times more profit from a rice crop than from an indigo crop: in fact, that the latter, as one planter admits, "does not produce enough "to cover the advances."

How is it, then, the English public will ask, that the ryot enters into such a ruinous engagement? The Report says that an immense proportion of these engagements are *old* ones, carried on from year to year from father to son, and that owing to the low price given, the ryot cannot shake himself loose from them. So difficult, indeed, is it to induce any ryots to enter into new engagements, that it is notorious that factories have been alone kept going *by the balances.* If a factory had not a host of old balances to hang *in terrorem* over the ryots, it would have to shut up. It is this intolerable and irremediable, this hereditary weight of debt that has created such intense irritation on the part of the natives. The bulk of the engagements were probably made when, as compared with other crops, indigo was not so unremunerative as it is now. In other cases, both then and now, a ryot is half tempted, half bullied into a contract. An advance is pressed upon him at a season when he is in great need of money, for he lives from hand to mouth; and, above all, it is pressed upon him by a planter who has bought the manorial (zemindaree) rights;* and who, in that capacity, has ten thousand means of oppressing him. In fact, he buys the manorial rights at immense cost for the sole purpose of having a command over the ryots. That such oppression is not a calumny, but a fact in many cases, is proved beyond a doubt, not only by this Report, but by the records of the Indian courts. Many planters may never exercise oppression, but when we find that they are in a position to do so with impunity, when oppression of the weak by the strong, of the ryot by the landowner, is the tradition of the country, a ryot always fears oppression, and can therefore be compelled by an "order" to do what what was wanted. If Planter A does not oppress, Planter B does, and the tradition is kept up. Casting aside all hearsay and mere rumours, there is distinct proof, vouched for by this Report, of a *practice*, on the part of many planters, of kidnapping, breaking up, and deporting ryots who give them trouble, or of carrying off their cattle. Well, when an engagement is once made and an advance once taken, there is no getting rid of it. So valuable, so indispensable, is every such debt to the factory, that the planter will even pay ready money to the ryot for his indigo instead of crediting him with the value in the account, rather than allow the balance to be cleared from the books, and the man's name to be written off.

* The beegah in Behar is three times the size of the beegah in Lower Bengal.

* In other words, he buys the right of collecting the rents from the hereditary cultivators.

THE BOARD OF TRADE RETURNS FOR OCTOBER.

The Board of Trade Returns, just published, continue to show a decided increase in the foreign and colonial trade of this country, especially the former. The principal colonies of Great Britain have all been more or less affected by circumstances tending to depress their commercial prosperity within the last year or two, and consequently we shall see that while our imports from the colonies are still on the increase, our exports thither are either stationary or slightly declining in value. The declared value of the exports of October, and of the ten months ending with 31st October, will be seen from the following table:—

Exports for Month ended 31st October.

1857.	1858.	1859.	1860.
£	£	£	£
10,985,789	10,268,797	10,717,873	11,232,181

Ten Months ending 31st October.

1857.	1858.	1859.	1860.
£	£	£	£
106,721,381	96,579,126	108,755,184	112,956,527

whence it will be seen that the increase in the ten months' trade is nearly 4 per cent. as compared with last year, and nearly 6 per cent. as compared with 1857, the year of greatest previous prosperity.

The increase for the *month* of October of about 520,000*l* may be accounted for by the increased exports of cotton goods and cotton yarns as compared with October last year, the increase on cotton goods being upwards of 400,000*l*, and on cotton yarns more than 100,000*l*. The increased export in the former case is chiefly in the exports to Portugal, Italy, Turkey, Egypt, Brazil, and the British

East Indies,—and in the case of cotton yarn to Turkey, Holland, Prussia, and China. The woollen exports of the month are rather diminished as compared with the same month last year.

But the fluctuations for a single month are of scarcely any real importance;—those for the ten months may indicate some permanent causes.

The increased value of our principal exports for the ten months ended 31st October, is divided as follows between the two principal trades in which that increase has taken place. We have taken in 1857, as 1858 was a year of exceptional depression.

TEN MONTHS ENDED 31st OCTOBER.

	1857.	1858.	1859.	1860.	Per centage since 1857
	£	£	£	£	
Cottons:—					
Goods	24,770,734	26,045,587	30,414,161	32,773,758	
Yarns	7,555,110	7,817,680	7,666,323	8,256,864	
	32,325,844	33,863,267	38,080,484	41,030,622	27 p. ct.
Woollens:—					
Cloths	2,652,350	2,186,415	2,424,507	2,528,413	
Mixed stuffs	3,359,696	2,760,888	3,562,253	3,702,373	
Entered at value	456,746	324,396	431,549	410,623	
Stockings	105,226	67,538	134,068	137,422	
Worsteds	3,011,629	2,727,982	3,590,061	3,541,149	
Woollen and worsted yarn	2,649,675	2,416,330	2,449,147	3,278,057	
	12,235,322	10,483,549	12,591,585	13,598,037	11 p. ct.

Hence we see that while the whole exports of the country have increased about 6 per cent. since 1857, the cotton exports, which now constitute near 37 per cent. of the value of our whole exports, have increased about 27 per cent., and the woollens and worsteds about 11 per cent. During the same period the linen exports have stood absolutely still, their value (including the yarns) in 1857 for the first ten months of the year having been 5,089,109*l*, and in the first ten months of this year 5,087,793*l*, while the exports of silk manufactures have declined not a little.

These tables also contain the declared value of the "British and Irish produce" exported to the different countries during the first three quarters (*nine* months) of the year as compared with the first three quarters of last year. We most remember that the *re*-exported imports are not included in this table, as they are in the usual monthly tables. From this it appears that the foreign trade of Great Britain has been far more favourable during the last year than its colonial trade, although the main increase since 1857 is due to the latter.

THREE QUARTERS ENDED 30th SEPTEMBER.

Exports.	1857.	1858.	1859.	1860.
	£	£	£	£
To foreign countries	67,731,384	56,072,051	62,992,478	68,339,696
— British possessions	28,004,208	30,238,278	35,044,833	33,384,650
	95,735,592	86,310,329	98,037,311	101,724,346

From this it would appear that while the increase of the nine months' home exports to foreign countries on last year has been about 8½ per cent., the decrease on our home exports to the colonies has been 5 per cent.; but that, looking to the period which has elapsed since 1857, the increase of our home exports to foreign countries has been less than one per cent., while the increase of our home exports to British possessions—India of course being the chief—has been 19 per cent., in spite of the falling off in the present year. Amongst the chief sources of increase of the foreign trade in the present year are the South American Republics, the Empire of Brazil, China, and, coming nearer home, Turkey, Holland, and the Hanse towns.

With regard to the imports, the quantity of cotton received for the month is small. The raw materials received are as follows:—

	OCTOBER.		
	1858.	1859.	1860.
Cotton ....cwts	333,681	454,328	267,314
Flax	171,906	183,782	183,900
Hemp	99,537	174,104	139,250
Raw silk ....lbs	818,208	706,396	723,497
Wool	8,418,901	8,518,927	10,100,508
Tallow ....cwts	178,203	233,743	204,787

There are largely increased receipts and a largely increased consumption of wheat; and also of coffee, sugar, tea, spirits, and wine.

ENTERED FOR HOME CONSUMPTION—OCTOBER.

	1858.	1859.	1860.
Grain—Wheat ....qrs	285,095	335,894	845,129
Barley, oats, peas, & beans	471,885	425,498	355,807
Indian corn and maize	252,364	208,505	135,211
Wheatmeal and flour..cwts	179,836	94,833	811,439
Coffee ....lbs	2,879,336	2,880,468	3,170,883
Sugar, unrefined ....cwts	747,457	706,004	853,517
Tea ....lbs	6,262,178	5,708,508	7,025,535
Spirits—Rum....proof gals	275,710	299,400	315,916
Brandy	102,426	123,977	140,486
Geneva	2,231	2,283	9,708
Wine ....gals	634,501	641,565	645,434

With respect to the last item, the French wines show the only considerable increase of consumption.

Agriculture.

AGRICULTURAL SOCIETIES.

CONFUSION OF DUTIES.

NOTHING more strongly marks the amateur and non-business character of most meetings of agricultural societies than the manner in which agriculture and its belongings are treated at the high table by the landowners and notorieties there assembled. It was observed by some supercilious gentleman, at one of these meetings early in the autumn, that "farming is a bore," and politics being excluded, he went off into the "volunteer movement" and other gimcrackeries which happened at the time to occupy the aristocratic mind. And this has proved the key-note of the season for most of those who deem it part of the "duties of a country gentleman to attend and speak at agricultural meetings. Others of a more practical turn of mind generally conceive it their duty to take the wider scope of affording the farmers some instruction as to the best modes of managing their own business; though we can scarcely congratulate them on any eminent success.

At the recent Abingdon (Berks) agricultural show of "roots, cattle, and other farming produce," Mr John Walter, M.P. for the county, performed the part of chief spokesman and farmers' Mentor. After adverting to the rule excluding politics, and evading it by inuendo and insinuation, barely admitting of reply if any one present had thought it worth while to differ from the political conclusions implied, and somewhat contemptuously intimating that the benefit of two prizes he had gained would "go where they were really deserved—namely, to his excellent farm bailiff," he said: "I think there is an opinion very general throughout most counties that it is rather an unpardonable sin than otherwise for any country gentleman to presume to know anything of farming. A country gentleman may be a first-rate master of hounds; he may hunt or he may shoot, but he must know nothing of farming. If he does, his knowledge is only to be obtained at such a ruinous cost, that very many do not like to venture on the experiment." He then went on to say he farmed a great deal of land himself, and he was not satisfied with the present state of things, "for the popular notion is that it is not possible for any country gentleman to farm with either profit or credit to himself. I wish to see that state of things altered, which supposes that a farmer's profit can only be made up of little odds and ends—by a kind of picking and stealing as it were—a cheese-paring system of economy!" And he said he had heard that farmers were jealous of and at market rather combined against a gentleman-farmer, but he did not "believe in combinations of such shabby and unhandsome character." And added: "I should very much like to know—that is, if there is any secret in the matter—why it is supposed that a gentleman, if he has a good bailiff, cannot farm as well as any farmer.....And I should like, when I next offer more prizes, to offer one at least to the bailiff who is able to produce the best balance sheet in his master's favour."

There are numerous reasons why gentlemen of fortune farming a part of their own land will never, as a rule, make farming pay, and, instead of attempting a vain thing, they had far better try to learn that which is strictly their own business, *i. e.* so to manage their estates as to render their farms attractive to the best class of professional farmers. As to farming being made to pay only by "cheese-paring savings," the remark only shows how far Mr Walter has wandered from the true causes of the unprofitableness of farming in the hands of proprietors. That farming is a business which of all others demands strict attention to details is notorious, and that attention is seldom given where the proprietor of a farm is also its occupier. But the chief reason is, that the gentleman-farmer is without the stimulus of necessity and self-interest. Whether the home farm pays or not is a mere question of a few cheques more or less per month on the squire's banker; and a bailiff, be he ever so competent and zealous, naturally, nay necessarily considers appearances rather than profit. He does not stop so often to consider whether a given outlay will pay as the farmer does, and if he did, he would very soon find his master complaining that something or other was not in such good trim as that of My Lord This or Sir John That. Then needlessly expensive buildings are often erected, and processes doubtless very complete and interesting are adopted *and continued* by the farming landowner with but little regard to profit. Again, the farm of the great proprietor is commonly made subservient to the uses of his establishment. The bailiff of a considerable landed proprietor told us the other day, rather complainingly, that he had every year to draw about 230 tons of coals for the use of the Great House a distance of more than six miles, and that he had really no

more farm horses than were necessary for the complete cultivation of the home farm. Now this was doubtless very judicious management on the part of the master, who combines the amusement of farming with the other *agremens* of a large country establishment. But it is not farming in a professional sense, and no arrangement such a country gentleman could make would ever make his farm show, on a real and true balance sheet, a profitable result. The conditions under which the real farmer and the gentleman-farmer cultivate their farms are altogether different, and Mr Walter's proposed prize to the bailiff who produces "the best balance sheet in his master's favour," will probably produce an imposing balance sheet, but no profit. Even in his own speech Mr Walter betrays the different way in which landowners and farmers regard farming. He assumes that prizes for roots and fat cattle tempt farmers to grow more roots and fat more stock than they would do without such inducement, yet he himself wins such prizes, and throws them to his bailiff as utterly beneath his own notice. And this typifies the differences between the real and the gentleman-farmer. It is by bold outlays in combination with a cautious attention to details and close observation of results that the professional farmer can alone make business answer, and these are beyond the reach of the country gentleman.

The inevitable conclusion is, that these local agricultural societies are of no practical value to husbandry, unless they produce active competition amongst farmers as stock shows, and that unless they embrace a wide area they never can produce such a competition. Indeed, Mr Walter suggested that some sort of amalgamation should take place, so that "an association might be established which would bring into competition all the farmers from all parts of the county." This is assuredly the only way of making a society useful. Whether the farmers of Berks are sufficiently alive to the benefits of good stock beyond sheep, is a question for local people to answer.

Literature.

COMMERCIAL LITERATURE.

URE'S DICTIONARY OF ARTS, MANUFACTURES, AND MINES. Edited by ROBERT HUNT, F.R.S. Longman, Green, Longman, and Roberts.

THIS valuable standard work is now completed, and will take its place in the library by the side of those works of reference which, if brought up to the date of the day by new editions, may endure for many generations. We think Mr Hunt has fully carried out his programme, viz., (1) to furnish a reliable work of reference on all points connected with the Arts, Manufactures, and Mines; (2) to give the scientific student and the public the most exact details of those manufactures which involve the application of the discoveries of either physics or chemistry; (3) to include so much of science as may render the philosophy of manufacture intelligible, and enable the technical man to appreciate the value of abstruse research; and (4) to include such commercial information as may guide the manufacturer, and fairly represent the history and the value of such foreign and colonial productions as are imported in the raw condition.

Mr Hunt has fully carried out his design; those who possess his book need never be at a loss for information, and most valuable and practical information, on the subjects which the work is intended to elucidate, and they will be assisted, and materially assisted, by nearly two thousand engravings on wood with which it is illustrated. These engravings are not only finely executed, but executed with that correctness of detail on which the value of engravings intended to illustrate the machinery employed in our mines and manufactures and the fine arts mainly depend. We believe Dr Ure's original work went through many editions: we are quite sure that an increased popularity, from the great extent of original matter which has been now introduced, is in store for the present edition; in fact, it may almost be looked on as a work retaining all that was good of the old dictionary, but going far beyond it in general information.

LETTS' DIARY FOR 1861.

NOTHING more nor less can be said of this diary than that it is excellent. Every pains has been taken to store it with useful information, and, what is of equal importance, the information is not only useful, but accurate and well selected. "Letts' Diaries" are of every variety of size and price, and this places them within the reach of rich and poor. Besides all the information a diary ought to contain, there is a remarkably concise commercial summary and chronological statement of the events of 1859. This summary appearing only as it does in the diaries of 1861 is rather out of date; it might be carried down to as late a period as is consistent with the due publication of the diary and the supply of it to its innumerable purchasers abroad. In commenting on the price and fluctuations in cotton, why are they confined to fine Surat? Surely there was something done also in American cotton. We point out these small faults, for we should wish to see so very useful a book as "Letts' Diary" as perfect as possible.

DE LA RUE'S IMPROVED INDELIBLE DIARY AND MEMORANDUM BOOK. 1861.

DE LA RUE'S RED LETTER DIARY AND IMPROVED MEMORANDUM BOOK. 1861.

THESE two little books are each complete of their kind. The former is Mr De la Rue's well-known Indelible Diary, bound up into a pocket-book which will also serve as a purse. It is edited by the director of the Hartwell Observatory, Mr Pogson, and contains, as does also the Red Letter Diary, two views of Mars on the 20th April, 1856, as a frontispiece. The Red Letter Diary is one of the best now published. The paper and printing are very good, and it contains all the indefinable requisites which are alone appreciated by the systematic diarist.

GENERAL LITERATURE.

A HISTORY OF ENGLAND DURING THE REIGN OF GEORGE THE THIRD. By WILLIAM MASSEY, M.P. Vol. III. 1781—1793. John W. Parker and Son.

THE scale on which history is written has of late years become so enlarged, that a work like Mr Massey's, which eschews this modern system and adheres to the old rule, is likely to prove disappointing to ordinary readers. Nor will Mr Massey's style of writing tend to lessen this feeling. He is often an instructive, but he is not an animated writer; and for any interest which his narrative may excite, he must rely on the judgment rather than the enthusiasm of those who glance through his pages. His volumes are a critical summary of the leading features of the reign, and not a dramatic reproduction of the past, which carries the reader along with it to the conclusion at which the author himself has arrived. The eventful passages of the American and French Revolutions do not live again in Mr Massey's notice of them. Nor has he any particular power of analysing and delineating character, though his judgments on men are trenchant and unreserved. Clearness of exposition and carefulness in the examination and reception of facts are the chief merits of this history, which of course has the advantage of being based on the latest publications of family papers bearing on that period.

Hatred of the Whig party, and not merely a lenient but often a favourable judgment of the King's conduct, are the leading features of Mr Massey's history. We could understand and sympathise with the former feeling to some extent when we are dealing simply with the exclusive and oligarchic selfishness of the great Whig families in the earlier part of the reign of George III. But our author's bitterness is equally unrelenting when the section of the Whigs headed by Fox became the leaders of the popular party, and the only consistent advocates of civil and religious liberty. Our author's horror of the oligarchic tendencies of the old Whigs and of the democratic sympathies of the Foxites, though there may be and doubtless is a foundation for it in recognised facts, is so exaggerated and one-sided, and marked by so little discrimination and breadth of argument, that while conceding to him the merit of having tarnished the fair fame of several of the leading statesmen of that time, we are unable to recognise in him the fit qualifications for our pilot among the political shoals and quicksands on which so many great reputations were wrecked and lost. We have still less sympathy with the attempt to set up once more George III. on a pedestal of private virtue. That some of his worst faults may be explained and palliated by the disease which lurked in his mind through his whole life, is the utmost amount of charity which we can extend to his cunning and dissimulation—his malignant and inveterate rancour to individuals—and his narrow and most mischievous obstinacy. That George, Prince of Wales, was a bad son as well as an unprincipled intriguer, does not render the father whom he injured necessarily a paragon of Christian excellence. The early mismanagement of the Prince, and the scarcely disguised hatred displayed towards him at a comparatively early period in a quarter where he had a right to expect indulgence, while they explain to some extent, though not entirely, his subsequent misconduct, are not pleasing traits in the true portrait of this model fatherly Prince. And although there are many stories of affecting marks of confidence on the part of the old King towards certain favoured individuals, there is no instance, so far as we are aware, of this friendship surviving the exhibition on the part of its recipients of the slightest independence of thought or action, or of any fixed opposition to any of the Royal wishes. The only men to whom the King seemed to cling with unbroken affection were those who had forgotten their dignity as men and citizens in the atmosphere of Court favour. That Addington was far more in the King's confidence than Pitt with all his services and devotion ever was, is a significant fact which says much as to the merits of that government by the "King's friends" which Lord Macaulay so energetically denounced, and which Mr Massey has taken under his protection.

We cannot pretend to enter on a criticism in detail of the manner in which our author has handled the events embraced in his present volume, which, as will be seen by the dates, commences in the midst of the American Revolution and ends with the first stage of the French. We are not disposed to do combat with him on behalf of Major André, who no doubt suffered justly, and probably as a matter of necessity; but we think some expression of indignation was called for on the part of the historian beyond

the feeling inevitably excited by the bare narrative of the harshness with which the *ignominious* form of the execution was adhered to, even to interment of the remains near the gallows. With all his high qualities, there is in the character of Washington a coldness, and at times a seeming want of generosity, which, we must confess, impairs much of our enthusiasm in his behalf. The censure which Mr Massey is compelled to pass on the King's "unwarrantable and treacherous conduct" in intimidating individually the members of the House of Lords into a vote against the India Bill introduced by his responsible advisers, would be unexceptionable and well-timed, if it were not coupled with an intimation that the Ministers were equally to blame for having recourse to a vote of the House of Commons on the proceeding, instead of placing their resignations in the hands of the King. When it is remembered that this last proceeding was exactly that into which the King wished to drive them, we cannot say that we think they would have been justified in abandoning the field in this manner while still possessed of so large a majority in that assembly which was understood to embody the sentiments of the nation. The King had in an underhand and unconstitutional manner attacked them in one House, and they in their defence in the other House affirmed a principle without the recognition of which all parliamentary privileges are an empty form. But to cover the King's delinquency with a countercharge, Mr Massey has recourse to the plea that the King had been dictated to in all the Ministerial arrangements, and that the Sovereign has a right to choose his Ministers, subject to the approval of Parliament. Why, then, was "the conduct of the Whigs from the beginning to the end of this business factious and perverse," if by an appeal to the popular House of Parliament they demonstrated that they enjoyed its confidence, and that the irresponsible advisers of the Crown did *not?* This may serve as a specimen of Mr Massey's treatment of the Whigs. Whatever may be our judgment on Fox's policy with respect to the French Revolution, and whether Pitt's and Burke's positions were irresistible or not, there can be little doubt that their conduct was characterised by all the exorbitancies of a blind fear of revolution, instead of a wise and dignified confidence in the fundamentals of our own constitution, and a prudent and timely reform of its more salient abuses. War with the French Republic may have been unavoidable sooner or later, but it was not necessary that it should be associated with the suppression of freedom of speech in this country—with the abandonment and denunciation as seditious of all reforms—with the maintenance of all the old props of bigotry—and with the promulgation in high quarters of the legitimist doctrines of the days of the Stuarts.

We have freely criticised what we consider to be the great defects of Mr Massey's history. We must add, however, that it contains much that is valuable and interesting to a political student of the present day; and, in justice to the author, it is only fair that we should give a passage which exhibits his clearness of exposition to advantage in connection with a subject which is now again occupying much of the public attention—Commercial Treaties with France. He is speaking of the year 1787:—

> In the recess of Parliament, the Ministry were engaged in maturing two measures of great utility and importance. The one was a commercial treaty with France, and other was a kindred project, the consolidation of various duties of customs and excise. An article in the late Treaty of Peace between France and England had provided for the negotiation of a commercial intercourse between the two countries. This was now happily effected by a Treaty based upon the most liberal terms, and conceived in a spirit which recognised the mutual interests of the great contracting parties. Prohibitory duties on the products of either country were to be repealed with some few exceptions. A moderate tariff, mostly for revenue purposes, was to be fixed on certain commodities. A great concession was made to France, abolishing the differential duties in favour of the wines of Portugal, and thus abandoning the famous Methuen Treaty which had been so long considered a masterpiece of British diplomacy. The Treaty was calculated to be highly beneficial to the trade, commerce and manufactures of both nations; and to ruin the contraband traffic, which, in spite of repressive laws and a revenue fleet, had long infested the channel. But above all, it was valuable in its tendency to allay the barbarous animosities which had subsisted for centuries, and to introduce relations of a more humane and generous character, between two great and enlightened communities.
>
> The Treaty which had been signed at Versailles, on the 28th of September, was submitted to the approbation of Parliament on its re-assembly in 1787. The wisdom of the policy which sought to open a market for our rapidly increasing manufactures in a neighbouring country, with a population of twenty-four millions, was so striking, that Opposition, unable to urge any substantial objection to the scheme, was forced to appeal to the jealousies and animosities between the people of the two countries, as a reason for not contributing to the prosperity of our ancient foe, even though we should by the same act advance our own material interests in a far greater proportion. Fox, while he laboured this argument, seemed to feel that the exigencies of party warfare compelled him to a course unworthy of a statesman. He admitted—and the admission was valuable as showing the improved state of public opinion—that he might be charged with giving effect to vulgar and illiberal prejudices; but he said, that these prejudices had engaged us in war, which had contributed more than any other circumstance to the greatness and glory of the country. Burke, whose penetrating intellect, when not obscured by passion or prejudice, surveyed the whole field of politics, though he could not quite bring himself to adopt the doctrine of his leader, that war and glory were more conducive to the prosperity of the nation than trade and commerce, yet was scarcely more reasonable when he denounced the narrowness of Pitt's mind in the conception of this measure. The Minister had unfolded his scheme in a speech, the singular perspicuity and intelligence of which, had conveyed information to those who had previously been little acquainted with the subject, and conviction to many, whose habitual opinions, though not hardened into prejudices, had received a violent shock from a proposal so novel as that of amicable intercourse with the ancient enemy of England. But Burke considered that the Minister had treated the business as a counting-house affair, a contention for custom between the Fleur-de-lis and the Red Lion! Such is a specimen of the taste and candour which too frequently gave pain and offence to his hearers, and drew down upon him rebukes such as he received on this occasion. Wilberforce lamented over the decay of faculties which, in better days, had compelled the assent and admiration of the House. Pitt affected to remonstrate with his friend for taking notice of such silly and petulant animadversions, and, in his bitterest manner, spoke of the philosophic statesman and consummate orator as a man crazed by ill-temper and spleen, whose condition, though challenging compassion, was not free from disgust. The manufacturing and commercial interest, though somewhat uneasy at the innovating spirit displayed by Pitt on all subjects connected with trade, were so much under the influence of his authority, that they hesitated to offer that opposition to his measures, which a similar policy, if ventured upon by any of his predecessors, would probably have encountered. On this occasion, the General Chamber of Manufactures and Commerce presented a petition to Parliament, in which, while they admitted that they had not been able to arrive at any certain judgment on the subject, yet craved some little delay in coming to a final decision on the treaty, on account of its awful importance to the interests which they represented. A remonstrance so hesitating as this was not very likely to offer any impediment to the progress of the measure, which the house affirmed by a very large majority.
>
> The other measure referred to, the plan for the consolidation of the Customs and Excise, was framed likewise with a timely recognition of the increasing importance of trade and commerce. A multiplicity of vexatious, uncertain, and unintelligible imposts were abolished, and in their place were substituted specific duties on every article; an arrangement which facilitated the transactions of commerce, simplified the collection of the revenue, and added considerably to its amount. The measure had originated in the Administration of Lord North, but had been laid aside until it was revived and brought to maturity by the diligence and discrimination of Pitt. The Bill passed with general approbation.

Faithful for Ever. By Coventry Patmore.
J. W. Parker and Son. 1860.

Mr Coventry Patmore is a genuine poet, and this little volume contains, we think, his best poem. It would scarcely be appropriate to fill the columns of the Economist with any extended criticism of contributions to poetical literature, however popular and deserving of popularity. But we need not carry out the strict theory of the division of labour so far as to decline to give some brief general estimate of the merits of any work which is likely to attract a considerable share of public attention. In a time when no man of any trade or profession likes to be thought purely one-sided,—when the soldier aims at the culture of the man of letters, and the man of letters undertakes to discharge many of the duties of a soldier,—when publications devoted to the lightest and most entertaining walks of literature find room for dissertations on Political Economy, there can be no impropriety in one devoted mainly to political and economical studies occasionally passing out of its special sphere to estimate in a few words the works of a rising poet.

Mr Coventry Patmore has all the distinctive marks of a genuine poet. Almost every verse that he writes lives with a life of its own, and kindles the mind of the reader into the mood to see and understand that which the writer saw and understood as he wrote it. Sometimes we may find fault with what he sees,—we may sometimes doubt whether it were worth creating, whether it deserved the imaginative power spent upon it,—but the vision is there, the imagination *is* kindled into seeing what is not before it, and what it would not have conceived but for the poet's art. No one can doubt this for a moment who reads any of Mr Patmore's recent poems. No one certainly can doubt it who reads this last. The language *lives*, and summons living realities before our minds. This is the true test of poetry. If any one wants evidence of this before embarking on the poem as a whole, let him refer for instance to Mr Patmore's description (p. 32) of the sailor's longing for land,

> "Where *Spring that goes not out to sea,*
> Lay laughing in her lovely glee,"

or to that exquisite picture of Knatchley Wood before and after the storm, in the seventh canto of the last book of this poem, which seems like a translation of one of Gainsborough's rich pictures into words; or to the truly imaginative delineation of a child's inner world (p. 6), with its minute, defined, and equally distributed lights, its ignorance of cloud and mist, and of masses of light and shadow:—

> "Oh bright [illegible] sky
> O'ercircling childhood! Far and nigh
> Mystery and obscuration none,
> Yet nowhere any moon or sun."

Such passages as these, though sprinkled throughout the poem, are perhaps of a wider grasp and a deeper significance than its general level. Indeed, they would probably fail of their effect if they were more continuous. But in almost every page there is some instance of that *curiosa felicitas* in the choice of language

which is part of the special gift of a poet, and which produces many such couplets as the following,—describing a sky after rain, "with squadrons bright"

"Of cloudlets glittering calm and fair
Through gulfs of calm and glittering air."

Mr Patmore has not a little dramatic power, and very considerable dramatic insight. Every character he introduces is in a certain sense delicately and skilfully finished, and yet we cannot say that they are usually to us very interesting. He has a theory that the true index to human nature is in men's *Manners*, and the fruit of this theory seems to us to be a want of power and freedom in the movements of the characters which he delineates. If you are to make Manners the main instrument of a dramatic delineation, there is a great risk of dulness, and to prevent this the poet is in danger of laying on too thick a colouring of sentiment in his pictures of ordinary life. No doubt to a skilful eye like Mr Patmore's, quick to discern those little touches of character which make up the distinguishing interests of social life, a great deal of human nature may be seen by very casual glimpses. But much that is interesting in *actual* life where it is woven into our own destinies, is intolerable in that secondary image of it which literature gives, and in order to avoid this dulness the novelist is obliged to draw out the incidents of a tale. But a poet who, like Mr Patmore, despises Action and Suffering, and for the most part even Thought, as a machinery for developing the true forms of human character, and who relies on the imaginative charm which he can throw over the gentle ripples in the still surface of ordinary manners, is almost compelled to cloy his picture with too much sentiment.

And this is accordingly the chief fault we have to find with the present poem. All the characters are necessarily of that mould and class which permit themselves to be delineated through a medium of sentiment,—of sentiment that is allowed no opportunity of expanding into passion, of colouring action, or even of tinging a really comprehensive range of thought. And this is to us rather oppressive, because for the most part the higher sentiments remain in fact latent, except when the other energies of our nature are also called out. An habitual predominance of sentiment without sufficient occasion for it in the scenery of circumstance, is usually felt to be either young or feminine, and this is the true reason, we take it, why our greater poets never attempt to delineate the general level of life, but choose the critical moments of great collisions between strong human wills, or between human wills and human destinies. But Mr Patmore, who resolutely confines himself to the milder sentiments for his sources of dramatic colour, is forced to choose characters which will *let* themselves be painted through so imperfect a medium, and hence he loses the freedom and the depth of drama. There is a cloying sweetness diffused through his poem,—a sort of poetical attar of roses, delightful at first, but which makes us long for more frequent escapes into the cool outer air.

But we will not too closely criticise poetry which we could not write, and for which we are very grateful. We certainly should be glad to get oftener out of the society of Frederick Graham and his mother, and Honoria and Felix, and Jane, and even Lady Clitheroe (whom, however, we sincerely admire), to Knatchley Wood and "the three black windmills on the hill," and the gipsies and the donkey-boy. But, as we said, 'beggars must not be choosers,' and no one but Mr Coventry Patmore could have written "Faithful for Ever," while many, very many, not very eminent critics are quite competent to pick holes in it. The poem is full of light and grace; it has true humour as well has beauty, and here and there passages of meditative wisdom. It will be widely read, and will deserve to be widely read. It has something of the deep colouring of Tennyson's sentiment, with much of the ease, grace and happy little surprises of Moore's Irish melodies, without any of their intolerable tinsel, filigree, and affectations.

John Horsleydown; or, the Confessions of a Thief. Written by Himself, and revised by Thomas Littleton Holt. London: Ward and Lock, 158 Fleet street. 1860.

This ghastly tale ought never to have been published. It purports to be the veritable autobiography of a thief, revised by Mr Holt, a reporter on the *Morning Chronicle*, at whose door the MS. was left by an unknown man in a white top-coat, a few nights after the meeting of ticket-of-leave men convened by Mr H. Mayhew. "I have, of course," says Mr Holt, "materially altered names and dates throughout the book, to avoid giving pain to individuals; but the manuscript, I can assure the public, was full of marginal notes and references which testify to the truth and exactness of every incident herein related." If this is a true statement, a wholly different course should have been taken. Such portions of the MS. as were suitable for publication should have been printed, unaltered, in some record of criminal statistics, for the use of legislators and moralists. To throw loose on the world such a tissue of heartless, base, unrelieved depravity, was unpardonable. The only readers who could take any pleasure in such a book are those who might be injured by it; to no one else could it be even endurable. If, on the other hand, the work be a fiction, compounded from police records or newspapers reports (a supposition which many things in the work tend to confirm), the case is still worse. Upon either hypothesis, this publication deserves the severest reprehension.

Foreign Correspondence.

(FROM OUR CORRESPONDENTS.)

PARIS, Thursday.

The negotiation between the Banks of England and France has ceased to occupy general attention. But the latter I hear is anxious that it should be known that the reason why it has such an enormous amount of silver on hand is not, as has been alleged, that it has lately been making large purchases of that metal, but that the stock is one of long standing, dating, in fact, from the time at which the large discoveries of gold caused silver to be at a premium. If this be so, one cannot help wondering that the Bank did not continue to get rid of at least a portion of the stock from time to time,—a thing which it might easily have done without causing a monetary perturbation. With regard to the purchases of gold made by the Bank of France at London, it appears that the intention of that establishment was that they should be effected as secretly as possible, and on no account direct from the Bank of England; but that the person charged with the operation went to that Bank, and alarmed it by his large drawings of gold—a circumstance which led to the increase of discount. It further appears that the Discount Bank (Comptoir d'Escompte) was not, as at one time supposed, a purchaser of gold; the Bank of France having taken its bills on London, led to the name of the Discount Bank being used.

Some ministerial changes have taken place. Among them M. Magne has been removed from the Ministry of Finance, and M. de Forcade la Roquette, Director of Customs, has been appointed his successor. The removal of M. Magne is to be applauded, as he is an indifferent financier, and an obstinate opponent of commercial reform. The nomination of M. de Forcade to such a high office has occasioned some surprise, as he is still quite young, has not been very long at the Board of Customs, is of no special repute as a financier, and has no political standing whatsoever. He is, however, not devoid of ability, and possesses the merit of having contributed as much as he could to the recent tariff reforms, and to the settling of the details of the treaty of commerce with England. If, instead of him, a certain great economist, whose name all your readers will divine, had been appointed to the Finance department, or if, what would have been equally good, the present Minister of Commerce, M. Rouher, had been placed therein, and the said economist had succeeded him,—if either of those two things had been done, a vast portion of the public would have rejoiced greatly, the country would have obtained immense benefit, and the work of commercial reform so well begun would have been continued with energy.

The non-publication of the remainder of the tariff to be imposed on British goods under the commercial treaty, though, as your readers know, it is settled and signed, causes great annoyance; and to say the least, it proves that the French and English Governments do not possess due consideration for the interests of the commercial community.

Mr Cobden, say the newspapers, has been down to Nantes to confer with the shipowners and merchants of that place on the subject of the differential duties on shipping. The result of his conference is not stated; but doubtless he found the Nantes people hard to convince.

The Chamber of Commerce of Havre, like those of Nantes and Bordeaux, has addressed a communication to the Minister of Commerce on the subject of the proposed modifications in the differential duties in favour of French shipping. It is shorter than the Nantes and Bordeaux notes, and does not, like them, dwell on the disadvantage under which French shipowners labour compared with English, in having to pay more for building their vessels. Its chief points are these:—English ships can obtain in their ports numerous freights to carry out to any destination; and this enables them to accept prices for return cargoes lower than French vessels can do, the latter having no out-going freights except some quantities of wine despatched from Bordeaux. If French vessels go to England to take coal as an out-going cargo, they are subjected to expenses for assurance, wages of crews, tonnage and other dues, and loss of time, which may be estimated at 35f the ton. The "maritime inscription" subjects merchant shipping to burdens for which the Government ought to accord compensation. One of the principal of these is bringing back sailors to the port from which they sailed, in the event of the vessel going to another one, or of according them an indemnity. Thus, for a vessel despatched from Havre to America, and obliged on its return to carry a cargo to Marseilles, a sum of 1,881f has to be paid for a crew of twenty men to enable them to reach Havre. Supposing that a new crew be shipped at Marseilles for a voyage

to the West Indies, and that the vessel comes back to Havre, a like sum has to be paid to send the men to Marseilles. From this obligation there is no escape, the law not allowing private arrangements between shipowners and sailors to avert it. Another grievance is, that a cabin-boy must be engaged in every vessel having more than two men, and another cabin-boy in every ten men above the stipulated number of "more than two." The next grievance recorded is, that though the law of 1793 allows foreigners to be employed in the proportion of one-fourth in every vessel, the Government does not permit that number to be engaged except when it is under the necessity of making extraordinary levies for the fleet. In the Crimean war the Government demanded more than 70,000 men out of a total of 85,000 to 90,000, and of course it took the youngest and best; merchant shipowners had consequently to pay almost double wages to sailors (100f a month instead of 50f or 60f), and to employ old sailors who had retired, or mere lads unfit for their work. In addition to all this, shipowners are subjected to a number of petty expenses about inventories, the fitting out of ships, duties on articles lost by accident at sea, &c., all which in the aggregate are important; they are, too (so the note affirms), obliged to feed their sailors better than foreigners are fed. Lastly, the sale of vessels when belonging to more than one person is subjected to formalities which cause loss of time and expense. For these reasons the Havre Chamber of Commerce insists that French shipping ought to be allowed "protection which will permit it to struggle without too much disadvantage with English vessels;" and it thus specifies the amount of protection it considers necessary:—"We are of opinion that the surtax on the importation of merchandise from India ought to be, n order to protect our flag, 35f to 40f the ton; and for arrivals ifrom places within the Cape of Good Hope and Cape Horn, 20f to 25f—the tax to be higher on merchandise of great value, such as indigo, tea, cochineal, &c."

A return respecting railways has just been published by the Government, and it contains some interesting details. The railways in this country are divided into tho "old network," consisting of the main lines and original concessions; and the "new network," consisting of branches and secondary lines. As many of the latter are certain to be unprofitable, and as the execution of them was imposed by the Government, a guarantee of interest is accorded to them; and hence the necessity of keeping them distinct from the others. The following are the principal features in the Government return:—

Names of Lines.	1859. Total worked on the 30th September.	1859. Av. length worked during the first nine months of the year.	1860. Total worked on the 30th September.	1860. * A Kilometre is ⅝ths of a mile.

The Bank of Algeria advertises the payment of 24f 20c, as dividend for the half-year from April to October.

The Eastern Railway announces that it will pay from the 1st of December the half-year's interest on the 5 and 3 per cent. bonds.

The Bourse has not been very animated during the past week. Fears are entertained of a new American crisis; though why Paris should be alarmed on that score when London is calm, does not appear. The reforms of the Emperor caused a rise, but the day after there was a fall; they are, in truth, of such small political importance that they cannot affect the market. A report is current that the Government will undoubtedly soon have to raise a loan; and whilst some speculators put it at 250,000,000f, others talk of 500,000,000f, or even 750,000,000f. The issue of M. Mires' loan for Turkey is looked for almost daily, all his arrangements for it being completed. At one time the belief was that the Government would hardly consent to it; but political considerations connected with the prolongation, by permission of Turkey, of the stay of its troops in Syria, have caused it to be yielding. The news that the Bank of England has reduced its discount has been received with pleasure. The following are the quotations:—

* The hectolitre is somewhat more than 22 gallons; the quintal is very nearly 2 cwts.

It will be observed that most of the articles on which the Government some time ago reduced the import duties, cocoa, coffee, cotton wool, &c., present a very satisfactory increase; thereby testifying to the public utility of the reduction. As to the articles affected by the English treaty, it is to be remarked that, with the exception of coal, it was only on the 1st October that the new duties on a certain number of them came into operation, and that they could not be expected to produce much effect in the course of a short month. Nevertheless, it will be observed that in machinery there is a rather important augmentation. With regard to coal, the reduced duty on which came into operation on the 1st July, it is a little singular that the increase has come entirely from Belgium, Germany, and other places, and that the quantity brought from England even presents a small decline,—9,776,848 quintals for the ten months of the present year to 10,005,897 of the corresponding period of last year; but this is doubtless only accidental.

The following is a detail of the exports of the principal productions of France:—

The item in the above which will probably attract most attention from your readers is that of wine. Of the total 1,600,563 hectolitres sent out in the course of the present year, 93,121 have gone to England: in the corresponding period of last year she received only 38,836. These figures must render French wine-producers very sanguine as to the effect the commercial treaty will have on their interests. The return does not specify the portion of the inferior wines taken by England,

The following is an account of the precious metals:—

Annexed is the weekly report of the markets:—

Flour.—At *Paris*, during the past week, the market has been calm: yesterday the quotations were 60f to 63f the sack of 159 kilogs inferior quality; 54f to 57f secondary quality. In four marks little also has been done, and yesterday the disposable was 61f to 61f 25c; December, 59f 75c to 60f.

Wheat.—At *Paris*, yesterday, the offers exceeded the demand and prices fell, the quotations being 34f to 36f and 36f 25c the sack of 120 kilogs. Some small quantities of superior were taken at 36f 50c. Of the provincial markets, as many as 115 present a decline of from 10c to 2f 25c the hectolitre; in only 12 has there been a rise of 20c to 1f, and in 26 there has been no change.

Cotton.—At *Havre*, in the week ending Friday, the sales were 6,168 bales, and the arrivals 4,434. Prices rose 1f for very low qualities, and other sorts remained unchanged. Low New Orleans was consequently 90f the 50 kilogs, and very ordinary ditto 98f. In the present week the market was calm on Monday and Tuesday, but was more animated yesterday. The quotation of low New Orleans yesterday was 90f 50c.

Coffee.—The sales at *Havre*, in the week ending Friday, which were chiefly for exportation, were 2,200 sacks Hayti disposable, the greater part at 78f to 78f 50c the 50 kilogs in bond, the rest at 79f to 79f 50c; 55 sacks Gonaïves, 84f; 100 sacks Hayti Cape, 80f 50c; 85 sacks Santos, 75f; 300 Ceylon, 108f duty paid. The arrivals were not quite 350 sacks. This week, business has been active; Rio, 75f 50c to 77f in bond; Hayti, 78f to 79f; Gonaïves, 74f; Santos, 78f; Ceylon, 108f duty paid. At *Bordeaux*, last week, business was done and prices did not change. Nothing has been done this week. At *Nantes*, last week, no sales were made, and the arrivals were about 4,600 sacks. This week, no operations are recorded. At *Marseilles*, last week, some large sales of Rio were made at 70f to 75f; and the arrivals of Rio were upwards of 21,000 sacks.

Sugar.—Business at *Havre*, in the week ending Friday, was limited. 165 casks French West India disposable, 50f to 50f 50c the 50 kilogs duty paid; a small lot ditto, 53f; 25 casks Havana, 39f. Nearly 500 casks of damaged Havana were also sold. This week, little has been done: French West India, 50f 50c. At *Bordeaux*, last week, only one lot of 180 casks French West India went at 49f 50c; and a cargo of 8,500 bales Mauritius was taken for 55f in bond. This week, business has been tolerably active: French West India, 49f 50c; some usine ditto, at prices kept secret. At *Nantes*, last week, about 300 casks French West India went at 49f: some usine ditto, 58f; some lots of superior Havana were also sold at high prices. This week, Mayotte has been at 49f; French West India, 49f; Reunion, "gros grains," 57f. At *Marseilles*, last week, little was done.

Indigo.—At *Havre*, in the week ending Friday, business was more active, 65 cases Bengal having been disposed of, but prices were kept secret. The arrivals consisted of only two small lots from England. This week, only one small lot Bengal has been sold, at prices kept secret. At *Bordeaux*, sales were not important, and prices are not given. The same has been the case this week.

Hides.—At *Havre*, in the week ending Friday, 6,000 Buenos Ayres and La Plata dry went at 105f to 130f the 50 kilogs, duty paid; 1,250 ditto salted *saladeros*, 80f; 4,700 Pernambuco drysalted, the greater part at 90f, the rest at 92f; 1,156 Valparaiso salted, 95f for cows, 70f for oxen; 265 Australia salted, 45f; 681 horse hides, Buenos Ayres dry, 10f each, duty paid; and 5 bales kid La Plata, 11f the dozen. The arrivals exceeded 35,000. This week, business has been active. Buenos Ayres dry, 112f 50c to 125f; ditto salted, 79f; Monte Video, 112f 50c.

Wool.—No sales were made at *Havre* last week, and the arrivals were about 1,000 bales. This week, a small lot of Buenos Ayres unwashed has been sold at 232f 50c the 100 kilogs.

Tallow.—At *Havre*, last week, there were no sales, and the arrivals were only 27 casks from New York. No sales have been made this week. At *Paris*, yesterday, the 100 kilogs were 149f 20c.

Brussels, Nov. 28.

The Budget of 1861, just presented to the Chambers, estimates the ways and means at 149,029,190f, and the expenses at 145,948,085f. In addition to the ways and means, a sum of about 15,000,000f will be raised on the principal branches of revenue—coffee, wine, brandies, beer, vinegar, sugar, and post office—to be distributed among towns and villages, to replace the octroi duties lately abolished.

COMMERCIAL AND MISCELLANEOUS NEWS.

The following return shows the state of the note circulation in the United Kingdom during the four weeks ending October 20, 1860, compared with the previous month:—

	Sept. 22, 1860.	Oct. 20, 1860.	Increase.	Decrease.
	£	£	£	£
Bank of England.....	21058365	21478564	420199	...
Private Banks	3502110	3529584	227474	...
Joint Stock Banks	2935094	3077474	142380	...
Total in England.....	27295569	28085622	790053	...
Scotland.....	4096771	4283513	186742	...
Ireland	6166077	6701329	535252	...
United Kingdom.....	37558417	39070464	1512047	...

And, as compared with the month ending the 22nd of October, 1859, the above return shows a decrease of 643,576*l* in the circulation of notes in England, and a decrease of 1,109,590*l* in the circulation of the United Kingdom. On comparing the above with the fixed issues of the several banks, the following is the state of the circulation:—The English private banks are below their fixed issue 875,351*l*, the English joint stock banks are below their fixed issue 224,883*l*,—total below fixed issue in England 1,100,234*l*; the Scotch banks are above their fixed issue 1,534,242*l*, the Irish banks are above their fixed issue 346,835*l*. The average stock of bullion held by the Bank of England in both departments during the month ending the 17th of October was 15,533,947*l*, being a decrease of 640,393*l* as compared with the previous month, and a decrease of 1,786,783*l* when compared with the same period last year. The following are the amounts of specie held by the Scotch and Irish banks during the month ending the 20th of Oct.:—Gold and silver held by the Scotch banks, 2,472,686*l*; gold and silver held by the Irish banks, 2,277,878*l*; total, 4,750,564*l*; being an increase of 18,480*l* as compared with the previous return, and a decrease of 85,436*l* when compared with the corresponding period last year.

An account, pursuant to the Act 8 and 9 Vict., cap. 38, of the amount of bank notes authorised by law to be issued by the several banks of issue in Scotland, and the average amount of bank notes in circulation, and of coin held, during the four weeks ending Saturday, the 17th day of November, 1860:—

COTTON.

New York, November 13.

The following is a statement of the week's sales here and at the chief Southern ports, at latest telegraphic dates, with the closing prices f.o.b., with freight in sterling at current exchange:—

	Sales.	Closing.	Middling.	Freight.	F.o.b.
New Orleans...Nov. 12	48000	½ higher	... 11¼c ...	¼d equal to	6.71d
Mobile 10	12000	⅛ lower	... 10⅞c ...	9-16d —	6.22d
Charleston 9	7000	¼ —	... 10⅞c ...	15-32d —	6.03d
Savannah 9	4000	¼ —	... 10⅞c ...	7-16d —	6.09d
New York 13	8000	⅛ —	... Upl. 11⅛c ...	¼d —	6.33d
Total.....	79000 bales			Average	6.27d

New York Market.—In this market business was quiet in the opening of the week, and concessions were made to encourage business. On Saturday there was an improved demand for transit cottons, and with favourable Liverpool advices to hand yesterday, a steady business was done. Middling upland is now worth 11⅝ to 11¾.

The following is a statement of the movements of cotton for the last week, and since 1st September last, compared with the five preceding years :—

	Receipts. Week's Receipts. bales	Since 1st Sept. bales	Exports for the Week. To Great Britain. bales	To France. bales	To other For. Pts bales
1860-61	137000	799000	62000	21000	13000
1859-60	156000	940000	59000	17000	7000
1858-59	142000	826000	42000	19000	7000
1857-58	52000	345000	26000	2000	5000
1856-57	98000	632000	24000	6000	3000
1855-56	96000	632000	54000	24000	7000

	Exports since First September. To Great Britain. bales	To France. bales	To other For. Pts. bales	Total. bales	Stock. bales
1860-61	226000	61000	38000	325000	549000
1859-60	288000	77000	30000	395000	575000
1858-59	175000	93000	28000	296000	505000
1857-58	130000	27000	21000	178000	212000
1856-57	86000	56000	25000	167000	390000
1855-56	246000	67000	46000	359000	288000

Thus the receipts show a decrease of 141,000 bales from those of last year, and a decrease of 27,000 over 1858-9, and the exports exhibit the following results :—

	To G. Britain.	To France.	To other F.P.	Total.	Stock.
Compared with last year	Dec. 62000	Dec. 16000	Inc. 8000	Dec. 70000	Dec. 26000
Compared with 1858-9	Inc. 51000	Dec. 32000	Inc. 10000	Inc. 29000	Inc. 44000

Southern Markets by Telegraph.—Business at the South has been rather unsettled during the week, and with stringent money markets and the difficulty of negotiating exchange at most points, prices have declined.

Receipts.—The receipts are steadily increasing, and for the present week amount to 137,000 bales against 156,000 last year, and 142,000 the year before. The total is now 799,000 bales against 940,000 last year, showing a decrease of 141,000 bales.

Exports.—The exports are large this week, amounting to all ports to 96,000 bales. Of this, 62,000 are for Great Britain, 21,000 for France, and 13,000 for other foreign markets, while the home trade have taken 15,000 bales.—*From Messrs Neill Bros. and Co.'s Circular, forwarded by Mr Ollerenshaw, of Manchester.*

New York, Nov. 17.—The cotton market yesterday, under the influence of the foreign news, was steadier and more active; the sales footed up between 3,000 and 4,000 bales.

A full amount of business has been daily transacted in the cotton market during the week. Holders of American have been enabled to recover still more of the concession previously made in their value, and we have again to raise our quotations slightly in the middling qualities. Egyptian meet with fair sale at easy prices. Brazil are still held for full rates. East India have somewhat improved in value. The sales to-day are estimated at 10,000 bales. The market is firm. The reported export amounts to 4,330 bales, consisting of 2,070 American, 110 Brazil, and 2,150 East India.

CORN.

AMERICAN GRAIN AND FLOUR MARKETS.

New York, Nov. 17.—Flour was rather heavy, but the foreign intelligence tended to sustain prices, while the prices were moderate and unchanged. Wheat was more active, but prices were without change of moment; the transactions embraced parcels in transit, on the spot, and on speculation. Corn was rather better and more active, with sales of Western mixed afloat and in store at 69c to 71c; Western yellow, at 72c; round ditto, at 71½c; and prime North Carolina white at 78c to 81c. Freights were firmer, and corn and wheat were engaged, in bulk, at 13d to 13½d; wheat, in bulk and ships' bags, at 13½d to 14d, with flour at 3s 9d; to London wheat was engaged, in bulk, at 15d, and flour, at 4s.

LONDON MARKETS.

STATE OF THE CORN TRADE FOR THE WEEK.

Mark Lane, Friday Evening.

During the whole of the week, great heaviness has prevailed in the demand for wheat. Owing to the enormous influx of produce from abroad, the immense quantities still on passage, and the high range in the value of money in the discount market, millers generally have purchased with extreme caution, and, as regards English parcels, we may observe that selected qualities have given way 2s; other kinds from 3s to 5s per quarter, at which only a trifling business has been passing. Foreign wheats have fallen in value 2s per quarter, and some kinds have ruled nominal in value. The arrivals of barley having increased to some extent, that description of produce has sold slowly, at 1s to 3s per quarter less money. For malt, the inquiry has been much restricted, at about previous rates. Oats have fallen 6d to 1s; beans and peas, 1s per quarter; and country flour has given way 1s per 280 lbs.

The future course of the trade is regarded with much anxiety by the growers and importers. Now, however, that the Directors of the Bank of England have reduced their *minimum* rate for money to five per cent., and that there is much greater ease in the general discount market, the present somewhat heavy fall in price may be arrested. Much, of course, will depend upon the strength of the importing houses; but at present we see nothing to create alarm as regards their stability. Purchases abroad will, of course, be suspended, and we may be able to work up warehoused stocks without difficulty. The trade of the country, generally, is still in favour of a large consumption of food.

Throughout the Continent very little business has been passing in wheat for shipment to England, and the demand for all other articles has fallen off.

In Ireland the grain trade has been in a most inactive state, and prices generally have given way. The shipments to England have not increased to any extent.

The Scotch markets have been heavy for all kinds of produce, and the quotations have ruled in favour of buyers. Rather large quantities of grain have been forwarded to the South.

The demand for both English and foreign wheat here to-day was heavy; indeed so little business was doing that the rates were almost nominal. There was scarcely any inquiry for barley, and all other kinds of produce, on rather easier terms.

The state of the floating trade is thus reported by Mr Ed. Rainford :—Since the 22nd inst. 18 arrivals off coast for orders are reported up to last night, consisting of 8 cargoes of wheat, 7 maize, and 3 miscellaneous, viz. :—Wheat, 2 from Taganrog, 1 Constantinople, 1 New York, 2 Marianople, 1 Ibraila, 1 Odessa; maize, 3 Constantinople, 2 Mazagan, 2 Sulina; maize and beans, 1 Darel-Beida; beans, 1 Alexandria; barley, 1 Scala Nova. Of these, 5 or 6 had previously changed owners. The business in floating cargoes has been unusually limited this week, but prices not lower; indeed, maize has brought about 6d more money. The following are the prices paid;—Wheat, arrived, Berdianski, 57s; new Odessa Ghirka, 57s; ditto, not quite perfect, 56s 9d; Taganrog Ghirka, at equal to 52s 9d, and a cargo at 53s, all per 492 lbs; red Bordeaux, 56s, and Polish Odessa, 55s per 480 lbs. Maize, arrived, Galatz, part out of condition, 38s 9d, and 1 considerably damaged, at 37s 6d tale quale, per 492 lbs; Ibraila, at 38s 6d, and damaged, 37s 6d; Wallachian, not perfect, 37s 6d; Mazagan, 38s to 38s 9d; prices according to condition, and all per 480 lbs. Beans, arrived, Egyptian, 36s per imperial quarter.

The London averages announced this week are :—

The Bankers' Gazette.

BANK RETURNS AND MONEY MARKET.

BANK OF ENGLAND.

(From the Gazette.)

An Account, pursuant to the Act 7th and 8th Victoria, cap. 32, for the week ending on Wednesday, the 28th day of November, 1860.

ISSUE DEPARTMENT.

	£		£
Notes issued	27,536,575	Government Debt	11,015,100
		Other Securities	3,459,900
		Gold Coin and Bullion	12,725,079
		Silver Bullion	336,496
	27,536,575		27,536,575

BANKING DEPARTMENT.

	£		£
Proprietors' Capital	14,553,000	Government Securities(including Dead Weight Annuity)	9,490,273
Rest	3,166,972	Other Securities	20,392,252
Public Deposits, including Exchequer, Savings Banks, Commissioners of National Debt, and Dividend Accounts	6,515,612	Notes	7,636,360
Other Deposits	13,366,250	Gold and Silver Coin	798,801
Seven Day and other Bills	715,852		
	38,317,686		38,317,686

Dated the 29th November, 1860. M. MARSHALL, Chief Casbier.

THE OLD FORM.

The above Bank accounts would, if made out in the old form, present the following result:—

Liabilities.	£	Assets.	£
Circulation (including Bank post bills)	20,616,367	Securities	29,804,525
Public Deposits	6,515,612	Coin and Bullion	13,860,376
Private Deposits	13,366,250		
	40,497,929		43,664,901

The balance of Assets above Liabilities being 3,166,972*l*, as stated in the above account under the head Rest.

FRIDAY NIGHT.

The preceding accounts, compared with those of last week, exhibit—

A decrease of Circulation of	£507,109
An increase of Public Deposits of	442,015
An increase of Other Deposits of	701,238
No change in the amount of Government Securities.	
An increase of Other Securities of	94,236
An increase of Bullion of	503,245
A decrease of Rest of	38,653
An increase of Reserve of	1,000,545

The present Bank returns are very favourable. There is again a decrease in the circulation of 507,109*l*; an increase in the public deposits of 442,015*l*, and in other deposits of 701,238*l*; and also an increase in the bullion of 503,245*l*, and in the reserve of 1,000,545*l*. It will be observed that the silver bullion received from the Bank of France amounts to 336,496*l*.

Subjoined is our usual weekly table, affording a comparative view of the Bank returns, the Bank rate of discount, the price of Consols, the price of wheat, and the leading exchanges, during a period of four years, corresponding with the present date, as well as ten years back, viz., in 1850:—

At corresponding dates with the present week	1850.	1857.	1858.	1859.	1860.
Circulation, including bank post bills	£ 19,872,856	£ 21,943,691	£ 21,107,538	£ 22,066,641	£ 20,616,067
Public deposits	9,398,752	6,072,267	8,245,211	8,679,315	6,515,612
Other deposits	9,789,794	14 436,186	12,491,758	13,364,382	13,866,250
Government securities	14,228,901	5,441 647	10,808,591	10,925,157	9,490,273
Other securities	12,461,368	31,191 386	15,432,330	19 376,439	20,392,252
Reserve of notes & coin	11,402,421	2,729,037	12,942,174	10,248,882	8,435,161
Coin and bullion	16,009,871	7,356,467	18,776,314	17,018,512	13,860,376
Bank rate of discount	2½ p. c.	10 p. c.	3 p. c.	2½ p. c.	5 p. c.
Price of Consols	97⅞	91¼	98¼	96¼	93¼
Average price of wheat	40s 3d	49s 8d	41s 2d	44s 1d	56s 3d
Exchange on Paris (shrt)	25 0 5	25 40 50	25 7½ 15	25 7½ 12½	25 15 22½
— Amsterdam ditto	11 14½ 15	11 19	11 14 15	11 13¾ 14¼	11 14¼ 15
— Hamburg (3months)	13 6¼ 7	13 13	13 7 7½	13 5 5½	13 6¾ 7

In 1850, the exchanges were decidedly against England. Gold was 0.54 per cent. dearer in Paris than in London, and at Hamburg it was 0.65 per cent. dearer than in London. The consequence was that the bullion in the Bank showed a decrease of 210,572*l*. Trade was beginning to show symptoms of great activity, the private securities in the Bank having increased 741,998*l*.

In 1857, the panic at Hamburg had reached its climax. Mercantile firms there were failing in great numbers. Here the crisis in monetary circles had been partially relieved, the Bank holding a reserve of 729,037*l* over and above the two millions of notes issued in excess of the statutory limit; but dread was still inspired by increasing commercial embarrassment. Houses connected with the Continent and with the silk trade were stopping daily. The session of Parliament was to open at an unusually early day, the 3rd of December.

In 1858, the contrast of the Bank return compared with that of 1857 is remarkable. Other securities, as compared with those of 1857, having fallen from 31,191,386*l* to 15,432,330*l*, whereas the Government securities held by the Bank had risen from 5,441,647*l* in 1857, to 10,808,591*l* in 1858. But the most remarkable feature was the increase of the reserve, which virtually in 1857 was only 729,037*l* (as the Bank had exceeded the statutory limit by 2,000,000*l*), to 12,942,174*l*, and the bullion from 7,356,467*l* in 1857, to 18,766,314*l* in 1858. The Bank rate of money had fallen from 10 per cent. in 1857 to 2½ per cent. in 1858. The new Chilian Four-and-a-Half per Cent. Loan for 1,554,800*l* at 92 per cent. had been taken, and was quoted ¼ pm.

In 1859, the Council of India were lending money on the Stock Exchange at 2 per cent., and had for the time being suspended remittances of silver to India. The funds were buoyant in consequence of a convocation of a Congress and the cessation of an Anglo-French paper war which for a long time had been fiercely raging. Messrs Baring, Rothschild, Huth, A. Gibbs and Sons had signed an address to Lord John Russell, begging that the British Government would throw its protection over British interests in Mexico, and put a stop to those outrages which continue, unfortunately, to the present day.

The amount of the "other" deposits, as compared with the "other" securities, showed, in 1850, a deficiency of 2,671,569*l*; in 1857, a deficiency of 16,775,200*l*; in 1858, a deficiency of 2,940,572*l*; and in 1859, a deficiency of 6,012,057*l*. In 1860, the deficiency is 7,026,002*l*.

Discount and Money Market.—We last week mentioned that the discount market presented a somewhat unsettled appearance, and we instanced that, although a fair demand for discount took place at the Bank of England at 6 per cent., considerable transactions had taken place in Lombard street at 5½ and 5 per cent., and that 6 months' bills had been discounted at 5⅛, and that notwithstanding money had been in great demand at high rates, there had throughout been a most abundant supply which still existed. This week the demand for discount at the Bank has in consequence of that supply been very limited, for money in the discount market in Lombard street was up to Thursday last fully ¾ to 1 per cent. below the Bank rate; the consequence has been that the Bank Directors, at their meeting on Thursday, lowered the rate of discount to 5 per cent.

This action of the Bank has been followed by the joint stock banks lowering the rate they allow on deposits from 4½ to 4 per cent. The London and Westminster allow the same rate as other banks for sums above 500*l*, but only 3 per cent. for sums below that amount. The discount houses now allow 4 per cent. for money at call, and 4¼ for money at notice.

It will be observed that this is a reduction of ½ per cent. on money at call, and ¾ per cent. for money at notice.

It is evident that the tendency both of the joint stock banks and the discount houses is to make a greater difference between the Bank rate and the rate they allow for money at call, than has hitherto been their custom. The fact is, that since the refusal of the Bank of England to rediscount, it has become imperative on the part of the discount houses to keep much larger cash reserves than formerly, and consequently they cannot afford to pay so high a rate for money at call as would be the case if they knew they could immediately convert the securities they hold into cash, by either rediscounting or depositing them with the Bank of England. This regulation of the Bank, therefore, reacts on the discount houses and on the public. The discount houses keep larger cash reserves, and pay the public less for them, or, more correctly speaking, on their deposits at call; and we believe we shall yet see a still larger margin than now exists between money at call and money for fixed periods.

Since the reduction of the rate to 5 per cent., there has been an active demand at the Bank. In Lombard street the rate charged by the discount houses is 4½ to 4¾, and a very active business at these rates is being carried on. Money still continues very abundant, and we hope for some time to see steadiness in the rate, although the advices from America to-day, bringing the exchange from 104½ to 106 in consequence of the threatened secession of the Southern States from the Northern, will cause gold to be transmitted from this country to America—not so much as an exchange operation, but as a matter of precaution by houses in England who have branches or agents in New York, in order to provide funds against any emergency that may arise. The best in-

formed American houses seem to think that the present state of affairs in America will soon blow over. Be this as it may, about 50,000 sovereigns have been taken from the Bank to-day to send by the next steamer to New York, and it is probable that 150,000 more will be taken for the same purpose to-morrow.

We abstain from offering any opinion whatever as to the turn matters are likely to take in the United States. We have given the opinion of the best informed American houses; and we quote extracts of a letter Messrs Robert Benson and Co. have received, per Atlantic, from Mr Walker, the chairman of the Executive Committee of the Illinois Central Railway, whose interests are deeply involved in the solution of the present agitation:—

New York, November 17th, 1860.

Messrs Robert Benson and Company.

Gentlemen,—There appears to be less excitement in regard to political questions than at the date of my letter of the 15th inst.

The fear of the suspension of some of the Southern Banks has deranged the exchanges and given the merchants of the different cities increased inquietude touching their receipts, and required of them additional exertions to provide against any contingency which may arise in regard to their future payments.

These fears are rather abating with the improvement in Southern exchange movements.

The considerable amount of specie which has gone forward to New Orleans has already induced a market there for bills on New York, but at Chicago and other western cities desirable bills are difficult to be obtained even at a high premium. Business is, of course, much obstructed..... Changes are, however, so quickly brought about in financial matters, that when there is no deep-seated cause a few days very often entirely alters their action. So that we may hope soon again to see the wheels set in regular motion, and business relations proceed in their usual course.

(Signed) Robt. Benson and Co.

We have no doubt that the above extracts contain all that is known or can be said on the subject. In the meantime it is not to be disguised that, although the present agitation in America *may* blow over, and we trust for the sake of the great interests involved it may, we must not conceal from ourselves that the present may be only the commencement of a struggle which may seriously affect the vast pecuniary interests England has with the United States, and might possibly cause very serious monetary derangements in our relations with the United States.

The rate of money on the Stock Exchange is 3 per cent. on Government securities, and it is very abundant. The following are the rates of discount at

	Bank Rate. Per cent.	Open Market. Per cent.
Paris	4½	4
Hamburg	...	2¾
Vienna	5½	5½
Brussels	3	3
St Petersburg	6½	for 3 months' paper
Ditto	7	for 6 months' paper

English Funds.—The market for English securities has been remarkably firm throughout the week, with very little variation in price. Consols have been as high as 93⅞ ¾ for money; and from the continued investments on the part of the public, there would probably have been a further improvement had it not been for the unfavourable accounts in America, and the fear of a renewed export of bullion. Consols close this afternoon at 93½ ⅝ for money and account, and 93¾ for the January settlement; Exchequer bills, 4 to 1 discount; New 3 per Cents. and Reduced, at 91¼ 2.

Foreign Funds.—In the foreign funds little or no alteration has occurred since our last. Turkish bonds are rather heavy this afternoon; those of 1854 being quoted 73 to ½, and those of 1858, 58 to ½. It is stated that some difficulties exist in respect to the negotiation of the new loan.

Subjoined is our usual list of the highest and lowest prices of Consols every day, and the closing prices of the principal English and foreign stocks last Friday and this day:—

Railroads.—The settlement of the railway account passed off in a satisfactory manner. It is evident the public continue to invest in these securities. A marked improvement has taken place in Midland and Lancashire and Yorkshire stocks. Grand Trunk of Canada also shows firmness.

Subjoined is our usual list of the closing prices of the principal railway shares last Friday and this day:—

Railways.

	Closing prices last Friday.		Closing prices this day.

Bullion.—We subjoin Messrs Pixley, Abell, and Langley's circular, which gives an account of the bullion transactions of the week, and also those in India Government loan notes:—

Gold—Our market during the past week has been exceedingly quiet. The arrivals have been unimportant, and in consequence of the arrangements made between the Banks of England and France, the demand for the Continent is not sufficiently active to induce any withdrawals of gold from the Bank. The Bank of France has already delivered a considerable amount of silver, but has not yet taken any gold in exchange. The Fulton has brought 8,000*l*, and the Hammonia 9,000*l*, from New York; and about 13,000*l* has been sent to that city during the week, which amount has been taken from the Bank. It is expected that further amounts will follow, unless the disturbed state of the markets in New York should subside. The Ellora has taken 5,900*l* to Bombay, and 9,890*l* to Alexandria.

Silver—There has been but little demand for bars, the Ellora taking 17,260*l* only to Bombay; we quote the price as 61½d per oz standard, with a quiet market.

Mexican Dollars—There have been a few purchases of dollars for the mail to China of the 1st December effected at 62⅛d per oz, and we quote that rate, with a fair demand. The West India steamer has not yet been reported; it is supposed she will have rather a large amount of specie on board.

Exchange on India remains unchanged. Bank drafts on Bombay and Calcutta we quote 1s 11⅞d to 2s 0⅛d: bills with documents, 1s 11½d to 1s 11⅝d; Madras, 1s 11⅞d to 2s for Bank sixty days' sight.

India Government Loan Notes continue steady and firm at a rise of ½ per cent. over our last quotations. 5 per Cents. we quote 95½ to ¾; 5½ per Cents., 101½ to ¾; with more business doing than for some time past.

Quotations for Bullion.—Gold—Bar gold, 77s 10d per oz std, last price; bar gold, fine, 77s 10d per oz std, last price; bar gold refinable, 78s per oz std. Silver—Bar silver, 5s 1½d per oz std; bar silver, containing 5 grs gold, 5s 1½d per oz std; fine cake silver, 5s 5½d per oz; Mexican dollars, 5s 2⅛d per oz; Spanish dollars (Carolus), 6s 2d per oz, last price.

Failures.—In the Bankruptcy Court an adjournment was ordered in the case of Messrs Francis and Hooper, leather factors, of Bermondsey. The certificates (third class) of Messrs Sims and Sims, styling themselves "merchants,"

of Fish street hill, were suspended for two years, and protection was withheld for six months. The conduct of the bankrupts was stigmatised as "reckless and fraudulent" in the extreme.

An adjourned meeting of the creditors of Messrs Williams and Co., of Fenchurch street, was held at the London Tavern, when a proposition was made on the part of the firm to pay 14s 6d, but after some rather lengthened discussion a composition of 15s in the pound was accepted, payable, 5s in a month, 5s in two months, 2s 6d in four months, and 2s 6d in six months; the last to be secured. The following is the official record of the decision come to, drawn up by Mr Theodore Jones, the accountant:—

Messrs J. and E. Williams propose to pay their creditors 15s in the pound, in full discharge of their debts, as follows—5s in one month, 5s in two months, 2s 6d in four months, 2s 6d in six months from this date; the last instalment to be secured. All Messrs Williams' creditors who have stopped goods to consent to state their individual case, to be approved of by Messrs Williams' solicitor, and submitted to some counsel, to be mutually agreed on, both Messrs Williams and the creditors to be bound by such counsel's opinion.

The certificate meeting of Messrs Streatfeild, Mortimore, and Co. is adjourned to Wednesday next, the 5th December. The total liabilities of the London house amount to 736,000*l*, and those of the Liverpool house to 184,000*l*. The dividend meeting is fixed for the 14th December. The claims proved on the estates, which on the first day amounted to 40,000*l*, have day by day increased, until nearly all have been proved. The assets in hand belonging to the London firm amount to 50,000*l*, and 20.000*l* on account of the Liverpool firm. The estates of Mr Mortimore have yet to be realised with other assets. We abstain from any comment arising from the examination of the bankrupts until the whole is before us.

Miscellaneous.—Messrs Baring Brothers and Co., and Glyn, Mills, and Co., are authorised by the Government of Canada to continue for a period of thirty days (from the 1st to the 30th of the present month) the conversion of the sterling debentures of the Province into Canadian Consolidated Five per Cents., at the rate specified in the circular of the Hon. A. T. Galt, dated 31st Dec., 1859.

Messrs N. M. Rothschild and Sons, of London, announce that the Austrian Government, desirous of affording the same facility of negotiating the bonds of the Austrian Five per Cent. Loan of 1859 as that attached to the loan of 1852, have directed that, on and after the 1st of January next, holders of coupons—which by the existing stipulations in the bond can be optionally presented for payment in Vienna at the rate of 25 florins Austrian currency in silver, per coupon; in Frankfort-on-the-Maine at 29 guilders 10 kreutzers, German currency; and in London at 2*l* 10s sterling for each coupon—may likewise on and after the said period present them at the office of Messrs de Rothschild Brothers, Paris, at the rate of 25f 50c per pound sterling, or 63f 75c per coupon.

It is stated that a large amount of bills drawn from Constantinople by some unauthorised person, or in a fictitious name, on a respectable house in London, have been put in circulation at various places on the Continent.

Advices from Naples to-day state that an action brought by Deputy Bertani against one of the public journals on account of some allegations of corruption in connection with the railway concessions granted by General Garibaldi had resulted in his entire vindication.

It is reported that the Sardinian Government have resolved to issue 4,000,000*l* of Treasury bonds.

A recent number of the Toronto *Leader*, one of the organs of the Canadian Ministry, states that the Government, in view of the Grand Trunk Railway Company's application for relief, will immediately appoint three commissioners to institute a searching inquiry into the affairs of the Company. The commissioners are to be Mr Grant, manager of the Northern Railway, and Messrs Langton and Thudieu. The same paper mentions that the advances of the Bank of Upper Canada to the Company were made upon the security of its property in Vermont, New Hampshire, and Maine. It consists of the rolling stock property and entire interest of the Company there, and is fully and unquestionably ample to cover the amount. A previous judgment is removed in favour of the bank, so that there is no creditor before it.

A meeting of the Imperial Brazilian Mining Association took place yesterday, Mr Cutbill in the chair. The accounts showed a balance of assets of 28,570*l*, and the proposition of the directors to declare a distribution of 2*l* 5s per share, leaving 6,070*l*, was agreed to, an amendment for 2*l* 10s being negatived.

A meeting of the Madras Irrigation and Canal Company was also held yesterday, when the report was adopted.

The following committee notice has been posted on the Stock Exchange:—"In consequence of a certain clause of great importance contained in the articles of association having been left out of the prospectus of the Anglo-Spanish Smelting and Silver Mining Company, and of circumstances of the most extraordinary and irregular character connected with bringing out and allotting the shares of the said Company,—Resolved, That the application for a settling day in the shares of the Anglo-Spanish Smelting and Silver Mining Company be refused."

In the first ten months of the present year the exports of the precious metals exceeded the imports by 840,832*l*; for the same period of 1859 the imports exceeded the exports by 2,107,454*l*. In the same period of 1858 the imports exceeded the exports by 9,681,595*l*.

The *Wolverhampton Chonicle* announces "that a number of forged notes of the Stratford-upon-Avon Old Bank (branch of the Stourbridge and Kidderminster Banking Company), purporting to have been issued at Stratford, and dated the 4th of October, 1859, are in circulation."

A new bank is in the course of formation at Liverpool, under the title of "The Mercantile Bank of Liverpool," with the view to render the commerce of the port in a greater degree independent of extraneous financial support.

COMPARATIVE EXCHANGES.

The quotation of gold at Paris is about 1 per mille premium, and the short exchange on London is 25.17½ per 1*l* sterling. On comparing these rates with the English mint price of 3*l* 17s 10½d per ounce for standard gold, it appears that gold is about 1-10th per cent. dearer in Paris than in London.

By advices from Hamburg the price of gold is 424¾ per mark, and the short exchange on London is 13.4¾ per 1*l* sterling. Standard gold at the English Mint price is, therefore, not quite 1-10th per cent. dearer in Hamburg than in London.

The course of exchange at New York on London for bills at 60 days' sight is about 107 to 107½ per cent., which, compared with the Mint par between the two countries, shows that the exchange is against England; but, after making allowance for charges of transport and difference of interest, the present rate leaves no profit on the transmission of gold between the two countries. The exchange market at New York was very unsettled at the time of the last advices leaving, and even lower quotations than the above are given for some descriptions of paper.

Imports of the week ..... 831,515 qrs.

COMMERCIAL EPITOME.

FRIDAY NIGHT.

Nearly the whole of Monday's supply of English wheat was on offer at Mark-lane to-day. For both red and white qualities the demand ruled heavy in the extreme, and sales were difficult, notwithstanding that factors were disposed to accept even further reduced rates than previously noticed. Foreign wheat—the show of which was large—was a mere drug, and somewhat drooping in price. Fine malting barley supported late currencies; but other kinds were rather cheaper. All other produce moved off slowly, at barely late rates. In flour, next to nothing was doing. This week's imports from abroad are large, viz., 22,820 qrs of wheat, 18,260 barley, 51,280 oats, 1,820 sacks and 3,000 barrels of flour.

At Liverpool, this morning, wheat gave way 1d to 2d per cental, and flour was 6d to 1s per 280 lbs lower, with a heavy market.

Messrs Briggs and Co., of Alexandria, report the state of the grain trade to the 17th of November, as follows:—

An active demand for grain and pulse has been maintained, with a further enhancemedt in the value of all descriptions. Receipts from the interior are becoming lighter, whilst the inquiry both for England and Syria continues unabated. For fine samples of wheat, an advance has been established equal to nearly 1s per quarter f.o.b. Beans are eagerly bought up, also at about 1s per quarter f.o.b. over the prices of last week. We have had no arrivals from the interior of Beheireh beans, or of barley, and the transactions in the latter are confined to re-sales from store. Receipts of linseed are limited to 100 ardebs. The following are sales since our advices of the 10th instant, with present value free on board. viz.:—Wheat—Saide, private trade produce, 12,500 qrs, 38s 10d to 40s; ditto, Pacha's produce, 3,460 qrs, 33s 10d to 41s 6d; Beheireh, private trade produce, 1,075 qrs, 37s to 38s; ditto, Pacha's, 2,000 qrs, 37s 2d to 39s 6d; beans—Saide, private trade produce, 3,200 qrs, 29s 2d to 30s; barley, 1,200 qrs, 23s to 24s 6d; Indian corn, 330 qrs, 30s to 30s 6d; lentils, 88 qrs, 26s to 26s 6d; linseed, 590 qrs, 46s 6d per qr. Freights—To the United Kingdom for orders, 7s 2d to 7s 6d for beans; other grain and seed in proportion; to a direct port, 6s 6d to 6s 9d; grain ballasts to Liverpool by sailing vessel, 6s to 6s 3d; by steamer, 7s 3d.

Advices from New York to the 17th November state that large quantities of wheat, flour, and Indian corn were still in progress of shipment to England.

There has been an improved demand in the Liverppool cotton market during the week, caused, principally, by the American reports of the continued decrease in the receipts, considered to predict a forthcoming short crop, and strengthened since by the yesterday's reduction of the Bank rate of discount 1 per cent. The total sales have amounted to 71,000 bales, and include 58,000 bales to spinners, 9,000 bales on speculation, and 4,000 for export. Quotations are a shade dearer than last Friday, and are again gradually reaching their late highest point. To-day's sales are 10,000 bales. Market firm.

The demand for tea has continued in a most inactive state. Only limited quantities have changed hands; nevertheless, no quotable change has taken place in prices.

The following commercial intelligence is dated Hong Kong October 13:—

The news from Shanghai comes down to the 5th inst. Tea—The amount of business in this staple had been extremely small, and that little had been in tea received from Ningpo. A few chops of Ningchow tea had been brought to market, and 1,500 chests had been shipped; but on teamen's account, 800 chests Howchow had been settled at 18 to 23 taels 500 chests common congou at 15 taels, and a small parcel of Oolong. Green Tea—About 7,500 packages had been settled, and of Japan about 2,000 packages. The quality of the Chinese tea was to such a state as to forbid classification, and consequently quotations are nominal. Silk—

Considerable business had been done in silk. True Tsatlees were firm in price, but inferior and Taysaams were a shade lower. The insurgents do not appear to interfere with the transit of this article, which in all probability is allowed to pass on payment of a duty. A large supply of silk may be expected from Japan. The markets for imports in Foochow continued very brisk. Tea—The recent large business had in a measure subsided. Adverse accounts of business generally from home, large stocks and apparent indifference on the part of the teamen had caused the transactions to be limited. The market had, however, a downward tendency. Settlements reported were as follows:—10,000 chests congou, dusty to common, 12½ to 18 taels; good common to flavoury, 19 to 24½ taels; Ningchow, 26½ taels; 700 chests Souchong, 33½ taels; 600 chests flowery Pekoe, 35½ to 40½ taels; 14,800 packages Oolong, 19 to 28½ taels; 2,600 packages scented tea, 24½ to 34½ taels. Our export of tea for this season, from 1st July to 12th October, 1860, is,—from Canton, 12,495,200 lbs; Foochow, 13,249,700; Shanghai, 1,739,600, giving total for the season 1860-61, as far as yet ascertained, 27,484,500 lbs against 21,919,300, at the same date last year—showing an increase of 5,565,200 lbs. The silk export, has been 24,195 baels, against 19,982 last season—the increase being 4,213 bales. Business in Canton continued to improve. Tea—Owing to renewed communication with the tea districts in consequence of the re-opening of the passes, large arrivals of tea have taken place. Sales, however, have been to a limited extent only.

Good and fine raw sugars have been taken off to a fair extent on former terms; but all other qualities have met a dull inquiry. Refined goods have ruled about stationary.

The supplies of coffee on offer by private contract have not increased. Plantation kinds have commanded full quotations; but other descriptions have met a heavy sale.

Messrs Volkart and Brothers, of Ceylon, thus report the state of the coffee trade to the 29th October:—

The disposal of the present season's crop to date is as follows:—

PLANTATION COFFEE.				
To Great Britain .....cwts	16,358	against last year, cwts		18,525
Foreign Ports	—	—	—	1,262
Australia and India.....	—	—	—	—
	16,358			19,787
NATIVE COFFEE.				
To Great Britain.....cwts	9,204	against last year, cwts		9,202
Foreign Ports.....	1,496	—	—	822
Australia and India.....	—	—	—	—
	10,700			10,024

Native coffee has remained almost without inquiry since the date of our last, there being very little disposition on the part of merchants to deal in the inferior samples now coming to hand. We call this description about 2s cheaper. In plantation coffee we hear of but one or two small lots purchased at previous values, one parcel for immediate delivery on the spot having changed hands at a higher figure. A good deal of the low crop is now in, and rains having been abundant, higher estates are said to be doing better than was expected. Plantation coffee, low, nominal; ditto, mountain, 11s 3d to 11s 6d per bhl; native coffee, unpicked, 41s to 42s; ditto, picked and dried, 43s to 44s per cwt. Cinnamon, plantation, 9d to 10d; ditto, inferior, 6d to 7½d per lb.

A Government contract for 150 tons having been announced, cocoa has been held firmly. The business doing in it, however, is very moderate.

Owing to the depressed state of the grain trade, all descriptions of rice have moved off heavily, at barely previous rates. There has been less activity in the demand for fruit, at about last week's currency.

The inquiry for saltpetre has been much restricted, and prices have had a drooping tendency.

A Government contract for 100,000 gallons of rum has been announced. That article has, consequently, been in improved request, and the quotations have somewhat advanced. In brandy and grain spirits, next to nothing has been doing.

The colonial wool sales are progressing steadily. Compared with the previous series, fine Sydney and Port Philip wools show an advance of 1d to 1½d; Cape qualities, a decline of 1d per lb.

The metal market has been devoid of animation. Oils, almost generally, have changed hands slowly, at about previous rates.

The demand for tallow has fallen off. To-day, P.Y.C., on the spot, has sold at 60s 3d to 60s 6d; December, 60s 3d; January to March, 60s 6d; April to June, 59s to 58s 6d; October to December, 1861, 57s 6d per cwt.

There was a decided favourable change in the confidence of money-lenders at New York on the 14th instant. The dead lock of the preceding day in the negotiation of mercantile paper outside of the bank was removed, and a fair currency restored for first-class names, some of which were passed at 8 per cent. per annum, or only 1 per cent. over the bank rate, and others at from 10 to 12 per cent. Some fair single names, which could scarcely be forced on sale on the 13th at 21 to 24 per cent., were quoted on the afternoon of the 14th at 15 to 18 per cent. On demand loan the stockbrokers were rather easier accommodated, though negotiations in this way were still embarrassed by the unusual cautious scrutiny of the collateral. The rate was generally 7 per cent. to the best firms, and this was paid on federal as well as railway stocks. Exchange rates again lower, and 106 to 107¼ per cent. was called the range for first-class bills. Sight exchange on New York at New Orleans was reported 99¼ to 99½, a further improvement of ⅛ to ¼ per cent. The following table shows the condition of the banks in four leading cities:—

	Loans. dols.	Specie. dols.	Circulation. dols.	Deposit. dols.

MARKETS IN THE MANUFACTURING DISTRICTS.

The amount of business doing in the manufacturing districts this week has been only moderate, and, in some instances, prices have had a drooping tendency, notwithstanding that the home trade is still remarkably healthy. The demand for cotton has improved to some extent, and the quotations have slightly advanced. Scotch pig iron has met a dull inquiry; but manufactured parcels have commanded rather more attention. Coals have sold at high rates, owing to the continued heavy shipments to the Continent.

MANCHESTER, Nov. 29.—Our market has shown a steady aspect this week, and rather an increase of transactions has been observed. At the end of last week a few extremely large purchases were made for China, chiefly of shirtings and T' cloths, and 16's to 24's water twist. These gave a tone to prices generally, which has since been fully supported. Buyers for smaller markets have been giving out orders with less hesitation, though the only definite advance we can quote has been in the above-named articles for China. And with respect to these, considerable stocks are now passing through the hands of exporters, shipment of which is delayed till circumstances determine to what Chinese port they should be sent. India goods and yarns have been little bought; German yarns bought moderately.

COMPARATIVE STATEMENT OF THE COTTON TRADE.

BRADFORD.—Wool is much the same as last week. More sales might be made at easier rates. Notwithstanding the dull trade, prices, owing to the scarcity of wool, are maintained with great firmness. There is a good sale for noils and brokes. In the yarn department there is a steady trade doing, but chiefly for the home trade, though the German houses are rather more active. In pieces the home traders are quiet, and the threatening aspect of American affairs appears to check business in that direction.

ROCHDALE.—The greatest demand is for home consumption, shipping houses not operating to any extent at present. Prices are not appreciably altered. For Yorkshire goods there is a shade more demand, and for some descriptions a little more money is obtainable.

LEICESTER.—There is a fair amount of business doing in some branches of the hosiery trade, and business generally is steady. At Loughborough and other country districts there is about an average amount of business doing. Manufacturers are keeping stocks low. Wools are high in price. The business doing in yarns is at late quotations.

NOTTINGHAM.—The lace trade remains very languid, neither home nor foreign buyers operating to any extent. There is not much doing in plain goods; some orders have been received for nets in the brown state, used for certain purposes. The fancy trade continues depressed; there has been a little doing in plaits; the demand for muslins is quiet. There is hardly so much doing in silk goods. In hosiery the dulness noticeable for the past fortnight continues.

BIRMINGHAM.—A change of an unfavourable character has occurred in connection with the trade of this town. Country orders have considerably fallen off. The iron trade in this district does not rally; all who are engaged in it are complaining. The coal trade is remarkably good, and prices firm.

GLASGOW.—At the last public sales of wool, the following prices were realised:—Half-bred hogs 18½d to 21½d per lb, white Cheviot 16d to 18d, ditto hogs 17½ to 20d, laid Cheviot washed 10½d to 13½d, some hogs 13½d to 14½d, laid Cheviot unwashed 7d to 10d, white Highland 8d to 10½d, laid ditto 5½d to 7d.

BELFAST.—The Linen Trade—Sales for the home market are the shade better, but still range far under those noted for the last week of November, 1859. There is still a steady turn-over in the foreign department of the trade; and, from all that can be anticipated, the year will close with an aggregate of stocks in warehouses rather below the average of the season. Brown Markets—There was a more active demand for roughs; and, in some cases, the depreciation of the previous market was made up by the turn on the side of holders. Damask goods have been freely taken off, and the older houses in that trade are well up in contracts. The lawn manufacture continues pretty active; no change in the market for handkerchiefs.

WOLVERHAMPTON.—The official list of prices of Staffordshire finished iron is as follows:—Common Staffordshire bars, 7*l* 10s, at the works; best bars, 8*l* 10s; sheets, 9*l*; doubles, 10*l* 10s; nail sheets, 8*l* 10s; latten, 12*l*; boiler plates, 9*l*; best and best best in proportion; common rods, 7*l* 10s; hoops, 8*l* 10s; gas strip, 8*l*; Canada plates, 12*l*, and all other sorts in proportion. Welch bars, 5*l* 7s 6d to 5*l* 10s. The nominal price of rails in Wales is 5*l* 10s.

COLONIAL AND FOREIGN PRODUCE MARKETS.

TRANSACTIONS OF THE WEEK.

FOR REPORT OF THIS DAY'S MARKETS, SEE "POSTSCRIPT."

MINCING LANE, FRIDAY MORNING.

SUGAR.—There has not been any further change in prices to notice this week, but the market is firmer, with diminished supplies offering. The sales of West India to yesterday (Thursday) reached 1,339 casks, at extreme rates. 200 casks Barbadoes, by auction, went from 41s to 46s 6d per cwt for low to fine. More inquiry prevails from the refiners, and the grocery Porto Rico submitted sold at the full valuations. The deliveries of sugar last week, although only 3,750 tons, were in excess of the landings, which amounted to 1,430 tons, consequently the stock has further decreased, viz., to 54,150 tons, against 66,000 tons in 1859.

Mauritius.—A few parcels have changed hands by private contract.

Madras.—4 000 bags native have been disposed of by private contract at 34s 6d to 35s; and 1,100 bags dark Jaggery, at 33s 3d per cwt.

Bengal.—534 bags middling Gurpatta date sold from 42s 6d to 43s 6d per cwt.

Foreign.—By auction, 770 casks 147 barrels Porto Rico chiefly sold at steady rates: brown and low, 40s to 41s 6d; low to very good yellow, 42s to 46s 6d. Privately, 600 bags clayed Manilla are reported at 40s, and 2,300 boxes Havana at 41s 6d to 42s 9d. Two floating cargoes of Havana, Nos. 9½ to 10½, sold for near ports at 27s 6d to 28s 3d.

Refined.—The market has been firmer, although not very active, and the latest sales show an advance of fully 6d on dry goods, the lowest grocery descriptions selling at 51s per cwt. Dutch crushed meets with more inquiry.

MOLASSES.—Scarcely any business has been done this week.

RUM.—The announcement of another Government contract for 100,000 gallons has influenced the market favourably. Demerara proof, 1s 11d to 2s 1d per gallon. Other kinds are firm.

COCOA.—A few contracts have been made in West India at previous rates. The 150 tons required by the Government will probably be taken in foreign. Tenders are to be sent in on the 12th proximo.

TEA.—There has not been any improvement in the demand, and the China intelligence received this week exercises little influence on the market. Common congou has sold at 1s 2½d per lb, and rather under.

COFFEE.—There is rather a better feeling in the market, and prices have experienced little variation. 160 casks 364 barrels and bags plantation Ceylon sold at 67s to 74s 6d for fine ordinary to good middling. 50 casks 40 barrels native brought 63s 6d to 64s for good ordinary to good. Some inquiry prevails for private contract. 539 bags Rio were bought in at 51s to 62s for ordinary to fine ordinary. Four floating cargoes of Rio have sold at 55s 9d to 56s 6d for near ports. Two of St Domingo at 63s 9d to 65s for the Mediterranean. 850 bags Rio on the spot brought 58s to 59s 6d per cwt. The total stock at this port is 6,730 tons, against 8,700, 7,350, 8,820, and 7,400 tons in the four preceding years.

RICE.—The sales have been on a limited scale by private contract, at easier rates: old Necrancie Arracan, 10s 9d; white Bengal, 12s 6d to 13s. A floating cargo of Necrancie Arracan is reported at 12s.

IMPORTS and DELIVERIES of RICE to November 24, with STOCKS on hand.

SAGO.—100 boxes middling small pearl sold at 18s 6d to 19s. 220 bags sago flour were bought in at 18s per cwt.

SPICES.—The sales have been small. 14 cases mace sold at lower rates: mixed and common to fair, 1s 1d to 1s 5d. 44 cases brown nutmegs sold at the previous value: small good bold brown, 1s 4d to 3s 10d. Black and white pepper have been inactive. No change has occurred in pimento. Cloves remain firm. 237 bags African ginger sold at 37s 6d. 123 barrels Jamaica went rather dearer: low small to fine, 3*l* 5s to 8*l* 5s per cwt.

SALTPETRE.—This article has been dull, and Bengal is dull of sale even at a further reduction in prices.

IMPORTS and DELIVERIES of SALTPETRE to November 17, with STOCKS on hand.

Stock	3950	...	4020	..	2450	...	7000

Deliveries last week 345 tons.

COCHINEAL.—The market has been inactive, and 305 bags about half met with purchasers: Honduras silvers, foul and pasty to fair grain, 2s 3d to 3s 4d; Teneriffe silvers, 2s 10d to 2s 11d; blacks, 3s 1d to 3s 4d per lb.

DYESTUFFS.—Safflower has been quiet. 360 bales Gambier were offered by auction on Tuesday, when the prices unexpectedly ranged from 17s 6d to 18s 6d, there being sellers of good privately at 17s 6d per cwt.

CAMPHOR has advanced considerably during the past fortnight, and the quotation is nominally 8*l* 10s to 9*l* per cwt.

RUBBER.—East India is unsaleable, unless at about 2d per lb under the late nominal quotation.

METALS.—The market has been devoid of animation, and the changes in prices generally are unimportant. More inquiry prevails for spelter. 20*l* to 20*l* 5s paid on the spot; 20*l* 10s spring shipment. British copper has been quiet at the smelter's quotations. Foreign tin is firm. A few contracts have been made in Straits at 130s 6d to 131s per cwt. Manufactured iron has been in moderate demand. Scotch pig has fluctuated in value slightly. This morning mixed numbers close at 52s 6d per ton.

HEMP.—There is no change to notice in this market, which remains quiet. Jute keeps steady, but transactions are very moderate in the absence of further public sales.

LINSEED.—With more extensive arrivals, prices have ruled rather lower. East India, 59s to 64s; Calcutta afloat, 58s. A floating cargo of Odessa was sold at 58s per quarter for the United Kingdom.

OILS.—There is more doing in olive: Gallipoli, 60*l*; other kinds, 55*l* 10s to 59*l*. A floating cargo has sold at 57*l* 10s per ton for the United Kingdom. Common fish oils do not show any further change. Sperm has realised 102*l* per tun for colonial. Rape oil is dull, with a large stock; foreign refined, 44s to 44s 6d; brown, 42s. The demand for linseed is firm, at 29s 6d. Large sales are reported for forward delivery at 30s to 30s 3d per cwt. Cocoa-nut firm; Cochin, 55s 6d to 56s: Ceylon, 54s to 54s 6d; for arrival, 2s to 3s less would be accepted. Palm is quiet; fine Lagos, 47s 6d to 48s per cwt.

TURPANTINE is quiet at 11s. Spirits dull, with sellers of American at 32s 6d per cwt.

TALLOW.—The market at one period this week was firmer, but it has since assumed a more quiet tone, and quotations are nearly the same as on Friday last, viz., 1st sort Y.C., 60s to 60s 3d: to the end of the year, 60s 6d: for delivery in the first three months of next, 60s 6d per cwt.

PARTICULARS OF TALLOW.—Monday, November 26.

POSTSCRIPT. FRIDAY EVENING.

SUGAR.—The market was steady to-day. 2,800 bags Mauritius partly sold at full prices. 1,726 bags Madras partly found purchasers at 33s 6d to 34s 6d for soft pasty brown. Dark Jaggery was taken in at 34s. 351 casks grainy Demerara were partly disposed of at 42s to 47s. 221 bags Gurpatta date Bengal withdrawn above the value. The week's business in West India reaches 1,868 casks.

COFFEE.—115 casks 25 barrels 203 bags plantation Ceylon partly sold at full prices. 437 bags native triage and blacks, 35s to 47s 6d. 984 bags Rio were chiefly sold at 56s to 58s. 227 bags Bahia partly found buyers from 58s 6d to 62s.

COCOA.—315 bags Bahia partly found buyers from 57s to 58s 6d per cwt.

COCHINEAL.—136 bags sold at 1d per lb decline.

LIMA WOOD.—650 tons Lima were bought in: pile 2, 10*l* to 10*l* 10s per ton.

PALM OIL.—700 casks by auction partly sold at 45s to 47s 6d per cwt. Colonial sperm brought 100*l* to 102*l*; headmatter, 102*l* 15s. 3,750 tubs Japan fish, 27*l* 5s to 30*l* per tun.

TALLOW.—Town was reduced to 60s 3d. By auction, 300 casks St Petersburg, unbracked, were bought in at 58s 6d; 291 casks Australian part sold at 53s 6d to 58s per cwt.

ADDITIONAL NOTICES.

REFINED SUGAR.—The home market for refined sugar has been rather firmer this week. The inferior descriptions of treacle are rather lower. In Holland crushed continues very firm; here some few sales have been made, viz., 50 tons B. & H. No. 1, 33s 9d barrels; 70 tons V. O., at 33s 3d, tierces; also 100 tons W. & Z., at 32s in barrels and 31s 6d hhds, f.o.b. at Rotterdam and Amsterdam.

GREEN FRUIT in good demand, and market freely supplied. Arrivals of oranges have been received from St Michael, Terceira, and Fayal. A cargo of the latter sold by Keeling and Hunt at public sale, sold at 21s to 21s 6d per box. Black Spanish nuts sell freely at 37s. Barcelonas firm, at 35s. Brazil advanced 2s per barrel. Messina lemons, 19s per case. Almeria grapes, 25s to 40s per barrel, in character with condition and quality.

DRY FRUIT.—Though the dry fruit trade has been less active this week, prices are unaltered, unless in figs, which for ordinary and mediums have declined 2s to 3s per cwt. Valentia raisins are firm at 42s; selected, 43s to 44s. Clearances of all sorts beyond the average.

COLONIAL WOOL.—The sales continue to progress at opening rates.

FLAX.—The value of this article is unaltered.

HEMP.—The market is quiet, and there is but little business to report this week.

COTTON.—Sales of cotton wool from Friday, 23rd November, to Thursday, the 29th, inclusive:—1,100 bales Surat, at 4½d for middling old Oomrawattee, 4¼d to 4⅜d for middling fair to fully fair Compta, and 5⅜d for a few good new sawginned; 800 bales Madras at 4¼d to 4⅜d for fair to fully fair Western, and 5⅜d for fair Tinnivelly. Last week there were no reported sales of cotton. This week an improved demand has prevailed, and a fair amount of business has been transacted, and the market closes with a much steadier feeling, the decline from the late highest point being barely ⅛d per lb for Tinnivelly, and about ⅛d to ¼d per lb for Western Madras and Surat. P.S.—Sales to-day: 300 middling fair Western, 4⅜d; 150 ditto Dhollera, 4⅜d, being about previous rates.

SILK.—This silk market has been rather quiet this week, consumers having supplied themselves. Prices of good and fine silk very firm; common sorts neglected.

TIMBER.—Some business doing in wood, though bearing no proportion with the heavy supply. For the increased freight payable on the autumn cargoes, there has been no equivalent rise in the value of deals or of timber. Teak, and some of the shipbuilding timber is becoming very dear. The demand for staves is excessively flat.

LEATHER AND HIDES.—There was not a large supply of fresh leather at Leadenhall on Tuesday, but it was fully adequate to the demand. The transactions of the week are generally at previous rates, and amount to about an average for this season of the year. The public sales of Thursday last went off heavily, and the tendency of prices in general was downward. The principal sales were 1,048 dry Bahia hides, firsts, 17 lbs at 9⅜d to 9½d, 26 lbs at 11½d; 612 salted Monte Video hides, 80½ lbs at 6½d, 93 lbs at 6⅜d; 2,035 Australian (out of 7,400 offered) at a reduction of ⅛d to ¼d per lb; 1,096 salted Buenos Ayres horse hides, 29 lbs at 10d; 8,768 Buffalos, best light Calcutta, 4¾d to 5d; Batavia 18 lbs at 6½d; Penang, 31½ lbs at 4d; Singapore, 27½ lbs to 40 lbs at 3¾d to 4⅞d for best, seconds 3½d to 4d; 84,000 East India kips (out of the 149,709 offered) at a decline of ¼d to ½d per lb; 4,400 East India tanned kips at about previous rates. There were no buyers of the drysalted Bahia, and salted Danish hides, nor of the salted German calf-skins. The sales by private contract are chiefly of Buenos Ayres light ox 46 lbs to 48 lbs at 6½d to 6⅞d; and 1,756 Australian hides, 62 lbs at 4½d.

METALS.—There is no special feature in the metal market, there being little doing in any branch. Copper is quiet in demand, and the very high price of ores is hardly maintained. Iron is without change, continuing quiet. Tin is well supported. Lead fairly firm at quotations. Spelter rather flat and drooping. Tin plates unchanged.

PROVISIONS.

Bacon market very quiet, prices being on the decline. Fine saleable Waterford bacon, 63s to arrive. Friesland, very indifferent, price 108s to 110s. Irish butter is dull of sale, but the price is maintained, and no chance of being lower.

METROPOLITAN CATTLE MARKET.

MONDAY, Nov. 26.—The total imports of foreign stock into London last week amounted to 8,330 head. In the corresponding period in 1859 we received 5,981; in 1858, 5,674; in 1857, 4,484; in 1856, 4,014; in 1855, 5,992; and in 1854, 5,680 head.

The arrivals of home-fed beasts fresh up this morning were moderate, and in somewhat improved condition. The best Scots, &c., were in steady request at quite last Monday's currency; but other beasts moved off slowly at late rates. We were fairly supplied with most kinds of sheep; on the whole, the mutton trade may be considered steady at last week's quotations. The show of calves was limited, and the veal trade ruled firm at extreme rates.

SUPPLIES.

	Nov 29, 1858.	Nov. 28, 1859.	Nov. 26, 1860.
Beasts	4626	4240	5300
Sheep	18950	20620	21850
Calves	90	127	148
Pigs	450	480	360

THURSDAY, Nov. 29.—About an average supply of beasts was on offer in to-day's market, in very middling condition. All breeds met a dull inquiry; but, compared with Monday, no change took place in prices. The show of sheep was limited; nevertheless, the mutton trade ruled very inactive, on former terms. Prime small calves were in fair request at full quotations; but inferior veal was very dull.

Per 8 lbs to sink the offal.

	s	d	s	d		s	d	s	d
Coarse and inferior beasts	2	6	2	8	Prime Southdown sheep	5	2	5	4
Second quality ditto	2	10	3	4	Large coarse calves	3	8	4	2
Prime large oxen	3	8	4	4	Prime small ditto	4	4	4	8

Coarse and inferior sheep	3	4	3	8	Small porkers	4	8	5	0
Second quality ditto	3	10	4	6	Suckling calves...each	19	0	22	0
Prime coarse-woolled do.	4	8	5	0	Quarter old store pigs	23	0	29	0

Total supply—Beasts, 1,050; sheep and lambs, 2,800; calves, 220; pigs, 340.
Foreign supply—Beasts, 540; sheep, 1,080; calves, 194.

NEWGATE AND LEADENHALL.

FRIDAY, Nov. 30.—There is a fair demand for prime beef and mutton at full prices; otherwise the demand was very inactive, at barely late rates. The supplies of meat are seasonably good.

Per 8 lbs by the carcass.

	s	d	s	d		s	d	s	d
Inferior beef	2	4	2	8	Mutton, inferior	3	0	3	8
Middling ditto	2	10	3	4	— middling	3	10	4	0
Prime large	3	6	3	8	— prime	4	2	4	4
Prime small	3	10	4	2	Large pork	3	10	4	4
Veal	3	8	4	4	Small pork	4	8	4	10

HOP MARKET.

BOROUGH, Monday, Nov. 26.—Our market continues in the same inactive state as of late, and prices are still further depressed:—Mid and East Kent, 6*l*, 14*l*, 18*l*; Weald of Kents, 5*l*, 8*l*, 13*l*; Sussex, 5*l*, 7 9*l*; Yearlings, 5*l*, 7*l* 7*s*, 10*l*.

FRIDAY, Nov. 30.—The market is heavy at late prices.

POTATO MARKET.

SOUTHWARK WATERSIDE, Monday, Nov. 26.—During the past week the arrivals, both coastwise and from abroad, have been larger than in any week during the season. The trade is very dull: second and inferior samples almost unsaleable. The following are this day's quotations:—York Regents, 110s to 130s; Lincolnshire ditto, 100s to 110s; Dunbar ditto 150s to 140s; Perth, Forfar and Fife ditto, 100s to 110s; Rocks and Reds, 90s to 100s; French whites, 85s to 90s; Belgian ditto, 80s to 90s; Dutch ditto, 80s to 85s per ton.

WATERSIDE, Thursday, Nov. 29.—The supplies of potatoes continue large at this market, and there has been no material falling off in the arrivals this week; trade, consequently is sluggish, at nominally the annexed quotations:—York Regents, from 110s to 130s; Kent and Essex ditto, 110s to 140s; Scotch ditto, 100s to 120s; Dunbars, 120s to 150s; French, 90s to 105s; Belgian, 80s to 85s; Prussian, 85s to 95s per ton.

HAY MARKETS.—THURSDAY.

SMITHFIELD.—Meadow hay, 2*l* 0s to 5*l* 5s; clover, 3*l* 5s to 5*l* 10s; and straw, 1*l* 10s to 1*l* 14s per load. Trade dull.

CUMBERLAND.—Meadow hay, 2*l* 8s to 5*l* 5s; clover, 3*l* 5s to 5*l* 10s; and straw, 1*l* 10s to 1*l* 16s per load. A slow trade.

WHITECHAPEL.—Meadow hay, 2*l* 5s to 5*l* 5s; clover, 3*l* 10s to 5*l* 15s; and straw, 1*l* 10s to 1*l* 16s per load. A heavy demand.

COAL MARKET.

FRIDAY, Nov. 30.—Wall's-end: Tees 23s. Ships at market, 9, mostly steamers.

LIVERPOOL MARKETS.

WOOL.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, Nov. 30.—The demand continues good, and we have a moderate amount of business doing in this market at firm prices, notwithstanding that the trade are occupied with the public sales in London, which commenced on the 15th inst., and will close on the 7th proximo.

CORN.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, Nov. 30.—Market moderately attended. Wheat in moderate consumption; business at a decline of 1d to 2d per cental. Flour, 6d to 1s per sack lower; barrels, a turn easier, with firm business. Indian 3d to 6d lower. Other articles unchanged.

METALS.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, Nov. 30.—There is no new feature to report in the market for manufactured iron, the demand for which has been only on a moderate scale during the past week. Scotch pig iron has maintained much steadiness, with a fair business doing. Copper is remarkably quiet, as also lead, for which there is little inquiry. Most other metals remain with little or no change to report.

The Gazette.

TUESDAY, Nov. 27.

BANKRUPTS.

J. Tomey, Queen's road, Chelsea, grocer.
R. G. Pappe, Barbican, builder.
A. Jennings and W. T. Jennings, Little Tower street, ship stores merchants

W. H. Smith, H. W. Withers, C. W. Coen, and G. Parsson, Creek bridge, Deptford, coal merchants.
C. Heath, Oxford street, Southampton, coffee house keeper.

LYCEUM THEATRE.—Mr S. Lover's comical novel of "Handy Andy" has been converted into a dramatic shape, that Mr John Drew, an actor celebrated in Ireland, may maintain the part of the blundering serving-man—the Jocrisse of Irish fiction. Mr Drew is an artist of the quietest and least obtrusive kind, never violently thrusting forward his drollery, but allowing it to insinuate itself into the minds of the audience, as if perfectly relying on its natural force.

CRYSTAL PALACE GREAT WINTER POULTRY SHOW.—This great annual show of poultry will be held at the Crystal Palace this year during the cattle show week, commencing on Wednesday, the 12th, and continuing until Saturday, the 15th December. The entries are very numerous, comprising nearly 1,000 pens of poultry of all kinds, with gold, silver, and other varieties of pheasants, nearly 400 pens of pigeons, and 100 pens of rabbits.

EPITOME OF RAILWAY NEWS.

TRAFFIC RETURNS.—The traffic returns of railways in the United Kingdom for the week ending Nov. 17 amounted to 499,740*l*, and for the corresponding week of last year to 474,245*l*, showing an increase of 25,495*l*. The gross receipts of the eight railways having their termini in the metropolis amounted to 204,553*l*, and for the corresponding week of 1859 to 203,814*l*, showing an increase of 739*l*.

NEW RAILWAY BILLS.—The notices of application to Parliament for Railway Bills in the ensuing session are very numerous. Up to the present time notices for about 260 Railway Bills have been given. The proposed lines are comparatively short, and chiefly for the purpose of shortening through routes, improving communications between existing railways, and for affording accommodation to local traffic in places much in want of railway communication. Powers to enlarge station accommodation, and for entering into traffic and other arrangements with other companies, are announced in a great number of the notices. There are three or four notices of application for Bills to authorise amalgamation, the principal ones being for the amalgamation of the Caledonian, the Edinburgh and Glasgow, and the Scottish Central Railway Companies; and the North-Eastern and the Newcastle and Carlisle Railway Companies. There is also a Bill for authorising traffic arrangements between the London and North-Western, the Great Northern, and the Manchester, Sheffield, and Lincolnshire, for the mutual benefit of those companies.

RAILWAY AND MINING SHARE MARKET.

LONDON.

MONDAY, Nov. 26.—The principal movement in the railway market this morning, was a rise in Midland to 134¼, the stock being in demand and scarce not only in London, but also in the provincial markets. The advance led to a few realisations, and a reaction took place to 133¾ to ⅞. Other descriptions were also firm in the earlier part of the day, but relapsed with Consols, and in several instances showed a decline compared with Saturday. American railway securities showed increased flatness, especially the shares of the Illinois Central and New York and Erie, the former declining 3 dols, and the latter 1 dol. Mines were firmer, and in several cases an advance took place. Joint stock banks were also steady. In miscellaneous descriptions, there was an improvement in English and Australian Copper and Royal Mail Steam, and a reduction in Mediterranean Extension Telegraph. Great Ship shares were dull at 4s to 4s 6d. Victoria debentures, now, left off at 106¾ to ⅞; Canadian Five per Cents., 102¾ to 103¼.

TUESDAY, Nov. 27.—In the railway market to-day the chief fluctuations were in Midland and Lancashire and Yorkshire. The former advanced in the morning to 134, but some sales subsequently caused a decline to 133½ to ¼. Lancashire and Yorkshire was in active demand in the afternoon, especially on provincial account, and improved nearly 1½ per cent. on a reported traffic arrangement between this company and the Midland. Other stocks were mostly higher, except Great Northern, which receded 1 per cent. Eastern Counties were also flat. In the foreign market, South Austrian and Lombardo-Venetian relapsed to ⅜ to ½ dis. American railway securities were firmer.

WEDNESDAY, Nov. 28.—The railway market was animated throughout the day, and closed firmly, although not quite so good as at one period. In the colonial market, Grand Trunk of Canada advanced to 24 to ½, from the scarcity of the stock for the settlement. Great Western shares remained dull at 11 to ¼. No change of importance occurred in the foreign market. South Austrian and Lombardo-Venetian, however, continued with a heavy tendency. A further recovery took place in Illinois Central and New York and Erie shares. Mines were inactive and rather less steady.

THURSDAY, Nov 29.—The railway market opened steadily, and a further advance took place, which, however, was not fully maintained. The closing prices for the new account showed little alteration from yesterday. York and North Midland, however, improved 1 per cent. Foreign descriptions showed rather an adverse tendency, especially South Austrian and Lombardo-Venetian. In American securities the bonds of the Illinois Central improved. New York and Erie shares on the other hand were 1 dol lower. A moderate business was transacted in mines at an occasional advance. Joint stock banks were without alteration.

FRIDAY, Nov. 30.—In the railway share market to-day there was an active demand for Lancashire and Yorkshire stock, which experienced a fresh rise of ½ per cent. There is also an advance of ¼ per cent. in Great Western. London and North-Western is firm. On the other hand, a reduction of ⅛ to ¼ per cent. was observable in South-Eastern, Midland, and Caledonian.

The Economist's Railway and Mining Share List.

THE PERFECT SUBSTITUTE FOR SILVER.—The real NICKEL SILVER, introduced more than twenty-five years ago by WILLIAM S. BURTON, when PLATED by the patent process of Messrs Elkington and Co., is beyond all comparison the very best article next to sterling silver that can be employed as such, either usefully or ornamentally, as by no possible test can it be distinguished from real silver.

A small useful set, guaranteed of first quality for finish and durability, as follows:—

	Fiddle or Old Silver Pattern	Thread or Brunswick Pattern	Lily Pattern	King's or Military, &c.
	£ s d	£ s d	£ s d	£ s d

KEATING'S COUGH LOZENGES.—Statistics show that 50,000 persons annually fall victims to Pulmonary Disorders, including Consumption, Diseases of the Chest, and the Respiratory Organs. Prevention is at all times better than cure; he, therefore, prepared, during the wet and wintry season, with a supply of KEATING'S COUGH LOZENGES, which possess the virtue of avertiag, as well as of caring a Cough or Cold; they are good alike for the young or for the aged.

RESTORATION OF VOICE BY KEATING'S COUGH LOZENGES. Glasgow.

SIR,—I have great pleasure in informing you of the great good your excellent COUGH LOZENGES have done me. In December, 1845, I caught a severe cold from riding two or three miles, one very wet night, which settled in my lungs, and quite took away my voice, so that I could not speak above a whisper from that time until December last. I tried all kinds of medicines, but they were of no avail. I was then advised to try your Lozenges, which I did only to please my friends, but before I had finished a 2s 9d tin, my voice, to my great joy, came back as strong as ever.—I am, Sir, yours respectfully, JAMES MARTIN.

THOMAS KEATING, Esq.

Prepared and Sold in Boxes, 1s 1½d; and Tins, 2s 9d, 4s 6d, and 10s 6d each, by Thomas Keating, chemist, &c., 76 St Paul's Churchyard, London. Retail by all Druggists, &c.

HOLLOWAY'S OINTMENT AND PILLS.—Experience Teacheth Wisdom.—The common consent of mankind has awarded to Holloway's remedies the palm for curing most complaints, whether external or internal. During the past quarter of a century thousands have borne willing testimony to their efficiency in alleviating the sufferings of mankind, and in expelling from the human body the first causes of disease. No other means can extract from the blood and solids any existing impurities with the same unerring certainty as Holloway's preparations, which fairly filter out all morbid matters. Numberless testimonials from clergymen and others, humanely watching over the welfare of the poor, attest their merits, which are gratefully acknowledged throughout the whole civilised world, being selected by wisdom and experience.

ANOTHER CURE OF LONG-STANDING ASTHMA by DR LOCOCK'S PULMONIC WAFERS.—Caldicot, February, 3, 1860. "Sir,—I was afflicted for years with a most violent Asthma, with shortness and difficulty of breathing, and at times a cough so bad as to cause me violent vomiting and dry retching. I had been ill some years, and tried nearly all the medical men about here. I found relief almost immediately, and have followed my employment ever since. JAS. GARDNER, Market Gardener. Witness, MR THOS. I. JONES, Chemist, 5 High street, Newport." To singers and public speakers Dr Locock's Wafers are invaluable for clearing and strengthening the voice. They have a pleasant taste. Price 1s 1½d, 2s 9d, and 11s per box. Sold by all druggists.

NO MORE PILLS OR ANY other Physic.—For Constipation, Indigestion (Dyspepsia), Palpitation, Nervous, Bilious, and Liver Complaints, Debility, Dropsy, Epilepsy, Paralysis, Cough, Asthma, Consumption, Bronchitis, Sore Throat, Fevers.

DR BARRY'S delicious Health-restoring REVALENTA ARABICA FOOD, which, at a few pence per day, saves fifty times its cost in medicine, and cures without purging or any of the uncertainties, annoyances, and ruinous expenses incurred by medicine, cod liver oil, or visits to distant climates.

Certificate No. 36,418.—We find it the safest remedy Andrew Ure, M.D., F.R.S.; Dr Harvey; Dr Wurzer Dr Shorland; Dr Campbell.

We extract a few out of 56,000 cures:—

Cure No. 1,771.—Lord Stuart de Decies of many years' dyspepsia.——Cure No. 40,832.—"Of fifty years' indescribable agony from dyspepsia, nervousness, asthma, cough, constipation, flatulency, spasms, sickness and vomiting." Maria Joly, of Lynn, Norfolk.——Cure No. 47,121.—Miss Elizabeth Jacobs, of extreme nervousness, indigestion, gatherings, low spirits, and nervous fancies.——Cure No. 54,816.—The Rev. James T. Campbell, Syderstone Rectory, near Fakenham, Norfolk, of indigestion and liver complaints.——Cure No 56,814.—Mr Samuel Laxton, Leicester, of two years' diarrhœa.——Cure No. 180.—Mr W. Reeves, 181 Fleet street, London, of 25 years' nervousness, constipation, indigestion, and debility.——Cure No. 4,028. "Eight years' dyspepsia, nervousness, debility, with cramps, spasms, and nausea." Rev. John W. Flavel, Biddington Rectory, Norfolk.——Cure No. 3,906.—"Thirteen years' cough, indigestion, and general debility." James Porter, Athol street, Perth.——Cure No 58,814.—Miss Elizabeth Yeoman, Gateacre, near Liverpool, of ten years' dyspepsia and all the horrors of nervous irritability."——Cure No. 46,270.—Mr James Roberts, timber merchant, of Frimley, Surrey, of 30 years' diseased lungs, spitting of blood, liver derangement, partial deafness.

Similar testimonials from 56,000 patients who can be referred to.

The food is sold in canisters, 1 lb, 2s 9d; 2 lbs, 4s 6d; 12 lbs, 22s; 24 lbs, 40s. Super-refined quality, 5 lbs, 22s; 10 lbs, 35s. The 10 lb, 12 lb, and 24 lb canisters carriage free, on receipt of post-office order by Barry Du Barry and Co., 77 Regent street, London; Fortnum, Mason, and Co., 182 Piccadilly; also at 60 Gracechurch street, 4 Cheapside, 330 Strand, 63 and 150 Oxford street, London; and all grocers and chemists.

66 Queen street, London, 23rd August, 1860.

MESSRS R. WOTHERSPOON

and CO., 46 Dunlop street, Glasgow.

DEAR SIRS,—I have, as requested, to-day visited the Royal Laundry, with reference to the advertisement of the Nottingham firm, who state that their starch has been used for many years in the Royal Laundry, and have been assured by Mr Thompson, the superintendent, that none but yourselves have any right to state that they supply starch to Her Majesty's Laundry, as no other starch is there used, nor has been used for some years, but the Glenfield Patent Starch. I have been further assured that your starch continues to give complete satisfaction, and that though trial has been made of samples of various starches, none of these have been found nearly equal in quality to the Glenfield.—I am, dear Sirs, your obedient servant, WM. BLACK.

CALCUTTA.—

ENGLISHMAN'S WEEKLY MAIL (vid Marseilles), price 1s, to be had of the London agent, G. STREET, Indian and Colonial newspaper offices, 30 Cornhill, E. C.

MR LEWIS AND SON,

113 Strand.—The Royal Lewisian Systems of Writing, Arithmetic, Bookkeeping, and Shorthand, as taught for upwards of fifty years by Mr Lewis, the real inventor and first teacher of these world-renowned and only infallible systems, insures perfection in any of the above branches after a few easy and interesting lessons Persons unable to take the lessons may obtain the inventor's works for self-instruction at his only institution, 113 Strand.

DINNEFORD'S

PURE FLUID MAGNESIA

has been for many years sanctioned by the most eminent of the Medical Profession, as an excellent remedy for acidities, heartburn, headache, gout, and indigestion. As a mild aperient it is admirably adapted for delicate females, particularly during pregnancy; and it prevents the food of infants from turning sour during digestion. Combined with the Acidulated Lemon Syrup, it forms an effervescing aperient draught which is highly agreeable and efficacious.

Prepare by DINNEFORD and CO., Dispensing Chemists (and General Agents for the Improved Horse Hair Gloves and Belts), 172 New Bond street, London, and sold by all respectable Chemists throughout the empire.

VOLUNTEER PIPE.—

RIFLE BORE.—The most delightful, economical, and permanent medium for the enjoyment of tobacco ever invented. This new pipe only to be had of the patentee. Sample pipe in case sent post free for 23 stamps.—EDWARD PILLINER, 53 Great Queen street, London, W.C.

FIRST-CLASS EDUCATION,

at the Royal Continental Collegiate Institution, Bushey heath, Herts.—In addition to all the qualities as a first-rate classical (preparatory to Harrow and Eton) and commercial school, it is also highly recommended for a thorough French education, and as preferable to going abroad. Some of the parents who are continually visiting France, and whose sons have scarcely been two years at this school, are most happy to assure those parents who are desirous that their children should acquire a thorough knowledge of the French language, without wishing them to neglect their English and classical education, that their sons speak far better and more grammatically than any of the sons of their friends who have spent two or three years in schools in France merely for the purpose of acquiring that language. No corporal punishment. Terms inclusive, and vary according to age and requirements, from £40, £50, to £60 per annum. Not one case of illness has occurred since the school has been established.—Address, stating age and requirements, Professor Vellère (late of the Harrow Preparatory School), Bushey heath, Herts. The pupils wear a uniform very elegant and becoming, but optional to parents.

DR DE JONGH'S

(Knight of the Order of Leopold of Belgium)

LIGHT-BROWN COD LIVER OIL,

Prescribed by the most Eminent Medical Men as the safest, speediest, and most effectual remedy for

CONSUMPTION, CHRONIC BRONCHITIS, ASTHMA, COUGHS, RHEUMATISM, GOUT, GENERAL DEBILITY, DISEASES OF THE SKIN, RICKETS, INFANTILE WASTING, AND ALL SCROFULOUS AFFECTIONS.

Extensive experience, and the recorded testimony of numberless eminent medical practitioners, prove that a half-pint of Dr de Jongh's Oil is far more efficacious than a quart of any other kind. Hence, as it is incomparably the best, so it is likewise unquestionably the cheapest.

Palatableness, speedy efficacy, safety, and economy, unitedly recommend this unrivalled preparation to invalids. NO OTHER OIL CAN POSSIBLY PRODUCE THE SAME BENEFICIAL RESULTS.

Opinion of Sir HENRY MARSH, Bart., M.D., T.C.D., Physician in Ordinary to the Queen, in Ireland; President of the Royal College of Physicians in Ireland; Visiting Physician to Stevens' Hospital; Consulting Physician to the City of Dublin, St Vincent, and Rotunda Hospitals, &c., &c.

"I have frequently prescribed Dr de Jongh's Light Brown Cod Liver Oil. I consider it to be a very pure Oil, not likely to create disgust, and a therapeutic agent of great value.

"Merrion Square, Dublin,
"September 6, 1860."

Sold ONLY IN IMPERIAL Half-Pints, 2s. 6d.; Pints, 4s. 9d.; Quarts, 9s., capsuled, and labelled with DR DE JONGH'S stamp and signature, WITHOUT WHICH NONE CAN POSSIBLY BE GENUINE, by respectable Chemists.

SOLE CONSIGNEES,
ANSAR, HARFORD, and CO., 77, STRAND, London, W.C.

CAUTION.—Beware of Proposed Substitutions.

LE SOMMIER ELASTIQUE PORTATIF.

HEAL AND SON

have patented a method of making a Spring Mattress portable. The great objection to the usual Spring Mattress is its being so heavy and cumbersome.

The "SOMMIER ELASTIQUE PORTATIF" is made in three separate parts, and when joined together has all the elasticity of the best Spring Mattress. As it has no stuffing of wool or horse hair, it cannot harbour moth, to which the usual Spring Mattress is very liable; the prices, also, are much below those of the best Spring Mattresses, viz:—

			£	s	d
3 ft wide by 6 ft 4 in.	long	.....	2	5	0
3 ft 6 in.	—	.....	2	10	0
4 ft	—	.....	2	15	0
4 ft 6 in.	—	.....	3	0	0
5 ft	—	.....	3	5	0
5 ft 6 in.	—	.....	3	10	0

The "SOMMIER ELASTIQUE PORTATIF," therefore, combines the advantages of elasticity, durability, cleanliness, portability, and cheapness.

An Illustrated Catalogue of Bedsteads, Bedding, and Bed-Room Furniture sent free by post on application.

HEAL and SON, 196 Tottenham court road, W.

DR BUCHAN'S PATENT

SUGAR-COATED VEGETABLE PILLS, VEGETABLE SKIN OINTMENT, and CONCENTRATED VEGETABLE ESSENCE, for Purifying the Blood, Regulating the Bowels, and Removing Vitiated Humours, Bilious and Liver Complaints, Rheumatism, Gout, Scorbutic Affections, Costiveness, Skin Eruptions, deep-seated Ulcers, and all Diseases of the Nervous System, from whatever cause, &c., affording at once a new lease of life to the sickly and aged of both sexes, whilst in addition imparting a beautiful and clear complexion, so anxiously sought for by all. Proved by the sworn testimonies made before the Lord Mayor of London, and sitting Magistrates. Sold by Buchan and Co., Patentees, 22 Newman street, Oxford street, London, W., and all chemists in town and country. Prices:—Pills, per box, 1s 1½d, 2s 9d, and 11s; Ointment, per pot, 1s 1½d, and 2s 9d; Essence, per bottle, 11s, or family bottle containing four times that quantity, 33s. Agents:—Barclay, 75 Farringdon street; J. Sanger, 150 Oxford street; Hannay, 63 Oxford street; Butler, 4 Cheapside; Hooper, 43 King William street, London Bridge; R. Howden, 78 Gracechurch street; Prout, 229 Strand, &c., &c.

Just published, gratis, or post free for one stamp, to be had of all agents, and at 22 Newman street, Extracts from Dr Buchan's Work, entitled BUCHAN'S DOMESTIC MEDICINES, being a Book of Reference, containing instructions for the cure of every ailment incidental to man, woman, or child.

A BOON TO NERVOUS

SUFFERERS.—Twenty Thousand Copies of a Medical Book for gratuitous circulation. HENRY SMITH, Doctor of Medicine of the Royal University of Jena, &c., who has devoted fifteen years to the study and treatment of Nervous Debility, Loss of Memory, Dimness of Sight, Lassitude, and Indigestion, will send free, for the benefit of Nervous Sufferers, a copy of the New Medical Guide, containing his highly successful mode of treatment, with necessary instructions by which sufferers may obtain a cure. Post free on receipt of a stamped directed envelope. Address Dr Henry Smith, 8 Burton crescent, Tavistock square, London, W.C.

RUPTURES.—BY ROYAL LETTERS PATENT

WHITE'S MOC-MAIN LEVER

TRUSS is allowed by upwards of 200 Medical Gentlemen to be the most effective invention in the curative treatment of HERNIA. The use of the steel spring, so often hurtful in its effects, is here avoided, a soft bandage being worn round the body while the requisite resisting power is supplied by the MOC-MAIN PAD and PATENT LEVER, fitting with so much ease and closeness that it cannot be detected, and may be worn during sleep. A descriptive circular may be had, and the Truss (which cannot fail to fit) forwarded by post, on the circumference of the body two inches below the hips being sent to the Manufacturer.

Mr WHITE, 228 Piccadilly London.

Price of a single Truss 16s, 21s, 26s 6d and 31s 6d; Postage, 1s. Double ditto, 31s 6d, 42s, and 52s 6d; postage, 1s 8d. Post-office orders to be made payable to John White, Post-office, Piccadilly.

ELASTIC STOCKINGS KNEE

CAPS, &c., for VARICOSE VEINS, and all cases of WEAKNESS and SWELLING of the LEGS, SPRAINS, &c. They are porous, light of texture, and inexpensive, and are drawn on like an ordinary stocking. Price from 7s 6d to 16s each; postage, 6d

WHITE, MANUFACTURER 228 Piccadilly, London

VALUABLE INFORMATION.—

GRATUITOUS EDITIONS of the following LECTURES, delivered at the Royal Institute of Anatomy Science, and Medicine, 369 Oxford street, London, by W. H. MARSTON, the Principal, are being issued, with plain directions for SELF-TREATMENT and CURE in each of them.

No. I.—NERVOUS DEBILITY (the result of youthful error), loss of memory, shortness of breath, dimness of sight, exhaustion, and general incapacity. Addressed specially to Young Men.

No. II. MARRIAGE: Its Obligations and Impediments. Addressed to those who contemplate Marriage, and to the Married who desire Children.

No. III.—THE BRAHMIN'S ELIXIR OF LIFE: Its History—Secret Remedies of the Hindoos no Fable—Full Particulars of this Extraordinary Specific—Its Amazing Powers as a Reinvigorator of the Impaired Functions, and in all Cases of Nervous Debility.

No. IV.—THE DISEASES INFLICTED UPON MANKIND BY THE GREAT SOCIAL EVIL. With a simple means of complete Cure without Mercury.

Each Lecture, neatly printed and bound, will be sent GRATIS, on receipt of two stamps to prepay postage, or THE WHOLE FOUR, BOUND TOGETHER, with numerous additions, and full directions for SELF-TREATMENT and CURE, 160 pages, 8vo, post free, for Six Stamps. Address, Treasurer, Royal Institute, 369 Oxford street, London.

DEANE'S TWO-HOLE BLACK PENS

which are unequalled for their durability and easy action, are adopted by the gentlemen of the Stock Exchange, and the principal bankers, merchants, and public companies of the city of London, besides several of Her Majesty's judges, the most eminent counsel, and the reverend the clergy. Their cheapness and popularity has induced many unprincipled people to put forth imitations of the genuine articles, which are equally useless to the purchaser, and disgraceful to the vender. The public are therefore cautioned, and respectfully requested not to purchase any as DEANE'S GENUINE TWO-HOLE BLACK PENS, unless each pen is stamped

"G. and J. Deane, London Bridge,"

and the box, which contains exactly twelve dozen, has thereon a variously coloured label, inscribed

"G. and J. DEANE'S Two-Hole Black Pens, 46 King William street, London bridge."

DR ROBERT ROWE ON INDIGESTION.

This day is published, price 2s 6d, the fifteenth edition,

NERVOUS DISEASES,

Liver and Stomach Complaints, Low Spirits, General Debility, and Diseases of Warm Climates; the Result of Thirty Years' Practice.

By G. ROBERT ROWE, M.D.

"Dr Rowe claims with justice a priority of authorship, while he yields to none in his treatment. The value of this work is enhanced by its practical nature."—LANCET.

"We have no hesitation in placing this work among the first ranks. We entertain a high opinion of its value."—MEDICAL TIMES.

"This is a clever and useful work; contains much that is worthy of attention, and should be read by all martyrs to indigestion and other ills."—TIMES.

Also, by the same Author, 2nd edition, price 4s 6d, On some of the Important Diseases of Females and Children.

London: J. Churchill, and to be had of all booksellers.

A New Edition of

THE PHILOSOPHY OF MARRIAGE.

By JOSEPH KAHN,

Graduate in Medicine, Surgery, and Midwifery, in the Royal and Imperial Universities of Vienna, Erlangen, &c., &c.

This popular work (which has been translated into four different languages) has now gone through forty-one Editions of 10,000 each, and is designed to impart accurate knowledge on subjects which involve the means of securing moral and physical happiness.

Price One Shilling, or free by post (in an envelope) for eighteen stamps.

J. Allen, 20 Warwick lane, Paternoster row; or from the Author's address, 17 Harley street, Cavendish square, W.

Just published, 71st thousand, price 1s, post free for 13 stamps. Sold by Mann, 39 Cornhill, or direct from the Author.

DR LA'MERT ON SPERMATORRHŒA;

an Original Essay on the Treatment and Cure of NERVOUS and PHYSICAL DEBILITY, resulting from pernicious habits contracted in Youth, excesses in Manhood, or residence in Tropical Climates. With Cases and Engravings from Life, representing the various Organs in Health and Disease.

CONTENTS.

SECTION I.—The Physiology of the Generative Organs.

SECTION II.—Puberty—Manhood—The Morale of Generative Physiology—True and False Morality.

SECTION III.—Marriage in its Moral, and Physical Relations—Happy and Unhappy Unions—How to secure Healthy Offspring.

SECTION IV.—Youthful Abuse—The Secret Causes of Nervous Debility, Impotence in Man, and Sterility in Man and Woman.

SECTION V.—Spermatorrhœa, or Chronic Impotence; its History, Causes, and Moral Consequences—The Sterility of Age.

Dr LA'MERT, Honorary Member of the London Hospital Medical Society, Registered Licentiate of the Royal Society of Apothecaries, &c., is the only legally qualified practitioner who, for 20 years, has devoted his attention to the treatment of these disorders, which are so frequently aggravated by the unskilfulness of ignorant empirics, either self-styled physicians or surgeons, sometimes assuming names of eminent medical men, &c. At home for consultation daily, from Ten till Two, and from Six till Eight.

37 Bedford square, London.

TO THE NERVOUS AND DEBILITATED.

Just published, the 125th thousand, with numerous plates, in a sealed envelope, price 1s, sold by all booksellers, or post paid, by the Author, for 12 stamps,

MANHOOD: THE CAUSE AND

CURE of PREMATURE DECLINE, with Plain Directions for Perfect Restoration to Health and Vigour. By Dr J. L. CURTIS, 15 Albemarle street, Piccadilly, London.

CONTENTS.

INTRODUCTORY CHAPTER on the Physiological Structure and Functions of the Reproductive Organs.

CHAPTER II.—Causes of Spermatorrhœa and Impotence; Early Vicious Indulgences; Dangers of Neglect.

CHAPTER III.—A Review of the Disqualifications of Marriage; whether resulting from the Youthful Abuse, the Follies of Maturity, the Effects of Climate, or Infection.

CHAPTER IV.—Plan of Treatment, Medical and Moral, with observations on a new and successful mode of detecting Spermatorrhœa and other Urethral discharges by microscopic examination.

CHAPTER V. and VI. on the modern Treatment of Gonorrhœa and Syphilis.

The Book concludes with numerous interesting cases, to which is added the Author's receipt of a preventive Lotion

Mr CURTIS, author of the above Medical Treatise, may be consulted from 10 till 3, and 6 till 8. Sundays from 10 till 1.

Sold by Piper and Co., 23 Paternoster row and Mann, 39 Cornhill, London.

HUBBUCK'S PATENT WHITE ZINC PAINT.

By their process, which is patented, Pure White Zinc Paint is cheaper than White Lead. It is the most durable and beautiful paint known, and does not stain or discolour with the London atmosphere.

CHEAPNESS.—Two hundred-weight of this Paint, with six gallons of Oil, covers as much surface as three hundred-weight of White Lead and twelve gallons of Oil. It is cheaper in the first instance, as well as desirable on every consideration.

ADULTERATIONS.—Prejudice is caused by some Paint Grinders selling Zinc Paint adulterated with Sulphate of Barytes, some even to the extent of thirty per cent. Whether this is sold under the name of "Improved Zinc Paint," or is candidly sold as Number Two or Three qualities, no Painter can produce good work with it. He naturally condemns Zinc Paint altogether.

That Painters have never seen the best Zinc Paint is evident, or they would not use any other paint for their best work. To prevent the prejudice which the inferior article must produce, each Cask of Pure White Zinc is stamped

"HUBBUCK, LONDON, PATENT."

THOMAS HUBBUCK and SON, WHITE LEAD, OIL, PAINT and VARNISH WORKS, 24 LIME STREET.

WHOLESALE IRONMONGERY.

DEANE AND COMPANY, LONDON BRIDGE.

ESTABLISHED A.D. 1700.

MERCHANTS, SHIPPERS, and COLONISTS, by entrusting their orders to DEANE and Co., will ensure all the advantages of their large and long-established connections, and the Best Articles at the Lowest Prices. DEANE and Co.'s extensive and complete Stock comprises their celebrated TABLE and POCKET CUTLERY, Electro-plate, Lamps, Baths, Colonial Cooking Stoves, Ranges, Register Stoves, Fenders, Fire-irons, Iron Bedsteads, Bedding; Builders' Ironmongery; Britannia Metal, Copper, Tin, and Brass Goods; Smiths', Carpenters', Masons', and Mechanical Tools; and all manufactured articles of Ironmongery and Hardware.

AGRICULTURAL IMPLEMENTS AT THE MAKERS' PRICES,

MILLS AND MACHINERY FOR EVERY PURPOSE.

ILLUSTRATED CATALOGUES POST FREE.

DEANE AND CO. (OPENING TO THE MONUMENT), LONDON BRIDGE.

FREDERICK DENT, Chronometer, Watch, and Clock Maker to the Queen and Prince Consort, and maker of the Great Clock for the Houses of Parliament, 61 Strand, and 34 Royal Exchange.

SAUCES.—CONNOISEURS have Pronounced LEA and PERRINS' "WORCESTERSHIRE SAUCE" one of the best additions to Soup, Fish, Joints, and Game. The large and increasing demand has caused unprincipled traders to manufacture a spurious article; but the "GENUINE" all bear Lea and Perrins' name on Bottle, Label, and Stopper. Sold by Crosse and Blackwell, London, and all respectable Oilmen and Grocers. Sole manufacturers—Lea and Perrins, Worcester.

CROSSE AND BLACKWELL, Purveyors in Ordinary to Her Majesty, invite attention to their PICKLES, SAUCES, TART FRUITS, and other Table Delicacies, the whole of which are prepared with the most scrupulous attention to wholesomeness and purity. C. and B. have for many years enjoyed the high honour of supplying Her Majesty's Table with their Manufactures. A few of the articles most highly recommended are—Pickles and Tart Fruits of every description, Royal Table Sauce, Essence of Shrimps, Soho Sauce, Essence of Anchovies, Orange Marmalade, Anchovy and Bloater Pastes, Strasbourg and other Potted Meats, Calf's-foot Jellies of various kinds for table use, M. Soyer's Sauces, Relish, and Aromatic Mustard, Carstairs' Sir Robert Peel's Sauce, and Payne's Royal Osborne Sauce. To be obtained of all respectable oilmen, grocers, &c., and wholesale of Crosse and Blackwell, 21 Soho square, London.

JULLIEN FUND.

Committee Room—50 New Bond street.

The Committee of the Jullien Fund, fearing that the subscriptions have been materially checked by the unfortunate death of Mons. Jullien, desire to explain that a widow and others, members of his family, can be protected from want only by the kind aid of those who appreciate the great services rendered by the late lamented maestro to the cause of the musical education of the English people.

The Committee confidently appeal to that benevolence for which their countrymen are so distinguished, for such prompt and liberal additions to the subscription list as shall enable them to do some justice to the memory of M. Jullien, and at the same time afford adequate relief to his bereaved family.

COMMITTEE for the DISTRIBUTION of the JULLIEN FUND.

Mr John Mitchell	Mr W. Duncan Davison
Mr W. R. Sams	Mr Jules Benedict
Mr Thomas Chappell	Mr A. Blumenthal

HONORARY TREASURERS.

Mr T. Chappell, 50 New Bond street
Mr W. R. Sams, 1 St James's street

BANKERS.

Messrs Coutts and Co., Strand
Heywood, Kennards, and Co., Lombard street
London and County Bank, Hanover square

Who, as well as the honorary treasurers, have kindly consented to receive subscriptions.

April, 25th, 1860.

EAU-DE-VIE.—THIS PURE PALE BRANDY, though only 18s per gallon, is demonstrated, upon analysis, to be peculiarly free from acidity, and very superior to recent importations of veritable Cognac. In French bottles, 38s per dozen; or securely packed in a case for the country, 39s.

HENRY BRETT and CO.,
Old Furnival's Distillery, Holborn.
To be obtained only at their Distillery.

KINAHAN'S LL WHISKY v. COGNAC BRANDY.—This celebrated old Irish Whisky rivals the finest French Brandy. It is pure, mild, mellow, delicious, and very wholesome. Sold in bottles, 3s 8d each, at most of the respectable retail houses in London; by the appointed agents in the principal towns in England; or wholesale at 8 Great Windmill street, Haymarket.—Observe the red seal, pink label, and cork branded "Kinahan's LL Whisky."

BOTH PLEASURE AND PROFIT may be derived from a purchase at E. MOSES and SON'S Establishments, which are furnished with an immense stock of every description of Attire for Adults and Juveniles of all classes, and where Comfort, Style, Durability, and Neatness are combined with a lowness of price which could only be remunerative on such an extensive scale as no other house in the trade can boast of.

The departments to which E. MOSES and SON invite particular attention are the READY-MADE and BESPOKE CLOTHING, the HOSIERY and DRAPERY, HAT and CAP, BOOT and SHOE, and GENERAL OUTFITTING Departments.

The BESPOKE TAILORING DEPARTMENT has been replenished with a splendid collection of the newest and choicest Home and Foreign Manufactures. Accuracy of fit, Elegance of style, and Promptitude in the execution of orders have gained for this department a large and daily increasing connection.

N.B. Should any article not be approved of, it will be exchanged, or the money returned.

E. MOSES and SON'S rules for self-measurement and lists of prices, with pamphlet on the Ready-made Clothing System (Past and Present), gratis on application, or post free.

The Establishments are closed every Friday evening at sunset until Saturday sunset, when business is resumed until 11 o'clock.

E. MOSES and SON,
MERCHANT TAILORS, WOOLLEN DRAPERS, HATTERS, HOSIERS, BOOT and SHOE MAKERS, and GENERAL OUTFITTERS.

London Houses:
Corner of Minories and Aldgate.
New Oxford street, corner of Hart street.
Corner of Tottenham Court road and Euston road.

Country Establishments:
Thornton's buildings, Bridge street, Bradford, Yorkshire.
Fargate, Sheffield.

SPECIAL NOTICE.

E. MOSES and SON take this opportunity of reminding their Friends and the Public, that their new Branch Establishment at the Corner of Tottenham Court road and Euston road was opened on the 6th instant.

CHUBB'S PATENT SAFES —the most secure against Fire and Thieves.—CHUBB'S FIRE-PROOF STRONG ROOM DOORS. CHUBB'S PATENT DETECTOR and STREET-DOOR LATCHES. CHUBB'S CASH and DEED BOXES. Illustrated Price-list gratis and post free.

CHUBB and SON, 57 St Paul's churchyard, London; 28 Lord street, Liverpool; 16 Market street, Manchester; and Wolverhampton.

IMPORTANT NOTICE.

GLENFIELD PATENT STARCH is the only STARCH used in HER MAJESTY'S LAUNDRY.

And as some unprincipal Parties are now making and offering for Sale an Imitation of the

GLENFIELD STARCH,

we hereby caution all our Customers to be careful, when purchasing, to see that the word GLENFIELD is on each Packet, to copy which is Felony.

WOTHERSPOON and CO., Glasgow and London.

S. W. SILVER AND CO., OUTFITTING WAREHOUSES, 66 and 67 CORNHILL, E.C.

Special Outfits for Australia, India, and China, for Naval and Military Officers, Cadets, Midshipmen, and Civilians. Manufactory, Silvertown, opposite H.M. Dockyards Woolwich.

TRADE B/P MARK.

BROWN AND POLSON'S PATENT CORN FLOUR.

The LANCET states,

"This is superior to anything of the kind known."

FIRST OF THE KIND Manufactured and Patented in the United Kingdom and France, as explained with Engravings in THE ILLUSTRATED LONDON NEWS, of May 26th. Supplied by BROWN and POLSON, to Her Majesty the Queen, by order from Buckingham Palace. It is in great favour wherever it has been made known, for Puddings, Blancmange, &c., preferred to the best arrow root, and especially suited to the delicacy of Children and Invalids.—BROWN and POLSON, Manufacturers and Purveyors to Her Majesty: Paisley, Manchester, Dublin, and London.

IMPORTANT TO PURCHASERS.

LAMPS, CHANDELIERS, AND GAS FITTINGS.

TUCKER and SON having purchased of Messrs Pearce and Son (of Ludgate hill) their entire stock of Lamps, Gas Chandeliers, &c., (on their relinquishing that branch of their business to devote exclusive attention to the China and Glass Trade) have distributed it among their three Show Rooms, as under; and being goods of first-rate quality, and offered to the public at a reduction of one-third from their usual price, to insure their immediate realisation, they must command the attention of purchasers.

City Show Rooms, 36 King William street (4 doors from London Bridge); Central do., 190 Strand (opposite St Clement's church, and near Temple Bar).

TUCKER and SON—Established 43 years.

Manufactory, Essex Works, W. C.—November, 1860.

DUTY OFF MODERATOR LAMPS. —J. Schlossmacher's celebrated Manufacture. Burner of every Lamp stamped J. S. The duty being now off, and J. S. being enabled by machinery to reduce the prices of his Lamps to the charges of other makers for their commonest qualities, the full benefit of both reductions is given to the public through his London Agents, TUCKER and SON, at their Establishments, as under:—

Central Show Rooms, 190 Strand (near Temple Bar); City Show Rooms, 36 King William street (4 doors from London Bridge). Established 43 years.

Engravings free by Post.

ALLSOPP'S PALE OR BITTER ALE.—Messrs S. ALLSOPP and SONS beg to inform the Trade, that they are now registering orders for the October Brewings of their Pale Ale in Casks of 18 Gallons and upwards, at the Brewery, Burton-on-Trent; and at the undermentioned Branch Establishments:—

Messrs SAMUEL ALLSOPP & SONS

LONDON	61 King William st. City.
LIVERPOOL	Cook street.
MANCHESTER	Ducie place.
BIRMINGHAM	Upper Temple street.
DERBY	London road.
WOLVERHAMPTON	Exchange street.
CHESTERFIELD	Low Pavement.
STOKE-UPON-TRENT	Wharf street.
DUDLEY	Burnt Tree.
WORCESTER	The Cross
SOUTH WALES	King street, Bristol.
DUBLIN	Crampton quay.
CORK	Cook street.
EDINBURGH	Union street lane.
GLASGOW	St Vincent street.
PARIS	279 Rue St Honoré.

Messrs ALLSOPP and SONS take the opportunity of announcing to private families that their Ales, so strongly recommended by the medical profession, may be procured in Bottles and Casks, and on Draught, from all the most respectable wine and beer merchants and licensed victuallers, on "ALLSOPP'S PALE ALE" being especially asked for.

When in bottle, the genuineness of the table can be ascertained by its having "ALLSOPP and SONS" written across it upon red and white ground stripes.

The Brewery, Burton-on-Trent, April 30, 1860.

The Corporation grant Drafts, and negotiate or collect Bills payable at Bombay, Calcutta, Madras, Ceylon, Hongkong, Singapore, Mauritius, Melbourne, Sydney, Auckland, and Wellington, on terms which may be ascertained at their office. They also issue Circular Notes and Letters of Credit for the use of Travellers by the Overland Route. They undertake the agency of parties connected with India, the purchase and sale of Indian Securities, the safe custody of Indian Government Paper, the receipt of Interest, Dividends, Pay, Pensions, &c., and the effecting of remittances between the above-named dependencies.

They also receive deposits of £100 and upwards, repayable on a notice of 10 days, and allow interest thereon at 1 per cent. below the Bank of England minimum rate of discount, rising and falling therewith. Deposits subject to longer notices of repayment bear higher rates which may be ascertained at their office.

Office hours 10 to 3. Saturdays, 10 to 2.

Threadneedle street, London, March 28, 1860.

THE AGRA AND UNITED SERVICE BANK, LIMITED.

Established in India 1833.

Incorporated by Letters Patent 1857.

Paid-up capital £1,000,000 (One Million sterling.) Reserved fund £190,000.

Branches at Calcutta, Bombay, Madras, Agra, Lahore, Hong Kong, and Shanghai.

Head Office—27 Cannon street, London, E.C.

DIRECTORS.

Robert Guthrie Macgregor, Esq., Chairman.
George Gordon Macpherson, Esq., Deputy-Chairman.
George Hay Donaldson, Esq.
Lieut.-Col. Henry Doveton.
Alderman Thomas Quested Finnis.
Lieut.-Col. Henry Barkley Henderson.
Colonel James Holland.
Lieut.-Col. James Horsburgh Macdonald
Charles Grenville Mansel, Esq.
John Carrington Palmer, Esq.
Major Gen. Duncan Sim.
James Sydney Stopford, Esq.
James Thomson, Esq.
William Hardinge Tyler, Esq.

GENERAL MANAGER—Mackintosh Balfour, Esq. (in India).

OFFICIATING GENERAL MANAGER—William Shipman, Esq.

AUDITORS—William Newmarch, Esq. and John Hill Williams, Esq.

Current or Floating Accounts (balanced half-yearly, on the 30th June and 31st December) opened with Individuals and Firms, bearing interest when the minimum monthly balance at credit is not less than £100 at the rate of two per cent per annum. When the balance falls below £100, a moderate Commission is charged, according to the nature of the account.

Deposits in sums of not less than £100 are received, repayable on 10 days' notice, at 1 per cent. below the Bank of England minimum rate of discount, rising and falling therewith, but not to exceed five per cent. per annum

Deposits for Fixed Periods are received at Interest, particulars of which may be obtained at the Bank.

Sales and Purchases effected in British and Foreign Securities, in East India Stock and Loans, and Army, Navy, and Civil Pay and Pensions realised.

Bills issued at the Exchange of the day, and free of any extra charge, on the Branches of the Bank.

Approved Bills drawn against Funds, or upon Parties in India, purchased.

Bills payable in India sent out for collection.

Circular Notes, payable at the principal Cities of Europe, granted.

Interest on Indian Government Securities drawn, and the equivalent paid to parties interested, without charge.—By order of the Board,

WILLIAM SHIPMAN, Officiating General Manager.

Hours of business, 10 to 4; Saturdays, 10 to 3.

COMMERCIAL BANKING COMPANY of SYDNEY, NEW SOUTH WALES.

Incorporated by Act of the Colonial Legislature.

London Office, No. 33 Cornhill.

LONDON BOARD.

John Gilchrist, Esq.
Frederick Parbury, Esq.
Edwin Brett, Esq.

The London Board of Directors grant Letters of Credit payable on demand, and Bills of Exchange at thirty days' sight, on the Sydney office, and on the following branches of the Bank in the Colony of New South Wales, viz.:—

Albury	Goulburn	Maryborough	Shoalhaven
Cooma	Kiama	Morpeth	Wollongong
Eden	Maitland	Queanbeyan	Yass

They also negotiate approved Drafts on the Australian Colonies, forward Bills for Collection, and transact every description of banking business with Australia, on the most favourable terms, through the above-named establishments of the Bank in New South Wales, and its agents in Victoria, South Australia, and Tasmania.

EDWIN BRETT, Manager.

No. 33 Cornhill, London, E.C., July, 1860.

BANK OF NEW SOUTH WALES

(Established 1817, Incorporated by Act of the Colonial Legislature in 1850, and confirmed by Her Majesty in Council), 37 Cannon street, City. Capital £750,000. Reserve Fund £205,000.

The Board of Directors GRANT LETTERS of CREDIT, payable on demand, and BILLS of EXCHANGE, at 30 days' sight, on the undermentioned Establishments of the Corporation, at the rate of £101 for every £100 sterling paid here.

NEW SOUTH WALES.

Sydney	Bathurst	Toowoomba
Maitland	Albury	Rocky River
Newcastle	Mudgee	Deniliquin
Brisbane	Tamworth	Adelong
Ipswich	Kiandra	Windsor

VICTORIA.

Melbourne	Ballarat	Ararat
Geelong	Sandhurst	Tarrangower
Kyneton	Beechworth	Wongaratta
Castlemaine	Chiltern	Inglewood

And also on the Commercial Bank of Van Diemen's Land at Hobart Town and Launceston.

The Directors also negotiate approved Bills of Exchange, and send them for collection, drawn on any of the Australian colonies and New Zealand.

The Royal Bank of Scotland, Stuckey's Banking Company, the Manchester and Liverpool District Bank, the North and South Wales Bank, and the National Bank in Ireland are authorised to grant credits on this Bank at the several establishments in Australia, and will negotiate bills drawn on the Australian colonies.—By order of the London Board,

JOHN CURRIE, Secretary.

NATIONAL DISCOUNT COMPANY

(LIMITED), 35 Cornhill, London. Subscribed Capital, £2,000,000. Paid up, £385,345.

Approved mercantile bills discounted for parties properly introduced.

Money received at Interest on deposit, repayable on call or at fixed periods.—By order of the Board,

RICHARD PRICE, Secretary.

Cornhill, November, 1860.

TRUST AND LOAN COMPANY of UPPER CANADA.

At an Extraordinary General Meeting of shareholders held this day, at the offices of the Company, No. 65 Moorgate street, William Chapman Esq., in the chair, the following resolutions were passed unanimously:—

"That the report and accounts submitted by the Directors be received and adopted.

"That a dividend at the rate of 8½ per cent. per annum, less income tax, be declared on the paid up capital stock of the Company, for the six months ending 30th September, 1860.

"That the thanks of the meeting be given to the Chairman and Directors for their zeal and attention to the interests of the Company."

WM. CHAPMAN, Deputy-Chairman.

65 Moorgate street, 30th Nov., 1860.

THE TRUST AND LOAN COMPANY of UPPER CANADA.

Incorporated by Royal Charter. Capital £1,000,000.

DIRECTORS.

The Right Hon. Edward Pleydell Bouverie, M.P., President.

William Chapman, Esq., Deputy Chairman.

James Hutchinson, Esq.	William G. Thomson, Esq.
Charles Morrison, Esq.	T. M. Weguelin, Esq.

BANKERS—Messrs Glyn, Mills, and Co.

The Directors are prepared to grant Debentures for loans of sums of £100 and upwards, for periods of 3, 5, 7, or 10 years.

Any information required can be obtained on application to the Secretary. FRED. FEARON, Secretary.

65 Moorgate street, London.

THORLEY'S FOOD FOR CATTLE,

RETAIL DEPOT, 77 NEWGATE STREET, CITY. OFFICES and STEAM MILLS, CALEDONIAN ROAD, KING'S CROSS.

N.B.—A pamphlet post free. This Condiment has now become a great fact throughout the world.

THORLEY'S ILLUSTRATED FARMERS' ALMANAC, 77 NEWGATE STREET, CITY.

This Sixpennyworth contains more valuable information to the Farmer than any other almanac at even double the price, and ought to be on every Agriculturist's Book Shelf throughout the Kingdom.

THORLEY'S AGRICULTURAL CLEANER.

This Weekly is published every Saturday, and contains everything new and beneficial to the Agriculturist. Price 2d, Stamped 3d. 77 Newgate street, City.

SIR EDWIN LANDSEER, R.A.

A COLLECTION OF ENGRAVINGS

copied from his celebrated Pictures. Produced in the First Style of Art. The sole property of Mr William Tegg.

Laying Down the Law, 21 by 21	8s

Islay, 23 by 13½	6s

The whole set sent carriage free for £1 12s.

London: William Tegg, Pancras lane, Queen street, Cheapside, E.C.

Just out, price 6d, by post for 7 stamps,

RIMMEL'S ALMANACK FOR 1861,

Beautifully Illustrated and Perfumed.—An elegant little Bijou for the Toilet Table, and a sweet memento to send to friends at home and abroad. Sold by all the trade.—E. Rimmel, Perfumer to Her Majesty, 96 Strand; 24 Cornhill; and Crystal Palace, London; and 17 Boulevard des Italiens, Paris.

OVERLAND ROUTE.—

COMMUNICATION by STEAM to INDIA, AUSTRALIA, &c., via Egypt.—The PENINSULAR and ORIENTAL STEAM NAVIGATION COMPANY BOOK PASSENGERS and receive Cargo and Parcels for Gibraltar, Malta, Egypt, Aden, Ceylon, Madras, Calcutta, the Straits, and China, by their steamers leaving Southampton on the 4th and 20th of every month; for Gibraltar, Malta, Egypt, Aden, and Bombay, by those of the 12th and 27th of each month; and for Mauritius, Reunion, King George's Sound, Melbourne, and Sydney by the steamers leaving Southampton on the 20th of every month.—For further particulars apply at the Company's offices, 122 Leadenhall street, London, E. C., or Oriental place, Southampton.

NOTICE.—The Steamers call at Cork Harbour, on both outward and homeward passages, to land and receive Mails.

BRITISH AND NORTH AMERICAN ROYAL MAIL STEAM SHIPS,

appointed by the Admiralty to sail between LIVERPOOL and NEW YORK direct, and between LIVERPOOL and BOSTON, the Boston ships only calling at HALIFAX to land and receive passengers and Her Majesty's mails. The following, or other vessels, are appointed to sail from Liverpool:—

PERSIA, for NEW YORK direct, Saturday, Dec. 8.
CANADA, for BOSTON, Saturday, Dec. 15.
*AUSTRALASIAN, for NEW YORK direct, Saturday' Dec. 22.
*Taking Passengers and Goods for Nassau and Havana, to be transferred at New York on board the R.M.S.S Karnak.

Passage money, including steward's fee and provisions but without wines or liquors, which can be obtained on board:—To Halifax and Boston, chief cabin, Twenty-two Pounds; second cabin, Sixteen Pounds. To New York, chief cabin, Twenty-six Pounds; second cabin, Eighteen Pounds. Freight to Halifax, Boston, and New York, £3 per ton and 5 per cent. primage. Small parcels, 5s each and upwards. These steam ships have accommodation for a limited number of second cabin passengers.

For passage or other information, apply to J. B. Foord, 52 Old Broad street, London; D. Currie, Havre, and 12 Place de la Bourse, Paris; G. and J. Burns, Buchanan street, Glasgow; D. and C. M'Iver, Queenstown; or D. and C. M'Iver, 8 Water street, Liverpool.

STEAM SHIPS.—

The General Steam Navigation Company's powerful and first-class STEAM SHIPS leave from St Katharine's Wharf for—

HAMBURG—Every Wednesday and Saturday morning. Chief cabin, 2*l*; fore, 1*l* 5s.

HARBURG—Every Sunday.

ROTTERDAM—Every Tuesday, Thursday, and Saturday, at 11 morning. Chief cabin, 1*l* 10s; fore, 17s 6d. Cologne, 35s 6d or 19s 9d.

ANTWERP, BRUSSELS, and the RHINE—The Moselle and Dolphin every Tuesday and Thursday, at 11 morn. Chief cabin, 1*l* 7s; fore, 20s. Brussels, 22s 8d. Cologne, 35s 6d. Leaving Antwerp for London every Sunday and Friday at noon.

OSTEND, BRUSSELS, and the RHINE—Every Wednesday and Saturday morning. Dec. 1 at 3; 5 at 5. Leaving Ostend for London every Tuesday and Friday night. Chief cabin, 18s; fore, 14s. Brussels, 20s 3d. Cologne, 34s.

HAVRE—From St Katharine's Wharf, every Thursday morning. Dec. 6 at 5 a.m. Chief cabin, 14s; fore, 10s. London to Paris, £1.

PARIS, via CALAIS, direct—From London Bridge Wharf, to-morrow (Sunday), and every Wednesday and Saturday morning. Dec. 1 at 3; 5 at 6. Chief cabin, 14s; fore, 10s. London to Paris, 17s 8d.

BOULOGNE—From London Bridge Wharf, every Tuesday, Thursday, Friday, and Sunday morning. Dec. 2 at 3; 4 at 5; 6 at 6; 7 at 8; 9 at 10. Chief cabin, 14s; fore, 10s. London to Paris, 16s.

EDINBURGH—From St Katharine's Wharf adjoining the Tower, every Wednesday and Saturday; at 10 morning. Fares: chief cabin, 25s; return, 37s 6d: fore, 15s; return, 22s 6d; deck, 10s; which fares include all pier dues at London and Granton.

HULL—From London Bridge Wharf, every Wednesday and Saturday, at Eight morning Chief cabin, 6s 6d return, 10s; fore cabin, 4s; return, 6s.

NEWCASTLE—From Newcastle Steam Wharf, 272 Wapping, Wednesday and Sunday, at 10 morning. Chief cabin, 8s; return ticket, 12s: fore, 5s; return, 7s 6d.

YARMOUTH—From London Bridge Wharf, every Wednesday and Saturday at Four afternoon. Saloon, 8s: return, 12s: fore cabin, 5s; return, 7s 6d.

Offices 71 Lombard street, 37 Regent circus, and 35 Leadenhall street; and St Katharine Wharf.

THE ARRANGEMENT BETWEEN THE BANKS OF FRANCE AND ENGLAND.

In our article on the recent arrangement between the Banks of France and of England, we stated "the Bank of England "has further agreed to return, if required within a stipu- "lated time, 2,000,000*l* to the Bank of France; but in the "mean time the former is to have as much control over the "silver in its coffers as the latter has over the gold in its "coffers."

This is not, however, precisely so. The purchase by the Bank of England is an absolute purchase, and the sale by the Bank of France is an absolute sale. The only stipulations made are two:—1st, that *if* the silver is not sold, it shall be returned to the Bank of France on the same terms on which it was purchased from them; 2ndly, that if the silver be sold at a higher price than that at which it was purchased, which, from the market price of silver, is almost certain to be the case if it be sold at all, the Bank of France shall be paid the whole of the difference. The Bank of England desire to make no profit by the transaction. They have only taken care that in no case shall there be any loss.

THE MONETARY CRISIS IN AMERICA.

ITS REAL NATURE AND PROBABLE EFFECT *HERE*.

We have often remarked that it is impossible to be a prophet in the money market. The causes are too various and their effect too difficult to disentangle. And certainly we are hardly likely to see any events more likely to set prediction at defiance than those which have happened lately. If six months since a speculator had ventured to foretell that the slave question in the United States would affect the European money market, he would have been laughed at. Yet so it is; "America" is as much in men's mouths this week as "France" was a short time since. The chain of events which has produced this result, though it might have puzzled the wisest anticipator, is not however very difficult to explain after the event.

The financial crisis in America is in its origin wholly political. Industrially the country has never been so prosperous. Her crops are abundant; the market for them is excellent; trade is sound, though active. Up to a late date advices from the States gave a consistent narrative of steady prosperity. The money market was easy, yet not too easy. No one in New York, as far as we can learn, anticipated that a crisis was at hand. The state of the South has, however, as all our readers are aware, been very serious ever since Mr Lincoln was elected. Many of the Slave States have been very violently excited, and the authorities in those States have tried not to calm the irritation, but to aggravate it. "Secession" has been clamoured for, and secession for many purposes means revolution. The commercial effect of such a state of politics is evident. All credit was at once impaired. By the last accounts, many Banks in Washington, Richmond, Baltimore, and other towns have suspended payment; the failure of many others is expected, and the whole industrial organisation of the South is damaged and suspended.

This is no more than an inevitable result of obvious political causes. The Southern States are suffering from a property panic, aggravated by political fury and fanned by rulers who should have allayed it. The institutions of those States place much political power in the hands of the "mean whites,"—a degraded, uneducated, and reckless race. As the electors are, so are the elected. The State Legislatures are filled with brawling ruffians—no term less strong is adequate—and the Governor is too frequently defective in every true qualification for the office which he fills. The irritated ravings of such men have aggravated the not unnatural apprehensions of the slave-owners. For once the timidity of property has been on the same side with the violence of revolutionists, and it is no marvel that a great panic has ensued from the union of the two. We should have wondered if it had been otherwise.

But though the state of the South is readily explainable, that of New York is not so. There has been a great panic there, and yet a person looking at the surface of the facts and figures would scarcely see the reason. *The state of the Banks is very nearly as good as it was this time last year.* On the 13th November, 1859, the liabilities of the Banks were:—

	£
Deposits	15,868,126
Circulation	1,760,247
Total	17,628,373

and the specie reserve was 4,195,466*l*.

By the last account the liabilities were as follows:—

	£
Deposits	16,190,303
Circulation	1,969,092
Total	18,159,395

and the specie reserve was 4,136,187*l*. Nor is this statement on the face of it a very bad one. It is true that the specie reserve is only one quarter of the liabilities; a far less proportion than we see in the Bank of England or in the Bank of France. But then we should consider that in New York each Bank keeps its own specie reserve; whereas here the Bank of England keeps the corresponding reserve not only for itself but for the London bankers also. If we added the many millions of deposits in the hands of those bankers to the liabilities of the Bank of England, we should hardly see so satisfactory a proportion of cash to liabilities as the accounts of the New York Banks show us.

The panic at New York has in truth been produced by a singular combination of banking and mercantile peculiarities. New York is always a large creditor of the South. The bills drawn against much of the cotton sent to Europe are

negotiated at New York and the proceed sent Southwards. And when there is a panic at the South, the result at New York is twofold. First, the New York discounters will hardly touch Southern paper; and secondly, the proceeds of those bills which are discounted are sent Southwards, not in bankers' drafts or other ordinary remittances, but *in specie*. All other funds which the South can find means to obtain are sent in the same way. The New York bankers are puzzled by two difficulties at the same time;—by the withdrawal of their resources, and by the discredit of "parties" on whose "names" they have been used to rely, and of whose paper they are certain to hold very much. Upon the present occasion there has naturally been extreme apprehension. Governor Brown has proposed that the South should repudiate her debts to the North, and the effect on the mind of bankers who have discounted Southern paper may very easily be imagined.

Again, a state of apprehension is in some respects more terrible at New York than in London. *Here* the panic never goes beyond a certain point. We have one kind of credit which, in practice, is never impaired. The credit of the Bank of England is so great that no amount of pressure or confusion has as yet been able to affect it. But there is no similar institution at New York. All the Banks there are to some extent on an equality; they must sink or swim together. It is true that their valuable system of a *secured* currency gives them the power of meeting a suspension of cash payments, and this partially remedies the unfortunate want of any one indisputable credit. A theorist might also find something to say in favour of a system which causes each Bank to keep its own reserve and to be saved or ruined by itself. Still, on the whole, the Banks of New York must inevitably suffer in a time of confusion more than we do in London, where we have the, so to say, impregnable credit of the Bank of England to rely on at the last, and when everything else fails us. It is the opinion of many of the best judges that this defect of their banking system has been productive of peculiar evil at present. The Banks at New York have been over nervous. They are in the habit of making very large advances to brokers and others on stocks, shares, and bills of exchange. As soon as the panic at the South began to be felt, they called in these loans with extreme strictness. The result, as might be expected, was disastrous. The feeling of panic which until then was in comparison slight, was aggravated and became more and more intense every day.

The peculiar position which New York occupies with respect to the Western States aggravated the difficulty. The factor at New York accepts against produce which is sent to him for export to Europe, obtains bills on Europe in exchange for those goods, and he meets his acceptances when due by the sale of these bills. But owing to the panic such bills became almost unsaleable. The necessary result was that the panic was augmented, and that the productive classes were beginning to be hampered, for the factor at New York did not pay his acceptances, and the producer in the West did not get his money.

The Banks soon discovered, as we might expect, that their extreme timidity had aggravated the evil it was designed to cure. They have changed their course, and have adopted a series of measures to aid commerce and to restore confidence. They resolved to buy bills on England for 500,000*l*, and to extend their discounts by "five per cent. above their "receipts," meaning, we believe, five per cent. above the discounted bills, as we should say, "run off." The first of these measures has not been fully carried out; the Banks would not, it is said, pay the market rate of exchange; they thought it too high: but the discounts were considerably increased. These measures were, however, not sufficient to restore confidence; and we find by the mail of to-day that they had adopted a new resolution, which is, perhaps, as remarkable as any which the remarkable annals of commercial panics can show. The Banks have resolved that "The specie belonging to the Associated Banks shall "be considered and treated as a common fund for mutual "aid and protection, and the Committee shall have power to "equalise the same by assessment or otherwise. For this "purpose statements shall be made to the Committee of the "condition of each Bank on the morning of every day before "commencement of business, which shall be sent with the "exchanges to the manager of the Clearing House, specifying "the following terms, viz.:—1. Loans and discounts. "2. Deposits. 3. Loan Certificates. 4. Specie."

They have apparently been induced to adopt striking resolutions by one which they had adopted previously. There is in New York a Clearing House like that in London; but there being no independent Bank like the Bank of England on which cheques could be drawn, the balances are usually settled in specie. For the present, however, the Banks have resolved that they should be settled also in *secured certificates*. They have appointed a Committee to issue such certificates, upon receiving a deposit of United States Stock, good bills of exchange, or other approved securities, and it necessarily followed from this arrangement that the cash in the different Banks must be considered as a common fund belonging to all. So long as the balances were payable in specie, a bank with much to receive would be sure of having the means of discharging its obligations, but now that pieces of paper are to be used in the settlement of the balances, which are not a legal tender, and are of no use for any purpose except that settlement, a Bank which had received many of these might still fail; they could not be paid away to depositors, or to note-holders. In a time of pressure they would be useless. It was necessary, therefore, to have a supplementary resolution, and the one adopted is that which declares the specie reserve to be a common fund,—a resolution which certainly removes the difficulty, though to English notions in a strange way. With the moral strength obtained by reliance on these resolutions the Banks at New York are again discounting freely.

What the effect of these measures may be, we cannot know for some days. The best judges are sanguine of their success, but in so strange a series of events it is not wise to be very confident beforehand. We see, therefore, the nature of the American panic. It originated in political events necessarily trying, and unnecessarily aided by the foolish violence of some responsible persons; it was aggravated by the peculiar position of New York in the commercial system of the United States, and was yet further enhanced by the conduct of the Banks at that most important place.

Such being the nature of the American crisis, what is likely to be its effect *here*? Much of that effect must necessarily depend on the continuance or non-continuance of the panic, which must of necessity be uncertain. The best judges —those most conversant with American politics and finance— believe that the panic will most likely now *begin* to subside; and that, though quiet may not be at once restored, yet that the worst is past. They think that the South will in time become cooler; and indeed it seems an infatuation that the Slave States should speak of secession. That the Free States should do so would be intelligible; we can all understand that they might be disinclined to be connected even remotely with slavery. But that slave-owners should wish to be separated from the very States to whice alone they can look in a time of peril for keeping their slaves in subjection, appears incredible. It is rational, therefore, to expect that the cry for disunion in the South will gradually diminish, though we must not be sure of any rational result in a panic of property stimulated by disappointed rage. But whether the Southern outbreak continue or not, the best judges are sanguine that the effect of the measures now taken by the New York Banks will be sufficient to remedy the evil.

All this must be matter of speculation, but we may say with some certainty that if the panic should die away very little gold will be wanted from hence, and that if the panic should continue to augment very little will be required. The first is obvious, if the panic dies away in America, the drain of gold to America which has been caused solely by that panic will cease soon. And if the panic should grow more and more intense, specie payments at New York must be suspended, and in that case, also, no gold would be required from hence. The only event in which a drain of gold from this cause seems possible is the continuance of a semi-panic which never becomes acute enough to justify the suspension of cash payments and yet never dies away sufficiently to permit the ordinary methods of monetary action to be resumed. Looking at the history of panics, they seem to be short—to grow rapidly better or rapidly worse, and if either of these events should happen in this instance, there will be no drain of gold from England to America.

But there are two other facts which we must remember

First, it seems likely that the usual supply of gold from America to this country will in all probability not reach us. We hope we may not have to send them our money, but we must hardly expect them to send us theirs. Secondly, the panic is not the sole cause tending to make the American exchanges unfavourable to this country. We have largely increased our imports from America, and have rather diminished our exports to America, and the result necessarily is that in some way, directly or indirectly, we must pay the balance. The figures speak for themselves.

In the first nine months of

	£
1859 our exports to America were	17,128,062
1860 — —	15,765,014

In the first nine months of

	£
1859 our imports from America were	25,591,183
1860 — —	33,778,483

and this unfavorable balance of trade must have a tendency to draw bullion from this country, and still more a tendency to prevent its being sent here from America.

On the whole, therefore, it may be said by way of conclusion, that the present position of America, and our present relations with her, must tend in some measure to make money dearer here. Commercially, America was never sounder: politically, let us hope she has for the present seen the worst. We hope and believe that there can be no danger as to American debts due to this country, especially as there is reason to think that they are less than usual; far less than in 1857. Still a panic in New York must have a disturbing effect here: the importations of grain must have such an influence also. Lastly, the rate of discount at New York was, on November 21,—

	Per cent.
Prime endorsed bills, 60 to 90 days.....	10 to 12
— — 4 to 6 months	12 to 15
First-class single signatures.....	15 to 18
Other good bills	18 to 24

and it must be expected that the continuance of rates even approaching to these must tend at last to entice capital from this country.

THE NEW DECREES IN FRANCE AND COUNT PERSIGNY'S MANIFESTO.

M. Persigny's letter to the Prefects of France is couched in language so adulatory to the Emperor, that it can hardly be otherwise than distasteful to an Englishman's ear, but, nevertheless, it confirms our hope that the Imperial decrees of last week are likely to prove something more than nugatory. What are the grounds for that hope?

In the first place, the *manner* of the change. The Emperor, as we have often seen, likes to have the credit of interpreting the public opinion of France better than his own Ministers,—likes it to be understood that they are his instruments rather than his advisers, and consequently none of the great strokes of his policy have been anticipated or pressed upon him by his Cabinet;—on the contrary, they have been always preluded by some decisive act of the Emperor's own. We have had rumoured changes of policy without number that have had a purely ministerial origin, but they have seldom proved to be anything but indications of the impotent wishes of his Ministers. The real and decisive changes have almost always taken the public by surprise, and proceeded, apparently at least, from a sudden inspiration of his own. Thus it was when Drouyn de Lhuys was dismissed in 1855,—when the Emperor wished to mark his disapproval of the Slave Trade in 1858, notwithstanding his cavalier conduct to Portugal,—when the Austrian Ambassador was warned of the impending war in 1859,—when that war was to be concluded as suddenly as it was begun, at Villafranca,—and thus it was, again, in August of this year, when he wished to convince us through his ambassador, Count Persigny, that he desired a *bonâ fide* alliance with England in his Italian as well as in his general policy. In all these cases, and in others besides, the Emperor has taken care to initiate, and to make it well known that he initiated *himself*, the measures which were intended to be realities. The plausibilities and temporisings resulting from diplomatic convenience have always been left to his Ministers. The Emperor has never scrupled to do, what Count Persigny assures his Prefects that he himself will never do, "shield his responsibility behind that of his subordinates." But, on the other hand, the Emperor has always ostentatiously published his own share in originating a new policy. And we are therefore inclined to augur from the manner in which the Emperor has startled his Minister in the recent decree, and from Count Persigny's great anxiety to make it clear that his master's will was the sole spring of the recent change, that the Emperor, for the present at least, intends to inaugurate a real modification of his civil administration,—to begin that process, however limited his intentions may be, which he so long ago prefigured by the promise in due time to "crown the edifice" with some measure of constitutional freedom. "Here is a Prince," says his faithful follower and interpreter, "who, after having received power from the "nation to re-establish public order at home and the greatness "of the country abroad, *is the first to appeal to the wishes and "opinions of France.* Scarcely is he victorious over enemies "at home and abroad when he introduces into our institu- "tions improvements, which are a proof of his confidence in "the country." This is the kind of announcement which the Emperor only permits when he really means to draw attention to a change by which he hopes to win credit both for statesmanlike sagacity in interpreting the state of French feeling, and for the immediate intention to satisfy, so far as may be prudent, the want he has perceived.

We are the more inclined to look on the recent decrees as interpeted by this manifesto of Count Persigny's, as a genuine expression of the Emperor's present wishes, that there is nothing in the present change that in the least interferes with the genuine "Idées Napoleoniennes." The chief of these ideas has always been that an absolute administrator competent to discern and give immediate effect to the desires of his country and his age is the true governor for France; and into the new measures there enters not a shadow of *self-government*, which is the English notion of freedom. On the contrary, both the semi-official and the official interpreters of the Emperor take the greatest pains to explain that what is wanted is not a less absolute government, but a more efficient apparatus for showing the absolute ruler of the State what the wishes and tendencies of French thought are. The "*Chambre Jubinale*," as the Emperor is said to have contemptuously nicknamed the present Legislative Assembly from the name of a very servile supporter of the Government (M. Jubinal, a deputy from the basses Pyrenées), does not answer this purpose. The Emperor sees that it does not. He probably knows that he could feel the pulse of France more successfully if the Legislative Body contained an independent opposition,—that the elements of French thought and feeling would be in that case far better represented there,—and that he should therefore be in possession of a far more delicate electrometer with which to measure the impulses of the national mind, than he now is. He knows the danger of such opposition,—of the sudden moods of impatience which it may awaken in the nation when it speaks eloquently and yet speaks in vain. Still he thinks, and probably justly, that with a sagacious and vigilant mind at the head of affairs, there is now less danger in giving it free scope, than in judging and acting without any such guidance as it would give. It is simply the liberty of discussion, not of action, which he is going to extend. And how closely he watches, and how anxiously he meets, half-way, the shifting tide of public opinion in *this* country, his many special acts of deference to it sufficiently attest. He probably really feels the absence of similar help in judging of the finer movements of French opinion,—confidently as he believes that he himself has found for France "the lost thread of its destinies."

M. Persigny's letter to the French Prefects harps indeed continually on this string and on this alone,—that while the Government is to be as firm and prompt as before in suppressing all disorder, it wants fuller and directer access to the real state of the public mind. On this account the public functionaries are to conciliate anxiously those eminent men whom a "sentiment of personal dignity" at present holds aloof from public affairs. They are to neglect no occasion "to induce them to turn their knowledge and experience "to the advantage of their country," and they are to remind them that "if it is noble sedulously to wor- "ship the memories of the past, it is still more "noble to serve their country." And on this account, again, Count Persigny encourages the public officials themselves to assume a franker and more independent atti-

tude to the Government, to tell him their *real* convictions, and not to fear to give offence. "I ask you," he says, "to "put aside all personal considerations which but too often "embarrass great affairs. Always give me your opinions "frankly, with that independence of character which consti- "tutes the true servant of the State, consequently without "thinking whether you will please or offend." This is new language in a French Minister of the Interior, and argues, we may hope, that the Emperor has really felt the evils of a servile administration bent on echoing his wishes, instead of aiding him to form true views as to the wants of the country. From this evil he has asked M. Persigny to deliver him; and unscrupulous Absolutist though he is, and doubtless intends to be, Louis Napoleon has proved more than once that, though he despises a *Chambre Jubinale*, he does not despise any true indications of the popular will.

RAILWAY INVESTMENTS AND RAILWAY ENTERPRISE IN THE UNITED KINGDOM.

At the present time, speaking in round figures, there are 10,000 miles of Railway at work in the United Kingdom, constructed in about twenty years at a cost of about 330 Millions sterling, composed of 180 millions of ordinary share capital, 70 millions of preference and guaranteed contributions, and 80 millions of debenture loans. Taking the whole 10,000 miles in a mass, the results of their working is a net return of about 4 per cent. per annum upon the total capital (share, preference, and debenture) employed. The rate of interest on the preference and debenture portions of the total capital may be stated at rather better than 4½ per cent. per annum, and the rate of dividend on the 180 millions of *ordinary* stock and shares at say 3¼ per cent. per annum.

For the purposes of this article, it will be convenient to select three years, 1852, 1856, and 1858 or 1859, for the purpose of indicating the changes which have taken place and the progress which has been made.

Adopting the last result we have given, viz., the average dividend per cent. per annum on the whole of the lines in the United Kingdom as a test in a high degree expressive and decisive, we find that in 1852 the figure was 2*l* 8s per cent. per annum, on the *ordinary* shares—in 1856 it was 3*l* 8s per cent. per annum,—and in 1858 it was 3*l* per cent. per annum. So far, 1856 shows the most favourable result, but the present year may equal or perhaps surpass it.

The gross receipts of the lines were 16 millions sterling in 1852—were 23 millions in 1856—and in 1860 will be not far short of 30 millions. Of this gross receipt, about three-fifths will be for goods and merchandise, and the two-fifths for passengers.

The labours of twenty years have placed this country in possession of the most extensive (comparing mileage with area), the most perfect, and the most costly system of railways in the world. It may safely be said that no authentic records exist of the execution in any former age or country, by means of private or State enterprise, of a series of public works in any sense equal in magnitude, difficulty, or usefulness, to the railways of the United Kingdom. With that part of the question, however, we do not intend at present to deal. We purpose rather to inquire whether there is reason to suppose that British Railway Securities have at length arrived at such a point of development, and have assumed a degree of solidity, which entitles them to take rank among the best class of investments.

The total sum of 330 millions we must remember is very clearly distinguishable into three parts, viz., the 80 millions of debenture debts—the 70 millions of preference shares—and the 180 millions of ordinary stock. As regards the essential distinctions between these three classes of liabilities, it will be sufficient to say here that the *first* claim upon the net earnings of the line (that is the balance which remains after deducting the working expenses from the gross receipts) is for the interest on the debenture debts of the concern—the *second* claim is for the interest on the preference shares—and the *third* claim is for a dividend on the ordinary stock of the Company,—the precise mode of allocation being governed by the peculiar facts of each case.

The best security in the world are the obligations of the British Government as represented by the public funds. In what degree do these 330 millions of expenditure on British Railways approach, or in what degree are they likely to approach, in solidity and steadiness to the qualities of Consols?

We may best answer this question by taking two groups of important Companies out of the lines entering London, and out of the leading English Provincial Companies. In a note* we give the names of the seven Companies comprising the (A) or *Metropolitan* Group—a group comprising about 3,200 miles open, and 127 millions of capital expended; and the five Companies comprising the (B) or *English Provincial* Group—the mileage of which is 2,200, with 80 millions of expended capital. Taking the average of the market prices of the ordinary (100*l* pnid) stock of these two groups of lines in four months of 1859 and 1860, the results are as follows:—

Groups.		April.	July.	Sept.	Nov.
(A) Metropolitan	1859	84	82	84	86
—	1860	88	90	90	92
(B) English Provincial	1859	80	76	78	80
—	1860	83	85	88	90

In the (A) Group the advance in November, 1860, is about 7½ per cent. on the prices of 1859—and in the (B) Group about 12 per cent.

These are important improvements, but they are not more marked than the following Traffic results of the first nine months of the three years 1858-59-60:—

Groups.	Gross Traffic. 1860.	1859.	1858.	Traffic per mile per week. 1860.	1859.	1858.
	£	£	£	£	£	£
(A) Metropolitan	8,770,000	8,158,000	7,559,000	72	68	67
(B) English Provincial	5,200,000	4,726,000	4,505,000	63	56	54

Coupled with this evidence we have the following figures representing the dividends *per cent.* for the respective half-years paid upon the Ordinary stock of the groups of Companies:—

Groups.	1860. June 30.	1859. Dec. 31.	1859. June 30.	1858. Dec. 31.	1858. June 30.
	s	s	s	s	s
(A) Metropolitan	41	54	35	49	31
(B) English Provincial	41	38	29	31	34
Average	41	46	32	40	32

We have here a dividend of 3*l* 18s per cent. per annum in 1859—against 3*l* 12s in 1858—and in the *first half* of 1860 a markedly higher dividend than in either of the preceding years.

There is, however, another test to be applied, and a test probably more conclusive than any of the preceding. Let us, for example, take two groups of lines different from the preceding—say a group of lines in remote and poor districts—and a group of the largest of the Companies which have had to sustain during recent years the heaviest of the burdens entailed by numerous branches and feeders, many of them worked, for a time at least, at a loss. Let us ascertain as regards these two classes of cases, (C) and (D), what have been the earnings *per mile open* during the second or best half of the three years, 1852, 1856, and 1859.

In the following group (C) we give the traffic per mile of six lines in remote and poor regions:—

Group (C).	1852. £	1856. £	1859. £
Caledonian	1,300	1,746	1,975
Cork and Brandon	266	327	418
Dundee and Arbroath	788	948	993
Exeter and Crediton	511	780	849
Furness	634	1,270	1,273
Glasgow and South-Western	638	963	1,058
Average	690	1,006	1,094

And in the next group (D) we give the corresponding figures for eight large Companies, some of which have had to sustain perhaps the heaviest of the burdens entailed by subsidiary feeders, defensive leases, and onerous amalgamations:—

Group (D).	1852. £	1856. £	1859. £
Great Western	1,600	1,965	1,867
Brighton	1,884	2,335	2,089
London and South-Western	1,297	1,642	1,401
London and North-Western	2,394	2,638	2,205
Average	1,800	2,150	1,900
(D 1).			
Great Northern	1,250	2,220	2,442
Blackwall	5,940	6,932	7,501
Lancashire and Yorkshire	1,804	2,163	2,313
Manchester and South Junction	1,710	2,692	3,232
Average	2,676	3,500	3,924

* The Metropolitan Group (A) includes seven Companies:—London and North-Western; Great Western; Great Northern; Eastern Counties; Brighton; South-Eastern; and South-Western. The English Provincial Group (B) includes five Companies:—The Midland; Lancashire and Yorkshire; Sheffield and Manchester; North-Eastern; and South Wales.

In each of these cases the result is satisfactory. In the poor regions (C) the traffic has nearly doubled since 1852—a fact of the strongest significance as regards the developing and stimulating effects of railway facilities. In the large old Companies (D) which have been most burdened with collateral lines, the traffic of 1860 will equal or exceed the traffic of 1856—a year eminently prosperous, but a year not burdened as regards the Companies in question with anything like the same branch liabilities which exist at present. In the case of the four Companies marked (D 1), or Companies comparatively free from poor branches, the increase of traffic is most decided.

Looking at the whole of the facts, it is difficult to resist the conclusion that the recent rise in the market prices of British Railway Shares is, speaking generally, fully justified by a mass of evidence indicating increased solidity in the class of property they represent. The sources of uncertainty and danger during recent years as regards the ordinary stock of many of the leading Companies, have been the formidable engagements to Branches and collateral Companies, indispensable perhaps to the trunk line, but only to be nursed into profit by a long and tedious process. Heavy expenses also have had to be met for station accommodation in the most central parts of large towns. The more important of the stations on the lines themselves have had to be rebuilt or enlarged. Experiments have had to be tried with rails, plant, and rolling stock,—and above all a race of managers and servants has had to be reared to whom the working of a railway is to all intents and purposes a highly technical profession.

Most of these difficulties have been now surmounted. Time is rapidly rendering profitable even the most sluggish of branches. Connecting links—as, for example, the City lines in the metropolis—are opening up new sources of traffic to lines already established. Improved credit enables the Companies to borrow money on debentures at lower rates of interest. The principles of traffic management are better understood; and a generation of railway servants has grown up free from many of the prejudices and faults of the pioneers who were debauched by the early excesses of railway speculation.

THE TWO POLICIES OF AUSTRIA.

Scarcely anything is more difficult than for a nation to change its hereditary policy, especially while governed by the same monarch and the same aristocracy. When there exist two distinct and nearly balanced parties in the State, a casual circumstance may give the preponderance to the one which has been long in the minority; but this mode of renovating the political maxims of a country is the privilege of constitutional freedom. Where some old and powerful minister has long directed the Government, and retains from the past a power which the present would never have conferred upon him, his death, by handing over the helm to a new man, may at once give effect to the new ideas which have been gradually obtaining the supremacy in the public mind:—The death, or rather the retirement, of Metternich afforded such an opportunity to Austria, but the beneficial use of it was in a great measure lost by its synchronising with the revolutionary era of 1848. The substitution of a young monarch for an old one—especially if of a collateral branch—may offer another favourable occasion;—and few countries ever had a better opportunity of this sort than was presented by the accession of Francis Joseph; but unhappily he was inexperienced, incompetent, and ill advised; and the changes he introduced were chiefly in the wrong direction. He is now, to all appearance, dimly aware of his mistake and desirous in some measure to retrace his steps; but, as it seems to us, without any clear perception of his object or any adequate calculation of his means. The crisis is a perplexing and a perilous one; and demands qualities, both mental and moral, which neither he nor his ministers appear to possess.

Seldom, if ever, has the Austrian Empire been in such peril as at present. Not that we incline to think it, as some appear to do, no longer formidable either for aggression or defence. It is true it has to struggle with many internal difficulties and discontents; it is true that it is loaded with a perpetual and increasing deficit; it is true that its finances are embarrassed almost to the verge of bankruptcy. But we must remember that Austria has always displayed marvellous tenacity of life; that she has more than once been as "hard up" as now; and has repeatedly shown herself able, even after the most crushing and sanguinary defeats, again to bring large armies into the field in a wonderfully short period,—though how she contrived to pay them and subsist them was a problem that puzzled every one. We must remember, too, that the armies of other States, as well as Austria, have managed to fight and conquer in spite of an exhausted treasury and an impoverished land. Frederick the Great fought on, and made good his defence against the heaviest odds, when Prussia could supply him with little except rye-bread and gunpowder; and the forces of Revolutionary France were everywhere triumphant, though wanting even shoes and paid only in *assignats*. We doubt, therefore, whether mere financial exhaustion will, of itself, suffice to compel Austria to prudence or to peace.

But we wish to direct attention to the combined mischievousness and want of sagacity indicated by the course which the Emperor has recently pursued. He is at issue with two of the most important Provinces of his dominions—Hungary, the most extensive and most military; and Venetia, which is or might be the most opulent. He is bent upon retaining both, and upon retaining one by means of the other. But in pursuing this object he commits the double error of aiming at the impossible and haggling about the price. He wishes to regain the affections of the Hungarians, in order by their arms to coerce the Venetians, if not to reconquer Lombardy. But in order to do this he finds that he must not only abandon his policy of amalgamating Hungary with the more dependent Provinces of the Empire, but must so completely give back to its people their ancient institutions, that their arms and their resources will no longer be absolutely at his control. He wishes to conciliate them for a special purpose, but the price demanded for this conciliation would, he perceives, be probably fatal to this purpose. If he completely satisfied Hungary in order to coerce Venetia, it is certain that Hungary, when thus satisfied, would be able, and probably would determine, to refuse to be made the instrument of crushing the hopes and withholding the liberties of a friendly and enthusiastic people. We incline to fear that Austria, if wielding all the military resources of a cordial and reconciled Hungary, would be more than a match, at least for some time to come, for the new Italian Kingdom; but we greatly doubt whether these resources would ever be placed at her disposal for such a purpose. If they were, Hungary would for ever lose her claim to the respect and sympathies of Europe. But, after what passed between Kossuth, Cavour, and Louis Napoleon in Italy just before the peace of Villafranca,—after the formation of an "Hungarian Legion" in the Piedmontese army, and after the part taken by a similar "Legion" in the recent campaign of Garibaldi, it is impossible to anticipate such a monstrous proceeding. Francis Joseph, therefore, is now endeavouring to conciliate the Hungarians by offering them an insufficient bribe, which they will not accept; and he is doing this with the aim of obtaining from them a service which they will not render.

While showing this shallow statesmanship on the one side, he is committing a blunder at least as desperate on the other. In the hope of retaining Venice, he is incurring enormous expenses, exhausting his finances, and preparing to modify the whole system of his internal policy. Yet if there is anything certain and, one would fancy, obvious to all observation, it is that Venice cannot be permanently retained by Austria; and that her attempts to retain it, even for a time, will cost her more in men, in money, and in European position, than any Province whatever can be worth. The first endeavour of the Venetians for freedom, and the first effort of the Italian Monarchy to aid them, may indeed be defeated. So may the second. But is there any man in the least degree cognizant either of the profound and burning hatred felt by all Venetians to Austrian rule, or of the passionate sympathy felt for them by all other Italians, who does not know that the conflict will be eternally renewed and must ultimately be successful? Does any man doubt in his heart that, sooner or later, Venice must form a portion of the

Italian Unity; and that till it does so, Austria can only hold it by military occupation? She might now negotiate for its surrender on terms which would enrich her empty treasury by probably two millions per annum for many years. If she refuses, she will have to spend more than four millions per annum in defending it, with the certainty that it will be wrested from her at last. By pursuing the policy we point out—by frankly accepting the inevitable, as many Powers as great as Austria have had to do ere now—she would augment her revenue and diminish her expenditure; she might enormously reduce her army; she might devote herself to husband and develop the resources of her Empire, till the deficit was turned into a surplus;—and she might place herself once more in harmony with European and especially with English feeling. By following her present course, at once obstinate, short-sighted, and feeble, she is compelled to compromise and bargain with every disaffected Province; she reduces herself to absolute powerlessness for any influential action on the politics of Europe; she travels onward towards certain insolvency at a fearful pace; and she accumulates against her a degree and an intensity of hatred, at home and abroad, which will leave her destitute of all compassion and of all aid when her day of trial and calamity arrives.

SIR HUGH ROSE.

At a moment when the accounts from India are far from cheerful, when we hear of famine combining with more ordinary causes to render the income tax unpopular in Bombay, and when we have at least considerable anxieties for our administration in other parts of India, it is satisfactory to have so able a commander as Sir Hugh Rose at the head of our Indian army. He has now given ample proof not only of skilful generalship, but of those two qualities which are equally essential in a great military leader and yet which so often interfere with each other—a love of strict discipline, and so warm a sympathy with the rank and file as to exclude all martinetism. Both these qualities are shown in the highest degree in Sir Hugh Rose's recent measures and general orders; both are admirably illustrated in his mode of dealing with the mutineers of the fifth Bengal Infantry reported in our last accounts from India: and it is far from common to find both these qualities in equal strength in the same commander. Those leaders who, like Garibaldi, have the latter in the greatest perfection, seldom have the former in anything like the same measure. The great popular qualities and sympathies, the ardour of self-forgetfulness, the inspiration of success, which carry forward a small expedition on an all but hopeless enterprise, have not unfrequently distinguished men who, like Columbus, Cromwell, Gustavus Adolphus, Garibaldi, and men of that stamp, have been something more than military men,—ardent enthusiasts as well,—the soul of a great cause; but it is not of such stuff that our greatest English commanders have been usually made,—and though few can be more *considerate* for their soldiers than our eminent English captains, they are not unfrequently somewhat too devoted to military etiquette.

Sir Hugh Rose is of course a commander of the English stamp, but he seems to have much of that promptness of sympathy with zeal and merit in the lower ranks, which is far less common among our generals than the energetic but judicious severity of which he is likewise capable. His conduct with regard to the mutiny at Dinapore seems to us a very happy combination of both, and likely to do as much to inspire the rank and file of the army with emulation and hope as with respect and fear. In singling out a non-commissioned officer for a eulogy and a reward which will make him a marked man in the Indian army, he has probably done as much to secure the loyalty and devotion of the men, as his rigid severities in punishing the mutineers. A just warmth in both directions probably marks the best temperament for a successful leader,—though that temperament must be under the control of a perfectly cool judgment. We confess that all we have yet seen of Sir Hugh Rose's Indian career induces us to place the greatest confidence in his capacity to maintain the peace of the Indian Empire during the perilous crisis through which it is about to pass.

Agriculture.

THE CHALK SOILS OF THE WEST.

The improvements which, during the past thirty or forty years, have most attracted public attention, and have formed the main subjects of most agricultural writers, have been those effected upon the strong and wet soils. The key-stone to such improvements has been drainage, for until such soils were effectually relieved from the redundant moisture by which they were laden, other improvements could not be undertaken with much prospect of permanent benefit either to landlord or tenant. During the same period husbandry on the lighter soils, the turnip and barley lands of England, have made great progress, but it has been more silent and gradual, arising probably from the fact that, with the exception of more and better buildings, the improvements on light soils have been less dependent on the aid and co-operation of the landlords than have been those on the strong lands. There have been, however, great differences in the rate of progress made by the cultivators of light soils in different districts.

It is now some years ago that the late Mr Philip Pusey drew the attention of the agricultural world to the spirited farming adopted by the occupiers of the wold and other light lands of Lincolnshire, and contrasted their operations with those of the farmers on similar soils in the West of England, certainly not to the advantage of the latter.

On the chalk soils of Dorsetshire, Hampshire, and Wiltshire, there have remained vast tracts of "Downs" or natural pastures whereon the sheep have been fed during the day, to be brought at night and folded on the arable land in preparation for a corn crop. These Downs would for the most part have been rendered more profitable by being broken up and brought into a judicious course of arable culture. And that has for some years past been done in all these counties to a certain extent. But any considerable conversion of the sheep-walk to arable land on a West-country farm involved additional outlays of capital and some change of management, requiring more of activity and enterprise than had been previously exerted. We all know the obstacles such changes present to agricultural improvement. Still great advances have been made on the chalk soils of all these three counties, though Dorsetshire has generally been deemed to be much behind the other two in the race. In the part of the Journal of the Bath and West of England Agricultural Society which has just been published, we find a paper on "Farming on the Chalk Soils of Dorset," by Mr Joseph Darby, of Lytchett, near Poole, which shows that within the last five years the chalk land farmers of Dorsetshire have taken a start which bids fair to place them in the front rank of light land cultivators.

The Prize Report on Dorset Farming of the Royal Agricultural Society, made about five years since by Mr Ruegg, seems, according to the present writer, scarcely to have done justice to the actual progress then made in that county. It now appears that "in no part of the kingdom has agricultural progress more rapidly extended itself, or been attended with more uniform success," than in Dorsetshire, and that Mr Ruegg "wrote at a period when great changes which had been effected in the breaking up of the Downs, and the adoption of improved systems of husbandry were not fully developed." Since that time, former successes have been confirmed and higher achievements "have been effected in this now highly-farmed tract of country."

The chalk hills "formerly presented to view one vast sheet of Downs; cultivation was confined to the valleys, which intersected them or to their slopes, where the land was of good natural fertility, but it seldom extended upwards to a great distance from their bases." Up to 1840 little had been done in breaking up the Downs. At that time tithe commutation had advanced, and artificial manures had been ascertained to be most effective agents in the cultivation of poor soils. It was then discovered that a quarter of half-inch bones would grow a good crop of turnips on the down land when broken up. The farmers applied for, and the landowners generally permitted, the breaking up of down land, it being found that a crop of turnips fed off with sheep produced good corn crops on the down land without in the slightest degree robbing the old cultivated part of the land. The conversion of poor sheep-walks to tillage became rapid, and corn and green crops were seen on the hills throughout the chalk districts. "The sites of those old downs are now very generally covered with luxuriant green crops and heavy waving breadths of corn, so that it would task the most attentive observer to trace the places where they once appeared; the ancient landmarks are obliterated, and the old arable land and the new are equally embraced in one vast enterprise, since liberal treatment has covered hill and dale with a rich garment of beauty." Even where the land after harvest appears to be a bed of chalk or a mass of flints, the growing crops are such as to lead an observer to suppose them to be growing on a naturally fertile soil. Sheep and artificial manure accomplished this; and the Dorset sheep farmers are said to "have at least doubled the number of sheep kept to the acreage, and have more than trebled the yield of corn from their holdings." The rents have, of course, increased as well as the produce of the land, but on such land rent is a comparatively small portion of the cost of raising crops. Artificial manures, oil-cake, and the wear and tear of iron in working the flinty soil, form far greater items of outlay.

Yet these chalk soils vary greatly. Some of the hills are so covered with flints as to present rather the appearance of a newly-made road than cultivated land. In other places on the hill summits the chalk lies only a few inches beneath the surface, and is turned up every time the plough enters. On the Eastern side of the county the soil of the hills is more friable and the subsoil more penetrable than the Western hills. Saintfoin, consequently, is largely cultivated on the Eastern hills, while oats are more grown on those on the West side of the county. On the slopes of the hills and in the valleys the soils are everywhere deeper and naturally more fertile. Hence the systems of cropping are very various.

Once the four-course or Norfolk system was very generally adopted in Dorsetshire, but many and striking modifications of that system have now come into use. Mr Darby says that the Norfolk system in Dorsetshire "was only of use during the time of those tranformations which gradually raised the character of the farm from a semi-barbarous state to one of high productiveness." Now the agriculture of the chalk districts has "entered another phase of development; not only have there been important deviations from the systems previously established, but also a very general abandonment of a strict adherence to any system whatever. The five-course shift, it is true, still holds its sway over many of the hill farms; but in the vales, and on the better class of soils generally, neither that nor the four-course is found adapted to the present wants of farming." The roots fed off as they now are in Dorsetshire with large quantities of hay and sometimes with oilcake in addition, are found to leave an amount of manure which is too stimulating for the barley crop which in the four-course shift would follow. The barley would become over-luxuriant and the produce not fit for the maltster, and consequently that crop is placed in another part of the rotation. The root crop thus fed off is followed "by another green crop of either turnips, rape or spring vetches, which is fed off in the autumn." Then wheat is sown, and on these soils is seldom hurt by excessive manuring, while it leaves the chalk land thus treated in fine condition for a barley crop the succeeding year. Clover follows the barley, and the clover is sometimes allowed to remain for two years, and then follows wheat again. The same rotation is again repeated on some farms, while on others it is varied by a rotation of the four-course shift, and the turnips are then fed off early so as to permit the barley sowing in February or early in March, a plan which prevents some of the ill effects of over-luxuriance. It will be obvious that on the large farms of these districts, varying from 600 to 1,500 acres, the combination of the two rotations not only affords the farmer an immense quantity of green food for his sheep, but provides such provender during the greatest number of months in the year. Another rotation—six-shift—is also in use:—1, wheat; 2, barley (stubble sown to vetches); 3, swedes or turnips; 4, barley; 5 and 6, clover. This is now used on kindly land for barley. The wheat stubbles are generally cleaned in autumn and a winter green crop sown, which is fed off sufficiently early in the spring to allow the root crop to be properly cultivated.

Mangold wurtzel is also being largely substituted for swedes, in the vales on the classes of soils on the hills of the Western side of the county. This is done without farm-yard manure by feeding off a winter green crop, and then the mangold is sown with from 4 to 5 cwts of Peruvian guano, 5 cwts of salt, and 2 cwts of superphosphate per acre. This costs about 3*l* 10s per acre, and of course can only be adopted on warm and fertile soils where the winter green crop can be fed off early. The mangold is usually stored in small heaps on the field where it is intended to be fed off during the winter. The quantity of hay grown from the clover has greatly increased of late years by manuring the young clover with farm-yard manure, to which it acts as a stimulant and affords shelter to the tender plant from frost. Nearly all the hay of the farm is given to sheep, the horses being fed on oats and wheat chaff or cut straw, and to this ample provision Mr Darby attributes the facts "that the lives of thousands of sheep were saved in the last winter, and that the depreciation in their value was by no means so great in the South-western counties as in the North of England, and that while numbers were starved in Scotland, their lives were well preserved in Dorset." We regard it as a hopeful sign that "the progress of good farming in Dorset is characterised more and more every succeeding year by a lessened dependence on corn-growing, and increased attention to green crops and stock-keeping." And such is the opinion of the best farmers of that county. Mr Darby quotes the following passage from a letter by Mr Henry Richards, of Abbots Court Farm, which is worthy of attention by farmers everywhere:—"There is one error into which many men striving to do their best fall, which is, they are too fond of using the plough, and too anxious to grow large breadths of corn, forgetting that a heavy expense attends the cropping, and that unless a certain amount of produce be obtained the growing of it is attended with a loss instead of a gain; whereas, by less frequent cropping, and keeping land down to some sort of grasses or clovers—feeding more stock on them, and thereby manuring and improving them, expenses are avoided of seed and tillage, money is made of stock instead of corn; and when these lands are sown the crops are such that they cover all ordinary expenses (which are but little different on a five-sack or ten-sack crop) and leave a profit to the grower. I have at this moment nearly 1,200 sheep on 370 acres of land, much of it of very inferior quality; whereas my usual breadth of corn of all kinds on about 235 acres of arable is less than 100 acres. I am convinced a farmer cannot commit a more ruinous error than that of over-cropping his land." Other Dorsetshire farmers holding equally sound opinions, and whose practice is as judicious, are mentioned. One Mr John Homer, of Martinstown, "often grows as many as three green crops before wheat in one season," though the effect is sometimes to cause his sheep to scour when feeding off these rapidly-grown green crops.

Still there is room for improvement. The straw on Dorset farms is accounted of so small importance as to be valued between outgoing and incoming tenant at from 7s to 8s only per acre. Now "some of this straw cut into chaff and mixed with a few pulped roots and a little oilcake would feed a herd of cattle profitably and well in the winter season," while provision for their summer feed may be made by growing more vetches, trifolium, and other green crops on the stubbles. The cattle would always remain in the yards. But here is the difficulty. The Dorset farms have no yards, "and without a very considerable outlay in the erection of stalls and other farm offices, very little improvement can be anticipated in this direction..... Where better buildings have been erected, the adoption of cattle feeding has followed as a natural consequence, and is generally carried out with much spirit." This is particularly the case on the Dorchester side of the county.

Finally, the labourers have greatly benefited by the conversion of down land to arable, their wages having advanced generally from 2s to 3s per week above the rates of twenty years ago. They have usually cottages with gardens rent free and some minor advantages, in addition to money wages ranging from 8s to 11s per week. The consumption of artificial manures and oilcake in the county is large and greatly on the increase. Another article on the Hill Farming of Wiltshire and Hampshire exhibits some striking peculiarities in the chalk soils of those counties, but we are at present compelled to postpone a notice of that paper.

Literature.

COMMERCIAL LITERATURE.

THE BANKER'S MAGAZINE. Groombridge and Sons, Paternoster row.

THE present number contains a well-written article on the arrangement made between the Bank of England and France, and has other articles of interest to the monied and commercial world, besides the usual circulation returns, &c.

HUNT'S MERCHANTS' MAGAZINE AND COMMERCIAL REVIEW. London: Sampson Low, Son, and Co.

THE November number of this American periodical is, as usual, replete with useful commercial intelligence, and likewise contains many well-written articles on various subjects. There is a paper on Philadelphia and its Manufactures, and a particularly able article (No. 4 of a series) on the Currency of the United States, to which, when completed, we may have occasion again to recur, the more especially as the present monetary and banking crisis in the United States will tend, in some measure, to confirm or refute the writer's views on the subject.

FIRST STREET RAILWAY BANQUET IN THE OLD WORLD. Lee, Nightingale, and Co., Liverpool.

WE forget the name of the great statesman who solemnly declared that, in his opinion, no great principle in England ever triumphed unless it was first inaugurated by a dinner. We presume Mr Train, the "Stephenson of Street Railways," profited by this hint. We have so lately touched upon the great benefit that the overcrowded streets of London would derive from the introduction of street railways, which have been so successfully introduced in the United States, that we have little further to add on the present occasion than to hope Mr Train's plan will be as successful as his banquet. If we might be allowed to offer a suggestion, it would be that now Mr Train's railway is in actual operation, he will obtain reports from practical men as to its working, rather than of his own speeches, notwithstanding that they are, in the language of the *Liverpool Daily Post*, "the most wonderful ever heard." We are happy, however, to read Mr Dargan's opinion, "that the new system must inevitably supersede every other mode of street conveyance," and that "the new power brought into operation would be inferior to nothing but steam," notwithstanding "the little rigidity, the little knocking, and the little discomfort and some things that they might wish to see removed." We believe with Mr Dargan that all these little drawbacks will easily be surmounted, and we shall be happy to announce that they are.

GENERAL LITERATURE.

LIFE AND RELIGION OF THE HINDOOS; with a Sketch of My Life and Experience. By JOGUTH CHUNDER GANGOOLY. London: Whitfield.

IT has often been justly complained that the real life of the Hindoos and their inner world are an unknown world to their rulers, who often quite unconsciously injure their most sacred prejudices, and

often alarm them by measures, of the probable Hindoo interpretation of which they have not the smallest conception. This is so true that if we are to bridge over the chasm between the two races at all, it must be in the first instance by the help of Anglicising Hindoos, and cannot be through Hindooising English. Apart from the insuperable difficulties of intimate intercourse between the foreigner and the Hindoo, it is impossible for any man who has been brought up in the West so to mould his imagination as to enter into all the recesses of that indolent, receptive, and custom-ridden mind. It can only be through the half-unconscious confessions of Anglicised Hindoos, with enough activity and originality to burst the fetters of their own decaying civilisation, and yet enough relics of their birth and education to give us full insight into the type of their countrymen's nature, that we can hope to learn anything of the mind of our millions of fellow-subjects in India.

Such a book we have here, and since it is unquestionably a very interesting and instructive, it ought also to become a very popular one in England. Mr Gangooly is a young Brahmin (or, as he writes it himself, a Brahmun) of high caste, who lived not far from Calcutta. He was, according to his own account, a sincere idolator and worshipper of the images. He "verily thought with himself that he ought to do all things" to uproot the Christian heresy that was, if not *spreading* among his countrymen, at least threatening their own faith and turning many into sceptics. He obtained some Christian tracts for the sake of replying to and annihilating the false creed. He found amongst them the Sermon on the Mount, and became himself gradually shaken, and finally converted by the Unitarian Missionary in Calcutta.

The first striking feature we notice in this book, is, that if it truly represents the state of any large portion of the better educated Brahmins in Lower Bengal, they have by no means so universally lost faith in their own idolatry, as we sometimes hear it said. Mr Gangooly was himself of a high caste and of a well-educated family. His father and uncle were both not only priests, but remarkably pious priests, thoroughly accepting the idolatries they practised. Nor is there the slightest indication in these pages that the circle of Brahmins in which young Mr Gangooly moved was sceptical. Most of them were apparently dissipated, many of them broke through the ceremonial, and neglected the prescribed fasts; but there is no hint given of a diffused disbelief in the Hindoo idolatry. The following passages seem to testify to a general atmosphere of *bonâ fide* superstition around him, with possibilities of outburst into actual fervour:—

I had to go to a town across the river Ganges to attend to the images. So strong was my affection for the idols, so earnest was I to ace all people worship unceasingly, that while playing cards with my friends one day, I proposed an extra worship of the Goddess. The little band approved it; the cost was counted and found too huge for our private pocket to afford. I encouraged them with a promise to construct the image with my own hand. They considered the possibility of the enterprise, and we at once set out to work. Accordiogly, bamboo was brought, a piece of board, nails, straw, string, &c., were secured. Fearing our parents would interfere with this, we carried the materials to the top of a house, which in our country is flat. One day a respectable Brahmin, looking at the parapet, saw the hands of the image, and came up stairs to see what we had done. The neighbours flocked in to see, admire, and help at our work, and a universal enthusiasm prevailed. A great many doubted my ability to finish the idol, but I think I did it nicely. My oldest brother painted it, and we received the praise of the people. To commemorate this event, we worshipped the idol annually, defraying the expenses by subscription.

The following sentences which describe young Gangooly's devotion to the worship of Joggernauth, and the anxious superstition with which he presided over the idols in the annual procession of Joggernauth's car, are evidence to the same effect:—

Being a Brahmin, and widely known as a sincere lover of the idols, I used to sit on the top of the car, fan the idols, receive the shower of flower-garlands from the crowd, and throw them again at the men, women, and children below as a benediction. Such was my devotion and affection to the images, that while almost everybody deserted the car on account of a heavy shower, I alone sat by and took care of the idols, believing they would reward me abundantly hereafter.

The Hindoos have been called the "women of the human race;" and if to have receptive minds with very little impulse to original activity of any kind, but plenty of previously fixed notions which have been inhaled rather than acquired, and the strongest adhesiveness to immemorial custom, be feminine, the expression seems not incorrect. A ritual and ceremonial life, with fixed rites for every month and week in the year, and well-defined customs for every day, has been one of the great attractions of the Catholic faith for Western women feeling "the weight of too much liberty," while it has proved the oppressive burden of the men of the Western nations which "neither our fathers nor we were able to bear." Just as the ceremonial and Oriental detail of the Jewish law seemed to chafe the stronger minds amongst the Jews and to enslave the weaker, the Roman Church has irritated half its members into open rebellion and subjugated the other half. But the Hindoo idolatry and system of caste has eaten far deeper into the heart of Hindoo life than ever did the Catholic Church into that of Christian life, and has apparently roused no impatience and no fretfulness. There is no eager fuming under so oppressive a yoke. The pressure is *enjoyed* like that of an artificial support to which the race has become accustomed. Society hugs its chains. Funerals and fastings and meaningless festivals make up the round of life. Arbitrary social distinctions which are either devoid of meaning or have a mischievous meaning, seem to be preferred to none, and even the low castes would rather be despicable than lose the interest of class distinctions altogether, as we see sometimes that the lower class of Western society is the greatest worshipper of aristocratic rights. Here are examples of Hindoo forms: what strikes us most is the immeasurable patience they imply. What should we, who so often chafe under the artificial solemnities of a funeral procession, say to such a form as the following?—

During those days of mourning the sons of the deceased call on every family in his native place, high or low caste, rich or poor. Entering into a native gentleman's house, they thus address him:—"Sir, to-day is the sixth day of my father's departure from this world. He has received the grace of Gunga. I am ignorant of a great many things, inexperienced, and know not what to do. I earnestly entreat you to be kind enough to go to my house; superintend everything necessary; advise me and others interested in my case; receive and entertain the guests in my behalf," &c. It is customary to give some pecuniary aid to them, especially if they be poor, for it costs a large sum of money to perform the ceremony and entertain several hundred persons at least.

Or how should we chafe at the following religious excuse for dilatory habits:—

In order to take a long or short journey, especially if undertaken for some important business, a "fortunate hour" is sought for, which the priests designate after consulting the day and its planet (each day, being named after the heavenly bodies, such as Sun, Moon, &c., has its attendant planet). Before starting on the journey, a man prostrates himself before his parents, bows to them reverently, bends his head also before the idols or pictures of the gods, asks their blessing, recites a prayer or two, which are always creed-like and authoritative, and finally bids "Farewell, I come then." This is answered by, "Let success attend your steps," "Gods be with you," &c. If accidentally he should strike or touch his head against a door or wall, or if any one present should shout or sneeze, or if any one should speak to him, he would immediately take his seat for a few minutes. Such interruption is regarded a bad omen, and, if repeated, the journey is to be postponed.

The number of distinctions in the mode of addressing people is also far more complex than ours. They have distinct names not only for brother's son and sister's son, but for the different cousins on both sides to a great distance, and so of all other relationships. Children and juniors are addressed in letters as "Objects of Blessing," while Brahmins and elder persons are addressed as "Most adorable," or "Obedience to thee is my joy." Social distinctions of all kinds are multiplied *ad infinitum*, and observed with delight.

One of the most characteristic features in the Bengalee, besides his immeasurable patience, and love of social distinctions, is his great caution and timidity. The scientifically tentative steps by which Mr Gangooly confesses that he tested the power of the idols before abandoning their worship, is one of the most characteristic passages in this curious book:—

Although I felt quite sure that the gods of my country are mere imaginary deities, or some ancient heroes deified after death, still I could not readily free my mind from the fear and respect I bore them from my infancy. But something must be done, some measure must be taken to make an experiment of their power, so that I need bend before their images no longer. An old anecdote coming vividly to my mind seemed to discourage me for a while. It was this. Nearly a couple of years before, I had been to worship the idols belonging to a widow. It was a winter evening, and carelessly I had forgotten to cover them with their warm clothes. Next day I was told by that widow of the great crime I had done, and I felt much frightened to see the images suffering in cold. She said she retired late as usual, and notwithstanding a quantity of clothes on her back she felt chilly. Not knowing the reason of such an unusual experience, she came to the closet and found the idols lay unprotected in the cold! Now a great fear filled my heart at the thought that if, owing to my carelessness, the innocent woman suffered, how much more will I have to suffer if I neglect the gods for ever. But, upon consideration that God is mightier than all, and that if we come unto Him for protection, no god, no spirit can hurt us in the least, I grew strong. I would not have gone so far as to touch irreverently the idols, had it not been to see whether there is any consciousness in them, because I had been taught to believe that they are living beings. So, one by one, I tried the strength of the idols that fell within my reach, in treating them with less care. Thus one day while I was bringing down the idols from a high place, like a mantelpiece, the heaviest of them fell down on the floor, making a loud noise thereby. Hastily I picked it up, examined whether any damage had been done or not, and washed it as usual. At first, I thought I could not worship it in the prescribed ways; but fearing it would be too much for the first time, I thought it prudent to worship it as usual. Thus privately taking steps too bold, too improper for a Hindoo to venture, I determined to see the end.....To a town on the other side of the Ganges I had to go occasionally to worship idols. During the holidays I was sent by my mother there to worship the Goddess of Learning. I did not repeat any prayer. I sat down before the idol and scattered flowers in the usual way. The matron said, "I wonder how you could perform this worship in so short a time." I felt embarrassed, and sitting before the idol in the next house, spent more time in reciting my English lessons learned long ago,—such as "The English Grammar is the art of speaking and writing the English language correctly," "The Caspian Sea or Lake is surrounded by Russia, Tartary, and Persia," "A straight line that divides a circle in two equal parts is called its diameter," &c., and no complaint was made then. I am fully aware I did a great many things at this stage of my experience which certainly wore a double aspect,—not daring to let these

changes in my faith be known to my friends, and at the same time not wishing to follow what I conceived to be superstition.

We have given enough extract from this curious and interesting work to show its value as a study to any one who wishes to understand the *inside* of the Hindoo character. This is not the place in which to comment on Mr Gangooly's religious conversion, but his own personal experience will be found to be a living comment on his account of the "manners and customs" of his fellow-countrymen, realising to us their habits and modes of thought as no mere general account of them could illustrate them.

WYCLIFFE AND THE HUGUENOTS; or Sketches of the Rise of the Reformation in England, and of the Early History of Protestantism in France. By the Rev. WILLIAM HANNA, LL.D., Author of "Memoirs of Thomas Chalmers, D.D." Hamilton and Co.

THESE sketches of the earlier days of the Reformation in England and France were originally composed for delivery at the Philosophical Institution of Edinburgh. They are now published in the modest volume before us, with a view "to popularise a portion of Ecclesiastical history,"—a study not popular as a whole, but nevertheless affording many striking points of world-wide interest and picturesque capabilities for the popular lecturer who knows how, as Dr Hanna does, to avail himself of them.

In this prolific season of periodical literature, when new monthlies spring up on every side in luxuriant growth, it can hardly be expected that that omnivorous, impatient, and plentifully supplied abstraction, the general reader, should have either time or appetite for Church history; it is, therefore, perhaps well that it should be dressed up for him in a lighter form—that the historic muse should sometimes stoop from the "dignity of history" and submit to the humbler style of the popular lecture, thankful if by so doing she can secure an exponent as clear and able as Dr Hanna. The lecture upon the "Life and Times of Wycliffe" may incite some of its readers to a closer study of a period in history as yet too much neglected, considering its great and important bearings upon succeeding events, and also to a better and wider appreciation of our first and greatest reformer. We prefer this lecture to its companion, "The Huguenots," both from its treating of a less frequently discussed chapter of history, and from its wider range and more thoughtful spirit. Yet it is, perhaps, less attractive generally from its quieter tone and the less stirring nature of its incidents. The sketch of the "Early History of Protestantism in France" scarcely answers to its title, since the actual relation does not begin till midway in the reign of Francis I. From that time the narrative of the long and deadly struggle that distracted and tore into factions the country, the city, and the court, is animated and close, terminating with the massacre of St Bartholomew. As a specimen of the tone and style of Dr Hanna's lectures, we will extract the closing paragraph of his first lecture, in which he sums up "Wycliffe's position and services as a reformer":—

Had he, at that early age in which he lived, seen but half the length he saw,—had he done but half of what he did,—had he attacked but one or two of the chief strengths of the enemy, and brought into action but one or two of the great engines of war,—our eye had fixed on him as the foremost pioneer of that great host, led on by Luther, who, far in advance of all the rest, alone in the thickest of the enemy, had first lifted the war-cry of the Reformation, and commenced the battle. But, a century and a half before the ranks mustered under their great German leader, to see this solitary English soldier fighting that battle as he did, taking up every position that was afterwards taken up, using every instrument of war that afterwards was used, assaulting every stronghold that was afterwards assaulted—nay more, advancing in more than one direction further than ever Luther did—alone, deserted, pressing on to the last, not a jot of heart or hope abated, his last strokes his strongest, till he fell, but fell all confident that he left victory in store for those who followed;—what zonalist of this great campaign shall describe to us the place and part in it that such a warrior filled, or who shall weave for us the crown that we would like to plant upon his pale and palsied brow?

THE DUBLIN UNIVERSITY MAGAZINE. No. 336. December, 1860. Hurst and Blackett, London.

THE closing number of the "Dublin University Magazine" for the present year is a fair specimen of this pleasant periodical, containing, indeed, no articles of especial brilliancy or notability, but a large amount of thoughtful, intelligent, and careful writing. It works freely, and we think wisely, in a field rich in materials for native writers,—viz., the old historical records and legendary traditions of Ireland, as well as the delineation of her more remote regions, where something of her ancient wildness and desolation still lingers among the grand and beautiful scenery, and where the inhabitants still retain traces of their former rude freedom, ignorance, simplicity, and rough hospitality. "The Wanderings in Ireland" of this number takes us into the more cultivated and civilised region of the North-east. It is pleasant, in the land of mud-cabins, pigs, and poreens, to read of the substantial comfort, the industry, and independence of the Northern farmers and peasantry. "Let any man," says the writer, "of an observant habit take a walk or drive among the pleasant hills of Downshire, and personally visit these farming homesteads, and view their order and snugness, and their manifestations of industry; let him converse with the honest, straightforward paterfamilias; the kind, gentle, and generally pious mother; the modest, hard-working, and pure daughters; let him talk to the fine, blunt, active youths and farm lads; and, summing all up, he must confess that these fair homesteads, perched amongst the Northern hills, form a civil, social, and moral picture, of which every true-hearted man and loyal and patriotic Irish subject may be proud." A search among the newly published State Papers of Ireland affords materials for a partly historical, partly biographical sketch of the O'Connor and Cowley-Wellesley families; and an effective little tale, "Shawn Buie," paints the scenery round Kilkee as it was some fifty years ago, before the encroachment of summer tourists. "Old Paris" is a retrospect, antiquarian and topographical. "The Work a Day World in France," a critique upon the social state of the French workman, and more especially on the Conseils de Prud'hommes, or Conciliation Courts of mixed masters and artisans, where the settlement of disputed cases between employer and employed is successfully undertaken. In Rouen, 1,193 cases came before these cheap and simple courts of justice, of which 775 were settled in private, 373 withdrawn, 44 carried to the upper court, and 41 withdrawn before judgment. "The building trades," said the Secretary of the Paris Courts, "with all their great Paris improvements, have given us most trouble. Had it not been for our Councils there would have been serious disturbances; but when the contending parties get once fairly into our Conciliation Office, their differences are soon adjusted."

Would it not be well if the same thing could be said respecting our "serious disturbances" in the building and other trades? "Thomas Becket" and "Robert Owen" are fairly written articles. This number is, on the whole, a good one.

THE ENGLISH WOMAN'S JOURNAL. December, 1860. W. Kent and Co., Paternoster row.

THE "English Woman's Journal" continues to work industriously at the practical side of the "woman" question; calling attention quite as much to reforms which can be carried out by women for and among themselves, as to those required from without; and advocating each scheme that opens for them a prospect of better training and wider employment. The first article—a paper read before the Association of Social Science at Glasgow—dwells upon the low standard of education among girls of the poorer middle class, who are above profiting by the superior instruction to be gained in the National Schools. Endowed schools for girls as well as boys of this rank in life are much needed. The physical training of girls receives its share of attention. The "Ladies' Sanitary Association" is reported as progressing favourably. The establishment of Benefit Societies among working-women is advocated in an article which explains the working of Friendly Societies generally.

Purely literary topics form the theme of three pleasantly-written articles:—the commencement of a memoir of Madame Récamier; a discourse on nuts as the "Fruit in its Season;" and a curious account of a Roman villa lately discovered in the Weald of Sussex, at Bognor, near Arundel. The walls are gone, but the foundations and the ornamental Mosaic pavement of great beauty are still in good preservation.

Foreign Correspondence.

(FROM OUR CORRESPONDENT.)

PARIS, Thursday.

The publication of the remainder of the tariff to be imposed under the treaty on British goods brought into France is naturally the great event of the day. The protectionist fraternity are in dismay, because the reform effected goes further than they had thought possible; and the friends of liberal commercial policy are proportionally delighted. In the eyes of these latter the new tariff does the highest honour to M. Michel Chevalier and M. Rouher, the Minister of Commerce, by whom it was negotiated. Assuredly it is a bold and sweeping measure as regards France, and two short years back would have been treated as one of the wildest of dreams. It is not improbable that the manufacturers of Rouen, Lille, and other places, may remonstrate against it, though they will gain nothing by so doing. Some shipowners and merchant captains of Bordeaux have already addressed a complaint to the Government against British vessels being allowed to bring jute from Calcutta on the same terms as the French.

The Board of Customs has addressed the following communication on the subject of the treaty to the Chambers of Commerce. It is dated the 1st:—

A second complementary convention between the French and English Plenipotentiaries fixes, in execution of the treaty of 28th January last, the duties applicable to a new series of merchandise of British origin or manufacture, and to some products of other origin imported direct by French and English vessels. The new conventional tariffs are not immediately applicable, except for one kind of merchandise—pins of all kinds of English make, which are admissible at the new duty from this day. Whether they are in iron, steel, copper, or tin, and whether tinned or not tinned, painted or varnished, they are to pay a duty of 50f per 100 kilogrammes. They will thus cease, as far as regards the application of the treaty, to be classified as articles of mercery. I must here remind you that pins with large steel heads must be considered as small articles of steel, and be only liable to a duty of 25f per 100 kilos. It must be also remembered that pins in gold and silver, or in metal gilded or silver, remain liable to the duties chargeable on jewellery, whether real or imitation.

A gentleman named Barbier has been appointed Director-General of the Board of Customs. He has held a high office in the Customs, but is unknown to fame. It would have been more satisfactory to the public to have seen a man of greater authority appointed to the post, as it will be on him that will devolve the task of bringing the commercial treaty into working order.

The Government has appointed a commission to examine and report on the demands which manufacturers and others may make to the Treasury for loans to renew their machinery and *materiel;* and the Ministers of Finance and Commerce are to decide whether the loans shall be accorded or not. It may be remembered that a law passed in August last authorised the grant of loans to needy manufacturers, in order to render the treaty of commerce with England less distasteful to them.

Considerable sensation was caused on Friday last by the refusal of MM. Rothschild to pay the dividends on one of the Papal loans due that day, the cause of the refusal being that they had not received *the whole* of the funds necessary for the purpose. The belief is, however, that the funds will be provided, either by the Catholic party on behalf of the Pope, so as to redeem his credit, or by King Victor Emanuel's Government, who holds part of the Papal territory.

M. Mires is making a great fuss about his Turkish loan, but the public generally do not appear disposed to regard it with much favour. Some surprise has been caused by an announcement that by decision of the Turkish Government, "in accord with a desire expressed by him," the payment of the dividends on the loan is to be made, not by his bank, but by the Credit Industriel Bank.

Business on the Bourse has not been active during the week, and the following are the quotations:—

The Board of Customs, as is known, publishes annually a large volume of statistics on the commerce of France, under the title of "Tableau General du Commerce de la France." That for 1859 has just appeared, and from the multitude of facts it contains, I extract the following:—

The *official* value of *all* imports into, and *all* exports from France which are technically designated "general commerce," were united:—

1856.	1857.	1858.	1859.
f	f	f	f
4,587,300,000 ...	4,592,500,000 ...	4,476,800,000 ...	4,903,800,000

of which imports were:—

1856.	1857.	1858.	1859.
f	f	f	f
2,267,500,000 ...	2,235,800,000 ...	2,034,900,000 ...	2,148,200,000

And exports:—

1856.	1857.	1858.	1859.
f	f	f	f
2,319,800,000 ...	2,356,700,000 ...	2,441,900,000 ...	2,755,600,000

Of these, the official value of the imports for *consumption in France*—the tables call them "special commerce" was:—

1856.	1857.	1858.	1859.
f	f	f	f
1,521,000,000 ...	1,450,100,000 ...	1,383,700,000 ...	1,404,000,000

And that of the articles of *French production* exported—"special commerce"—was:—

1856.	1857.	1858.	1859.
f	f	f	f
1,626,900,000 ...	1,640,200,000 ...	1,777,500,000 ...	1,998,000,000

The difference between these last two lines of figures and those above represents in imports what was sent abroad or what remained in bond, and in exports the productions of foreign countries which were sent through France.

The "*actual* value" in 1859 of all imports was 2,354,800,000f, of which 1,604,700,000f were consumed in France; and of all exports 3,057,100,000f, of which 2,266,400,000f were French productions.

England, which, in the language of the French Customs, means not only the United Kingdom, but also Malta, the Ionian Isles, and Gibraltar, took a far larger share in French commerce, both as regards imports and exports, than any other country. Thus the total imports from her were "official value":—

1856.	1857.	1858.	1859.
f	f	f	f
353,300,000 ...	356,300,000 ...	338,600,000 ...	368,600,000

of which the portion consumed in France was:—

1856.	1857.	1858.	1859.
f	f	f	f
251,200,000 ...	236,700,000 ...	215,600,000 ...	223,100,000

And the exports to her were:—

1856.	1857.	1858.	1859.
f	f	f	f
410,100,000 ...	422,400,000 ...	499,100,000 ...	625,600,000

in which French productions figured for:—

1856.	1857.	1858.	1859.
f	f	f	f
278,900,000 ...	291,500,000 ...	371,400,000 ...	474,000,000

The "*actual* value" in 1859 of the imports from England consumed in France was, in round figures, 278,200,000f; and that of French productions exported to England, 591,300,000f.

The share which the dependencies of England had in the "general commerce" of France was as follows in official value:—

	1856.	1857.	1858.	1859.
	IMPORTS.			
	f	f	f	f
India	92,800,000 ...	106,300,000 ...	81,800,000 ...	70,300,000
Western Coast of Africa	23,000,000 ...	23,100,000 ...	21,500,000 ...	18,100,000
Mauritius and Cape of Good Hope	5,000,000 ...	9,500,000 ...	7,700,000 ...	11,300,000
Possessions in America	200,000 ...	400,000 ...	200,000 ...	300,000
	EXPORTS.			
India	6,900,000 ...	7,600,000 ...	9,300,000 ...	7,200 000
Western Coast of Africa	5,600,000 ...	6,700,000 ...	3,900,000 ...	5,100,000
Mauritius and Cape of Good Hope	6,700,000 ...	13,100,000 ...	13,900,000 ...	13,300,000
Possessions in America	2,100,000 ...	2,700,000 ...	1,600,000 ...	2,000,000

The following was the value, official and actual, of the principal articles imported into France in the year 1859 from the United Kingdom (Malta, the Ionian Islands, and Gibraltar included), the head "general commerce" specifying all that was brought in, the head "special commerce" all thereof that was consumed in France:—

	General Commerce.		Special Commerce.	
	Official Value.	Actual Value.	Official Value.	Actual Value.
	f	f	f	f
Silk	133,267,508 ...	147,912,525	83,529,916 ...	107,462,464
Cotton tissues, laces, &c	35,664,660 ...	9,702,306	17,524 ...	17,524
Coal	21,925,912 ...	28,224,588	17,738,815 ...	21,162,352
Iron and steel	18,626,689 ...	15,820,167	5,707,472 ...	4,854,724
Wool	17,874 056 ...	42,682,135	17,975,152 ...	42,487 138
Oleaginous seeds	15,263,871 ...	6,962,446	3,045,977 ...	1,405,152
Woollen tissues, &c	13.932,673 ...	21.485,351	309,702 ...	112,361
Copper	11,168,882 ...	14,519,547	10,956,644 ...	14,243,637
Oils	6,833,405 ...	8,247,882	5,826,795 ...	6,910,285
Machines	5,931,468 ...	5,931,468	3,475,760 ...	3,475,760
Cotton	5.499,835 ...	5,065,638	1,399,282 ...	1,288,812
Carbonate of native baryte	4,650,176 ...	279,011	4,650,176 ...	279,011
Silk-worms' eggs	4,180,480 ...	1 633,000	3.869,184 ...	1,511,400
Skins	4,045,407 ...	6,192,383	2,737,298 ...	4,219,405
Cashmere shawls	3,882,400 ...	6,173,000	2,981,800 ...	4,764.100
Goats' hair	3,773,510 ...	6,414,967	3,773,250 ...	6,414.525
Rice	3,728,992 ...	2,380,620	3,517.843 ...	2,198,652
Indigo	2,701,810 ...	2,777,858	11,600 ...	8,745
Flax &hemp tissues,&c	3,560,745 ...	2,848,850	1,212,119 ...	1,040,574
Silk tissues & ribbons	3,371,169 ...	4,070,962	469,674 ...	485,749

The other articles specified, forty in number, are all below the last figure of official value.

The principal exports from France to the United Kingdom (Malta, the Ionian Islands, and Gibraltar included), were as follows: the first two columns, "general commerce," representing foreign and French articles united; the last two, "special commerce," French productions exclusively:—

	General Commerce.		Special Commerce	
	Official Value.	Actual Value.	Official Value.	Actual Value.
	f	f	f	f
Silk tissues, &c	180,729,626 ...	241,113,016	123,564,841 ...	163,290,406
Grain	74,181,629 ...	60,814,817	68,852,309 ...	55,867.833
Woollen tissues, &c	49,090,341 ...	45,183,046	44,517.883 ...	39,178,321
Wheat flour	29,880,620 ...	45,119,736	28,921,360 ...	43,671,254
Cotton tissues, &c	28,477,192 ...	14,366,290	13,060,560 ...	5,742,145
Silk	23,513,217 ...	28,981,686	7,465,827 ...	9,057,406
Prepared skins and articles in skin and leather	21,892,102 ...	46,457,916	20,525,580 ...	42,615,646

Silversmith's work and jewellery	16,735,306 ...	22,895,003	3,610,253 ...	4,858,046
Clocks and watches and their works	14,564,462 ...	14,376,537	917,466 ...	1,023,196
Brandy, spirits, and liqueurs	13,447,810 ...	50,739,195	13,405,340 ...	50,669,642
Wines	12,053,596 ...	19,783,370	11,973,209 ...	19,628,520
Eggs	8,860,770 ...	12,737,357	8,856,797 ...	12,731.64

	General Commerce. Official Value.		General Commerce. Actual Value.		Special Commerce. Official Value.		Special Commerce. Actual Value.
	f		f		f		f
Flax and hemp tissues	8,273,696	...	4,551,132	.....	6,979,745	...	3,831,917
Grain for sowing	7,663,517	...	8,174,418	.....	7,816,753	...	8,124,537
Oils	7,243,670	...	7,566,704	.....	2,099,544	...	1,290,745
Sugar (beetroot)	7,057,556	...	5,834,246	.....	7,057,556	...	5,834,246
Clothing and articles in linen	6,787,727	...	7,871,370	.....	5,786,397	...	6,833,173
Pottery, glass, and crystal	5,424,484	...	4,424,452	.....	6,387,401	...	4,398,377
Salt butter	5,466,019	...	10,527,148	.....	5,459,068	...	10,513,760

All the other articles specified, which are also forty in number, are below 5,000,000f in official value. It may be stated that "official value" means a series of fixed estimations of merchandise which were made so far back as 1827; the phrase "actual value," explains itself. The wide difference which in certain cases exists between the two values will be noticed.

I must reserve for another letter details respecting the commerce of France with other countries than England.

Annexed is an account of the markets:—

FLOUR.—At *Paris*, during the week, business was inactive: yesterday, quotations were 60f to 62f the sack of 159 kilogs. Four marks were 58f 75c and 59f for the current month, and 58f 50c to 58f 75c for January.

WHEAT at *Paris*, yesterday, was 33f to 35f 50c and 36f the sack of 120 kilogs. The greater part of the provincial markets have declined during the week.

COTTON.—Business at *Havre*, in the early part of the week ending Friday, was not very animated, but it became so in the latter part. The total sales were 9,272 bales, and the arrivals 3,144. The closing quotations were 1f higher for low New Orleans and Mobile, and those of other sorts were unchanged. Low New Orleans was 91f the 50 kilogs, and very ordinary ditto, 98f. This week, business has not been active: yesterday, low New Orleans was 90f.

COFFEE.—At *Havre*, in the week ending Friday, business was important: 1,700 sacks Hayti Port-au-Prince disposable went at 79f 50c the 50 kilogs in bond; 1,200 ditto for delivery, 78f; 40 sacks Cape disposable, 81f; 25 sacks Gonaives, 84f; 4,700 sacks Rio, not washed, for delivery, 74f 25c to 77f 50c; 200 sacks Santos, for delivery, 78f; 64 sacks Ceylon, 108f duty paid; 100 sacks Singapore, 110f; and some lots of Mocha, 132f 50c. In addition, some Macassar was sold by auction, at 99f to 104f duty paid. The arrivals were about 300 sacks and 158 casks. This week, sales have been rather numerous: Rio, 75f to 76f; Hayti, 80f to 81f; Rio, washed, 83f; Macassar, 110f 50c to 110f 75c; Santos, 76f. At *Bordeaux*, last week, business was not very active: 2,500 sacks Rio, expected, went at 74f the 50 kilogs in bond; 250 sacks Mysore, 112f 50c. The arrivals were 3,451 sacks Guayra. This week, Rio has been 79f; Singapore, 106f. At *Nantes*, neither last week nor this has anything been done. At *Marseilles*, last week, business was extraordinarily active, upwards of 6,000 sacks having been taken, at 70f to 74f; 140 Rio, washed, 82f; 2,500 sacks Hayti at 84f; and a lot of Mocha, at 110f to 116f.

SUGAR.—At *Havre*, in the week ending Friday, business was not important in French West India: 26 casks went at 50f the 50 kilogs duty paid, 465 at 49f 50c, a small lot at 50f 50c, and another at 53f. In Reunion, however, there was a large transaction, 450 tons for delivery having been taken at 53f the 50 kilogs duty paid. The arrivals were about 380 casks and 564 sacks. This week, French West India has been done at 49f 50c and 49f; Trinidad, 50f. At *Bordeaux*, last week, 95 casks French West India went at 49f 50c; 3,365 bales Reunion for delivery, at prices not stated. This week, French West India has been at 48f 50c and 48f 75c. At *Nantes*, last week, a small lot of French West India was taken at 49f; 350 sacks Mayotte same price; 250 sacks Reunion, 57f. The arrivals were nearly 400 casks French West India and upwards of 800 sacks Java. Nothing done this week. At *Marseilles*, last week, as many as 26,000 bales Reunion for delivery were taken at 53f and 54f. Nothing was done in French West India.

INDIGO.—About 60 cases Bengal were sold at *Havre*, in the week ending Friday, at established prices. The arrivals were only 6 cases from England. No sales have been made this week. At *Bordeaux*, last week, about 40 cases Bengal and 30 Kurpah were sold. The quotation of Bengal was 12f 50c to 25f 50c the kilog duty paid; of Kurpah, 10f to 12f. This week, some Kurpah has been sold; prices not stated.

HIDES.—Business was active at *Havre* in the week ending Friday. 23,200 La Plata, dry, went at 110f to 125f the 50 kilogs duty paid; 500 Monte Video, salted saladeros, 79f 50c; 1,189 Rio Grande, dry, 60f; 4,475 horse La Plata, salted, 98f to 98f 50c the 100 kilogs. In addition, 7,493 were offered by auction, almost all sound, and about 7,000 of them were taken: Buenos Ayres, dry, at 122f 50c to 124f 50c; Monte Video, dry, 115f to 123f 50c; Mexican, dry, 90f; ditto, damaged, 68f to 71f 50c; Maracaibo, dry salted, 80f to 84f; New York, salted, 51f 50c to 64f. The arrivals exceeded 2,000. This week, New York have been at 51f to 54f; Buenos Ayres cow, 75f; ditto, dry, 117f 50c.

WOOL.—At *Havre*, the only transaction in the week ending Friday was the sale of 29 bales Buenos Ayres unwashed, at 2f 5c to 2f 32½c the kilog. The arrivals were about 160 bales. This week, Chili unwashed has been at 2f 80c the kilog; Russia, 2f 30c to 2f 40c; Monte Video unwashed, 1f 90c to 2f 75c.

TALLOW.—At *Havre*, in the week ending Friday, there were neither sales nor arrivals. The stock on the 1st December was 300 casks Russian and 50 New York. No sales have been made this week. At *Paris*, yesterday, the 100 kilogs were 144f 20c.

SPIRITS.—At *Paris*, yesterday, 3-6 of 90 deg., first quality, was 92f; Montpelier, of 86 deg., 140f. At *Bordeaux*, the day before yesterday, 3-6 Languedoc was 132f 50c; beetroot, first quality, 106f.

Correspondence.

THE GRAND TRUNK RAILWAY.

TO THE EDITOR OF THE ECONOMIST.

SIR,—Your extremely able articles on the Grand Trunk Railway have obtained that attention in Canada to which they were so fully entitled. It may be useful to add, to the special argument you have so powerfully developed, considerations of a more general character, which have a direct bearing on this great question.

Most persons are apt to think of railways as nothing more than speculative investments of the capital of shareholders, and convenient instruments for the accommodation of ordinary travellers. This is a most narrow and inadequate view of the subject. Railways perform other services to the country of immeasurably greater value than these. If witnesses are wanted to proclaim their good deeds, let the astonishing prosperity of England during the last fifteen years testify to what they have done. Every kind of explanation has been pressed into the service to account for the marvellous fact—free trade, increased supplies of gold, the long peace, improved political liberty; but to railways, far away beyond all the other concurrent causes put together, is the debt of English gratitude due. The proof of this assertion is not difficult. Several years ago Robert Stevenson calculated that in the space of twenty years from their commencement, the railways of Great Britain had paid off the National Debt; that is, that over and above the ordinary returns for the capital invested, the railways had created a clear profit, a perpetual income, equalling the annual charge of 28 millions for interest on the National Debt. Let any one place himself in the position of a man who had been told thirty years ago that in twenty years the National Debt would be paid off. In those days it seemed an incubus which sooner or later would bring English greatness to the ground: now we have the happy experience of the same benefit as if England had received a gift of 510 millions, and paid them away to the national creditors. Can it be a matter of wonder after this, if England displays a wealth, a power, a multiplicity of resources and enjoyments which excite the envy and the astonishment of the world? And it must be remembered that these enormous results are not reaped once for all, and then done with. If a national debt has been paid off in twenty years—if an abiding profit of twenty-eight millions a year has been secured,—another income of at least equal amount will be realised in a similar interval. It is not too much to say that in fifty years from their origin, the British railways will have provided England with a clear annual profit of sixty millions.

France equally illustrates the same phenomenon. No thinking man can fail to have been struck with the vast amount of strength and resources which France, in spite of revolutions, civil tumults, political uncertainty, and a gigantic military expenditure, has displayed. The development of her railway system, I cannot doubt, is the prolific root from which all this prosperity has grown up. The comparative tardiness of the railway movement in Germany, Austria, and Russia, furnishes an obvious explanation of the comparative slowness with which their national progress has advanced.

Some 400 millions have been expended on the construction of our railways. Folly, ignorance, and corruption have all helped to swell needlessly this vast amount; yet the conclusion is irresistible from the preceding statement:—If the whole cost of railways had been absolutely absorbed, and not one shilling of dividend were ever to be paid to their shareholders, the railways would still have realised a clear surplus profit of the difference between 800 and 400 millions—that is, of 400 millions, and would remain still immeasurably the most profitable investment of English capital ever made.

It is easy to see how this prodigious result has been achieved. Railways open new markets to agricultural and manufacturing produce, and thereby render the cultivation of English land profitable where it was not remunerating before, or more profitable where it was already under tillage. This has produced the same effect as if new counties had been added to England, or the fertility of the whole of her soil had been raised. Cheap manures are now brought to the farmer's door; the farms of Devon and Surrey command Northern consumers; the fruits and hops of Kent find ready buyers at Liverpool and Manchester. The saving effected in avoiding the loss of meat, by wear and tear, in driving cattle and sheep to distant markets, is something enormous. It is a saving of what was pure waste—of a loss that evaporated into the air. Railways multiply man, his intelligence and his activity: they give greater scope to division of labour; each county ceases to do everything for itself, and commodities of every kind are produced at the minimum of cost, where local facilities enable them to be made most cheaply. The cheapness of carriage annihilates distance. Shopkeepers can now dispense with keeping up large stores of idle goods; their capital is saved, for they can quickly and cheaply replenish their supplies as rapidly as they are taken off by customers. The circulation of intelligence and skill is not less efficient, though their material effects are less obvious to the vulgar eye. Land acquires increased value. Factories arise to meet the improved demand of agricultural and general consumers; more is produced of every kind, and universal prosperity is diffused.

This is what railways do for England; and this, and even more, is what they are doing and will do for Canada. The poorer and more helpless a country is, the greater is the relative benefit which it receives from improved communication. But for railways, vast districts of Canada must have remained for years, perhaps for ages, undeveloped. The power of railways to attract population to a new and fertile country it is almost impossible to describe. Land can be purchased, cultivation commenced, and an industrious population settle down, in regions which are supplied by means of cheap and rapid communications with great markets and a ready sale, but which, without these indispensable conditions, might remain uninhabited and undeveloped for an indefinite length of time. And such communications are precisely those benefits which are very costly and burdensome to make for a thinly scattered people, and are the very greatest boon they can receive from foreign and friendly capitalists.

These are not speculations, but facts. Whatever may be the issue to the share and bondholders of the Grand Trunk Railway, the immense benefit acquired to the Province by their money is undeniable. The capital has been laid out in Canada. So long as the railway is at work, the profit, the vast profit, reaped by Canada will be uninjured. The shareholders may be ruined; but their money will not be lost to the Canadians. They will reap the full value, nay double, probably tenfold the value of every pound laid out in the construction of the Grand Trunk. As has been proved in the case of England, if Canada had paid the whole cost of the railway out of her own resources, and never received back a shilling of dividend, she would still have made the most lucrative investment that could have been devised.

I do not enter into the peculiar circumstances of the case. I take my ground simply on this fact,—that if the shareholders lose all their money, Canada will have gained it all, and will remain indebted to the commercial outlay,—an improvident outlay to them, if it be so, but still an outlay entirely appropriated by Canada,—and the ruin of others, for the greatest of all the material blessings of civilisation.

A True Liberal.

COMMERCIAL AND MISCELLANEOUS NEWS.

A return of the liabilities of the Imperial Government of Great Britain for guarantees on foreign and colonial loans and telegraphic and other undertakings, moved for by Mr Hubbard, has just been published. The manner in which it has been prepared is not complete or explicit, but the following table, with the help of information from other sources, has been compiled from it. Although it is termed a return of "unexpired" guarantees, it contains one item, the Canada Loan, of 1,500,000*l*, which appears to have been extinguished. Under the head of Submarine Telegraph guarantees, the document, instead of giving a concise detail of the leading conditions, simply refers the inquirer to other Parliamentary papers.

GUARANTEED LOANS.

1. To Foreign Governments.

Loan.	Original Amount.	Amount Outstanding.	Amount paid by Great Britain under its guarantee liability.
	£	£	£
Russian Dutch 5 per Cent., of 1816, with sinking fund of 1 per cent.*	2,033,333	1,145,833	Nil.
Greek 5 per Cent. of 1833, with sinking fund of one per cent., proportion guaranteed by England (Russia and France being liable for similar amounts)	793,500	396,000	780,705

The market is without important change. The difficulty in negotiating foreign exchange, owing to the great stringency in the money market, has become still greater, and has tended to almost wholly prohibit sales for export. Transactions since Friday are, therefore, confined to 4,000 bales, nearly all for domestic consumption, but including a lot of 750 bales in transit, the seller consenting to receive a bill of sterling in payment. The sales have been at very irregular prices, which afford no criterion of the market. We modify our quotations somewhat, but remark that they may be considered nominal. We quote:—

New York Classification.

	Upland.	Florida.	Mobile.	New Orleans and Texas.
	c	c	c	c
Ordinary	7⅛	7⅛	7⅛	8
Good ordinary	8⅛	8⅛	9	9⅛
Middling	11⅛	11⅛	11⅛	11⅛
Good middling	12	12⅛	12⅛	13
Middling fair	12⅛	12⅛	13	14

The arrivals have been from Texas, 1,588 bales; New Orleans, 1,268; Mobile, 725; Florida, 1,784; Georgia, 5,161; South Carolina, 3,331; North Carolina, 981; Virginia, 1,525; Baltimore, 151; Philadelphia, 79—total, 16,593 bales. Total import since 1st inst., 50,299 bales. Total import since 1st September, 120,863 bales. Export from 1st to 20th November, 20,105 bales, against 8,937 in 1859.

New York, Nov. 23.—Cotton steadier, and in better demand. Sales, 3,000 bales; middling uplands, 10¾.

LIVERPOOL MARKET.—December 7.

There has been no more than a moderate demand for cotton this week. The trade have bought less than their average consumption, and other buyers have not acted with confidence. At the same time we have had large arrivals of new American cotton, which, though not yet landed, give the consumer hopes of an early better selection. Holders have also showed more disposition to to close old parcels, and have in many cases submitted to a decline. We have reduced our quotations for middling 1-16d per lb, and those for the lower qualities rather more. Egyptian are less saleable, and have been bought on easier terms. Brazil do not vary in value, being in few hands. East India are rather easier. The sales to-day are 8,000 bales; the market heavy and drooping. The reported export amounts to 2,690 bales, consisting of 1,550 American, 190 Brazil, and 950 East India.

BANK RETURNS AND MONEY MARKET.

BANK OF ENGLAND.

(From the GAZETTE.)

AN ACCOUNT, pursuant to the Act 7th and 8th Victoria, cap. 32, for the week ending on Wednesday, the 5th day of December, 1860.

ISSUE DEPARTMENT.

	£		£
Notes issued	27,405,175	Government Debt	11,015,100
		Other Securities	3,469,900
		Gold Coin and Bullion	12,419,043
		Silver Bullion	511,132
	27,405,175		27,405,175

BANKING DEPARTMENT.

	£		£
Proprietors' Capital	14,553,000	Government Securities (including Dead Weight Annuity)	9,490,273
Rest	3,168,834	Other Securities	20,104,335
Public Deposits, including Exchequer, Savings Banks, Commissioners of National Debt, and Dividend Accounts	6,617,485	Notes	7,198,086
		Gold and Silver Coin	735,491
Other Deposits	12,472,348		
Seven Day and other Bills	716,518		
	37,528,185		37,528,185

Dated the 6th December, 1860. M. MARSHALL, Chief Cashier.

THE OLD FORM.

The above Bank accounts would, if made out in the old form, present the following result:—

Liabilities.	£	Assets.	£
Circulation (including Bank post bills)	20,923,607	Securities	29,516,608
Public Deposits	6,617,485	Coin and Bullion	13,665,666
Private Deposits	12,472,348		
	40,013,440		43,182,274

The balance of Assets above Liabilities being 3,168,834*l*, as stated in the above account under the head REST.

FRIDAY NIGHT.

The preceding accounts, compared with those of last week, exhibit—

An INCREASE of Circulation of	£307,540
An INCREASE of Public Deposits of	101,873
A DECREASE of Other Deposits of	893,902
No change in the amount of Government Securities.	
A DECREASE of Other Securities of	287,917
A DECREASE of Bullion of	194,710
An INCREASE of Rest of	1,862
A DECREASE of Reserve of	501,584

The present Bank return is rather unfavourable than otherwise. The decrease in the reserve amounts to 501,584*l*, whereas the increase in the circulation amounts to 307,540*l*, and the decrease in the bullion to 194,710*l*. There is also a decrease in the "other" deposits of 893,902*l*. The most favourable feature is the decrease in the "other" securities of 287,917*l*.

Subjoined is our usual weekly table, affording a comparative view of the Bank returns, the Bank rate of discount, the price of Consols, the price of wheat, and the leading exchanges, during a period of four years, corresponding with the present date, as well as ten years back, viz., in 1850:—

At corresponding dates with the present week	1850.	1857.	1858.	1859.	1860.
Circulation, including bank post bills	£ 19,960,708	£ 20,953,992	£ 20,833,078	£ 21,942,827	£ 20,923,607
Public deposits	9,775,399	6,648,062	8,855,814	8,608,215	6,617,485
Other deposits	9,511,556	14,440,724	12,371,668	13,444,361	12,472,348
Government securities	14,228,901	5,434 022	10,808,591	10,925,157	9,490,273
Other securities	12,722 488	30,111,185	15,595,731	19 350,811	20,104,335
Reserve of notes & coin	11,235,488	4,401,719	13,357,261	10,261,410	7,933,577
Coin and bullion	15,942,198	8,069,489	18,921,171	16,936,815	13,665,666
Bank rate of discount	2½ p. c.	10 p. c.	2½ p. c.	2½ p. c.	5 p. c.
Price of Consols	97 xd	91¼ xd	96⅞ xd	95⅝ xd	94
Average price of wheat	40s 2d	48s 3d	41s 5d	44s 8d	54s 10d
Exchange on Paris (shrt)	24 95 97½	25 40 50	25 7½ 15	25 7½ 15	25 17½ 25
— Amsterdam ditto	11 14½ 14¾	11 18 12	11 15 16	11 13 13½	11 14¼ 15
— Hamburg (3months)	13 6	13 13 14	13 7 7½	13 5 5½	13 6½ 7

In 1850, the Belgian Government came to the conclusion of making silver only the legal tender. 2,500,000 dollars had arrived at New York and New Orleans from California, notwithstanding warnings were plentiful in America as to the small earnings the miners were obtaining in California. Consols and railway shares were rising, notwithstanding the exchanges were becoming adverse to this country.

In 1857, numerous and heavy failures were occurring from day to day, yet confidence was reviving, and the position of the Bank exhibited a great accession of strength, the reserve having increased 1,670,000*l* and the bullion 713,000*l* within a week. Of the total reserve of 4,401,000*l*, however, two millions represented the notes issued under the Government letter.

In 1858, the Bank of England adopted the long deferred and then very unexpected step of lowering the rate of discount from 3 to 2½ per cent. The new Chilian Loan commanded ¼ premium, the Old Turkish 6 per Cents. were at 93, and the last loan about par.

In 1859, a portion of the Turkish Loan, amounting to 620,000*l*, forming the balance of the new 6 per Cent. Loan of 5,000,000*l*, which had not been subscribed for, was offered at 62½ per cent., the current quotation of similar bonds in the market being about 65. It was eagerly subscribed for, and Turkish Bonds rose to 66 to ½, and those of 1854 to 77½ to 78. French and English funds were both rising in anticipation that the projected Congress would confirm the peace of Europe. There was also an active demand for Indian securities.

The amount of the "other" deposits, as compared with the "other" securities, showed, in 1850, a deficiency of 3,210,932*l*; in 1857, a deficiency of 15,670,461*l*; in 1858, a deficiency of 3,134,063*l*; and in 1859, a deficiency of 5,906,450*l*. In 1860, the deficiency is 7,631,987*l*.

DISCOUNT AND MONEY MARKET.—We last week expressed a hope that for some time at least we should see steadiness in the discount market. Money is very abundant, but at the same time there is an active demand for it. The rate charged in Lombard street is from 4¾ to 5 per cent., and a very active business has been carried on. Private letters from Paris state that the position of the Bank of France is improving. On the other hand, the great fall in the exchange at New York has since our last caused shipments of gold to the extent of between 600,000*l* and 700,000*l*, inclusive of that to be sent by the Persia to-morrow, and it remains to be seen whether this amount will be sufficient to raise the exchange to a price that it will not pay to send gold from this country. The par of exchange between England and America is 109½, or dols 4-86-65 to the £ sterling. The last quotation is 103 to 5 for first-class paper, and 100 to 102 for second-class bills, which leaves a large margin of profit to the shippers of bullion. If the banks in America suspend specie payments, of course the gold sent out will be returned without delay, but this will depend entirely on the balance of trade between this country and the United States, which, from the large shipments of corn and cotton, is assumed to be considerably against this country.

Another circumstance must be borne in mind, and that is, that the price of American securities in this country is higher than in America, and this may cause sales here which will tend to keep the exchange against England.

We subjoin a letter received this morning by Messrs Robert Benson and Co. from their correspondent in New York, who generally takes a very correct view of the state of the money market in America. The consolidation of the banking capital he alludes to refers to the New York banks having agreed to act in common.

(Copy per Bremen.)

Office of the Illinois Central Railway Company,
New York, Nov. 23, 1860.

Messrs Robert Benson and Co., London.

GENTLEMEN,—We have nothing of special importance from Illinois since my respects of the 20th. We hope to report at the end of the month 100,000 dols of collections, and 200,000 dols of sales in the land department.

The Conservative men at the South appear to be moving at last to stem the current of the disunionists, and it is generally believed that they with the Northern States will concur in some plan of adjustment after the convening of Congress. During the excitement of the week of panic, every one was perplexed to explain how so much difficulty could arise in the moment of such apparent prosperity of large exports and small imports. It seems that the balance of trade has for a few months turned more decidedly in favour of this country than heretofore. The importers have used their means and credit for a month or two past to prepay their debts in England by purchases of bills at a discount, and as the exports have increased in volume, bankers and others have bought largely of bills, at the same time that the exporters of grain and produce were under heavy engagements for immediate shipment. There was little demand for bills—hence the large discount at the quotation of 98, or eleven per cent. Even now, with the accommodation granted under the consolidation of the banking capital of New York, the best class of bills are at six per cent. discount; and those less known with bills of lading attached may be had at 100, or nine per cent. loss. This does not arise from the scarcity of money to-day, but from the fact being better understood that the balances are in favour of this country.

There have been no failures, although mercantile paper was for a week almost unsaleable in consequence of the demand loans called in from note and stockbrokers, said to amount to fifteen millions.

The action of our New York Banks has relieved the community, and we have a better feeling in all departments of trade.

At the South there is a very serious trouble—suspension of banks, decline in cotton, and elements enough for uneasiness for several months.

It seems improbable that the balance of trade can turn in favour of England at an early period; and we apprehend serious alarm on your side if your purchases of produce are made with gold.—Yours respectfully, (Signed) THOMAS E. WALKER,
Chairman Executive Committee.

We insert the following agreement on the part of the New York Banks for an extension of loans and discounts to meet the present monetary crisis:—

At a meeting of the officers of the banks of the city of New York, at the Merchants' Bank, on Wednesday, the 21st of November, 1860, the following proceedings were unanimously adopted, viz.:—In order to enable the banks of the city of New York to expand their loans and discounts, and also for the purpose of facilitating the settlement of the exchanges between the banks, it is proposed that any bank in the Clearing House Association may, at its option, deposit with a Committee of five persons—to be appointed for that purpose—an amount of its bills receivable, United States' stocks, treasury notes or stocks of the State of New York, to be approved by said Committee, who shall be authorised to issue thereupon to said depositing bank certificates of deposit, bearing interest at 7 per cent. per annum, in denominations of 5,000 dols and 10,000 dols each, as may be desired, to an amount equal to 75 per cent. of such deposit. These certificates may be used in settlement of balances at the Clearing House, for a period of thirty days from the date hereof, and they shall be received by creditor banks during that period, daily, in the same proportion as they bear to the aggregate amount of the debtor balances paid at the Clearing House. The interest which may accrue upon these certificates shall, at the expiration of the 30 days, be apportioned among the banks which shall have held them during that time. The securities deposited with said Committee, as above named, shall be held by them in trust as a special deposit, pledged for the redemption of the certificates issued thereupon. The Committee shall be authorised to exchange any portion of said securities for an equal amount of others, to be approved by them at the request of the depositing bank, and shall have power to demand additional security, either by an exchange or an increased amount, at their discretion. The amount of certificates which this Committee may issue as above shall not exceed 5,000,000 dols. This agreement shall be binding upon the Clearing House Association when assented to by three-fourths of its members. Resolved, that in order to accomplish the purpose set forth in this agreement, the specie belonging to the Associated Banks shall be considered and treated as a common fund for mutual aid and protection, and the Committee shall have power to equalise the same by assessment or otherwise. For this purpose statements shall be made to the Committee of the condition of each bank on the morning of every day before commencement of business, which shall be sent with the exchanges to the manager of the Clearing House, specifying the following terms—viz., 1. Loans and discounts. 2. Deposits. 3. Loan certificates. 4. Specie. Resolved,—That after the 1st of February next every bank in the Clearance House Association shall have on hand at all times, in specie, an amount equal to one-fourth of its net liabilities, and any bank whose specie shall fall below that proportion shall not make loans or discounts until their position is re-established; and we, as members of the Clearing House Association, agree that we will not continue to exchange with any bank which shall show by its two successive weekly statements that it has violated this agreement. The Chairman appointed the following named gentlemen as the Committee:—Moses Taylor, of the City Bank; James Punnett, of the Bank of America; R. W. Howes, of the Park Bank; A. S. Fraser, of the Seventh Ward Bank; Charles P. Leverich, of the Bank of New York.—Adjourned, JOHN A. STEVENS, Chairman.
W. T. Hooker, Secretary.

It is evident, therefore, that if bullion is required from this side to settle *a balance of trade against this country*, the present rate of money will be maintained here for some time. There has been a very active demand for discount to-day both in Lombard street and at the Bank of England, and the rate at which bills have been for the most part negotiated is 5 per cent. The cases where they have been done under that rate are exceptional, or for bills of very short date.

There has also been a considerable demand for money at the Stock Exchange to-day, at from 3½ to 4 per cent., owing to the shutting of the Consols for the dividend. The Bank of England have now commenced the usual quarterly advances on Government securities, and on mercantile bills not having more than six months to run, at 5 per cent. These advances are repayable on the 9th of January, when the dividends will be paid.

The following are the rates of discount at

	Bank Rate. Per cent.		Open Market. Per cent.
Paris	4½		4
Hamburg	...		2½
Vienna	5½		5½
Brussels	3		3
St Petersburg	6½	for 3 months' paper	
Ditto	7	for 6 months' paper	

ENGLISH FUNDS.—There has been a decided improvement in the English funds this week, notwithstanding the adverse accounts from America, but this has been principally occasioned by large purchases of Consols by the Court of Chancery. The amount purchased has been about 550,000*l*, and fully accounts for the rise in Consols; the public have also been making investments prior to the shutting for the dividend.

The settlement of the Consol account has gone off in a satisfactory manner; the rate of continuation till the January account has been 5-16 to ⅜, but this includes the payment of the income tax. Money has, however, been in demand on stock at from 3 to 3½ per cent., and to-day is wanted at the latter rate. We must again draw attention to the great disparity which exists between the price of Consols and New 3 per Cents. and Reduced. Consols are 94 for money, whereas New 3 per Cents. and Reduced are at 92½ ⅜, consequently any one selling Consols for money, and buying New 3 per Cents. or Reduced, would receive their dividend *at once*, pay commission, save 10d in the pound income tax, and receive their dividends in April instead of July. Exchequer Bills are 6s to 3s discount. The closing price of Consols, 94 for money, and 94½ ⅜ for the January account.

FOREIGN FUNDS.—The market for foreign funds has evinced great steadiness. There have been some speculative purchases of New Turkish Bonds in connection with the new loan stated to have been contracted by M. Mirès and Co.

Subjoined is our usual list of the highest and lowest prices of Consols every day, and the closing prices of the principal English and foreign stocks last Friday and this day:—

RAILWAYS.—The railway market has been very buoyant, especially Midland, North-Eastern York stock, and Leeds, Lancashire and Yorkshire shares: the public seem to steadily invest in these securities. There has also been an improvement in Brazilian railways, in consequence of a law having passed at Rio authorising the Government to issue 4½ per Cent. Foreign Stock and 6 per Cent. Domestic Stock, at par, in exchange for existing railway shares.

Subjoined is our usual list of the closing prices of the principal railway shares last Friday and this day:—

BULLION.—We subjoin Messrs Pixley, Abell, and Langley's circular, which gives an account of the bullion transactions of the week, and also those in India Government loan notes :—

Gold.—In our last circular, dated 29th November, we mentioned the probability of further amounts of gold being sent to New York. Our anticipations have been realised, as during the past week the Europa has taken 108,500*l*, the Borussia 3,500*l*, the Atlantic 149,450*l*, and the Etna 70,000*l*; the Persia, to leave Liverpool on the 8th instant, will also take a considerable amount. The accounts from America are now looked for with anxiety. The Suffolk has arrived from Melbourne, after a very quick run of 68 days, bringing 293,500*l*; nearly the whole of this amount will be sent away. The Tamar brings 2,000*l* from the West Indies, and the Tyne 3,841*l* from the Brazils. The Oneida has taken 3,172*l* to the West Indies, and the Ceylon 20,210*l* to the East.

Silver.—The Tamar has brought 128,000*l* from the West Indies; the bar silver by her has been sold at 61¼d per ounce standard, at which price there is a fair demand. The Ceylon, for India and China, took out 75,430*l* on the 4th instant.

Mexican Dollars.—There is but little doing in dollars. We quote the price as 62¼d per ounce with a quiet market. The Tamar, contrary to expectation, brought but very few.

Exchange on India for Banks' drafts on Bombay and Calcutta at 60 days' sight is rather firmer, and rates close this day 2s to 2s 0¼d, in place of 1s 11¾d to 2s 0¼d, as at date of our last; bills with documents 1s 11¾d to 1s 11⅞d.

India Government Loan Notes.—The market for these securities is very quiet, and we quote prices 101½ to 102 for 5½ per Cents., and 95½ to 96 for 5 per Cents. The news reported from Bombay this day, of combinations in opposition to the income tax (more, we understand, owing to the complicated nature of the returns, than any opposition to the tax itself), has not produced any material change in the London quotations.

Quotations for Bullion.—Gold—Bar gold, 77s 9d per oz std; bar gold, refinable, 78s per oz std; Spanish doubloons, 77s 6d per oz last price. Silver—Bar silver, 5s 1¼d per oz std, firm; bar silver, containing 5 grs gold, 5s 1½d per oz std; fine cake silver, 5s 5⅞d per oz; Mexican dollars, 5s 2⅛d to 5s 2¼d per oz; Spanish dollars (Carolus), 5s 2d per oz, last price.

FAILURES.—The suspension of Messrs Moxon and Co., contractors for the Metropolitan drainage sewer, has taken place: their liabilities are stated to amount to between 100,000*l* and 200,000*l*. Their accounts are stated to show a surplus.

The firm of Messrs M'Lenan, of the West end, has been gazetted.

It has also transpired that Messrs Thomas Piper and Son, of Bishopsgate, have suspended: their liabilities amount to 50,000*l*.

The Manchester letters mention the suspension of Mr Harry Hiller, an export merchant, principally in the Levant trade. The total liabilities are reported at 200,000*l*, of which about 50,000*l* are for debts on open accounts.

In the Bankruptcy Court there were some further proceedings of a remarkable character in the case of the Mitre Assurance Association. There was a great deal of fencing on the part of one witness (Mr F. P. F. Strousberg) in connection with the attempt on the part of the assignees to discover the whereabouts of Mr Brydges, the secretary, and of Mr Latham, whose post is described as that of a "kind of office director, or in-door superintendent." Mr Strousberg admits that shares were repeatedly transferred to the office porter. The proceedings were adjourned. The examination of Mr Edwards, the Company's solicitor, with respect to the books, is appointed for the 13th inst.

An adjournment for two months was ordered in the case of Messrs Francis and Hooper, leather factors, of Bermondsey, no accounts having been filed.

In the Bankruptcy Court the examination in the case of Messrs Streatfeild, Laurence, and Mortimore has been proceeded with and adjourned. We suspend remarks until the case is completed.

MISCELLANEOUS.—According to a return made by the House of Commons, the total amount owing to the depositors in Savings Banks in England and Wales on the 20th November, 1859, amounts to 34,271,021*l* 7s 8d, and that the total amount invested with the Commissioners for the reduction of the National Debt on the 20th November, 1859, excluding the surplus fund, was 34,101,158*l* 17s 11d; that the balance in the hands of the Treasurer on the 20th November, 1859, was 280,488*l* 18s 1d, and the total amount of the separate surplus fund in the hands of the Commissioners amounted at the same date to 339,089*l* 13s 7d; that the average rate of interest paid to depositors amounted to 2*l* 19s per cent., that the number of accounts remaining open amounted to 1,289,220, and the expenses of management to 108,944*l* 5s 9d.

Private advices from Buenos Ayres by the present packet give a strong description of the satisfaction felt throughout the province at its definite incorporation with the Argentine Republic. Senor de la Riestra, the Finance Minister, has entered upon the task of reorganising the finances of the old confederated provinces, with, it is stated, the cordial support of all parties, and with the best results as regards internal credit. A few years of continued peace are looked upon as alone wanting to increase the trade of the country to an extraordinary extent. Among its most recent productions is wool, which 20 years ago was almost wholly unattended to, and which now promises to become one of its most important exports. The hide trade temporarily remains in a state of suspense, exporters waiting to learn the final effects of our leather failures; but there was a prospect of activity as soon as our markets should be reported in a settled condition. The gold discoveries announced about eighteen months back in the province of San Juan are stated to have proved remunerative, 1,500 persons being now engaged in the district. Very rich gold and silver veins are represented to have been found.

Although the *Bombay Times* received yesterday states that "the Baroda Railway works have been summarily suspended, and all the establishment dismissed," the Company have as yet had no advices of that kind. An idea was recently entertained of limiting or suspending the works at each terminus, so as to concentrate them at the centre of the route, and it is probable that this will be found to furnish the explanation of the statement.

A meeting of the Peninsular and Oriental Steam Company was held on Wednesday, Mr B. M. Willcox, M.P., in the chair, when the report recommending a distribution of 5 per cent. for the half-year, free of income tax, was adopted unanimously after a long discussion. The Company's fleet now numbers 52 steamers, including one building, of 70,743 tons and 17,111 horse power, and eight transport, store, and coal ships of 10,277 tons, making a total tonnage of 81,020 tons.

Later reports from Mexico, received at New York by way of Havana and New Orleans, allege that Miramon has resigned and been succeeded by General Robles. The Reactionists, it is added, had evacuated Puebla, and the greatest alarm prevailed at the capital. Mr Maclane, the American Minister, had given up his appointment.

It is stated that a proposal has been made to the French Government to subsidise a line of steamers between Galway and a French port. Should the application be acceded to, it is proposed, we believe, to add the vessels in the possession of the Anglo-Luso-Brazilian Steam Navigation Company, which is now being wound up, to the fleet already employed on the line between Galway and New York.

It has been announced by the Submarine Telegraph Company that they have made arrangements with the French Government for telegrams from India, China, and Australia to be despatched from Marseilles immediately on the arrival of the steamers at that port, instead of first passing through the Post Office. Consequently the delays that at present occur at Marseilles will be entirely obviated. The telegrams must be addressed to "Director, Telegraph-station, Marseilles," and the receiver's name and address are to be written as the first words of the message. Firms wishing to avail themselves of this arrangement must furnish the Company with the names of their agents in Marseilles, to whom the telegraph authorities can apply for payment of the telegrams.

We are authorised to state that a law has passed the Brazilian Legislature offering to the holders of Brazilian guaranteed railway shares the option of converting their shares into Six per Cent. Local Brazilian Stock, or Four-and-a-Half per Cent. Brazilian Sterling Bonds at par, on payment of the uncalled capital, and that a transfer from the Bahia register of 1,000 shares of the Bahia and Sao Fran-

cisco Railway Company has been made to the Imperial treasury, which the directors believe to be an operation under that law. It may be useful to point out that, whilst the Brazilian Sterling Four-and-a-Half per Cent. Bonds command here 87, the Brazilian Local Six per Cent. Stock is now quoted at par in Brazil. Prior to the granting of this option to the holders of the railway shares, its price ranged as high as 106.

The Great Kanawha Company has given notice that the list for applications for shares will be closed on Thursday the 13th December.

COMPARATIVE EXCHANGES.

The quotation of gold at Paris is about 1 per mille premium, and the short exchange on London is 25.17½ per 1*l* sterling. On comparing these rates with the English mint price of 3*l* 17s 10½d per ounce for standard gold, it appears that gold is about 1-10th per cent. dearer in Paris than in London.

By advices from Hamburg the price of gold is 424¾ per mark, and the short exchange on London is 13.4¾ per 1*l* sterling. Standard gold at the English Mint price is, therefore, not quite 1-10th per cent. dearer in Hamburg than in London.

The course of exchange at New York on London for bills at 60 days' sight is quoted at various rates, from par to 105 per cent.; but for good commercial bills may be considered to be about 103 per cent., which exchange is against this country, and admits of the exportation of gold to the United States.

Imports of the week ..... 374,780 qrs.

COMMERCIAL EPITOME.

FRIDAY NIGHT.

There was a very poor show of English wheat at Mark-lane, to-day, both as to quantity and quality. The few fine dry samples on offer changed hands somewhat freely, at full quotations; but other kinds were dull, and almost nominal in price. Foreign wheat—the supply of which was large—commanded very little attention; nevertheless, importers, generally, were firm in their demands. All

descriptions of spring corn, especially fine barley and oats, commanded quite as much money as on Monday. Flour, however, was a dull sale. This week's imports from abroad are 26,480 quarters of wheat; 4,710 barley; 8,860 oats; 1,650 sacks and 26,510 barrels of flour. At Liverpool, this morning, both wheat and flour were somewhat higher in price, with an improved consumptive demand.

Messrs Briggs and Co., of Alexandria, report the state of the grain trade to the 27th ult. as follows:—We have but little change to report in our market. Wheat and Indian corn are very firm at our previous quotations and with very light arrivals. Beans have undergone a fresh advance equal to about 6d per qr free on board. Supplies of linseed are excessively small, and have consisted during the past week of only two small lots of unscreened, but the price may be quoted nominally for screened seed at about 44s 6d to 45s per qr free on board. The following are the sales since our last circular of the 17th inst., with present value free on board:—Wheat—Saide, private trade produce, 5,550 qrs, 39s to 40s; ditto, Pacha's ditto, 1,435 qrs, 40s 6d to 41s 8d; Beheireh, 1,956 qrs, 37s to 40s 6d: beans—Saide, 4,799 qrs, 29s 6d to 30s 6d; Beheireh, 130 qrs, 27s 6d to 28s 6d: barley, 1,404 qrs, 24s to 25s; Indian corn, 1,155 qrs, 29s 6d to 30s; lentils, 190 qrs, 30s 6d to 31s 6d per qr. Freights have undergone a decline during the past week, which may be estimated at about 9d per qr. We quote to-day, for beans, to the United Kingdom for orders, 6s 3d to 6s 6d for vessels of 2,400 to 2,000 qrs; other grain and seed in proportion; to a direct port for wheat or other grain, 5s 8d to 6s 2d; by steamer to Liverpool, 6s 6d; cotton to Liverpool, ½d. Exchange—Further receipts of specie being expected by this steamer, exchange is somewhat firmer; say at 95 piastres per £ at three months' date on London; France, 5f 30c per dollar of 20 tariff piastres.

There has been a fair demand throughout the week in the Liverpool cotton market, the total sales amounting to 49,000 bales, and include 43,000 bales to spinners, 3,000 on speculation, and 3,000 bales for export. Quotations are the same as on Friday last. To-day the market closes quiet, but steady; sales, 8,000 bales.

Cotton exports from Bombay from the 1st of January to the 10th of November:—

	1860. bales	1859. bales
To Europe	390,791	509,687½
To China, &c.	194,688½	127,189½
Total	585,479½	636,877

Showing a decrease of ..... 51,397½ bales.

We have again to report a heavy demand for all kinds of tea, and, in some instances, the quotations had a downward tendency.

An influential meeting of the Tea Trade has been held this week in reference to the long-established charge of "Lot-money" on teas purchased by the brokers. At the meeting, the following resolution was agreed to:—"That the meeting of the wholesale tea trade do stand adjourned till 1 o'clock on Friday, the 28th instant, at the London Tavern—meantime the subscribers pledge themselves to each other to purchase no tea whatever bearing the charge of 'Lot-money.'"

Although the supplies of raw sugar brought forward have been very moderate, dealers have purchased with extreme caution, and prices have given way 6d per cwt. Refined goods have sold at a similar reduction in price.

COMPARATIVE STATEMENT of the SHIPMENT of SUGAR from the Mauritius, from the beginning of each Crop to November 1.

Rice has continued to move off heavily; nevertheless, no change has taken place in the value of any kind. Saltpetre has met a dull inquiry, and common qualities of rum have gone a shade lower. Valencia raisins have fallen 2s to 3s per cwt. The state of the fruit market, last month, is thus referred to by Messrs Witherby and Son:—Currants—The quantity received at this port since 5th Nov., when our last report was issued, has been comparatively light, only 2,450 tons, by eleven vessels, making the total importation into London from 30th August to this date about 15,000 tons, against 14,000 tons and 11,000 tons to the same date in 1859 and 1858 respectively. Liverpool has received nearly 9,500 tons. The October home clearances we reported last month at 4,005 tons, scarcely expecting to see those of November keep up to nearly the same mark. They have, however, reached 3,610 tons, against 2,170 tons in November, 1859, and against 2,230 in 1858. Raisins—Thirteen cargoes of Valencias have arrived since 5th ult., making the total importations so far this season 127,676 boxes, and 82,034 half-boxes, or about 4,200 tons, against 6,700 tons to 7th Dec., 1859, and 6,600 tons to 5th Dec., 1858. There have been scarcely any arrivals of other descriptions of raisins."

The colonial wool sales have been brought to a close this evening. During the week, most of the parcels offered have found buyers, at the fluctuations already reported. The quantity taken for export at this series has been very moderate.

"A continued unsatisfactory market must be reported in silk," observes Mr W. Eaton, "owing perhaps in some branches to the indifferent assortment of present stocks. Best and finest Taysaams have been taken freely, but the medium and coarse sizes are unusually difficult of sale, the sewing and ribbon trades having been for some time prostrated. Chinese throwns have attracted more attention, but at easier rates, except for the best and finest descriptions, which have been firm. Canton silk has been less in favour than usual, the quality and getting up this season being by no means as it should be.

Messrs Grant, Hodgson, and Co., report the state of the tobacco trade as follows:—

A fair average extent of business was transacted last month in most descriptions, and sales so far as they can be estimated were 1,300 hhds; but it is not improbable that some sales may have been suppressed, as it is currently reported that upwards of 400 hhds were sold in the previous month on private terms, of which we were not able to give particulars in our last circular. The market has not presented any observable change in character, and importers have shown no desire to effect sales, unless at full quotations. A considerable portion of the business which has transpired consisted of good and fine Western leaf and strips of old import; of new, sales have been comparatively very limited. An improved demand was experienced for exportation, especially for middling and fine heavy descriptions, of which about 200 hhds were taken. Latest advices from the United States report quiet but firm markets. Business had been more or less affected by the state of monetary and political affairs. Imports—388 hhds. Deliveries—983 hhds, against 936 hhds in the corresponding month of last year. Stock—22,426 hhds, against 18,829 hhds in 1859; 13,254 hhds in 1858; 10,576 hhds in 1857; 11,033 hhds in 1856.

Messrs Powell and Co. thus allude to the leather trade during the past month as follows:—

The leather market has not presented any marked feature. The transactions have been considerable, and former prices, excepting for light and common medium weight butts, have generally been maintained. The sales of bankrupts' stocks have been in progress during the month, both privately and publicly. It is, however, satisfactory to know that nearly all these stocks in London have now been sold, and although the whole may not yet have gone into consumption, they have passed into hands where they will not materially interfere with the sales of the production of manufacturers in the usual channels. It is not often that the present month is one of active business, but the supplies of fresh leather at this season are also frequently small, and, as we believe there is a considerable diminution in the quantity of leather in process of tanning, we do not anticipate an accumulation of stock adequate to produce any influence on prices. In raw goods an average amount of business has been done, generally at a little decline in prices. The import has been moderate, with the exception of Australian hides and horse hides, so that stocks on the whole have not increased. London market hides have declined considerably, so as to afford a still stronger reason why tanners should abstain from buying South American hides at existing rates.

Messrs Churchill and Sim have issued the following statement, showing the comparative stocks of timber at the public docks on the 1st of December:—

	1860.		1859.		1858.
Foreign deals ..... pieces	1,283,000	...	1,607,000	...	1,492,000

East Indian teake	2,400	...	5,400	...	11,600

The oil market, generally, has continued very quiet, at barely last week's prices. Tallow has changed hands to a moderate extent. To-day, P. Y. C. on the spot has sold at 60s 6d; all the month, 60s 3d; January to March, 61s; April to June, 59s to 59s 6d; October to December, 57s 6d to 58s per cwt. Town tallow, 58s net cash.

"A conference of the Bank Directors," says the New York *Shipping List* of the 24th ult., "was held on Monday at the Bank of Commerce, at which some 45,000,000 dols of the 69,000,000 dols City Banking capital was represented. The result of it all was the appointment of a committee of three, consisting of Messrs Tileston, of the Phenix, Stevens, of the Commerce, and Taylor, of the City Bank, to purchase 2,500,000 dols sterling bills, for joint account of all the Banks represented, for the purpose of relieving the market for foreign exchange. This timely proceeding, it is expected, will be followed by salutary results, and the promotion of an improved feeling in business circles. Certain it is, without some such relief it would have been next to impossible to avert serious disasters in commercial circles—a fact which cuts short all argument as to the policy or expediency of the measure. We hear of some prime qualities of paper going as high as 2½ per cent. per month; while little or nothing can be done below 1 to 1½ per cent. The weekly statement of the City Banks disappointed public expectation, in so far as the loans showed a sharper and heavier contraction, with a much larger abatement in the specie reserves than circumstances were supposed to justify. We give below the usual summary, compared with the previous returns:—

	Nov. 10. dols		Nov. 17. dols			dols
Loans	125,666,715	...	123,271,024	...	Dec.	2,365,691
Specie	21,125,429	...	19,464,410	...	Dec.	1,661,019
Circulation	9,548,112	...	9,266,317	...	Dec.	281,795
Deposits	79,025,296	...	76,189,663	...	Dec.	2,835,633

General trade, it scarcely need be remarked, has been, and now is, seriously affected by the financial difficulties, but not to such an extent as to call for special remark outside the regular prices current. Further advices from New York, to the 23rd ult state:—"The offerings at bank this morning were very large, and the discounts unusually liberal. The Bank of Commerce discounted a million of paper, and two or three other banks from three to five hundred thousand dollars each. This prompt execution of the resolve of last Wednesday has had a marvellous effect on men's minds—cheerfulness and hope are now the order of the day. At the discount houses the inquiry for paper is increasing; we note sales of first-class at 10 per cent."

MARKETS IN THE MANUFACTURING DISTRICTS.

During nearly the whole of the week, the amount of business transacted in goods for export purposes has been very moderate; but, for home use, the sales have been tolerably numerous. However, we find, in some instances, the stocks in warehouse have accumulated. Wool has sold at very full prices, owing to the limited quantities on offer. In iron, comparatively little has been passing; but coals have continued to realise extreme rates.

MANCHESTER, Dec. 6.—The market has been quiet, but steady. One or two large transactions have passed in water twist for China at full rates, and mule for India has had a degree more of attention than of late; otherwise yarns, especially those for manufacture in the district, have been scarcely asked for. Spinners, however, having liberal engagements, and being fearless of reduction in cotton, maintain prices. In cloths, business has been extremely limited. In shirtings for China we can quote no change, but printing cloths have been easier to buy. Light shirtings have been bought fairly at last rates; the alteration recommended at Calcutta of charging duty on the uniform valuation of 9 annas, or 13½d per lb, being considerably to the advantage of the lesser weights.

BRADFORD.—There is little or no change to report in the wool trade. Noils and shorts are taken off as produced, the make being considerably reduced. Of the yarn market we can say but little. The spinners are exceedingly quiet; both the export and home consumption is very limited. Few goods have been bought out of stock, and not many orders offered.

LEEDS.—The market has presented no feature. Light fabrics were in rather better demand, but for ordinary cloths there was no improvement.

ROCHDALE.—Dyed flannels have been in fair request, and there have been some few transactions in goods for the spring trade, but, upon the whole, the market has been rather dull, as stock-taking will soon commence, and operations are in the meantime confined chiefly to immediate wants. Yorkshire goods sell well, and prices of all descriptions of fabrics keep well up. Wools are firm in price, and a moderate business is doing in them by the local dealers.

BIRMINGHAM.—The trade of this town continues extremely dull. There is an absence of animation in almost every department. Manufacturers generally are complaining, but especially those who have a limited connection. The home trade is flat enough, but those who are dependent on the foreign are undoubtedly the worst off. There is scarcely anything doing with America, and in other departments the orders are small.

HUDDERSFIELD.—We have had a better feeling in our market, consequent upon the appearance of one or two large buyers, who, though they have been more intent upon anything jobbish than

upon regular goods, have been an intimation that the turn of the season is not far off. Prices are, and have been all along, very well supported.

HALIFAX.—There is a moderate amount of business doing in long wools, but operations are less extensive than they would be if purchases could be made on rather easier terms. The staplers are very firm in their quotations. Noils and brokes continue to sell well. For pieces suitable for the spring trade there is an improved demand, but manufacturers cannot be said to be busy.

LEICESTER.—The demand continues dull for the home market. Some of the new colours in fancy hosiery sell freely; but some of the branches are very much depressed. The knit hose and sock hands are many of them out of work, and a considerable amount of machinery is idle. The demand for yarns is flat, the manufacturers buying only for immediate use, and keeping their stock as small as possible. The wool market is without change; prices are very firm.

GLASGOW.—The demand for wools has rather improved. Good, clean, shafty laid Highland is wanted; but short greasy clips, or these containing sand or moss are quite unsaleable. Crosses are scarce. Laid Cheviots are rather heavy of sale. Quotations are unaltered.

BELFAST.—The demand for goods in the brown state has been rather less active in several lines, but without any turn one way or other. In the coarser descriptions of linen there has been a slight disposition to advance of rates, the hardening values of flax for the last few weeks giving holders more confidence, while it has been rather against production, the increased cost of goods not being met by the receipts of sales. The absence of large stocks in the hands of manufacturers give a steadier aspect to the yarn market, and even though the course of transactions is generally in small parcels, the total amount of business takes off large quantities of the current production of the spindles in most counts; while in others some millowners are oversold, and find it difficult to meet the demands on them.

WOLVERHAMPTON.—Current prices of pig iron:—Staffordshire cold blast, 4*l* 5*s*; best native hydrate pigs, 3*l* 10*s* to 4*l*; first-class all mine grey forge pigs, 3*l* 5*s* to 3*l* 10*s*; good mine pigs, with a modicum of flue cinder, 2*l* 12*s* 6*d* to 2*l* 17*s* 6*d*; mine pigs, deteriorated by cinder, 2*l* 7*s* 6*d* to 2*l* 15*s*; Clestor Moor hæmatites, 3*l* 10*s* to 3*l* 11*s* 3*d*; Barrow hæmatites, 3*l* 10*s* to 3*l* 11*s* 3*d*, none in the market; Workington hæmatites, 3*l* 7*s* 6*d* to 3*l* 8*s* 9*d*; Kirkless Hall hæmatites, 3*l* 5*s* to 3*l* 6*s* 3*d*; grey forge cinder pig iron, 2*l* 5*s* to 2*l* 10*s*; white forge cinder pigs, 2*l* 2*s* to 2*l* 7*s* 6*d*; melters, Nos. 1, 2, and 3, 2*l* 12*s* 6*d* to 2*l* 17*s* 6*d*; superior makes of all mine melting iron, 3*l* 2*s* 6*d* to 3*l* 15*s*, according to make and quality. The above prices are all delivered on to the wharfs at the South Staffordshire manufactories. Favourite Shropshire and Forest of Dean brands, 4*l* 10*s* delivered; Northern hæmatites from 3*l* 5*s* to 3*l* 11*s* 3*d*, according to brand and quality.

CORN.

AMERICAN GRAIN AND FLOUR MARKETS.

NEW YORK, NOV. 21.—FLOUR AND MEAL.—The general features of the market for State and Western flour remain in much the same condition as at the date of our previous writing. Dulness has constituted the most noticeable characteristic, and holders have found it exceedingly difficult to effect sales to any extent, even at a reduction of 20c to 25c per bbl. Transactions during the past three days comprise 25,000 bbls. The depression in the market for Southern flour has been marked, and prices have experienced a decided and material decline, amounting to 25c to 50c per bbl.

EXPORT, from 1st to 20th November.

	1860 barrels	1859 barrels
Wheat Flour...	168,791	90,191

GRAIN.—The continued stringency in the money market, the derangement of foreign and domestic exchange, and the panic in stocks, together with the multiplying manifestations of impaired confidence in almost every department of trade, have exercised a very unfavourable influence on 'Change during the past three days, and the market for all kinds of grain has been exceedingly dull, heavy, and unsettled. The difficulty experienced in negotiating foreign exchange has prevented transactions to any extent in wheat for export, and caused shippers to withdraw from the market. Considerable shipments have been made from first hands, but the sales have been mainly to supply the wants of local millers, and to fill orders. Transactions since Friday comprise 133,000 bushels.

EXPORT, from 1st to 20th November.

	1860 bushels	1859 bushels
Wheat	1,892,922	102,394
Corn	458,766	1,958

NEW YORK, NOV. 23.—Southern flour firmer; sales embraced 1,400 bales within range of the quotations. Wheat demanded full prices. The transactions comprised 50,000 bushels, at 1 dol 36c for prime. To Liverpool about 35,000 to 40,000 bushels wheat were taken in bulk and bags at 11¼d to 13½d. Flour was taken at 3s 3d to 3s 6d.

EXPORT of BREADSTUFFS from the UNITED STATES to GREAT BRITAIN and IRELAND since September 1, 1860.

LONDON MARKETS.

STATE OF THE CORN TRADE FOR THE WEEK.

MARK LANE, FRIDAY EVENING.

Notwithstanding that only limited supplies of English wheat have been on offer in the various markets held this week, the demand for all kinds, owing to the continuous influx of foreign produce, and the high rate for money in the general discount market, has ruled very inactive, and, in some instances, further reduced rates have been submitted to for low and damp parcels. Millers, generally, have continued to purchase foreign wheat with extreme caution; nevertheless, importers have, for the most part, refused to accept lower currencies. There has been a fair inquiry for fine malting barley, at the late decline in value; but other kinds have met a heavy sale, at barely previous rates. In malt, very little has been passing; nevertheless, no quotable change has taken place in prices. Oats have ruled a shade lower, with a slow consumptive inquiry. In beans and peas, very little has been doing, and the transactions in flour have been much restricted.

Advices from most parts of the Continent are to the effect that, of late, next to nothing has been doing in wheat for spring shipment. Sellers of most kinds of spring corn have come forward on lower terms; nevertheless, the transactions have been limited. Our American letters state that both wheat and flour have given way in price, and that the demand for export to England has suddenly stopped. The stocks at the leading seaports were very large.

The weather has continued very unfavourable for out-door farm labours. The saturated condition of the soil has checked ploughing and sowing, and apprehensions are entertained that many of the heavy lands will not be sown with wheat in consequence. The still prevailing damp weather has, too, greatly interfered with the condition of the grain, both in stack and barn.

The grain trade in Scotland has ruled very inactive; nevertheless, scarcely any change has taken place in the quotations. The shipments of produce to the South have been liberal.

In Ireland, next to nothing has been doing in wheat, and inferior kinds have sold on easier terms. Spring corn has met a dull inquiry, at barely late rates.

The show of English wheat at Mark lane to-day was very moderate. Good and fine samples were in improved request, at full prices; but other kinds were much neglected. Foreign wheat changed hands slowly, at late rates; but all kinds of spring corn were firm in price. Flour changed hands slowly, at late rates.

Mr Ed. Rainford reports the state of the floating trade as follows:—The arrivals for orders since this day week up to last night are 15, consisting of 7 cargoes of wheat, 2 wheat and flour, 4 maize, and 2 barley, viz.:—Wheat, 4 from New York, 1 Ibraila, 1 Odessa, 1 Venice; wheat and flour, 2 New York; maize, 1 Mazagan, 2 New York, 1 Sulina; barley, 2 Ibraila. Three or four of these had found buyers previously. The business in cargoes afloat continues dull. The following are the transactions since this day week:—Wheat, arrived, Berdianski, slight dry warmth, at 56*s*; Marianople, perfect, at 57*s* 4½*d* (sold direct) and 56*s* 6*d*; ditto, slight dry warmth, at 56*s* and 55*s* 6*d* (very few lay days); new and old Odessa Ghirka, at equal to 54*s* 4*d*, all per 492 lbs; Galatz, heated and injured, at 45*s* per 480 lbs. Maize, arrived, Galatz, 1 foot M. H. discoloured by heat, 38*s* 6*d* per 492 lbs; Ibraila, part discoloured, 37*s* 6*d*, and Wallachian, not perfect, at 37*s* per 480 lbs. Barley, arrived, Scala Nova, slight dry warmth, 29*s* per 400 lbs; just shipped, Odessa, 3,000 qrs, 28*s* 6*d* per 400 lbs. Rye, on passage, Eupatorian, B. L. November, 36*s* per 480 lbs.

The London averages announced this week are:—

	qrs	s	d

COLONIAL AND FOREIGN PRODUCE MARKETS.

TRANSACTIONS OF THE WEEK.

For Report of This Day's Markets, see "Postscript."

Mincing Lane, Friday Morning.

Sugar.—Since last Friday the market has been flat, and the moderate transactions up to yesterday were generally at 6d, or in some cases even 1s reduction. Only 800 casks West India found buyers, including the parcels offered by auction. 310 casks Barbadoes went from 40s to 46s. 314 casks other kinds: grainy Berbice, 38s to 43s 6d; crystallised Demerara, 43s to 46s. Jamaica, brown and yellow, 39s 6d to 43s 6d per cwt. The landings last week were nearly the same as the deliveries, consequently the stock has shown little alteration. It is now 54,000 tons, against 63,100 tons at the same date in 1859.

Mauritius.—6,155 bags brought forward on Tuesday were principally sold: grainy brown and yellow, 39s to 43s 6d; crystallised, 44s to 45s; low to good soft brown, 33s to 39s. By private contract, 3,500 bags have changed hands at 42s per cwt.

Bengal.—1,710 bags went as follows: Bally, 45s 6d to 47s 6d; Cossipore, 44s to 46s; syrups, 41s to 41s 6d; Gurpatta date, good yellow, 43s. Business has been done in low brown privately at 32s per cwt.

Madras.—1,600 bags native partly found buyers at 35s to 35s 6d for brown and low yellow, and 1,000 bags are reported by private treaty.

Java.—110 baskets Java were bought in at 41s 6d per cwt for soft low yellow.

Foreign.—The sound portion of 16,950 bags clayed Manilla was bought in at 39s 6d to 40s 6d. Of 1,150 boxes Havana, about one-fourth sold at 41s 6d to 46s for low to fine yellow; a few lots of Florettes at 49s. 135 casks Cuba were bought in at 39s to 42s 6d for brown to good yellow. Privately, 1,300 boxes Havana have sold at 41s 9d to 43s 6d for Nos. 9 to 12; and 2,500 bags Manilla clayed, 39s 6d; unclayed, 33s 6d per cwt. A floating cargo of Havana, No. 12½ to 13, has sold for the United Kingdom at 29s 3d per cwt.

Refined.—The market is dull, closing with a downward tendency. Low goods may be quoted at 50s 6d to 51s; crushed, 49s to 50s. Dutch crushed has been steady.

Molasses.—Owing to the continued limited supplies no sales are reported.

Rum.—Transactions to a moderate extent have taken place, chiefly in Demerara, at 2s to 2s 1d per proof gallon. Some Mauritius brought 1s 9d per proof gallon.

Cocoa.—The market has been dull since last Friday, and 438 bags Trinidad at public sale were chiefly bought in at 66s to 77s for grey to good red; also 43 bags ordinary grey Surinam at 67s per cwt.

Coffee.—Very few public sales have taken place this week, yet quotations of plantation Ceylon declined 1s yesterday. 460 casks 358 barrels and bags principally found buyers: fine ordinary pale to good, 65s to 77s 6d; fine, 77s 6d to 82s. 32 casks good native were bought in at 64s 6d. Two floating cargoes of good firsts Rio have sold at 55s 6d to 56s per cwt.

Tea.—The trade have made limited purchases this week, and general quotations are unaltered. Several cargoes have arrived.

Rice continues flat, and the limited quantity disposed of has been at barely former rates, including pinky Madras at 11s 6d, and fine white Bengal at 12s 3d to 15s. By auction, 1,780 bags of the latter were taken in at 12s 6d to 13s 6d per cwt for low middling to fine white.

Imports and Deliveries of Rice to December 1, with Stocks on hand.

Stock	37200	72950	86700	81200

* The deliveries of duty-free goods for export are not given now, and the total will be shown under the head of home consumption.

Sago Flour.—220 bags sold at 17s, being a decline of 1s per cwt.

Spices.—833 bags pimento in the public sales chiefly sold at easier rates, from 2½d to 3½d. 56 cases brown nutmegs went rather cheaper for some kinds: ordinary to middling, 1s 3d to 1s 9d; good bold, 2s 9d. 21 cases mace brought 1s to 1s 1d per lb for low and common quality. Both black and white pepper are dull.

Saltpetre.—The market has been rather more active, but prices rule very irregular. About 4,500 bags Bengal have sold privately, the latest transactions including refraction 2¾, at 42s 3d; 9¼, 39s 6d per cwt. The demand has latterly subsided again.

Imports and Deliveries of Saltpetre to December 1, with Stocks on hand.

	1860.	1859.	1858.	1857.
	tons	tons	tons	tons
Imported	11800	17350	9350	16400
Delivered	11950	16350	13150	11600
Stock	3700	3950	2550	6750

Deliveries last week 310 tons.

Cochineal.—There were rather large public sales held yesterday, viz., 510 bags, of which a fair proportion sold at about previous rates: Honduras silver, 2s 10d to 3s 3d; black, 3s 2d to 3s 9d; Teneriffe black, 3s 2d to 3s 9d per lb.

Drugs.—At the sales, yesterday, a considerable quantity of oil of aniseed was offered, which partly sold at 7s to 7s 2d. Oil of cassia was 9d per lb cheaper. East India star aniseed found buyers at 70s to 80s per cwt, according to condition.

Dyestuffs.—A parcel of Cutch, offered yesterday, was bought in above the value. Gambier has been dull, and there are now sellers at 17s for good quality. 105 bales Bengal safflower were taken in at 4*l* 5s to 8*l* per cwt.

Shellac has not quite supported its late high value: middling orange sold at 11*l* 17s 6d to 12*l* 5s; garnet, 11*l* 5s to 11*l* 10s; button, 10*l* 12s 6d to 10*l* 17s 6d.

India Rubber.—838 packages East India were withdrawn at 2s per lb, there being no buyers near the previous value.

Metals.—Prices have shown rather a downward tendency, the market being very flat. The last sales of Scotch pig iron were at 51s 4½d for mixed numbers. Spelter is quiet, and may be quoted 19*l* 15s to 19*l* 17s 6d on the spot. The stock on the 1st inst. was 5,150 tons against 3,450 tons last year. Foreign tin continues firm at 131s per cwt for Straits. No change has occurred in other metals.

Hemp.—Russian is steady at the quotations. A limited business has been done in Manilla by private contract. The jute market is less freely supplied, and the deliveries continue large. On Wednesday, 5,900 bales by auction sold at the full valuations, from 12*l* 5s to 21*l* 10s per ton, according to quality.

Hides.—The public sales of East India went off with extreme heaviness, as the importers would not make any further concession in prices, and a large proportion of 110,000 hides submitted yesterday was bought in.

Linseed.—Prices are again lower this week: Bombay, 63s; Calcutta, 58s to 59s per quarter, and about the same for arrival.

Oils.—No change has occurred in fish oils. Olive has again improved. Floating cargoes are in demand, also most kinds on the spot, at the quotations. Cocoa nut remains firm: Cochin, 56s; Ceylon, 54s to 55s 6d. Palm has been quiet, at 47s to 47s 6d. Linseed continues in good supply at 29s 3d, and 30s for delivery in January to April. A few sales have been made in rape, chiefly by speculators, at easier rates: foreign refined, 43s to 44s; brown, 41s 6d to 42s per cwt.

Turpentine.—Rough quoted at 11s. Spirits dull: American, in barrels, 32s per cwt.

Tallow.—At the commencement and in the middle of the week, foreign sold on easier terms, viz., 59s 6d to 60s, partly attributable to large arrivals. The market has since been firmer. Yesterday afternoon the quotation was 60s for Y.C. on the spot and to the end of the month; 60s 6d for delivery in January to March; 58s per cwt for the last three months. A few parcels were offered by auction. South American sold at 57s to 59s; East India at 55s 9d. Australian bought in at 57s 6d per cwt for fine beef.

Particulars of Tallow.—Monday, December 3.

POSTSCRIPT. Friday Evening.

Sugar.—The market was flat to-day, most descriptions closing 6d to 1s lower for the week. Sales of West India, 1,150 casks. The public sales, comprising 5,439 bags Mauritius, 11,648 bags Bengal, 852 bags Madras, and 1,068 bags Penang, went off flatly, and the lower descriptions showed the greatest depression. Importers bought in a considerable proportion. By private contract a few parcels of colonial sold, and some low brown China at 33s 6d.

Coffee.—171 casks 192 barrels and bags plantation Ceylon sold at the former value; 595 bags good native at 64s per cwt.

Spices.—215 cases brown nutmegs sold from 1s 1d to 3s 9d; 210 cases mace at 11d to 2s per lb, being rather cheaper for some kinds; 547 bags Singapore white pepper were chiefly bought in at 6d to 6¼d per lb; and 167 bags African ginger at 38s 6d per cwt.

Cutch.—1,631 bags were taken in at 25s 6d per cwt for the sound portion.

Gutta Percha partly found buyers at 1s 4d to 1s 7d per lb for mixed to good genuine quality.

Shellac.—Native orange sold at 11*l* 5s to 11*l* 7s 6d; garnet, 10*l* 12s 6d to 10*l* 15s; good button sort, 10*l* 5s to 10*l* 12s 6d per cwt.

Tallow.—Town unaltered. Y. C., 60s 3d to 60s 6d; spring, 61s per cwt.

ADDITIONAL NOTICES.

Refined Sugar.—The home market for refined sugar continues neglected, no material alteration to note as respects prices.

Green Fruit.—Contrary winds keep the market bare of stock. A

cargo of Fayal and one of Terceira oranges, sold by Keeling and Hunt at public sale, went at moderate prices. Shipments from St Michael's would commence om the 23rd ult. Messina lemons firm, a cargo being lost per Black Prince s.s.; and the Alice s.s put into Lisbon leaky. Nuts of all kinds without alteration; more inquiry, or Barcelonas.

DRIED FRUIT.—The activity in this market is now sensibly dying out on the approach of Christmas. The market transactions are few, but the wholesale houses are supplying the retailers with their final stocks, but even these consist chiefly in French fruits and the smaller articles necessary to supply a Christmas demand. Currants, though very quiet are held firmly, and importers are looking for an early demand on the turn of the year. The arrivals are moderate, and our stock in London cannot be over and above what will be required for a spring trade. The good quality of currants of all growths, and the moderate and remunerative prices now ruling, are the great motives that have induced to bring this article during the season into great notice. The clearances of currants in London alone, in the three months ending November, have been 10,455 tons, against only 5,540 tons last year in same months. Raisins, especially Valencias, are attracting considerable attention; the stock, December 1, consisted only of 950 tons, which is less than three weeks December consumption, and we can look for very little to arrive. Prices rule from 40s to 50s. A cargo of common was sold at auction this week at 38s. Eleme and red Smyrnas are in favour, and upon these we shall have to depend for our spring supplies. Figs, though at present rather depressed, are being largely consumed this winter, and prices are more moderate.

COLONIAL WOOL.—The sales closed this day very firmly. The low wools opened at about former rates.

FLAX.—This article coutinues firm at our quotations.

HEMP.—Very little business is doing at late rates.

COTTON.—Sales of cotton wool from Friday, 30th November, to Thursday, 6th December, inclusive:—500 bales Surat at 4⅜d for middling fair old Dhollera; and 4¼d for fair Compta; 600 bales Madras at 4⅜d to 5d for middling to middling fair Tinnivelly; and 4⅛d to 4⅜d for middling fair to fully fair Western. The transactions have been limited, and the market dull; prices are rather irregular, but for the most part about the same as last week. 72 bales and 150 bags Surat are advertised for public sale on Thursday, 13th instant.

TOBACCO.—The market remains firm and steady at present quotations. The demand for home trade has been principally for good and fine sorts; and for growths other than American, sales have been made to a considerable extent.

LEATHER AND HIDES.—The supply of leather was not large on Tuesday at Leadenhall, and former prices were generally maintained. At the public sale of foreign goods, this week, there was a languid demand for salted hides. No River Plate were brought forward. Of the 8,000 Australian, 3,700 were sold at 4d to 5d; seconds, 3d to 3½d. In East India kips, of 115,000 offered, 4,050 only were sold—the best at fully former prices; for more inferior descriptions there was no demand.

METALS.—There is a monotonous sameness in the course of the metal market, which we can now hardly hope to see changed before the commencement of next year. Copper is in but limited demand, and prices of ores have receded somewhat, although they are still comparatively high. Iron is firmer in Wales, in consequence of rather better demand; but in Staffordshire and Scotland trade is unchanged. Tin is quiet, with prices inclining slightly in favour of buyers of foreign. Lead steady. Spelter neglected, and stocks increasing considerably. Tin plates in moderate inquiry.

TALLOW.—Official market letter issued this evening:—

	s	d
Town tallow	60	3
Fat by ditto	3	1½
Yellow Russian	61	6
Melted stuff	43	0
Rough ditto	26	0
Greaves	20	0
Good dregs	7	0

Imports this week 858 casks.

PROVISIONS.

Bacon market steady, with last week's prices; delivery very good. Best Friesland on the advance, on account of the short supply. Very little doing in Irish butter. Lard steady, at previous rates.

METROPOLITAN CATTLE MARKET.

THURSDAY, Dec. 6.—A fair average supply of beasts, in but middling condition, was on offer in to-day's market. Very few buyers were in attendance, and the beef trade ruled heavy at Monday's quotations. We were scantily supplied with sheep; nevertheless, the demand for all breeds was in a sluggish state. In prices, however, no change took place. Owing to a large increase in the supply of calves, the veal trade was heavy, at 4d per 8 lbs less money.

Per 8 lbs to sink the offal.

	s	d	s	d		s	d	s	d
Coarse and inferior beasts	2	8	3	0	Prime Southdown sheep	5	4	5	6

HOP MARKET.

BOROUGH, Monday, Dec. 3.—Our market continues in the same inactive state as of late, without any alteration in price. Mid and East Kent, 6*l*, 14*l*, 18*l*; Weald of Kents, 5*l*, 8*l*, 15*l*; Sussex, 5*l*, 7*l*, 9*l*; Yearlings, 5*l*, 7*l* 7s, 10*l*.

FRIDAY, Dec. 7.—The market is firm for all fine hops, but inferior are a drug on the market.

POTATO MARKET.

SOUTHWARK WATERSIDE, Monday, Dec. 3.—During the past week the arrivals coastwise have been limited, owing to easterly winds; but there being a large quantity left over from last week's supply, the trade still continues dull. The following are this day's quotations:—York Regents, 110s to 130s; Lincolnshire ditto, 100s to 110s: Dunbar ditto, 120s to 140s; Perth, Forfar, and Fifeshire ditto, 100s to 110s: Rocks and Reds, 90s to 100s; French whites, 85s to 90s; Belgian ditto, 80s to 90s; Dutch ditto, 80s to 85s per ton.

THURSDAY, Dec. 6.—Since our last report the arrivals, coastwise and by rail, have been liberal, and the market continues largely supplied and trade inactive at nominally the annexed rates:—York Regents, from 110s to 130s; Kent and Essex ditto, from 110s to 140s; Scotch ditto, from 100s to 120s; Dunbars, 120s to 150s; French, 90s to 105s; Belgian, 80s to 85s; Prussian, 85s to 95s per ton.

HAY MARKETS.—THURSDAY.

SMITHFIELD.—Meadow hay, 2*l* 0s to 5*l* 5s; clover, 3*l* 0s to 5*l* 10s; and t raw, 1*l* 10s to 1*l* 14s per load. A slow trade.

CUMBERLAND.—Meadow hay, 2*l* 5s to 5*l* 5s; clover, 3*l* 0s to 5*l* 10s; and straw, 1*l* 10s to 1*l* 16s per load. Trade dull.

WHITECHAPEL.—Meadow hay, 2*l* 0s to 5*l* 5s; clover, 3*l* 0s to 5*l* 12s; and straw, 1*l* 10s to 1*l* 14s per load. A heavy trade.

COAL MARKET.

FRIDAY, Dec. 7.—Wall's-end Hetton 24s 6d—Lambton 24s—Haswell 24s 6d—Russell Hettons 23s 6d. Eight ships at market.

LIVERPOOL MARKETS.

WOOL.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, Dec. 7.—The market is rather quiet this week, in consequence of the principal buyers being in attendance at the London sales, where, after the close of the fine colonial wool sales on the 7th inst., low wools will be offered on the two following days.

CORN.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, Dec. 7.—Market moderately attended. Wheat twopence per cental dearer, with large business. Flour in better request at late rates. Indian corn 37s for mixed, 37s 6d to 38s for mixed for Galatz and Ibrail, with moderate demand. Beans steady. Oats and oatmeal partial, and trade rather easier.

METALS.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, Dec. 7.—The market for manufactured iron has been quiet throughout the past week, but with little or no change in prices. Scotch pig iron has been tolerably steady at about previous rates. The demaud for copper has been limited. Lead continues dull. In other metals there is little variation to notice.

The Gazette.

TUESDAY, Dec. 4.

BANKRUTS.

E. W. Freestone, Clark's place, High street, Islington, milliner.
W. Cole, jun., Mark lane, iron merchant.

EPITOME OF RAILWAY NEWS.

TRAFFIC RETURNS.—The traffic returns of railways in the United Kingdom for the week ending Nov. 24 amounted to 492,940*l*, and for the corresponding week of last year to 468,860*l*, showing an increase of 23,780*l*. The gross receipts of the eight railways having their termini in the metropolis amounted to 200,739*l*, and for the corresponding week of 1859 to 197,953*l*, showing an increase of 2,789*l*.

RAILWAY DIVIDENDS.—It appears that last year four companies paid dividends at the rate of 1 per cent. per annum and under; nine between 1 and 2 per cent.; 25 between 2 and 3 per cent.; 32 between 3 and 4 per cent.; 29 between 4 and 5 per cent.; 19 between 5 and 6 per cent.; five between 6 and 7 per cent.; four between 7 and 8 per cent.; one between 8 and 9 per cent.; and four between 9 and 10 per cent.

RAILWAY AND MINING SHARE MARKET.

LONDON.

MONDAY, Dec. 3.—In the railway market to-day there was a rise of nearly ¾ per cent in Lancashire and Yorkshire, on further reports of an important agreement between this company and the Midland. Great Western and Caledonian also slightly improved. On the other hand, a fall of 1½ to 2 per cent. took place in Great Northern, and of ¼ in York and North Midland, North British, and South-Eastern. Except as regards Lancashire and Yorkshire, the general business was limited. The transactions in American railway securities were mainly confined to Illinois Central and New York and Erie shares, the former recovering to 31 to 30 dis., while the latter receded to 31 to 32. Mines were inactive, but generally steady. In joint stock banks, Ottoman were firmer at 18 to ½. In miscellaneous descriptions a further decline occurred in Peninsular and Oriental steam.

TUESDAY, Dec. 4.—In the railway market the principal transactions were in Lancashire and Yorkshire, which, after advancing to 121, relapsed to 129 to ½, or the same as at the close yesterday. Other stocks also experienced some fluctuation, but generally an improvement was established. In the colonial market Grand Trunk of Canada improved to 24 to ¼. Great Western shares, on the other hand, were dull, at 10¾ to ⅞. Indian guaranteed stocks continued firm, and East India was last quoted 102 to ½. No change of importance occurred in foreign descriptions. Cape, New Brunswick, and Nova Scotia bonds advanced. A feature in the business of the day was an improvement in American railway securities. Mines were rather less steady. Joint stock banks and miscellaneous descriptions left off about the same as yesterday.

WEDNESDAY, Dec. 5.—The railway market improved in the morning with Consols, and, although the full rise was not maintained, closed intrinsically good. The principal movement was an advance in North Eastern, especially the York stock, Caledonian, and Great Northern. Midland continues scantily supplied, and was also firm. Lancashire and Yorkshire slightly relapsed. In the colonial market, Grand Trunk of Canada improved to 24½ to ¾; and Great Western to 10⅝ to 11. Foreign descriptions were likewise firmer. South Austrian and Lombardo-Venetian closed at ⅝ to ½ discount. Cape debentures were again ½ per cent. higher. The improvement in American railway securities continued, Illinois Central and New York and Erie shares being especially in demand. The former left off at 28½ to 27½ dis., and the latter 34½ to 35½. Mines were steady, and in one or two cases showed an advance. Joint stock banks were also firm. In miscellaneous descriptions Peninsular, and Oriental steam declined.

THURSDAY, Dec. 6.—The railway market to-day was less active, but a fair amount of business was transacted. The late advance in the principal shares continued to be maintained, the future prospects of these undertakings being regarded as favourable. Midland improved on purchases nearly 1 per cent.; Berwick were also firmer; Lancashire and Yorkshire, on the other hand, partially declined. There was a general rise in the shares of the Brazilian lines, but no important variation occurred in connection with American securities. Very limited transactions took place in mining shares. The shares of the Marine Insurance Companies were in demand; Ocean Marine being quoted 2½ to 3 pm., and Thames and Mersey 1 to 1¼ pm.

FRIDAY, Dec. 7.—The railway share market opened this morning with firmness, but subsequently gave way. Eastern Counties, Great Western, London and North-Western, and Lancashire and Yorkshire stocks were quoted ¼ to ⅜ per cent. lower than yesterday afternoon. Caledonian rose ¼ per cent., and there was a fresh advance in North-Eastern, particularly Berwick. Lombardo-Venetian shares were rather flatter. The Canadian lines were steady.

The Economist's Railway and Mining Share List.

ALLEN'S PATENT PORTMANTEAUS and TRAVELLING BAGS, with Square Opening; Ladies' Dress Trunks; Dressing Bags, with silver fittings; Despatch Boxes, Writing and Dressing Cases, and 500 other articles, for home or continental travelling. Illustrated Catalogues for 1860, by post for two stamps.—J. W. ALLEN, Manufacturer of Officers' Barrack Furniture and Military Outfitter (see separate catalogue), 18 and 22 Strand London

DINNEFORD'S
PURE FLUID MAGNESIA has been for many years sanctioned by the most eminent of the Medical Profession, as an excellent remedy for acidities, heartburn, headache, gout, and indigestion. As a mild aperient it is admirably adapted for delicate females, particularly during pregnancy; and it prevents the food of infants from turning sour during digestion. Combined with the Acidulated Lemon Syrup, it forms an effervescing aperient draught which is highly agreeable and efficacious.

Prepared by DINNEFORD and CO., Dispensing Chemists (and General Agents for the Improved Horse Hair Gloves and Belts), 172 New Bond street, London, and sold by all respectable Chemists throughout the empire.

KEATING'S COUGH LOZENGES.—Statistics show that 50,000 persons annually fall victims to Pulmonary Disorders, including Consumption, Diseases of the Chest, and the Respiratory Organs. Prevention is at all times better than cure; he, therefore, prepared, during the wet and wintry season, with a supply of KEATING'S COUGH LOZENGES, which possess the virtue of averting, as well as of caring a Cough or Cold; they are good alike for the young or for the aged.

RESTORATION OF VOICE BY KEATING'S COUGH LOZENGES. Glasgow.

SIR,—I have great pleasure in informing you of the great good your excellent COUGH LOZENGES have done me. In December, 1845, I caught a severe cold from riding two or three miles, one very wet night, which settled in my lungs, and quite took away my voice, so that I could not speak above a whisper from that time until December last. I tried all kinds of medicines, but they were of no avail. I was then advised to try your Lozenges, which I did only to please my friends, but before I had finished a 2s 9d tin, my voice, to my great joy, came back as strong as ever.—I am, Sir, yours respectfully, JAMES MARTIN.

THOMAS KEATING, Esq.

Prepared and Sold in Boxes, 1s 1½d; and Tins, 2s 9d, 4s 6d, and 10s 6d each, by Thomas Keating, chemist, &c., 76 St Paul's Churchyard, London. Retail by all Druggists, &c.

NO MORE PILLS OR ANY other Physic.—For Constipation, Indigestion (Dyspepsia), Palpitation, Nervous, Bilious, and Liver Complaints, Debility, Dropsy, Epilepsy, Paralysis, Cough, Asthma, Consumption, Bronchitis, Sore Throat, Fevers.

DR BARRY'S delicious Health-restoring REVALENTA ARABICA FOOD, which, at a few pence per day, saves fifty times its cost in medicine, and cures without purging or any of the uncertainties, annoyances, and ruinous expenses incurred by medicine, cod liver oil, or visits to distant climates.

Certificate No. 36,418.—We find it the safest remedy Andrew Ure, M.D., F.R.S.; Dr Harvey; Dr Wurzer Dr Shorland; Dr Campbell.

We extract a few out of 56,000 cures:—

Cure No. 1,771.—Lord Stuart de Decies of many years' dyspepsia.——Cure No. 49,832.—"Of fifty years' indescribable agony from dyspepsia, nervousness, asthma, cough, constipation, flatulency, spasms, sickness and vomiting." Maria Joly, of Lynn, Norfolk.——Cure No. 47,121.—Miss Elizabeth Jacobs, of extreme nervousness, indigestion, gatherings, low spirits, and nervous fancies.——Cure No. 54,816.—The Rev. James T. Campbell, Syderstone Rectory, near Fakenham, Norfolk, of indigestion and liver complaints.——Cure No. 56,814.—Mr Samuel Laxton, Leicester, of two years' diarrhœa.——Cure No. 180.—Mr W. Reeves, 181 Fleet street, London, of 25 years' nervousness, constipation, indigestion, and debility.——Cure No. 4,028. Eight years' dyspepsia, nervousness, debility, with cramps, spasms, and nausea." Rev. John W. Flavel, Ridlington Rectory, Norfolk.——Cure No. 3,906.—"Thirteen years' cough, indigestion, and general debility." James Porter, Athel street, Perth.——Cure No. 58,314.—Miss Elisabeth Yeoman, Gatenere, near Liverpool, of ten years' dyspepsia and all the horrors of nervous irritability."——Cure No. 46,270.—Mr James Roberts, timber merchant, of Frimley, Surrey, of 30 years' diseased lungs, spitting of blood, liver derangement, partial deafness.

Similar testimonials from 50,000 patients who can be referred to.

The food is sold in canisters, 1lb, 2s 9d; 2 lbs, 4s 6d; 12 lbs, 22s; 24 lbs, 40s. Super-refined quality, 5 lbs, 22s; 10 lbs, 33s. The 10 lb, 12 lb, and 24 lb canisters carriage free, on receipt of post-office order by Harry Du Barry and Co., 77 Regent street, London; Fortnum, Mason, and Co., 182 Piccadilly; also at 60 Gracechurch street, 4 Cheapside, 330 Strand, 63 and 150 Oxford street, London; and all grocers and chemists.

HOLLOWAY'S PILLS AND OINTMENT. — Mental Weakness. — To the stomach, liver, or circulation must we generally look for the gloomy thoughts which sometimes oppress us. A single dose of appropriate medicine has prevented many an act of suicide! Whenever apathy and depression overshadow us, let us take timely warning and regulate the sources of health by Holloway's remedies, which will infallibly set right the digestion, and purify and invigorate the circulation. The Ointment should be rubbed twice a day over the liver and stomach, and over the heart if palpitation distresses. It will be absorbed, and wonderfully assist the Pills in their salutary operation, without distressing or unduly weakening the system. This treatment, perseveringly followed, soon banishes melancholy and mental hallucinations.

LE SOMMIER ELASTIQUE PORTATIF.
HEAL AND SON have patented a method of making a Spring Mattress portable. The great objection to the usual Spring Mattress is its being so heavy and cumbersome.

The "SOMMIER ELASTIQUE PORTATIF" is made in three separate parts, and when joined together has all the elasticity of the best Spring Mattress. As it has no stuffing of wool or horse hair, it cannot harbour moth, to which the usual Spring Mattress is very liable; the prices, also, are much below those of the best Spring Mattresses, viz:—

			£	s	d
3 ft wide by 6 ft 4 in. long			2	5	0
3 ft 6 in.	—	—	2	10	0
4 ft	—	—	2	15	0
4 ft 6 in.	—	—	3	0	0
5 ft	—	—	3	5	0
5 ft 6 in.	—	—	3	10	0

The "SOMMIER ELASTIQUE PORTATIF," therefore, combines the advantages of elasticity, durability, cleanliness, portability, and cheapness.

An Illustrated Catalogue of Bedsteads, Bedding, and Bed-Room Furniture sent free by post on application.

HEAL and SON, 196 Tottenham court road, W.

DR BUCHAN'S PATENT SUGAR-COATED VEGETABLE PILLS, VEGETABLE SKIN OINTMENT, and CONCENTRATED VEGETABLE ESSENCE, for Purifying the Blood, Regulating the Bowels, and Removing Vitiated Humours, Bilious and Liver Complaints, Rheumatism, Gout, Scorbutic Affections, Costiveness, Skin Eruptions, deep-seated Ulcers, and all Diseases of the Nervous System, from whatever cause, &c., affording at once a new lease of life to the sickly and aged of both sexes, whilst in addition imparting a beautiful and clear complexion, so anxiously sought for by all. Proved by the sworn testimonies made before the Lord Mayor of London, and sitting Magistrates. Sold by Buchan and Co., Patentees, 22 Newman street, Oxford street, London, W., and all chemists in town and country. Prices:—Pills, per box, 1s 1½d, 2s 9d, and 11s; Ointment, per pot, 1s 1½d, and 2s 9d; Essence, per bottle, 11s, or family bottle containing four times that quantity, 33s. Agents:—Barclay, 75 Farringdon street; J. Sanger, 150 Oxford street; Hannay, 63 Oxford street; Butler, 4 Cheapside; Hooper, 43 King William street, London Bridge; R. Howden, 78 Gracechurch street; Prout, 229 Strand, &c., &c.

Just published, gratis, or post free for one stamp, to be had of all agents, and at 22 Newman street, Extracts from Dr Buchan's Work, entitled BUCHAN'S DOMESTIC MEDICINES, being a Book of Reference, containing instructions for the cure of every ailment incidental to man, woman, or child.

A BOON TO NERVOUS SUFFERERS.—Twenty Thousand Copies of a Medical Book for gratuitous circulation. HENRY SMITH, Doctor of Medicine of the Royal University of Jena, &c., who has devoted fifteen years to the study and treatment of Nervous Debility, Loss of Memory, Dimness of Sight, Lassitude, and Indigestion, will send free, for the benefit of Nervous Sufferers, a copy of the New Medical Guide, containing his highly successful mode of treatment, with necessary instructions by which sufferers may obtain a cure. Post free on receipt of a stamped directed envelope. Address Dr Henry Smith, 8 Burton crescent, Tavistock square, London, W.C.

RUPTURES.—BY ROYAL LETTERS PATENT
WHITE'S MOC-MAIN LEVER TRUSS is allowed by upwards of 200 Medical Gentlemen to be the most effective invention in the curative treatment of HERNIA. The use of the steel spring, so often hurtful in its effects, is here avoided, a soft bandage being worn round the body while the requisite resisting power is supplied by the MOC-MAIN PAD and PATENT LEVER, fitting with so much ease and closeness that it cannot be detected, and may be worn during sleep. A descriptive circular may be had, and the Truss (which cannot fail to fit) forwarded by post, on the circumference of the body two inches below the hips being sent to the Manufacturer.

Mr WHITE, 228 Piccadilly London.

Price of a single Truss 16s, 21s, 26s 6d and 31s 6d; Postage, 1s. Double ditto, 31s 6d, 42s, and 52s 6d; postage, 1s 8d. Post-office orders to be made payable to John White, Post-office, Piccadilly.

ELASTIC STOCKINGS KNEE CAPS, &c., for VARICOSE VEINS, and all cases of WEAKNESS and SWELLING of the LEGS, SPRAINS, &c. They are porous, light of texture, and inexpensive, and are drawn on like an ordinary stocking. Price from 7s 6d to 16s each; postage, 6d

WHITE, MANUFACTURER, 228 Piccadilly, London

VALUABLE INFORMATION.—GRATUITOUS EDITIONS of the following LECTURES, delivered at the Royal Institute of Anatomy Science, and Medicine, 369 Oxford street, London, by W. B. MARSTON, the Principal, are being issued, with plain directions for SELF-TREATMENT and CURE in each of them.

No. I.—NERVOUS DEBILITY (the result of youthful error), loss of memory, shortness of breath, dimness of sight, exhaustion, and general incapacity. Addressed specially to Young Men.

No. II.—MARRIAGE: Its Obligations and Impediments. Addressed to those who contemplate Marriage, and to the Married who desire Children.

No. III.—THE BRAHMIN'S ELIXIR OF LIFE: Its History—Secret Remedies of the Hindoos no Fable—Full Particulars of this Extraordinary Specific—Its Amazing Powers as a Reinvigorator of the Impaired Functions, and in all Cases of Nervous Debility.

No. IV.—THE DISEASES INFLICTED UPON MANKIND BY THE GREAT SOCIAL EVIL. With a simple means of complete Cure without Mercury.

Each Lecture, neatly printed and bound, will be sent GRATIS, on receipt of two stamps to prepay postage, or THE WHOLE FOUR, BOUND TOGETHER, with numerous additions, and full directions for SELF-TREATMENT and CURE, 160 pages, 8vo, post free, for Six Stamps. Address, Treasurer, Royal Institute, 369 Oxford street, London.

DEANE'S TWO-HOLE BLACK PENS which are unequalled for their durability and easy action, are adopted by the gentlemen of the Stock Exchange, and the principal bankers, merchants, and public companies of the city of London, besides several of Her Majesty's judges, the most eminent counsel, and the reverend the clergy. Their cheapness and popularity has induced many unprincipled people to put forth imitations of the genuine articles, which are equally useless to the purchaser, and disgraceful to the vender. The public are therefore cautioned, and respectfully requested not to purchase any as DEANE'S GENUINE TWO-HOLE BLACK PENS, unless each pen is stamped

"G. and J. Deane, London Bridge,"

and the box, which contains exactly twelve dozen, has thereon a variously coloured label, inscribed

"G. and J. DEANE'S Two-Hole Black Pens, 46 King William street, London bridge."

DR ROBERT ROWE ON INDIGESTION.
This day is published, price 2s 6d, the fifteenth edition,
NERVOUS DISEASES, Liver and Stomach Complaints, Low Spirits, General Debility, and Diseases of Warm Climates; the Result of Thirty Years' Practice.

By G. ROBERT ROWE, M.D.

"Dr Rowe claims with justice a priority of authorship, while he yields to none in his treatment. The value of this work is enhanced by its practical nature."—LANCET.

"We have no hesitation in placing this work among the first ranks. We entertain a high opinion of its value."—MEDICAL TIMES.

"This is a clever and useful work; contains much that is worthy of attention, and should be read by all martyrs to indigestion and other ills."—TIMES.

Also, by the same Author, 2nd edition, price 4s 6d, On some of the Important Diseases of Females and Children.

London: J. Churchill, and to be had of all booksellers.

A New Edition of
THE PHILOSOPHY OF MARRIAGE.
By JOSEPH KAHN,
Graduate in Medicine, Surgery, and Midwifery, in the Royal and Imperial Universities of Vienna, Erlangen, &c., &c.

This popular work (which has been translated into four different languages) has now gone through forty-one Editions of 10,000 each, and is designed to impart accurate knowledge on subjects which involve the means of securing moral and physical happiness.

Price One Shilling, or free by post (in an envelope) for eighteen stamps.

J. Allen, 20 Warwick lane, Paternoster row; or from the Author's address, 17 Harley street, Cavendish square, W.

Just published, 71st thousand, price 1s, post free for 13 stamps. Sold by Mann, 39 Cornhill, or direct from the Author.

DR LA'MERT ON SPERMATORRHŒA; an Original Essay on the Treatment and Cure of NERVOUS and PHYSICAL DEBILITY, resulting from pernicious habits contracted in Youth, excesses in Manhood, or residence in Tropical Climates. With Cases and Engravings from Life, representing the various Organs in Health and Disease.

CONTENTS.

SECTION I.—The Physiology of the Generative Organs.
SECTION II.—Puberty—Manhood—The Morals of Generative Physiology—True and False Morality.
SECTION III.—Marriage in its Moral, and Physical Relations—Happy and Unhappy Unions—How to secure Healthy Offspring.
SECTION IV.—Youthful Abuse—The Secret Causes of Nervous Debility, Impotence in Man, and Sterility in Man and Woman.
SECTION V.—Spermatorrhœa, or Chronic Impotence: its History, Causes, and Moral Consequences—The Sterility of Age.

Dr LA'MERT, Honorary Member of the London Hospital Medical Society, Registered Licentiate of the Royal Society of Apothecaries, &c., is the only legally qualified practitioner who, for 20 years, has devoted his attention to the treatment of these disorders, which are so frequently aggravated by the unskilfulness of ignorant empirics, either self-styled physicians or surgeons, sometimes assuming names of eminent medical men, &c. At home for consultation daily, from Ten till Two, and from Six till Eight.

37 Bedford square, London.

TO THE NERVOUS AND DEBILITATED.
Just published, the 125th thousand, with numerous plates, in a sealed envelope, price 1s, sold by all booksellers, or post paid, by the Author, for 12 stamps,
MANHOOD: THE CAUSE AND CURE OF PREMATURE DECLINE, with Plain Directions for Perfect Restoration to Health and Vigour. By Dr J. L. CURTIS, 15 Albemarle street, Piccadilly, London.

CONTENTS.

INTRODUCTORY CHAPTER on the Physiological Structure and Functions of the Reproductive Organs.
CHAPTER II.—Causes of Spermatorrhœa and Impotence; Early Vicious Indulgences; Dangers of Neglect.
CHAPTER III.—A Review of the Disqualifications of Marriage; whether resulting from the Youthful Abuse, the Follies of Maturity, the Effects of Climate, or Infection.
CHAPTER IV.—Plan of Treatment, Medical and Moral, with observations on a new and successful mode of detecting Spermatorrhœa and other Urethral discharges by microscopic examination.
CHAPTER V. and VI. on the modern Treatment of Gonorrhœa and Syphilis.

The Book concludes with numerous interesting cases, to which is added the Author's receipt of a preventive Lotion

MR CURTIS, author of the above Medical Treatise, may be consulted from 10 till 3, and 6 till 8. Sundays from 10 till 1.

Sold by Piper and Co., 23 Paternoster row and Mann, 39 Cornhill, London.

HUBBUCK'S PATENT WHITE ZINC PAINT.

By their process, which is patented, Pure White Zinc Paint is cheaper than White Lead. It is the most durable and beautiful paint known, and does not stain or discolour with the London atmosphere.

CHEAPNESS.—Two hundred-weight of this Paint, with six gallons of Oil, covers as much surface as three hundred-weight of White Lead and twelve gallons of Oil. It is cheaper in the first instance, as well as desirable on every consideration.

ADULTERATIONS.—Prejudice is caused by some Paint Grinders selling Zinc Paint adulterated with Sulphate of Barytes, some even to the extent of thirty per cent. Whether this is sold under the name of "Improved Zinc Paint," or is candidly sold as Number Two or Three qualities, no Painter can produce good work with it. He naturally condemns Zinc Paint altogether.

That Painters have never seen the best Zinc Paint is evident, or they would not use any other paint for their best work. To prevent the prejudice which the inferior article must produce, each Cask of Pure White Zinc is stamped

"HUBBUCK, LONDON, PATENT."

JULLIEN FUND. Committee Room—50 New Bond street.

The Committee of the Jullien Fund, fearing that the subscriptions have been materially checked by the unfortunate death of Mons. Jullien, desire to explain that a widow and others, members of his family, can be protected from want only by the kind aid of those who appreciate the great services rendered by the late lamented maestro to the cause of the musical education of the English people.

The Committee confidently appeal to that benevolence for which their countrymen are so distinguished, for such prompt and liberal additions to the subscription list as shall enable them to do some justice to the memory of M. Jullien, and at the same time afford adequate relief to his bereaved family.

COMMITTEE for the DISTRIBUTION of the JULLIEN FUND.

Mr John Mitchel | Mr W. Duncan Davison
Mr W. R. Sams | Mr Jules Benedict
Mr Thomas Chappell | Mr A. Blumenthal

HONORARY TREASURERS.

Mr John Mitchell, 33 Old Bond street
Mr T. Chappell, 50 New Bond street
Mr W. R. Sams, 1 St James's street

Messrs Coutts and Co., Strand
Heywood, Kennards, and Co., Lombard street
London and County Bank, Hanover square

Who, as well as the honorary treasurers, have kindly consented to receive subscriptions.

April, 25th, 1860.

KEATING'S COD LIVER OIL. Just imported. The Pale from Newfoundland, and the Light Brown from Norway. The supplies of the present season have never been surpassed, the fish being unusually fine, and the oil nearly tasteless. Professors Taylor and Thompson, of Guy's and St Thomas's Hospitals, have analysed, and pronounced the PALE NEWFOUNDLAND OIL the best and most desirable for invalids of very delicate constitution. The Light Brown being more economical in price, is brought within the reach of all classes. NO HIGHER PRICE NEED BE PAID than the following:—Light Brown, 1s 8d per pint, or 3s per quart. Pale, 1s 6d half-pints, 2s 6d pints, 4s 6d quarts, or in five-pint bottles, 10s 6d, imperial measure, at 79 St Paul's Churchyard.

EAU-DE-VIE.—THIS PURE PALE BRANDY, though only 18s per gallon, is demonstrated, upon analysis, to be peculiarly free from acidity, and very superior to recent importations of veritable Cognac. In French bottles, 38s per dozen; or securely packed in a case for the country, 39s.

HENRY BRETT and CO., Old Furnival's Distillery, Holborn.

To be obtained only at their Distillery

KINAHAN'S LL WHISKY v. COGNAC BRANDY.—This celebrated old Irish Whisky rivals the finest French Brandy. It is pure, mild, mellow, delicious, and very wholesome. Sold in bottles, 3s 8d each, at most of the respectable retail houses in London; by the appointed agents in the principal towns in England; or wholesale at 8 Great Windmill street, Haymarket.—Observe the red seal, pink label, and cork branded "Kinahan's LL Whisky."

SOYER'S SULTANA SAUCE Relish, Succulente, Aromatic Mustard, &c.—These excellent preparations, of which the LANCET, in its sanitary analysation of Articles of Food, reported so favourably of their purity and wholesomeness, are to be obtained of all grocers and Italian warehousemen in the United Kingdom. They are indispensable with Fish, Meat, Game, Poultry, Hashes, Stews, and all made dishes, impart also to Chops, Steaks, and Cutlets a most delicious flavour. Wholesale, CROSSE and BLACKWELL, Purveyors to the Queen, 21 Soho square, London.

ADOPTED LARGELY BY HER MAJESTY'S GOVERNMENT.

CHEAP, LIGHT AND DURABLE ROOFING.

CROGGON'S PATENT ASPHALTE ROOFING FELT has been extensively used and pronounced efficient and particularly applicable for warm climates

1st. It is a non-conductor.

2nd. It is portable, being packed in rolls, and not liable to damage in carriage.

3rd. It effects a saving of half the timber usually required.

4th. It can easily be applied by any unpractised person.

5th. From its lightness, weighing only about 42 lbs to the square of 100 feet, the cost of carriage is small.

INODOROUS FELT, for damp walls and for damp floors, under carpets and floor cloths; also for lining iron houses, to equalise the temperature.

Price ONE PENNY PER SQUARE FOOT.

CROGGON and CO'S PATENT FELTED SHEATHING for Covering Ships' Bottoms, &c., and DRY HAIR FELT, for Covering Steam Boilers, Pipes, &c., preventing the radiation of Heat, and saving 25 per cent. of Fuel.

Samples, testimonials, and full instruction on application to CROGGON and CO, 2 Dowgate hill, London and at 2 Goree Piazzas, Liverpool.

DR DE JONGH'S (Knight of the Order of Leopold of Belgium)

LIGHT-BROWN COD LIVER OIL Prescribed by the most Eminent Medical Men as the safest, speediest, and most effectual remedy for CONSUMPTION, CHRONIC BRONCHITIS, ASTHMA, COUGHS, RHEUMATISM, GOUT, GENERAL DEBILITY, DISEASES OF THE SKIN, RICKETS, INFANTILE WASTING, AND ALL SCROFULOUS AFFECTIONS.

Extensive experience, and the recorded testimony of numberless eminent medical practitioners, prove that a half-pint of Dr de Jongh's Oil is far more efficacious than a quart of any other kind. Hence, as it is incomparably the best, so it is likewise unquestionably the cheapest.

Palatableness, speedy efficacy, safety, and economy, unitedly recommend this unrivalled preparation to invalids. NO OTHER OIL CAN POSSIBLY PRODUCE THE SAME BENEFICIAL RESULTS.

Opinion of Sir HENRY MARSH, Bart., M.D., T.C.D., Physician in Ordinary to the Queen, in Ireland; President of the Royal College of Physicians in Ireland, Visiting Physician to Stevens' Hospital; Consulting Physician to the City of Dublin, St. Vincent, and Rotunda Hospitals, &c., &c.

"I have frequently prescribed Dr de Jongh's Light Brown Cod Liver Oil. I consider it to be a very pure Oil, not likely to create disgust, and a therapeutic agent of great value.

"Merrion Square, Dublin,
"September 6, 1860."

Sold ONLY in IMPERIAL Half-Pints, 2s. 6d.; Pints, 4s. 9d.; Quarts, 9s., capsuled, and labelled with DR DE JONGH'S stamp and signature, WITHOUT WHICH NONE CAN POSSIBLY BE GENUINE, by respectable Chemists.

SOLE CONSIGNEES, ANSAR, HARFORD, and CO., 77, STRAND, London, W.C.

CAUTION.—Beware of Proposed Substitutions.

66 Queen street, London, 23rd August, 1860.

MESSRS R. WOTHERSPOON and CO., 46 Dunlop street, Glasgow,

DEAR SIRS,—I have, as requested, to-day visited the Royal Laundry, with reference to the advertisement of the Nottingham firm, who state that their starch has been used for many years in the Royal Laundry, and have been assured by Mr Thompson, the superintendent, that none but yourselves have any right to state that they supply starch to Her Majesty's Laundry, as no other starch is there used, nor has been used for some years, but the Glenfield Patent Starch. I have been further assured that your starch continues to give complete satisfaction, and that though trial has been made of samples of various starches, none of these have been found nearly equal in quality to the Glenfield.—I am, dear Sirs, your obedient servant. WM. BLACK.

CHUBB'S PATENT SAFES —the most secure against Fire and Thieves.—CHUBB'S FIRE-PROOF STRONG ROOM DOORS. CHUBB'S PATENT DETECTOR and STREET-DOOR LATCHES. CHUBB'S CASH and DEED BOXES. Illustrated Price-list gratis and post free.

CHUBB and SON, 57 St Paul's churchyard, London; 28 Lord street, Liverpool; 16 Market street, Manchester; and Wolverhampton.

IMPORTANT NOTICE.

GLENFIELD PATENT STARCH is the only STARCH used in HER MAJESTY'S LAUNDRY.

And as some unprincipal Parties are now making and offering for Sale an Imitation of the

GLENFIELD STARCH,

we hereby caution all our Customers to be careful, when purchasing, to see that the word GLENFIELD is on each Packet, to copy which is Felony.

WOTHERSPOON and CO., Glasgow and London.

S. W. SILVER AND CO., OUTFITTING WAREHOUSES, 66 and 67 CORNHILL, E.C.

SPECIAL NOTICE.

E. MOSES AND SON beg to remind their Friends and the Public that their new Branch Establishment at the corner of Tottenham Court road and Euston road was opened on the 6th November.

E. MOSES and SON, MERCHANT TAILORS, WOOLLEN DRAPERS, HATTERS, HOSIERS, BOOT and SHOE MAKERS and GENERAL OUTFITTERS.

London Houses:
Corner of Minories and Aldgate.
New Oxford street, corner of Hart street.
Corner of Tottenham Court road and Euston road.

Country Establishments:
Thornton's buildings, Bridge street, Bradford, Yorkshire, Fargate, Sheffield.

EXTRACTS FROM THE PRESS.

"Upon each floor, there are small apartments called the 'trying-on rooms,' affording customers an opportunity of avoiding the guess work which has hitherto prevailed in ready-made emporiums, and everywhere immense mirrors are placed in which the buyer may satisfy himself with the fit and shape of the garment which he proposes to purchase."—STANDARD, 21st Nov., 1860.

"On the whole, the new establishment of Messrs E. Moses and Son is decidedly the most complete of its class in the Metropolis."—MORNING HERALD, 21st Nov. 1860.

"The whole exterior of the building presents a noble aspect. It combines an appearance of lightness and solidity, grace, and strength."—ILLUSTRATED NEWS OF THE WORLD, Dec. 1st, 1860.

ALLSOPP'S PALE OR BITTER ALE.—Messrs S. ALLSOPP and SONS beg to inform the Trade, that they are now registering orders for the October Brewings of their Pale Ale in Casks of 18 Gallons and upwards, at the Brewery, Burton-on-Trent; and at the undermentioned Branch Establishments:—

Messrs SAMUEL ALLSOPP & SONS

ABRIDGED PROSPECTUS.

Freehold land is universally acknowledged as the only real security for the investment of capital.

This valuable estate, as well as being good farming land, is heavily covered with valuable timber, and contains in great abundance first class coal and iron, easily and cheaply worked, for the sale of which markets have already been opened up at very remunerative prices.

By the Great Kanawha River, which is daily navigated by steamers 30 miles above this estate, shipments of the products of the estate can be made to all the great markets in the Ohio and Mississippi Valleys, containing a population of about 10 millions.

After a careful examination of the various sources of revenue, it is estimated with great confidence that the net profits will yield an immediate dividend of 10 to 15 per cent. per annum, and that it will gradually increase; also that from the sales of land, shareholders will be reimbursed their entire capital within a comparatively short period.

No shareholder will incur any liability beyond the amount of the shares allotted to him.

Pamphlets, giving full details of property, prospectuses, reports from the most eminent engineers of the United States and by a surveyor sent from England, forms of application for shares, and of bankers' receipts for deposits, may be obtained from the brokers; or from the Secretary, 113 Fenchurch street, London, E.C.

Form of Application for Shares.

To the Directors of the Great Kanawha Company, (Limited), 113 Fenchurch street.

Gentlemen,—Having paid to the Bankers of the Company the sum of £ being the amount of the deposit of 10s per share, I hereby request you to allot me shares in the above Company, or any less number, subject to the regulations of the Company.—Dated this day of , 186 .

SUPPLEMENT
TO
The Economist.

THE SUPPLEMENTAL FRENCH TREATY.

[GRATIS.]

Vol. XVIII. SATURDAY, DECEMBER 8, 1860. No. 902

CONVENTION BETWEEN HER MAJESTY AND THE EMPEROR OF THE FRENCH, SUPPLEMENTARY TO THE TREATY OF COMMERCE OF JANUARY 23, 1860; WITH A TARIFF ANNEXED THERETO, SIGNED AT PARIS NOVEMBER 23, 1860.

(Ratifications exchanged at Paris, November 30, 1860.)

After the usual preamble, the annexed Articles are inserted:—

Article 1.—The articles of British origin or manufacture enumerated in the tariff annexed to the present Convention shall, when imported direct from the United Kingdom under the British or the French flag, be admitted into France at the duties specified by the said tariff.

Article 2.—The rules established by Articles 2, 4, 5, 6, 7, and 8 of the Convention concluded on the 12th of October last between the high contracting Powers, for the proofs of origin, the declarations of importation, and the valuation by experts of the productions taxed *ad valorem*, shall equally apply to the various articles of British origin or manufacture enumerated in the tariff annexed to the present Convention.

Article 3 of the Convention of the 12th of October last, which exempts the importers of machines, or detached prices of machines, of British origin or manufacture, from the obligation of producing models or drawings, is declared to be applicable to all the goods the importation whereof was subject to that formality, and which are comprised either in the present Convention or in that of the 12th of October last.

Article 3.—Independently of the duties of Customs stipulated in the Tariff annexed to the present Convention, and by application of Articles 1 and 9 of the Treaty concluded between the high contracting Powers on the 23rd of January last, the undermentioned articles of British origin or manufacture shall, on their importation into France, and by way of compensation for equivalent duties paid by French manufacturers, be subject to the supplementary duties hereinafter prescribed:—Raw soda, 4f 35c; crystals of soda, 4f 35c; sulphate of soda, pure, anhydrate, 6f; crystallised or hydrate, 2f 40c; impure, anhydrate, 5f 40c; crystallised or hydrate, 2f 10c; sulphito of soda, 6f; salt of soda, 11f; hydrochloric acid, 3f; chlorate of lime, 10f; chlorate of potash, 66f; chlorate of magnesium, 4f the 100 kilogrammes: plate glass or large mirrors, 1f the superficial metre; glass ware, window glass, and other white glass, 3f 20c; bottles, 1f 25c: artificial ultramarine, 11f; sal almoniac, 16f; kelp, 1f 50c; salts or raw residue of the calcination of beet-root refuse, 1f 25c; salt of tin, 3f: soap, white or marbled, composed of alkalis and oil of olives, or oleaginous seed, pure or mixed with animal fat, the oil composing at least half the mixture of oleaginous bodies, 8f 20c; the oil composing less than half in the mixture of oleaginous bodies, 6f; of animal fat, pure, 6f; mixed with resin, 6f; of palm or cocoa-nut oil mixed with animal fat, 4f; coloured, composed of oils from seeds or of animal fat, 6f the 100 kilogs: pure alcohol, 90f; beer, 2f 40c; spirits of wine varnish, per hectolitre of pure alcohol contained in the varnish, 90f the hectolitre. It is understood that refined sugar is not comprised in this list, because the duty of 41 francs per 100 kilogrammes, fixed on the importation of that article, includes the duty on consumption with which it is now charged in France. It is equally agreed between the high contracting Powers that, in the event of the modification or the suppression of the duties of Excise now imposed upon French manufacturers, goods of British origin and manufacture shall, with regard to such duties of Excise, be subjected to the same conditions as similar French goods. If, however, in consequence of the suppression of any such duties, the Government should establish a supervision or control, or an administrative system over certain articles of French manufacture, the direct or indirect charges which may be borne by the French manufacturer shall be countervailed by an equivalent surtax imposed upon similar British articles. It is further understood that if drawbacks are granted to other articles of French manufacture, the duties of Customs which are imposed upon similar articles of British origin or manufacture shall be augmented by a surtax equal to the amount of the drawbacks.

Article 4.—With regard to pure and mixed tissures taxed *ad valorem*, the valuation of which may appear to the French Government to present difficulties, they reserve to themselves the power to designate the Custom House of Paris exclusively for the admission of such goods.

Article 5.—Each of the high contracting Powers engages to extend to the other any favour, any privilege, or diminution of tariff which either of them may grant to a third Power in regard to the importation of goods mentioned, or not mentioned, in the Treaty of the 23rd of January, 1860.

Article 6.—The tariff annexed to the present Convention shall come into force within a time which shall not be later than the 1st of June, 1861, for yarns and tissures of flax, hemp, and jute, and the 1st of October following for all other articles.

Article 7.—The present Convention shall have the same duration as the Treaty concluded between the high contracting parties on the 23rd January last, of which it is a complement.

Article 8.—The present Convention shall be ratified, and the ratifications shall be exchanged at Paris within 15 days, or sooner if possible. In witness whereof the respective Plenipotentiaries have signed it, and have affixed thereto the seal of their arms. Done in duplicate, at Paris, the 16th day of November, 1860.

Turmeric, in powder	5 0 ...	5 0	Prohibited.
Hydrochloric acid (muriatic acid)	0 60 ...	0 60	74f 40c.
Caustic soda	8 0 ...	5 0	
Carbonate of soda (salt of soda) of all degrees	4 50 ...	3 0	31f 80c
Artificial soda (raw)	2 30 ...	1 50	
Carbonate of soda, crystallised (crystals of soda)	2 30 ...	1 50	31f 80c
Sulphate of soda, sulphite of soda	1 20 ...	1 0	7f 20c to 12f
Sulphate of soda, crystallised (Glauber's salts)	1 0 ...	0 70	7f 20c to 12f
Bicarbonate of soda, and other salts of soda, not specified	5 25 ...	3 50	
Chloride of lime	4 25 ...	2 80	
Chloride of potash	38 60 ...	25 75	
Soap, ordinary, and for perfumery	6 0 ...	6 0	Prohibited.
Artificial ultramarine	15 0 ...	15 0	
Red phosphorus	10 per cent. ad valorem.		
Aluminium	10 per cent. ad valorem.		
Aluminate of soda	10 per cent. ad valorem.		
Chloride of aluminium	10 per cent. ad valorem.		
Chromate of potash	10 per cent. ad valorem.		180f
— of lead	10 per cent. ad valorem.		90f
Colours (not specified) dry, in paste, and liquid	10 per cent. ad valorem.		21f to 42f
Stearic acid	10 per cent. ad valorem.		30f to 42f
Glue and gelatine	10 per cent. ad valorem		30f to 120f
Varnish:—Oil	10 per cent. ad valorem.		98f 40c
Essential oil	10 per cent. ad valorem.		98f 40c
Spirits of wine	10 per cent. ad valorem.		98f 40c
Orchella dyes of all kinds	5 per cent. ad valorem.		120f to 240f
Chymical, not specified	5 per cent. ad valorem.		Prohibited.
GLASS AND CRYSTAL WARE.			
Mirrors of less than 1 metre square	10 per cent. ad valorem.		120f
Plate glass and mirrors, unpolished	1 50 square superficial metre.		Per mètre carré 18f to 72f
Plate glass silvered or polished	4 0 square superficial metre.		19f 80c to 79f 20c.
Bottles of all shapes	1 30 100 kil.		Prohibited.
Window glass, plain	3 50 —		Prohibited.
Glass, coloured, polished, or engraved, and for watches and optical purposes	10 per cent. ad valorem.		Prohibited (except for watches and optical purposes, from 12f to 24f p 100 kil).
Glass ware and table glass, white or coloured	10 per cent. ad valorem.		Prohibited. Per kil.
Vitrifications	40 per cent. ad valorem.		1f 20c to 7f 20c.
Enamelled glass	10 per cent. ad valorem.		Prohibited.
Articles of glass not enumerated	10 per cent. ad valorem.		Prohibited.
Broken glass and cullet	Free.		Free.

Description of Articles.	Rates of Import Duties. 1860.	1864.	Former Duties (adding the two decimes).
Rock crystal, rough or worked	Free.		Rough, Free Worked, prohibited
N.B.—Rock crystal mounted will pay as jewellery			
EARTHENWARE AND POTTERY.			
Common Ware.			
Tiles of all kinds	Free.		7f 20c
Bricks	Free.		7f 20c
Fire-bricks	Free.		7f 20c
Gas retorts	Free.		7f 20c
Drainage pipes and others	Free.		7f 20c
Crucibles of all sorts, including those of plumbago or black lead	Free.		7f 20c
Clay pipes	Free.		7f 20c
Glazed or not, of all shapes	Free.		7f 20c
Glazed, with decorations of one or more colours, flat or hollow	5 0		7f 20c
Stoneware and Earthenware.			
Utensils and apparatus for the manufacture of chymical products	Free.		12f
Common of all sorts, flat and hollow, including bottles, flasks, household articles, kitchen utensils, &c.	4 0		18f
With tin gleze-coloured paste, white glaze	Free.		58f 80c
With coloured glaze, majolica, with varnish of more than one colour	20 percent. ad valorem	15 percent ad valorem	58f 80c
Fine earthenware	...ad valorem	...ad valorem	Prohibited.
Fine stoneware			Prohibited.
Porcelain, white or decorated, of all kinds, and Parian and biscuit (white)	10 per cent. ad valorem.		196f 80c, 392f 40c
VARIOUS ARTICLES.			
Artificial flowers	Free.		12f pr cent. ad val.
Modes	Free.		12f pr cent. ad val.
Mercery of all kinds	10 per cent. ad valorem.		Per 100 kilos. 120f to 240f
Buttons, fine or common, other than haberdashery	10 per cent. ad valorem		120f to 240f
Brushes of all kinds	10 per cent. ad valorem.		
Musical instruments and parts of instruments	10 per cent. ad val.		Pianos, 360f to 480f each; church organs, 480f; harps, 43f 20c.
Pins of all kinds	Per 100 kil. 50f from Dec. 1, 1860.		Per 100 kil.
Indiarubber manufactures:—	f c		
Pure or mixed	20 0		24f to 60f
Applied upon tissues in pieces or upon other materials	100 0		240f
Made-up wearing apparel	120 0		240f
In elastic tissues of any dimensions	200 0		240f
Boots and shoes	60 0		240f
N.B.—Articles of gutta-percha paying the same duties as India-rubber.			
Oil and floor-cloth:—For packing	5 0		84f to 264f
For furniture, hangings, and other purposes	15 0		84f to 264f
Sealing wax	30 0		120f
Blacking of all kinds	4 0		147f 50c
Ink, printing, drawing, and writing	20 0		72f to 120f
Cordage, cables, and fishing-nets	20 0		30f
Fish, freshwater:—Fresh	Free.		Free.
Prepared	10 0		48f
Fish, sea:—Fresh, dry, salted, or smoked (except cod)	10 0		48f
Sauces and pickles	25 0		240f
Cheese, hard	10 0		18f
Beer	2f per hectolitre, in addition to the internal tax.		7f 20c per hecto.
Molasses:—Containing less than 50 per cent. of saccharine matter	Per 100 kil. f c 14 0		Prohibited.
Containing more that 50 per cent. of saccharine matter	Same as raw sugar.		
Alchohol, per 100 degrees	15f per hectolitre, in addition to the internal tax.		30f per hectolitre.
Slates:—For roofing	4 0 per 1,000		9f, 55f 20c p 1,000
In squares or tablets	10 0 per 100		36f per 100

SIR C. TREVELYAN'S EXPLANATION.

SIR C. TREVELYAN has published a memorandum on the series of events which led to his recall, which seems to require some consideration from a financial journal. This remarkable paper raises two questions of very different kinds and very different degrees of interest; one of these is financial and the other personal; we shall say a few words upon each.

The financial question suggested by Sir C. Trevelyan is the broadest and most important in Indian finance. Sir Charles maintains strongly and plainly that no new taxes are necessary in India; that the sources of revenue which were in existence before the Budget of last February were amply adequate to the real wants of the State; that Indian financiers should not waste their labour and ingenuity on the invention and administration of new taxes, but should apply themselves steadily and consistently to the reduction of *expenditure*,—the most "natural" mode of establishing a financial equilibrium, and, as Sir Charles believes, in this case an efficient mode.

Sir Charles is, for obvious reasons, anxious to prove that he formed and published this opinion before Mr Wilson arrived in India, and before there was any reason to believe that he would consider new taxes to be necessary. And, on personal grounds, we are glad to know that such is the case. Indeed, we wish this question to be argued, as Sir Charles has now argued it, with no needless reference to feelings or to persons. But, as far as respects the correctness of the opinion itself, we are by no means sure that it will derive strength from the time when it was formed. It is evident that it must have been formed on very insufficient data. Before Mr Wilson arrived in India, the anticipations which the Government put forward as to the future Indian deficit were far too sanguine. In September, 1859, a statement was published at Calcutta, which stated that

	£
The deficit for 1859-1860 would be	6,499,981
— 1860-1861 —	3,340,680
For the two years	9,859,661

From a paper laid on the table of the House of Commons in July last, it appears that the true figures are these:—

	£
Deficit for 1859-1860	8,961,727
— 1860-1861	7,472,303
For the two years.....	16,434,030

—a larger deficit than even Mr Wilson expected, though in February it was not usually thought that he was inclined to be too sanguine. It would rather seem, however, as if Sir Charles did not consider the precise amount of the Indian deficit important, and as if indeed an error of millions were not material, since he thinks that there may be so great a reduction of expenditure as will remove entirely *any* deficit, however large. The force he has in reserve is so ample that he does not care to estimate precisely the difficulty he has to encounter.

The great department on which Sir Charles relies for his contemplated reductions is the military department; and this is the *only* resource on which he can rely; for the suggestions which he makes will probably tend rather to augment than to diminish the civil expenditure. And if no reductions had been effected—if the military expenditure were still what it was in 1858-59—if no considerable exertion had been made to reduce an expenditure exceptional in its very nature, and arising plainly in great part from the exigency of the time,—the case of Sir Charles would be unanswerable. If the military expenditure of a year of a great mutiny—of a year of a close struggle for existence—were made the standard or anything like the standard for succeeding years of comparative tranquillity, we should all of us thank the objector who indicated the absurdity of such a supposition. But what are the facts? The Parliamentary paper to which we have before referred* gives the figures as follows:—

	£
Military expenditure 1856-57.....	11,491,905
— — 1857-58.....	15,569,925
— — 1858-59.....	21,080,948
— — 1859-60.....	17,711,665
— — 1860-61.....	15,276,320

showing a reduction of nearly six millions in two years, and, notwithstanding that great reduction,

	£
The expenditure for 1860-61 was estimated at	45,234,963
The revenue — —	37,762,660
Deficit	7,472,303

—so little successful was even this unsparing economy in effacing the deficiency to be cured.

Nor is it true that no further reductions were contemplated at Calcutta. It was hoped by Mr Wilson (as we have the best reason to know) that he should be able, with the valuable aid given to him, to reduce the expenditure three millions and a half more, and he only anticipated that it would be necessary to raise somewhat less than four millions or thereabouts. Sir Charles, we must be permitted to say, throughout his memorandum speaks as if a reduction of expenditure were a discovery of his own, and were relied on by no one but himself; whereas the plain truth is that immense reductions have been made, and are making, by those whose duty it is to attend to that department.

The real issue is this:—Can Sir C. Trevelyan prove that the Indian expenditure is likely to be reduced by more than nine or ten millions? Mr Wilson hoped and based his estimates on the hope of reducing it to that extent. But still a large deficit remained.

We must be allowed to remind Sir Charles that there are two ways of proposing an economy—one useful and the other useless. Unfortunately the useless way is the most

* All these figures are taken from Parliamentary paper 493 of last session, on which Sir C. Wood founded much of his Budget speech last autumn, and their accuracy has not been impugned.

popular. Every one knows that the easiest way to gain a cheer in the House is to deliver some vague and sounding panegyric on the necessity of economy: every one is pleased at it, and no one is pained by it: mere words hurt no one. The only objection to such speakers is, that for all they do, the expenditure remains just what it was before. The only useful economy is specific, and that is always very difficult and always very unpopular. In England one of the most difficult measures to carry into practice is a small saving which many people are interested to prevent, and no one in particular is interested to effect. All over the world human nature is much the same. It is the same in the greatest affairs and in the smallest. Let a man try to save 100*l* in his household, and then he will know what it is to "economise" at the rate of millions a year in the vast, unwieldy, miscellaneous Empire of India. Every financier who is also a man of the world—and no other is worth much attention—will, we are persuaded, agree with us in thinking that the nine or ten millions which Mr Wilson hoped to economise are a huge sum, which staggers even a hopeful fancy—which it will need a rare discretion and a rare persistence to save—which no one should reckon on too securely until it is saved—which it would be a sanguine dream to hope *in real life* materially to exceed.

Sir Charles elaborately explains the dangers of the course which have been adopted, and no one has ever said that an increased taxation in India was free from great risks. But are there not greater dangers in the course which he has himself recommended? Is there not the great danger that under the pretext of a coming economy all things will continue exactly as they are now? Economy is precisely a reform which is always *about* to be made. If Sir Charles's plan had been adopted, the result would have almost certainly been that for many years projects of saving would have been periodically proposed; that on each succeeding occasion, by some "unto-"ward conjuncture," some unexpected chance, they would have been precluded from succeeding; each occasion we should be told was "exceptional;" we should be assured that it would never occur again; yet by a fatality—so in the course of time men would come to speak—on the very next trial some new accident would prevent the anticipated saving from being realised. And this is a serious danger both to the English taxpayer, and to the Indian Empire. A chronic deficit of millions in India we may be sure will be paid by us. *How* it will be paid we do not know, but paid it doubtless will be. India belongs to us, and if the Indian Exchequer should permanently be in disorder, we cannot hope to escape. Sooner or later a continuous deficit in India will mean continuous additions to the income tax in England; and we must make up our minds to take the necessary steps for securing an equilibrium while it is yet time, instead of wasting precious years and wearying our minds in hoping to carry economy to an extent which we know in our hearts to be impossible. Nor is the course which Sir Charles recommends less dangerous to India. Whatever he may intend, the *effect* of his scheme would be to hang an indefinite and huge economy over the whole of India. In simple words, all servants of the Government, civil and military, native and European, would live more or less under a chronic sentence of dismissal: every one would know that some one was to be got rid of: no one would know who the victim was to be,—whose *status* was to be impaired, whose income was to be diminished. We should be governing an unattached Empire by malcontent officials,—and we should be doing so for years. Great as may be the dangers of the collection of an income tax, they sink into imperceptible insignificance when contrasted with this:—great as are the dangers of the effectual remedy, they are immeasurably less than the dangers of the ineffectual.

We have left ourselves little space to speak of the personal question suggested by Sir C. Trevelyan's paper, and we scarcely desire to say anything. The world has given judgment. The broad common sense of public opinion has decided that the publication of the Madras Minute was an act of insubordination, and no refined reasoning will avail now. It has been universally felt that in presence of millions of Asiatics,—of countless "aliens in race, in language, in reli-"gion,"—the few Englishmen in India must loyally adhere to the Supreme authority. A soldier may "adduce consider-"ations" to prove that he did right in deserting at a moment of peril. But he will not be listened to, nor will Sir Charles Trevelyan. The steady instinct—the plain peremptory judgment of the mass of men is against them, and it is right that it should be against them. The world, as we said, has given judgment, and we at least need not continue the controversy.

THE DUTY OF THE REPUBLICAN PARTY IN THE UNITED STATES.

The political situation of the American Union has perhaps never been so full of painful interest to Englishmen, as it is at the present crisis. All the former crises through which it has passed since it first established its independence of England seem trivial in comparison with the present. Twice before indeed, in 1820 on occasion of the Missouri Compromise, and again in 1825 on occasion of Georgia's attempt to annex Indian territory, a discussion of precisely the same nature, founded on the Slavery question, was carried even to violent threats of disunion. And a third time, on occasion of the memorable tariff struggle in 1832, South Carolina went as far as she will doubtless go now, in resisting the authority of the Federal Government. But on none of these occasions was the quarrel so ripe as it now is. The tariff quarrel could not, by the nature of things, involve issues half so critical and widely diffused as the Slavery question. And at the time of the strictly analogous quarrels in 1820 and 1825, the broad antagonism between a Slavery and an Anti-Slavery policy, though it was understood distinctly enough by *statesmen*, had not yet fully penetrated the popular mind. The very fact that the present passionate excitement has arisen *apropos* of no special emergency,—that it is neither a question of the admission of a new Slave State, nor of the extension of Slavery into any given territory, nor of the enactment of a new Fugitive Slave Law, but that it is a broad issue between a Slavery and Anti-Slavery *policy*, and that it is known to rage most fiercely exactly in those quarters where there is least local grievance, proves that the issue is now ripe, and is grasped by the people at large, which in 1820 and 1825 was only fully understood by the leading statesmen of the day.

And it is impossible to exaggerate either the magnitude of the issue thus opened, or the dangers which attend its discussion. On the issue depends the fate of near half the North American territory, and ultimately, it may be, of the Isthmus and portions of South America, as well as the immediate political future of the Northern States. If the deeply ulcerated semblance of civilisation of which the great Southern planters are so proud, is to be permitted to spread, and reinforce itself by that "reciprocation of mutual blessings between Africa and America" (as the Slave Trade is now euphemistically termed), which is the real and ultimate stake played for, then must the white population of the Southern States soon sink to even a lower level than the half-castes of the Mexican Isthmus,—and the aristocratic South ultimately become what its worst population is already called, "mean" almost without alloy.

But it is not on the issue at stake—almost unparalleled as that really is in importance—that we now wish to write. It is rather on the danger menacing the Republican party in their present critical position. No American party has ever been in a position so urgently requiring the highest political qualities, the completest union of temper and moderation with resolution and far-sighted sagacity. It is obvious from all the recent public expressions of Republican opinion, whether by Statesmen or in the public Press, that they are not a little alarmed at their own victory,—that the bluster of their adversaries is telling somewhat upon them, and that they may even be induced to abandon all the fruits of their success. They are, no doubt, in an extremely difficult position. Not only is the danger of disunion far more serious than ever, but they are in a minority in both Houses of Congress, and can, for the present, carry no measure without the aid of some section of their opponents. This position inevitably suggests, nay absolutely requires a compromising certain amount of compromise,—and we only fear that this impulse,—always stronger in the statesmen of a Federation than in those of a single State,—and necessarily stronger in the statesmen of the American Federation than in that of almost any other Federation that ever existed from the essentially an-

tagonistic elements of which it is composed,—may carry them too far, and paralyse the party on which the salvation, if not of the Union, at all events of the Northern States depends, by internal dissensions and general discredit.

The one principle on which the Republican party is founded is the conviction that Slavery is a disastrous evil to the Union at large, the spread of which must be prevented, and all the natural feeders of which must be, *so far as the Federal authority will allow*, steadily obstructed and finally choked up. This, and this alone, is essential to the party. Every constitutional means must be used to arrest the spread of Slavery, and to diminish the force of the motives which at present prompt its supporters. Any concession either to the South or to the Unionist party at the North, which is consistent with pursuing this policy boldly and habitually, may be, perhaps ought to be, made. Any concession which sacrifices this policy is suicidal.

Now, what are the compromises which the Unionist party demand from the Republicans? They are as follows,—first, the repeal of all the "personal liberty bills" by the Northern States which prevent the practical execution of the Fugitive Slave law; secondly, the admission of perfect equality in the eye of Federal law between Slave and other property, whether in the territories or otherwise, except so far as special States in the exercise of their supreme prerogatives, forbid the holding of that kind of property by their own citizens. How far can the Republicans comply with either of these requisitions, which are made by the most moderate Unionists in Georgia,* without sowing the seeds of their own ultimate disgrace?

(1) As to the personal liberty bills, it cannot we think be doubted that the South is entitled under the Constitution to some sort of Fugitive Slave Law. The fourth article says expressly, "No person held to service or labour in one State, "under the laws thereof, escaping into another, shall, in "consequence of any law or regulation therein, be discharged "from such service or labour, but shall be delivered up on "claim of the party to whom such service or labour may be "due." This constitutes we think, a real contract between the States as one of the conditions of union; and if by any legislation the Northern States have evaded the force of the contract, we cannot wonder that the Slave States feel aggrieved. At the same time it must be remembered that the personal liberty bills are *constitutional* evasions of the surrender. They enact provisions rendering identification difficult, which are, in form, securities against the unjust apprehension of free Northern citizens,—an injustice of which there has been one real example since the law of 1850 was enacted. Now if the Constitution gives the Southern States a right to claim the surrender of their fugitives, it undoubtedly gives the Northern States a right to insist on tests which shall render all errors of this kind practically impossible. And the line can never be drawn between too strict precautions in this respect, and good faith, while the issue is of such immeasurable *moral* interest to the North. The conscience of the Free States quite properly revolts against the surrender of fugitives to an oppression so insupportable, and it is natural enough that artificial difficulties should be put in the way while such a stake remains to be played for. Nor can the Republican Executive, without really incurring deserved odium and disgrace, insist on breaking down all refined constitutional obstructions to the surrender of a fugitive from justice. But a compromise has been suggested, which is, we think, both feasible and consistent with Republican credit. In the debates on the Fugitive Slave Law in 1850, a clause was proposed and supported warmly by most of the *Southern* representatives asking for *compensation* from any Free State into which it could be proved that any slave had escaped, in case of his non-surrender. Now, though the Republicans cannot and ought not to break forcibly through the constitutional obstructions which prevent the surrender of a slave,—they can, and we think they ought, to concede this compensation clause, and to encourage the Free States to buy off the fugitives whom they will not surrender. Thus much is clearly due to constitutional obligations. This provision would be akin to one already common in the Slave States, which entitles the owner of any Slave who is executed for offences against the laws of that State, to a State compensation for the loss of his property. A compensation which the South obliges its own citizens to accept as an equivalent for the loss of a Slave, it could not refuse to accept from the North. If this would not satisfy the Slave States, nothing further either can or ought to be done. The evasion of the law of 1850 is, as we said, though a grievance to the South, yet a constitutional evasion of it,—and unless the Slave States are willing to accept a compromise round which no such artificial restrictions would be likely to gather as necessarily gather round the identification of a fugitive slave whom every true man longs to protect against his pursuers,—they must be left to find their own remedy.

(2) As to the second condition asked for, which requires that all property rights, whether in persons or land or things, should be regarded as equal before the federal law, and therefore as equally entitled to protection in the territories where the federal law has sway,—we think *no* concession of this kind can be made without absolute ruin to the credit of the Republican party. All their future measures for the restriction of Slavery, nay even their resolution to prohibit the Slave Trade, would be compromised by such an admission. It is quite clear that, constitutionally, Congress has power to distinguish between different kinds of property in all quarters where its jurisdiction is acknowledged. Moreover, if this were not clear, if it were really otherwise, the North, if it valued in the least its own welfare, would be compelled for its own sake to dissolve its unnatural identification with a system so corrupt that it pollutes all that it touches;—and to form a new union in which the Supreme Power should be at liberty to legislate on the very highest matters with which a State can have any concern.

* See Mr Stephens' able speech in defence of Union in the House of Representatives at Savannah, on 14th November last.

IMPERIAL INCONSISTENCIES.

Some observers of continental affairs regard the Emperor of the French as a politician of wonderfully sagacious and persistent views: others please themselves by representing him as a man without any policy at all. According to the first, his plans are all deeply laid, steadily pursued, and never abandoned,—now worked at underground, and now followed out in open day,—now directly and avowedly, now with an almost incredible amount of tortuousness and duplicity. According to the second, he has an infirm brain, full of restless fancies, hastily taken up and hastily thrown aside, constantly in conflict with each other, and following one another with a rapidity that is perfectly diseased. In the estimation of some, he is all impulse: in the estimation of others, he is all deliberation and intrigue. Some will have it that he is short-sighted, easily excited, and easily discouraged by difficulty or by opposition: others contend that he is the very impersonation of foresight, pertinacity, and coolness, knowing his objects distinctly, keeping them constantly in view, and scheming for their accomplishment with more than Machiavellian astuteness. Each estimate may appeal to various incidents in his career in confirmation of its accuracy: there is much truth in both: there is complete truth in neither. His conduct up to the date of his becoming Emperor favours one view: his vacillations and *revirements* subsequently, especially since the Italian campaign, strongly indicate the other.

The fact is that his *character* is by no means complete, rounded, and self-consistent. He combines incongruous qualities; he aims at incompatible objects. He has incurably inconsistent desires and expectations,—and his political knowledge is not extensive enough, nor his political acumen profound enough, to make him before hand conscious of the incurable inconsistency. He wishes for results, without being willing to pay the necessary price for them: he fancies he can obtain them cheaper than is possible,—hence his calculations are constantly at fault. Then he seldom consults others or takes advice: he acts on the spur of what he considers inspiration, and is, therefore, surprised into steps the consequences of which he has not foreseen; and these consequences traverse his own schemes. He has, besides, a fertile and a scheming fancy; and among the schemes which flash across him, some are wild, some are contradictory, and some are rashly and prematurely given to the public. He is far too unquiet a spirit always to be, or even to appear, wise.

Three exemplifications of this sort of inconsistency will occur to every one. Perhaps the most cherished public aim of the Emperor since his accession to power has been to develop the material prosperity of France,—to stimulate her agriculture, to render her resources more and more available by the multiplication of railroads, and to encourage and extend her commerce by the removal of prohibitions, and the substitution of a very cautious and modified form of free foreign competition. There can, we think, be no doubt as to the sincerity or the earnestness of his wishes in this direction. He was well aware that if he could give prosperity and wealth to the country, if he could make every Frenchman feel that his income was augmented and his prospects brightened, if he could occupy the peasantry with improved tillage and the *bourgeoisie* with extended trade, if in fact he could make the whole population feel that it was *better off*, more fully employed and more highly remunerated, than under previous *régimes*, his dynasty would be safe and his rule would be popular. But *quiet* is the very atmosphere, the indispensable condition, of mercantile enterprise and industrial activity: manufacturers will not employ artisans in the fabrication of goods for which they can secure no certain sale, and merchants dare not extend their ventures or multiply their engagements when political disturbances or political fears may at any moment supervene to upset the most sagacious schemes, to disturb commercial credit, and to bring embarrassment and possible ruin on the best established firms. The commerce and industry of France can only flourish and advance as the Emperor undoubtedly desires to make it do, in case he can induce and preserve in the public mind that sense of tranquillity and confidence which he is every day disturbing. Merchants, of all men, require to feel secure—to be able in some safe and reasonable measure to calculate upon the future: — and this is precisely what Louis Napoleon will never permit them to do. He exhorts them to peace of mind and courage; he assures them there is nothing to fear; that he has no schemes which can in any way disturb or menace the profound repose of Europe. But somehow his acts are perpetually creating perplexity and mistrust; he is so restless that no one knows what he will do next, but every one is always anticipating something new and startling; he arms actively; he intrigues incessantly; he has educated the public mind of Europe into a general state of feverish expectation. The consequence is that his exhortations and assurances absolutely go for nothing: the merchants of France dare not launch out; they are afraid to extend their credits or draw upon the future, for they feel that at any moment a single word or letter of the Emperor may overwhelm their best laid schemes with confusion and defeat. And for the same reason the employers of labour hesitate to give out work: the artisans of Paris are without wages, and the shopkeepers of Paris sigh in vain for a brisk and profitable trade.

Again, it is believed by those who have the best means of forming an opinion, that the Emperor—either from animosity to Austria and to the Pope, or from old associations and ideas, or with a view to some future and secret purposes of his own—has first accepted and then encouraged the enterprise of Victor Emanoel and the consolidation of the Italian Peninsula under his sceptre. It is even said that he urged the Piedmontese generals and authorities to do their work quickly. It is certain that he has done nothing to prevent them; that he has allowed them to overrun the Roman States, with the sole proviso that they must not interfere with the City of Rome and the so-called "Patrimony of St Peter," which is occupied by French troops. Yet at the eleventh hour, when the work was almost completed,—when a show of favour or even the continuance of inaction would have confirmed for him the character of a friend to the Italian cause, and secured to him the gratitude and admiration of those Peninsular patriots whom he is believed both to sympathise with and to dread,—he interposes to forbid the bombardment of Gaeta, and thus indefinitely to prolong the civil war;—when the proceeding can have no other result but to shed a vast amount of unnecessary Italian blood, to throw the Southern States back into confusion, and possibly to put to hazard the whole magnificent enterprise, of which he has assuredly been the chief instrument, and of which he might have reaped a large portion of the glory. The proceeding may have been a stroke of crafty and dangerous policy; or it may have been, as we believe, the dictate of a sudden and irrational impulse from which pride forbade him to withdraw:—but under any supposition, it was singularly at variance with his previous behaviour. Indeed the whole course of his proceedings from first to last in reference to Italian affairs has, more than anything else, shaken our notions of his being a Statesman with any clear and steady policy before him.

His recent decrees, ordaining Parliamentary publicity and freedom of speech and pen, afford another exemplification of his inconsistency. We have no idea of their being either a trap or a mere profession. We believe he really means what he says;—means, that is, to engraft the proceedings of liberty on the institutions of Despotism;—and moreover sincerely believes that he can do it. The appointment of M. Persigny as Minister of the Interior, and the bold and straightforward proceedings of that gentleman since his installation, go far to confirm us in this view. The Emperor finds that he has overdone the system of repression. He honestly desires to learn and understand the views and feelings of the French people, with the intention of consulting them and meeting them, as far as he can do so consistently with his own safety and his own power. He finds that a Press so gagged and a Legislative Chamber so packed and so bullied as those in France have been, are of little use for this purpose. They have become, far more than answers his object, for more perhaps than he desired, mere echoes of his own notions and his own creatures. He might have foreseen this—but he did not. He has no idea even now, of allowing either the Chamber or the Press to dictate his policy, or control his will, or oppose his Government; but he wishes them (in moderation) to criticise his measures and to abuse his ministers. They must not question the divine right of his dynasty, or the wisdom of universal suffrage; but they may present grievances and discuss laws. They may attack and vituperate his officials; but they must not bring his Government into contempt. The people may elect whom they like; but the mayors and the prefects must do all they can to direct the popular choice upon the right men. The newspapers and the deputies may expose abuses, explain the mischievous tendencies of this or that line of Imperial action, may even denounce the villany and jobbery of corrupt administrative agents; but they must not excite the minds of the people against those in power. They may speak freely and boldly; but they must speak temperately and tenderly as well. Meanwhile the old *laws* of Despotism remain, though its *temper* professes to be radically changed. *Avertissemens* are withdrawn; but the system of *avertissemens* remains unchanged. Prisons are opened; but the *loi de sûreté* is still there, and can fill them again at any moment. The nation is to have its head,—but the curb is kept still in its mouth and the saddle still upon its back. M. Persigny can see no reason why the Press should not be virtually as free as in England, so long as writers are public-spirited and honest. He forgets that we have trial by jury and the *Habeas Corpus*; and that the law of libel is with us administered by free tribunals and not by an irresponsible police. What will be the result of this singular but well-meant attempt to sew a new piece on an old garment, and to put new wine into old bottles, we have a sacred proverb which may help us to anticipate. In any case it is curious, and good may come of it in some fashion.

WHY DISCOUNT COMPANIES HAVE NOT BEEN SO SUCCESSFUL AS MIGHT HAVE BEEN EXPECTED.

One of the most considerable of the Discount Companies lately started in London is in the course of winding up; and none of the others, we may say without much fear of contradiction, have attained the rapid success which their founders hoped for them. It may be well to investigate very briefly the cause of this result.

First among the difficulties with which these Companies have to struggle, we may perhaps place the difficulty of the business in which they were engaged. Bill-broking is a difficult trade. A bill-broker in Lombard street professes to know the circumstances of a very large number of firms and persons scattered through England,—to watch them at

least so efficiently and constantly as to be sure of knowing any material change in their credit and solvency,—and he does so without any *apparent* means of information. A banker has one almost unfailing source of information. His own ledger rightly studied will tell him much of the transactions, of the habits, of the income, of the expenditure of his customer. The information so derived will be necessarily incomplete: it may easily be made the basis for hasty and mistaken inferences: to some extent an artful customer may mislead a banker by means of it. Still, after every such deduction, the account of a customer does and must, in the great majority of cases, give a banker very much valuable insight into the sort of facts which it is of the most importance to him to know. But a bill-broker has no such assistance. He has to acquire, to retain, and to adapt to changing circumstances, the same sort of knowledge which a banker has, without the important source of daily information on which all good bankers rely. In consequence, bill-broking requires an experience, a watchfulness, an *engrossment*, so to say, of mind hardly found in any other pursuit. The mind must be occupied almost fixedly, almost incessantly, with the shifting circumstances of miscellaneous traders; else, either it will forget some of them, or will take no heed of some of them; and if either of these events happen, a bad bill will be discounted.

Bill-broking, too, is not a business in which bad debts can properly be borne. Banking in general is not so. A merchant gets a large *profit* on the goods which he sells; and he can therefore afford to make a few bad debts. A banker who only gets mere *interest* on his money, cannot expect to be able to replace any loss of capital out of his much smaller gains. And the bill-broker is even in a worse position in this respect than the banker. The latter has large running accounts on which he pays no interest at all. The bill-broker pays interest for every shilling which is deposited with him, and makes his gains only out of the *difference* between the interest which he obtains and that which he pays. Of course, therefore, he can afford no bad debts,—and to have the skill to avoid them, must be the first qualification which he ought to possess.

Of course these are difficulties which may by the use of proper means be overcome. But still they are difficulties. It is difficult to find in a paid manager, or in a board of directors, the unremitting, ceaseless, absorbed attention which the *personalities* of bill-broking require. Still we are far from thinking it impossible. A manager with real interest in his work and in his Company (and such managers are not uncommon) might be found willing to give this unwearying attention; and if he were an able man besides, the results of his attention might be satisfactory. We consider, therefore, that the peculiar nature of bill-broking throws peculiar difficulties in the way of joint stock companies; but that it is possible, with due care and happy fortune, to surmount those difficulties.

A principal condition, however, of a first-rate Bill-broking Company would be a large paid-up capital not invested in the business itself. This would give confidence to the public, and would induce them to deposit their money there, and nothing else would give them that confidence. If the capital were large and were securely invested apart from the business, it seems to us that it would matter little whether the liability of the shareholders were limited or unlimited. The public, we believe, would judge favourably of a Company in which it saw a vast sum securely set apart for possible demands, either in one case or in the other. Most people in practice would not look further. We have no doubt that a Company with a capital, say of a million—not an extravagant sum if really large operations are to be carried on—would obtain large sums of money from bankers and others.

And what is more to the purpose, they would retain that money. All Discount Companies must publish accounts, and it is unsatisfactory to their depositors if there is not some considerable sum set down in them that is not absorbed in the business, and that is certainly available in a period of pressure. Without such a provision, no Discount Company can be safe. In a time of panic there will always be some pressure on them more or less; and without a tangible reserve they cannot be said to be prepared for it. No care in ordinary times—no skill in business—no judgment—no ability will compensate for the want of such a reserve. Every bill discounted may be good, but in a panic the depositors want money, and will be satisfied with nothing else.

If these two conditions were complied with—if a large capital subscribed were paid up—if that capital were so invested as to be a sure resource in time of need, we see no reason why good Discount Companies should not succeed,—not very rapidly perhaps; they would probably be experiments for some years; but nevertheless gradually, steadily, and in the end effectually.

THE MOTIVE OF THE MAORI WAR.

Some of our contemporaries who have taken up the clerical view of the New Zealand war have recently changed their ground. The statement of Archdeacon Hadfield that 80 or 90 per cent. of the real owners of the disputed land had never been consulted about the sale at all, appears to be so entirely fabulous, that its opponents now argue the question only on the *policy* of the war, and merely raise the question of justice incidentally, by suggesting an absurd and fallacious comparison between the rights of absentee owners of Irish lands—for which they or their ancestors have paid large sums,—and the property claims of emigrated Maoris who had once for a few years resided on a particular spot and then abandoned it to its previous desolation. The real question at issue is now shifted from the moral to the prudential point of view. It is asked, not whether the Governor had a justifying moral ground for war, but whether he had calculated the cost of it. "The question—"the whole question," it is said, "is whether this [the "Governor's] course of proceeding was or was not likely to "produce a war. If it was so, few people in England will "doubt the Governor's unfitness for his post. A good deal "of labour has been expended in discussing the validity of "William King's claim to the veto. But its invalidity, "even if proved, in no way diminishes the charge of im-"prudence and recklessness against the Governor. It was "quite clear that William King and his people believed in "his claim; and it is equally clear that 600 acres at the "Waitara were not worth a war like this." Of course it is quite clear; and it is equally clear that 600 acres at the Waitara were not in any way the motive of the war.

The true motive of the war was quite a sufficient one,—one, indeed, the force of which had for many years been growing stronger and stronger. The contemporary we have quoted above must surely know that the question at issue was not a particular land sale, but the general question of land sales in the Northern Island,—in short its continued settlement. That a party had been growing up among the natives hostile to any further sale of lands by natives to Europeans,—that this party had, especially in the neighbourhood of New Plymouth, obtained considerable support,—that William King was the foremost man of that party, and was trying to control the action of those legitimately entitled to sell by the mere authority of his position and name,—these are facts which form the very kernel of the whole dispute. The Governor did not go to war for a particular piece of land, but to repress pretensions so arrogant, so likely to spread, and so fatal to the extension of the European settlement in the island, as the following:—

"Friend the Governor,—Salutations to you. I have a "word to say to you and to Mr McLean. Do you hearken "to our Runanga respecting the land. Do you hearken: The "boundary commences at Waitaha, thence along the boundary "of Tarurutangi to Mangaraka, thence on till it reaches "Waiongana;—it there ends;—again it proceeds along the "course of the Waiongana stream till it reaches the boundary "of Paritutu, where that ends. Again it commences at the "mouth of the Waitaha, thence along the coast line in a "Northerly direction to Waioogana, Waitara, Turangi, "Waiau, Onaero, Urenui, Kaweka, Kupuriki, Waiti, "Paraeroa, Karakaura, Te Kawau, Pautama, and Mowha-"katino. The boundary of the land which is for ourselves "is at Mokau. The lands will not be given by us into the "Governor's and your hands, unless we resemble the sea "birds which perch upon a rock; when the tide flows the "rock is covered by the sea, and the birds take flight, for "they have no resting-place.....I have therefore written "to the Governor and you to tell you of the Runanga of this "new year, which is for withholding the land, because some "of the Maories still desire to sell land, which causes the "approach of death; it is said I am the cause, but it is not

"so, it is the men who persist; they have heard, yet they "still persist. If you hear of any one desiring to sell land "within these boundaries which we have here pointed out to "you, do not pay any attention to it, because that land "selling system is not approved of. This is all. Salutations, O Governor Browne, to you and to Mr McLean, and "do you write and send me your love. It is ended.—From "your friend, WIREMU KINGI WITI."

Now, as Mr Richmond said in his very able speech to the New Zealand Asembly, "The House must observe that "Waitaha is a small stream just beyond the Bell Block, "which is the extreme Northward boundary of the English "settlement. Waitaha is the Land Leaguers' boundary agreed "to at Manawapo. King, in the letter I have just read, "begins at Waitaha and runs inland straight along the English "line, and says 'You shall have nothing beyond the Waitaha, "'nothing between that and Mokau.' Now, I ask, is this a "claim of title? Is this the boundary of a Maori proprie-"tor? Why he includes all the Puketapu country!.....This "tyranny is the grievance of Mahau, the present head of the "Paketapu. Look at his letter to the Governor published in "in the *Maori Messenger* of the 30th April. This is the "grievance of Te Teira. This is what filled Taranaki with "bloodshed." The simple fact is, that the Governor had to choose, *not* whether he would or would not buy a particular piece of land, but whether he would or would not permit the dictation of a Maori Land League to override not only the fair expectations of the settlers, but the reasonable confidence of Maori vendors, who looked to be protected by the English in the exercise of their privileges as owners the more because they were co-operating with the interests of the settlers. Had the Governor permitted this, the Maori Land League must yearly have grown more presumptuous and threatening, and a stop must soon have been put to the colonisation of the Northern Island.

No doubt it would, as it turns out, have been wiser to wait for an accession of military strength. But as far as human foresight could discern, the military force was amply sufficient for its purpose, and probably if better directed would have prevented the outbreak of the war altogether. W. Kingi was probably acting alone, in the attitude he was then assuming,—the other tribes, especially the Waikatos, had shown no disposition to join him. And there was every reason to hope that decisive action would prevent the growth of a native party which might otherwise have become formidable. The policy failed; but we must ascribe its failure more to the military incompetence of the commander, than to the rashness of the Government.

THE CHINESE CONQUEST.

SUCCESS is sometimes more embarrassing than defeat. We were all shocked, and we were all indignant, on receiving the news of the disastrous repulse from the Taku forts in the autumn of 1859,—but we doubt whether there were anything like the amount of anxiety for the future which will exist in the public mind as a result of the conquest of Pekin. Those of our contemporaries who have hounded on the Government to this expedition into the interior of China, who have insisted on dictating a peace upon the walls of Pekin, are now not less alarmed at the prospect of the complications which they have taken such pains to bring about, than those who, like ourselves, have from the first deprecated this policy of intervention in the affairs of a nation which we can never undertake seriously to influence without undertaking absolutely to rule,—an obligation the assumption of which even the *Times* is not sufficiently presumptuous to advise. Even that journal now describes the present condition of our affairs in China as "at once so "glorious and so disastrous, so lamentable to individuals, so "costly to this country, and so uncertain in the future,"—and this when the aim of all its own recommendations has been attained, when our army is encamped on the walls of Pekin, and the Emperor is a fugitive into Tartary, leaving the spoils of his "summer palace" in the hands of the allies,—or perhaps we should say of the French,—if the account of the very unequal division of the spoil be true.

In truth this state of things is sufficiently "perplexing and disastrous." Our force is small, and is in the heart of an unknown country on the borders of Tartary, which probably supplies the reserve of the Imperial army, and San-ko-lin-sin with a force not yet routed is "still in the field." The winter is at hand, and fresh reinforcements cannot soon reach the army, which never expected to winter in the North of China. Not only are the Tai-ping rebels tolerably active, but there is some rumour of a new and quite independent rebellion in the province to the West of Pekin. The plot therefore thickens rapidly, and how soon we may get our troops out of China again, now we have once entered on this policy of intervention, it is not easy to see.

And what is the result? We have always been promised that if once we could triumph over the Chinese Mandarins at Pekin, all our difficulties would be at an end. But this consummation seems to be still as far off as ever. The Chinese yield, it is true, beneath immediate pressure, but the recoil comes as surely as the concession, when that pressure is once removed. Nothing will ever persuade them to acquiesce in all the English demands but an English occupation of China,—for which we have neither the wish nor the means. And so the only good we are likely to derive from our great march on Pekin, is—the glory, and the gain of a small proportion of the riches accumulated in the summer palace,—advantages which are compensated by the death of Mr de Norman and Captain Anderson, the cruelties inflicted on Mr Parkes and his fellow-sufferers, the probable loss of the *Times* Correspondent, and a certain legacy of indefinite military and diplomatic complications with the different Governments which are now contesting the privilege of ruling China.

Agriculture.

RUS IN URBE.

ALL the country has been in London during the past week. The greatest gathering of agriculturists in the metropolis is that which takes place during the week of the Smithfield Club Show. The interests which centre in the great stock exhibition are considerable and diversified. It is one of the grand advertisements of the breeders of first-class stock, second only to that afforded by the July show of the Royal Agricultural Society. It is the mart to which the largest and most enterprising butchers resort for the purchase of prize animals with a view of giving *eclat* and attracting custom to their general stores of Christmas fare. The display of agricultural implements and machinery, of roots and seeds, of stable fittings and so forth are subjects of general interest, and the sources of great and increasing trade. Nor is it without its use that here the active, bustling, and somewhat self-sufficient traders of London may admire some of the results of rural enterprise and skill.

Of the show itself we have nothing very special to notice, beyond the nearly uniform goodness of the stock exhibited. The Shorthorn oxen and steers formed perhaps the most remarkable classes in the yard, both for actual merit, and for the very close competition between the prize animals and the unsuccessful competitors. The two first prizes—Mr Baker's ox (the gold medalist) and the Duke of Beaufort's steer—alone stood out prominently in their respective classes. Next to the Shorthorns were the Devons, which for symmetry, breeding, and touch, were better than we ever recollect them at any previous show. The beauty of some of the Devon heifers was extremely great. Herefords were few in number, but such few consisted of good beasts.

The Sussex cattle appeared in increased numbers, and in form which ought to lead to a more extended use of this breed. Considerably larger than the Devons, and even than the Hereford, they in several instances were not inferior to either in quality and beef-producing character.

In sheep, the Leicesters formed the strongest portion of the show, and were of larger size and more vigorous character, with longer wool than until recently we were accustomed to meet with in this breed.

The few pens of Cotswolds shown were of extraordinary merit, while the West-country Downs, and the Cotswold and Down crosses indicated valuable combinations of wool and mutton.

The pigs were as fat as usual.

The half-yearly meeting of the Royal Agricultural Society was held during the week, and the report was adopted with a unanimity which seems to indicate that dissensions, which last year bore a somewhat threatening aspect, have been mitigated if not wholly healed. It seems the Canterbury show, in July last, involved considerable loss to the Society. In the stock prizes for the Leeds meeting next year, there are to be classes for Sussex cattle and Cleveland horses. In moving the adoption of the report, Mr Sidney recommended the Society to make efforts for improving "the breeds of cattle in remote districts like Wales." It is true that

prizes offered for Welsh cattle at one or two meetings did not produce much competition, but probably if made permanent, Welsh stock might appear in greater numbers. It is clearly sound policy to promote the improvement of all our pure breeds of stock, and the Welsh, eminently the poor man's stock, are fed in numbers throughout the country, of which no one, looking only at their appearance at the Society's show, would have the slightest idea. It was also suggested that the Society might usefully direct its attention to the improvement of rural labourers' cottages.

There has been a fine show of poultry and roots at the Crystal Palace.

The most important meeting of the week, however, was that of landowners and agriculturists, held at the Hanover square rooms, for the purpose of promoting some general measure for improving the outfalls for drainage. The Earl of Romney, who occupied the chair, pointed out that the system of taxing land for the purpose of sewage was not new, that it existed in several districts, where however the powers accorded were insufficient, and that there were numerous other districts where some general provisions for main drainage were urgently required. The recent period of long continued rain had proved the absolute necessity for some general action on the subject. The gentlemen who had promoted that meeting considered it desirable to "organise measures with the view of getting a Bill passed for the whole kingdom, giving all the necessary powers for the improvement and extension of arterial drainage." Such powers must apply to both large and small arteries, as on the condition of each depended the effectual carrying out a complete system. Objections had been made to interference with the rights of those who were not desirous of effecting improvements on their own land, "but any one who had considered the subject knew that property could never be held by one person so as to be an obstruction to public interests, and that private rights must give way to great public convenience..... .In ancient times men held their land by virtue of certain duties which they had to perform, perhaps at great personal inconvenience. For instance, by their tenure they were called upon to defend the kingdom against all invaders; and now a man could not so deal with his land as to prejudice or to cause nuisance to his neighbours or the public. With regard to the outfall of water on land, a man, by neglecting his duty, might do the public a great injury. Supposing he had a stream running through his estate, and he refused to allow his neighbours above to come upon it to improve the outfall, which remained checked, the water from a higher level would accumulate on the surface of the land, and the drainage of a whole district might be defeated. Therefore, no reasonable person, on reflection, could say that any objection could properly be made to promoting such a measure as he had indicated. It was in accordance with English law that land should be taxed to carry out these necessary improvements. Every one knew of instances of this kind. In his own county there were the Romney Marshes, with regard to which the principle had existed from time immemorial, and he need scarcely mention the case of the Bedford level, with which all were acquainted. Landowners had no more right to object to the making of proper watercourses through their estates than they had to prevent a highway or a railway over them being constructed. Nothing was more important to a country than the development of its agriculture, and it was now generally admitted that nothing was more destructive to agriculture than the prevention of a good system of drainage." These views are perfectly unexceptionable, and it is satisfactory to find them so plainly enunciated to a body of landowners seeking the means of improving their own estates. Sir H. Vavasour gave several illustrations of the difficulty of draining many districts under the existing laws, and said that much of the money hitherto expended in draining had been of imperfect benefit for want of arterial drainage. Sir J. V. Shelley referred to a Bill introduced to the House of Commons in 1852 by Mr Miles for such objects as those contemplated by the meeting, and which he intimated an intention of re-introducing. Drainage was then only beginning to attract the attention of the landed proprietors, and there were now 100 drainers amongst landowners for every 10 in 1832. Sir John Tyrrell pointed out difficulties in the way of a private member carrying such a Bill, and urged that the Government should be induced to take it up. It was then resolved, "That this meeting considers that a comprehensive public measure of arterial drainage and the improvement of outfalls is highly essential to meeting the requirements of the present advancing state of agriculture," and "That a deputation from this meeting wait upon the Secretary of State for the Home Department to impress upon him the necessity of the Government introducing such a measure at the earliest possible period of the ensuing session." Some mutterings of dissent—not very articulate—proceeded from Sir John Tyrrell, Mr Thorold, and Sir John Maxwell, who, however, did not oppose the resolutions. Mr Clutton referred to his experience of such a measure in Ireland, and expressed an opinion that land in many districts would be advanced in value from 10s to 50s per acre by its operation. A committee to carry out the resolutions was appointed, consisting of the Earl of Romney, Sir John Shelley, Sir Henry Vavasour, Mr Clutton, Mr Heathcote (Connington Castle), Mr Langston, Mr Bailey Denton, Mr A. Clarke, Mr Granthain, Mr Fisher Hobbs, and the Rev. J. Clutterbuck.

Cocoa: its Cultivation, Manufacture, and Uses; its Advantages and Value as an Article of Food. By James A. Mann, F.S.S., &c., &c.

Mr Mann, whose work on Cotton we have lately had occasion to mention in terms of high commendation, is the author of the present paper on Cocoa, which he seems to think is greatly neglected as an article of food, especially when its consumption is placed in juxtaposition with that of tea and coffee.

The following table will show the quantity consumed of each of the three articles, taking the annual averages of decennial periods:—

	Tea. lbs	Coffee. lbs	Cocoa. lbs
1820—9	24,920,099	11,554,010	325,922
1830—9	34,221,211	24,205,707	1,136,000
1840—9	42,394,633	32,685,269	2,609,114
1850—9	62,598,493	34,763,447	3,437,575

These figures do not include the quantity taken for Government stores and the Navy. In the year just passed (1859) the relative proportions of the three articles consumed were:—

Tea.	Coffee.	Cocoa.
67 per cent.	30 per cent.	3 per cent.

so that the quantity of cocoa consumed is only 1-25th of that of tea, 1-11th of that of coffee, and 1-38th of the entire aggregate of the three articles.

We are told that a pint of cocoa contains 2112 per cent. more of nutritious matter than the same quantity of tea, and 370 per cent. more than coffee. How is it then that cocoa, with such manifest advantages, does not come into greater consumption? The reason is this, that small as the quantity of tea or coffee actually taken into the system may be, it may nevertheless play a more important part than even cocoa in sustaining it. For the sake of convenience, food substances have been divided into "alimentary" and "heat givers"; the first embracing chiefly nitrogenous, the latter chiefly carbonous substances. These constituents are required to keep in repair the tissues of the body. We find the proportion of these active ingredients existing in tea, coffee, and cocoa, are respectively 3, 1.75, and 2 per cent., and consequently that cocoa stands next to tea even in this respect.

But as regards nutrition, cocoa stands immeasurably beyond tea and coffee. Assuming that it takes 1 oz of cocoa, 1 oz of coffee, and about ½th of an ounce of tea to make 1 pint of drinkable beverage.

1 pint of tea will cost	½d	and contain	18.40	grs. of	nutritive matter.
1 pint of coffee	— 1d	—	86.50	—	—
1 pint of cocoa	— ½d	—	407.10	—	—

Mr Mann, as usual, appends useful statistical tables to his work: the present contains four. No. 1 shows the quantity of tea, coffee, and cocoa annually imported, exported, and consumed in the United Kingdom since 1820.

No. 2 furnishes in detail the quantity of cocoa, husks, shells, chocolate, and cocoa paste annually imported, re-exported, and consumed in the United Kingdom since 1820.

No. 3 shows the quantities of cocoa annually imported into the United Kingdom from each of the producing countries since 1831.

And table No. 4 shows the annual average price of tea, coffee, and cocoa, the rates of duty imposed, and revenue collected on each, since 1820.

GENERAL LITERATURE.

A Personal Narrative of Two Years' Imprisonment in Burmah. By Henry Gouger. John Murray, Albemarle street.

Many of our readers, probably, will remember the story of the imprisonment of Dr Judson, the American missionary, in Burmah, at the breaking out of the first Burmese war. Now, after the lapse of four and thirty years, that "ancient tale of wrong" has come up afresh, and with more ample details, from the pen of a fellow-sufferer with Drs Judson and Price—a fellow missionary too, if, as Dr Livingstone affirms, the merchant is (or ought to be) the most effective missionary among savage and newly-opened nations. If Mr Gouger's narrative had appeared soon after the occurrence of the events it relates, while Burmah was a country almost unknown to, and untrodden by Englishmen, it would have had a greater success than it can hope for, now that pretty nearly all that can be said of the Burmese, their institutions, customs, &c., &c., has been said. Of this Mr Gouger is fully aware, and, since diffidence of his own powers and disinclination to literary labours prevented the earlier appearance of his book, he avoids all amplification on topics comparatively well known, and confines himself to the relation of his own personal fortunes, and those of his fellow-prisoners in so far as they were mixed up with his. To account for his presence in Burmah at the time of its rupture with England, Mr Gouger goes back to his early residence in India. Ill health compelling him to seek change of air, a friend advised him to unite health and profit in one venture by a visit to the Kingdom of Burmah, with the view of "ascertaining the wants of the population" with regard to English manufactures, and of gaining a "knowledge of the various products of the country

suitable for export." "My choice lay between accepting this proposal, and undertaking a dull routine voyage with no other object than the fulfilment of the doctor's injunction, and the reader will have little difficulty in deciding which of the two offered the strongest attractions, when I add that at this time I was barely twenty-three years of age. The love of novelty and adventure quickly settled the question in my mind, and I at once entered enthusiastically into the views of my friend, who, on his part, manifested his confidence in the success of the scheme by engaging to supply me amply with the means necessary to carry it out."

Mr Gouger was thus the first, or all but the first, to carry British commerce into the heart of the Burmese Empire. The result was at the outset all that could have been hoped for. He was received by the Emperor in the most friendly manner; his assortment of goods, especially the cotton fabrics, was scrambled for by nobles, ladies, and merchants. Cotton goods of the value of 3,000*l* realised 8,000*l*; of other articles the selling price was six or seven times the cost price. A fabulous field of wealth was opened before his eyes, burdened with only two drawbacks; but they were serious ones: the insecurity of life and property under a despotic prince, bound by no treaties, commercial or otherwise; and the difficulty of removing the wealth so easily acquired. "Bags of silver and gold in bullion" came pouring in to pay for goods seized upon with alacrity, but the question now arose of what to do with this bullion. To export it was illegal; and of all the varied produce of a great and fertile Empire, teak wood alone was a legal article of export. Rice was produced in such abundance that it mouldered into decay, but to export it was strictly forbidden. Precious stones were abundant, but they too were under the same prohibition. Raw silk was brought by caravans from China, but neither might this be taken out of the country. In this extremity our author had but two alternatives,—either to spend his gains as quickly as possible and retire from the rich field he had opened up, or to obtain some relaxation of the prohibitory laws. The first he would not do, and the second he could not do, except by one method not the most consistent with English ideas of straightforwardness and honesty. We will let the writer tell himself his difficulty, and his proposed means of extrication:—

It thus appears that one, and only one, serious impediment stood in the way of any individual seizing the opportunity to make a gigantic fortune, and that, too, in a very unexpected manner, in times when every corner of the world was supposed to be overrun and explored by hosts of indefatigable fortune-hunters. This one impediment was how to get the profits out of the country after they had been made. For the precious metals there was no hope; the prejudice was too deeply rooted to be assailed with any chance of success. But there was another article of commerce, already slightly hinted at, which would serve my purpose far better, and at the same time was not so likely to meet with opposition. If I could only succeed in shaking the obstinacy and ignorance of the Hlut-dau, the wanting link would be supplied, and the chain of commerce made perfect. I allude to Rice.

When we consider the vast amount of rice now grown upon our territories in Burmah, we can imagine the golden dreams our author was building in the prospect of this grand monopoly. How to attain his end was now the question, and to do at Burmah as the Burmese do, was the ready answer.

If ever doubtful means were not only admissible but justifiable, they were so here; so I opened my batteries against the strongholds of prohibition, by sending balls of gold and silver into Menthagee and the Woongees with such effect that the outworks were soon demolished. First fell the refusal to permit me carrying my treasure to Rangoon; then, bringing heavier metal to bear, the liberty to buy and export a little raw silk. I dared no more for the present; but I left off firing with this conviction, viz., that if I chose to bribe high enough, and in the right quarter, there were few privileges that were beyond my reach.

This probably was true enough; but this lavish use of money was afterwards brought up against him when, on the appearance of the English fleet before Rangoon, he was arrested on suspicion as a spy. Suspicion and conviction are, in a despotic country, almost synonymous terms, and Mr Gouger rapidly exchanges free intercourse with Emperor and nobles, court favour, and the prospect of an immense fortune, for the death-prison, and the near prospect of torture and death. Even if a violent close were not put to his existence in that fearful place—whose Burmese name, Let-ma-zoon, or "Hand—shrink not," tells its own tale—slow starvation would probably do its slower work, since the prisoners had no allowance of food made to them by the State, or if they had, never received it. Dr Judson's admirable wife did everything that was possible to alleviate her husband's fate; and our author, though a stranger in the country, was fortunate enough to have among the servants he took with him from India, one who, with rare fidelity, clung to his disgraced master, and by the labour of his hands provided him with his daily food during the two years of his imprisonment.

The state in which the English prisoners were found at the close of the second Burmese war has given us some insight into the nature of Burmese prisons; but the horrors of the Let-ma-zoon have never before been so completely revealed as in this book. Eleven months of intimate acquaintance made the writer familiar with its revolting cruelties, and enables him to paint a picture so horrible that we would gladly turn away from it, if the fact of its truth and the interest it awakens in the fate of the helpless victims did not chain us to the narrative.

On the 28th of May, 1824, Mr Gouger was carried before the court of justice, in the yard of the palace, where he had hitherto been a welcome visitor, clothed, by especial royal gift, in the royal scarlet silk plaid, an honour he had been used to think inconvenient, but which he would now have thankfully resumed. Here he was accused of communication with the enemy, sending information, drawing up plans, and, among other things, of being brother-in-law to the Honourable East India Company, who, it was affirmed, had married his sister! After a lengthened examination, and many fears of the question being applied, he was sent to the death-prison there to wait his sentence. One by one all the Europeans in Ava joined him there—a wretched company, guarded by seven or eight ruthless jailors, the outcasts of their nation, sealed on their cheeks with the seal of their degradation, a ring tattooed into the flesh. "I beheld," says Mr Gouger, "a poor youth doomed to the most debasing ignominy for the rest of his life by these fatal rings, his piteous cries at the degradation he was undergoing being drowned by the jeers and ridicule of the confederates. They soon made him as much a child of the Devil as themselves."

Three pairs of fetters having been riveted upon his ancles, Mr Gouger was introduced to his future dwelling. This was a planked building containing one long room, forty feet by thirty; dark in the full blaze of noon, except where light penetrated through chinks in the teak boarding. The furniture consisted of stocks and chains, with "one suspicious-looking piece of machinery whose painful uses it was my fate to test before many hours had elapsed. It was merely a long bamboo suspended from the roof by a rope at each end, and worked by blocks and pulleys to raise or depress it at pleasure." On the floor, foul with accumulated impurities, lay about forty natives nearly naked, half famished, inexpressibly dirty, with some one, some both feet in the stocks, and heavily chained besides. The odour was indescribable, the place teemed with creeping things, and if the loose fitting of the planks and a torn rafter in the roof had not let in a little air, "it is difficult to see how life could be long sustained." A short turn in the prison yard once a day was all the air and exercise allowed—the food brought by friends, or charitable people, was left at the wicket, no communication being allowed with any one outside. At night the feet of the European prisoners were secured to the "suspicious-looking" bamboo, which was then elevated till only the shoulders rested on the ground. In this attitude sleep was all but an impossibility, and if this torment had not been afterwards relaxed, the wretched prisoners must have yielded up their lives in that horrible den. To speak of the cruelties that were daily perpetrated there is a task too hateful; we will only give, as an indication of what they were, the closing reflections of our author, who gives but a "sample" of what he daily witnessed:—

Shall I be credited when I say that in process of time such spectacles as these passed unheeded and almost unfelt,—that the sufferings of our fellow-creatures, which at first we shuddered at, and almost fainted to behold, we lived to regard with unconcern? Strange and unnatural as it may at first appear, such, nevertheless, was the fact; and what makes this apathy more surprising is, that we knew at the time the extreme probability of our being ourselves subjected to similar treatment. It is terrible to think on the force of habit. I do not mean that our *reason* was perverted, or that we looked with complacency on such doings,—reason and religion taught us to hate and abhor them; but the fine feelings and sympathies of our nature were so continually and violently outraged, that in time they became, in a great degree, unimpressible and callous.....At any rate it was a merciful law for us, for had our sensibilities remained acute, we must have been driven mad.

During these eleven months' imprisonment the Burmese had been losing ground, and the English as steadily gaining upon them. A new General was appointed with large powers, and, Mr Gouger thinks, by his orders the white prisoners were removed from the State prison to a minor one in the province over which he ruled. Here, in a wretched and unhealthy shed, but free from the dirt and wickedness of their former prison, they waited the death they now fully expected. How it came to pass that they were yet alive, and unmangled by tortures, they knew not. We now come to the strange tale of the starving lion, which struck us always as incomprehensible in Dr Judson's account, as related by his second wife:—

One night, soon after the events lately related, this motley little family was trying to forget its sorrows in sleep, when hollow rumbling sounds, like distant thunders, disturbed its rest. Presently, as it came nearer, we could distinguish the sound of wheels creaking as if some clumsy vehicle was supporting a heavy weight, the voices of men, and above all, at intervals, the loud roaring of some wild animal, drowning for the moment all other sounds.....When the object of our inquiry had reached its destination, curiosity was changed into terror, by hearing that a huge lioness, confined in a strong cage, to which wheels had been fixed for facility of transport, was the cause of all this uproar. With some difficulty the clumsy car was drawn into the prison enclosure, and placed close under our room. All night long we listened to the hungry warnings of the animal with feelings of horror, eagerly searching for some probable motive that had influenced the Government to send such a creature here, but always in vain: returning in dismay to that which appeared to be the most simple interpretation, that we were to be thrown into the den of the savage to be torn to pieces and devoured. The royal beast was so near that her breathings might be distinctly heard, and every roar and hungry growl made us tremble in anticipation of the terrible doom that awaited us.....No information could we gain. There stood the lioness glaring on us with eyes of fury whenever we approached her cage, here stood the astonished jailor who could throw no light on the mystery.....The day past, still no

orders came; but our fears gained strength when we saw that the animal was kept without food. The cravings of hunger made it still more ferocious; the whole of the next night was spent in listening to its dreadful bellowings, which might have been heard at intervals across the plain. Little was it to be wondered at that the brain of worthy Father Ignatius lost its balance,—far more wonderful is it that any of us preserved our reason. Day after day the starvation continued, and night after night the same fearful bellowings were repeated, until in about a week the poor creature began to exhibit signs of diminished strength; and as these appeared our hopes revived. Could we be mistaken? This unparalleled cruelty continued for about a fortnight, when the noble animal yielded up its breath.

This lion was from Arabia, and had been presented to the Emperor by the Imaum of Muscat: for what cause it was doomed to this cruel end was never rightly known. Mr Gouger's conjecture seems only too probable; but what induced the subsequent change of plan, or the substitution of the very doubtful gain to the captives of being buried alive, he never discovered. The sudden disgrace and violent death of the newly-appointed General (who was trampled upon by elephants) saved our author and his companions for the present time, and the necessity of the Burmese Court for peace soon after procured their liberation,—Sir Archibald Campbell demanding the instant release of the white prisoners as an indispensable preliminary.

We have given a brief outline of Mr Gouger's story, which is full of curious and interesting matter, though much of it is necessarily of a painful and disagreeable nature. He may well say that after the experience of those two years, all subsequent trials and sufferings have seemed light in the comparison.

THE CORNHILL MAGAZINE. December. Smith and Elder.
MACMILLAN'S MAGAZINE. December. Macmillan.

THE numbers of both these magazines for the present month are very good. Mr Trollope and Mr Hughes keep up the ball with unflagging sprit, but "Framley Parsonage" is drawing fast to a happy conclusion, whereas "Tom Brown" we hope will continue to entertain us for some months longer. The present number of "Macmillan" is extremely clever, and is worked up with the freshness and vigour of Mr Hughes' happiest moments. In the "Roundabout Papers" Mr Thackeray gracefully intimates his intention of displacing Mr Trollope as chief *raconteur* of the "Cornhill," which has now completed its second volume. The December number contains, besides "Framley Parsonage" and the "Roundabout Papers," a clever essay on "Success," an amusing account of "How I was Upset," an article on "Criminal Law and the Detention of Crime," and several others of interest. There are some clever lines on a "Human Skull," and some very mediocre verses by Charlotte Brontë, which had better have been left in oblivion.

"Macmillan" has a very graphic and spirited article on "Travelling in Victoria," by Henry Kingsley; an account of "Mr Rarey's Manner of Breaking Horses," sufficiently curious; some extracts from the "Journal of an Englishwoman at Naples," giving a fearful account of the Neapolitan hospitals; a popular exposition of Mr Darwin's book; and a critical disquisition on Mr Patmore's last poem. These, with a short poem or two, are the chief contents of the number for December.

HOLIDAY TALES FOR SCHOOLBOYS. By WILLIAM MARTIN, Author of the "Holiday Book," "Every Boy's Book," &c. London: Darton and Co., 58 Holborn hill. 1860.

THESE stories are mostly vulgar and disagreeable, though not without a sort of smartness which some boys may find amusing. The best of the series is "The Ugly Slaves of Bengal," but its effect is marred by the selfish moral which the author has, quite needlessly, contrived to extract from it.

Foreign Correspondence.

(FROM OUR CORRESPONDENTS.)

PARIS, Thursday.

Some London journals have announced lately that the negotiations for commercial treaties between France and Belgium and France and the Zollverein have made great progress. As to Belgium, this is only a repetition of what has been already stated in the ECONOMIST; but as to the Zollverein, I am assured on good authority that the statement is exaggerated, little advance in the negotiations with it having really been made.

Reports have been current that the Government is about to make some radical changes in the system of taxation in this country, and in particular is about to establish an income tax. No one can say that some schemes of the kind may not be entertained by the Emperor; but what is certain is that if they be, they have not yet assumed a practical shape. As to the loan which was lately talked of, I hear that one *ought* to be raised; but that no decision on the matter has yet been come to; neither is one expected until the new Minister of Finance shall have made himself master of all the details of his office,—a task which is not to be accomplished in a day.

M. Mirès has at last announced the issue of his famous Ottoman loan, after preparing the public for it by publishing in the newspapers, at an enormous expense, a treatise on the finances and commerce of Turkey, in which, of course, both were represented *couleur de rose*. The amount of the loan is not stated, but 250,000 bonds are to be issued to the public at 312f 50c (12*l* 10s) each, and it is announced that bankers at Constantinople have taken 180,000 at a figure not mentioned, but which we may presume is certainly not higher than the said 312f 50c. It is also announced that 25,000 are to be reserved for the shareholders in M. Mirès' Caisse Générale des Chemins de fer, and that for them only 307f 50c is to be paid. The bonds are to be nominally of 500f, and are to receive 6 per cent. interest on that sum, that is 30f per annum; and they are to be paid off at 500f in the space of thirty-six years. As a guarantee for the payment of the interest on, and the reimbursement of the bonds, the general revenues and certain special revenues of the Ottoman Government are mortgaged, and are to be got in under the superintendence of a special commission. All this is very well—on paper; but what will the reality be? When a Government undertakes to give 20*l* sterling for every 12*l* 10s lent to it, and in the meantime to pay 6 per cent., can the security be perfectly good? This is what everybody is asking himself, and most *practical* men answer in the negative. So answering, the probability is that such men will abstain from subscribing. But it is not to them that M. Mirès addresses himself, but to the mass of the vulgar public, and perhaps his terms may tempt them. I have heard say, however, that as the Government in this country arrogates to itself the power of meddling with everything, it could not do a more useful action than to make known publicly, through the *Moniteur*, what it thinks of this loan; that is to say, whether from what it knows of the financial and political condition of Turkey, it entertains the conviction that she can and will give honest people 20*l* for every 12*l* 10s they may lend her, and 6 per cent. to boot. One might almost assume that the Government is not quite clear on that point, inasmuch as it publicly announced that a gentleman named M. Plœue, a French Inspector of Finance, who is on some official mission at Constantinople, was "not authorised by it" to accept a seat on the commission referred to, as M. Mirès advertised he had done. In consequence of this disagreeable notification, M. Mirès was forced to leave M. Plœuc's name out of his advertisements. A report too is current that an expression of Governmental dissatisfaction is not unlikely to be conveyed to the Governor of the Credit Industriel Bank for having consented to cause the payment of the interest on the loan to be made by that establishment,—he being appointed to his office by the Government, and his acts, therefore, being to a certain extent under its control.

In my last I gave from the recently published "Tableau Général du Commerce de la France" some statistics respecting French commerce of the last and preceding years. Subjoined are tables showing the principal countries from which imports and to which exports were made. It must be stated that in the imports, both what was destined for consumption in France and what was destined to be sent abroad are comprised; whilst the exports include both French productions and foreign articles brought to France to be exported. These two categories of imports and exports are classified by the French Customs under the head of "General Commerce." The figures represent the "official value," that is, are calculated according to a scale fixed so far back as 1827.

Norway	2,600,000	2,300,000	2,100,000	2,800,000
Sweden	2,200,000	1,600,000	1,800,000	2,600,000
Denmark	1,700,000	1,600,000	1,200,000	1,900,000

There are other countries in the lists, but they are not worth specifying. Many of these items are deserving attention. The smallness of the imports from Austria and Denmark, and the decline last year in those from the French possessions in India, will be particularly noticed. So also will the insignificant exports to Austria and to the same possessions. But what will perhaps be chiefly remarked is the enormous increase last year to England. If the quotations given in my last be referred to, it will be perceived that the articles in which the increase chiefly took place were silk tissues, wheat flour, prepared skins, brandies and spirits, wines, and butter.

The Western, Orleans, Mediterranean, Ardennes and Dauphiné railways advertise the payment of interest on bonds from the 1st of January next. The Line of Italy Company announces the payment of 12f 50c per new, and 6f 25c per old share, from the same date; also a call of 300f on "provisional certificates" of the loan. The Portuguese Railway Company likewise requires the payment of a call of 300f per share from the 1st of January. The Graissessac to Beziers shareholders have authorised the raising of a loan on such terms as the directors may think favourable, by the issue of 19,701 bonds, or the deposit of them as security.

At a recent meeting of the shareholders of the Bank of Algeria, the profits of the year 1860-61, ending the 31st October, were stated to be large enough, after deducting 99,041f for the reserve fund, to allow a dividend of 46f 50c per share to be declared, which is 9¾ per cent. for certain of the shares and 7¾ for the others. Among other things, it was announced that the discounts amounted to 53,942,530f, being an increase of 10,599,992f over those of the preceding year. It also announced that the reserve fund amounts to 866,199f, which is nearly 29 per cent. of the paid-up capital.

The cotton-spinners at Lille are represented to be busily engaged in transforming their machinery, so as to be better able to compete with the English under the treaty.

The Bourse during the week has been without animation. Some apprehension exists that the events in China will necessitate a large expenditure, and that, after all, things may turn out ill in America. To-day it was reported that M. Mirès had received numerous subscriptions for his loan. The quotations are as follow: the Threes are ex div.:—

Subjoined is an account of the markets:—

Flour.—Business at *Paris* has not been active during the week; yesterday, the sack of 159 kilogs was 60f to 63f; last week the quotation was 60f to 62f. In four marks there has been a rise; yesterday, the current worth was 60f 50c; for January and February, same price; March and April, 61f 25c to 61f 50c.

Wheat.—At *Paris*, yesterday, in the early part of the day offers were few and little was done, but towards the close operations became active: quotations were 33f to 35f 50c and 36f the sack of 120 kilogs. At *Marseilles*, last week, prices were firm and arrivals few. Of the provincial markets, 21 present a rise of 9c to 75c the hectolitre, 79 a fall of from 8c to 2f 25c; 41 have undergone no change; 17 are reported firm.

Cotton.—Business at *Havre*, in the week ending Friday, was regular, the sales amounting to 8,074 bales, and quotations remain unchanged. Low New Orleans was consequently 91f the 50 kilogs, and very ordinary ditto 98f. The arrivals were 28,948 bales. This week, business has been animated, and prices very firm.

Coffee.—At *Havre*, in the week ending Friday, a fair amount of business was done. 542 sacks Hayti Port-au-Prince disposable, fine quality, went at 80f to 81f the 50 kilogs in bond; 1,500 sacks ditto for delivery, 78f to 78f 50c; 315 sacks Rio not washed, disposable, 75f to 76f; 518 ditto, for delivery, 75f; 250 Rio washed, for delivery, 83f; 4,000 sacks Santos, expected, 76f; 283 ditto, also expected, 75f to 78f 50c 50 sacks Laguayra, 83f; 150 Malabar, 110f 50c to 110f 75c duty paid. The arrivals were nearly 8,000 sacks. The stock on the 1st of the present month was 2,783 tons, exclusive of the quantities not yet placed in bond: This week, Hayti has been at 80f in bond; ditto Cape, 81f; Rio, 69f. business not very active. At *Nantes*, last week, a small lot of Gaudeloupe went at 130f the 50 kilogs; and some Reunion at prices not stated. At *Bordeaux*, last week, about 600 sacks Rio washed and nowashed went at established prices. This week, about 770 ditto have been disposed of at 75f to 78f. At *Marseilles*, last week, about 7,000 sacks Rio went at 70f to 73f 25c; and some Mocha at 115f 50c.

Sugar.—At *Havre*, in the week ending Friday, business was somewhat more animated. About 2,500 casks French West India went at 48f 50c duty paid, and at 49f for some lots in port. A small lot of Trinidad was also taken at 50f duty paid. 581 casks Havana (for New York) 36f to 38f to 38f in bond. The arrivals were 257 casks and 910 sacks. This week, some small lots of French West India have been sold at 49f and 49f 50c; some Havana low, 36f in bond. At *Bordeaux*, last week, about 390 casks Martinique went at 48f 50c to 49f. Nothing done in Reunion or other sorts. The nominal quotation of Reunion was 52f 50c to 53f. This week, some French West India has sold at 48f 75c to 49f; a large lot of Mauritius, 54f 50c; some Reunion, 52f 50c. At *Nantes*, last week, sales were importaot. About 4,000 casks French West India went at 48f 75c to 49f, those at the former price being for England; 7,088 sacks Reunion at 51f 50c; 497 ditto, 54f 25c; 300 ditto gros grain, 58f; 308 ditto, very common quality, 39f 75c; 75 casks Mauritius, 58f 25c. For delivery, 2,600 sacks Mauritius gros grain, 1,800 ditto semi-gros grain, and 3,500 ordinary, went on an average at 58f 12½c and about 500 sacks Reunion, *habitation Murat*, went at 55f 50c. This week, a large lot of Havana has been sold at 37f; some French West India, 48f 50c. At *Marseilles*, last week, business was very insignificant, and arrivals almost null.

Indigo.—Business was very dull at *Havre* last week, only 5 cases Bengal having been sold: prices kept secret. No arrivals: stock on the 1st of this month 1,179 cases. Nothing done this week. At *Bordeaux*, last week, the sales consisted of 24 cases Bengal and 70 Kurpah. The quotations of Bengal were 12f 50c to 25f 50c the kilogramme; of Kurpah, 10f to 21f. This week, the sales of Bengal have been active; a small lot of Kurpah has also been disposed of: prices not stated.

Hides.—At *Havre*, in the week ending Friday, business was animated: 12,200 La Plata dry went at 105f to 120f the 50 kilogs duty paid; 1,000 ditto salted, 75f to 80f; 590 Rio Grande, salted, 75f; 2,000 Pernambuco drysalted, 90f; 1,008 New York salted, 52f 50c to 54f; 1,300 New Orleans ditto, for delivery, 51f; 220 Martinique ditto, disposable, 70f; 500 Valparaiso salted ox, 70f; also 502 horse hides, salted Buenos Ayres, 98f the 100 kilogs duty paid; and 8 bales of kid ditto, at 11f the dozen. The arrivals exceeded 30,000. This week, business has been active: Buenos Ayres dry, 120f to 127f 50c; New York salted, 53f 50c. Various lots of different sorts damaged have also been sold.

Wool.—At *Havre*, in the week ending Friday, the sales were 100 bales Monte Video unwashed at different prices; 69 ditto washed, 1f 90c to 2f 75c the kilogramme; 18 Chili unwashed, 2f 80c; 45 Donskoy, 30c; 5 bales sheepskins, Buenos Ayres unwashed, 1f 25c. This week: Buenos Ayres *pelades*, 2f 10c to 2f 20c. Some damaged Buenos Ayres and Monte Video has also been sold.

Tallow.—No sales were made at *Havre*, last week, but 134 casks were received. This week, some Russian has been sold at 72f the 50 kilogs. At *Paris*, yesterday, the 100 kilogs were 142f 20c—a fall on last week's quotations.

Spirits.—At *Paris*, yesterday 3-6 of 90 deg., first quality, was 98f the hectolitre; Montpellier of 86 deg., 135f. At *Bordeaux*, the day before yesterday, 3-6 Languedoc was 132f 50c; beetroot, first quality, 105f.

Brussels, Dec. 12.

The Government has just authorised a Company called Société de Credit Communal, the object of which is to facilitate to towns and villages the obtaining of loans and the conversion of their present debts.

Turin, Dec. 9.

The Credit Mobilier of this city makes a call of 1*l* sterling per share—the sixth tenth of the capital.

Madrid, Dec. 8.

The "General Company of Credit in Spain" advertises that it will from the 1st of next month pay 12s per share on account of the dividend for 1860.

COMMERCIAL AND MISCELLANEOUS NEWS.

We take the following from the *Calcutta Englishman* of the 8th of November:—The resumption of business after the holydays has been attended with the usual tendency to improvement in trade. The money market remains in the same condition of plethora, and no investments are found to relieve it. Imports have found somewhat freer sales, but

still at prices showing a heavy loss. Freights still rule high, and th promising news from China will help to maintain them for the present.

"The yield of the precious metal," says a report from Melbourne, dated Oct. 25, "shows a falling off as compared with previous years. The quantity of gold brought down by escort since the date of our last summary was 150,072 ounces, as compared with 160,531 ounces in the corresponding period of the previous year; while during the same periods of 1860 and 1859 shipments were respectivaly 167,386 and 196,031 ounces."

Jamaica advices are to the 24th of November. Tha rainy season had abated, and highly satisfactory accounts have been received of the crop returns.

An official memorandum by the officiating deputy collector of customs, Kurrachee, furnishes the external trade of Scinde for the year 1858-59, which is extremely satisfactory, showing a total increase in the movement of sea-borne trade amounting in round numbers to upwards of 42½ lacs of rupees (450,000*l*), or more than 19½ per cent. on the year previous:—

Year.	Imports. Rs.	Exports. Rs.	Total. Rs.
1858-59	1,54,06,000	1,04,42,000	2,58,48,000
1857-58	1,08,11,000	1,07,81,000	2,15,92,000

An official return of the trade of Holland in 1859 has been issued, which, when compared with 1858, shows a considerable falling off in the imports, but an increase in the exports. There is also a large increase in the transit trade.

	1858. florins.	1859. florins.
Total imports	416,736,669	339,670,200
Total exports	330,740,977	356,049,104
Transit trade	29,447,489	113,487,508
Imports for home consumption	313,229,144	288,699,170
Exports of home produce	231,183,488	242,561,596

A Government return, relating to the savings banks of the Unitrd Kingdom, has been issued, which presents some general results of interest. It appears that with a population of 27,459,475 persons there are 625 savings banks, having 648 unpaid and 1,222 paid officers, who respectively give security for 402,520*l* and 360,755*l*, while their salaries amount to 91,317*l* 2s 5d. The annual expense of management is 125,352*l* 8s 1d. The number of accounts remaining open on the 20th November, 1859, was 1,503,916, and the amount owing to them on that date was 38,919,127*l* 17s 9d, and of which 38,726,676*l* 17s 8d was invested with the Commissioners for the Reduction of the National Debt. The rate of interest paid to the depositors was on an average 2*l* 18s 10d per cent. The annual receipts from depositors amount to 1,815,053*l*.

The Secretary of the Bradford Chamber of Commerce has lately read the following communication received from the Board of Trade:—"Hakodadi, July 11, 1860.—Sir,—With regard to British merchandise saleable in Hakodadi, of which we spoke a few days ago, we beg to mention the following articles namely:—Camlets, shirtings, drills, printed ginghams, flannels, canvas, and window glass. We are of opinion that very large quantities of the latter-mentioned article would sell to great advantage, as the Japanese merchants here informed us that they have calculated and considered over the matter, and have come to the conclusion that window glass would be almost as economical, and certainly preferable for their windows. We have made strict inquiry with regard to the sale of English canvas for the use of the Japanese junks, and find that if it could be supplied to them at reasonable prices it would be generally adopted, size Nos. 1, 2, 3. Printed Cotton—Small patterns and gaudy colours are in general demand. Flannel Goods—A small yearly supply, say 80 to 100 bales, would sell for the natives of Yeeo; it would be requisite to supply something durable, and not too expensive; blue preferred. Drills are at present sold in large quantities; colours blue and white. Camlets are in great and general demand; dark green and blue preferred. Shirtings bleached and unbleached; ginghams in all patterns, colour immaterial. In conclusion, we beg to add that the Japanese (who since their intercourse with foreigners have received such enormous prices for their exports) have in a great measure neglected their home manufacture, and devoted their time to the production of articles of exportation; and, as a matter of course, the at present large amount of export will, in time, cause the demand for an equal amount of imports in return.—We beg, &c., STEPHENSON, WILKIE, and Co."

In the early part of the week the cotton market was languid, and rather inclined to droop. Since the arrival of the Cunard mail the tone of it has somewhat improved. The new American cotton is freely offered, and Orleans of good staple move readily. The Upland and Mobile are not so easily saleable. We have again slightly reduced our quotations for fair and middlings. Egyptians are in fair demand, but do not command a full price. Brazil are steady. East India are also without alteration. The sales to-day are 10,000 bales, at steady rates. The reported export amounts to 4,560 bales, consisting of 2,580 American, 30 Brazil, and 1,950 East India.

MARKETS IN THE MANUFACTURING DISTRICTS.

Advices from most of our manufacturing districts state that the demand for goods for home use has continued tolerably healthy, and that the inquiry for shipment to India and China has somewhat improved. In prices, however, very little change has taken place. Continental buyers have operated cautiously, and there is very little doing on American account. The stocks, therefore, have somewhat increased. Iron has continued dull in sale; but coals are selling at very high rates.

MANCHESTER, Dec. 13.—We reduce our quotations for shirtings, 8 lb 4 oz qualities in particular having been affected by the news from China; at the same time there are even now ready buyers for that market, should a reduction in price be established more thoroughly. The rest of our market has been quite languid, and the common expectation is that little more business is likely to be attempted till the year is out. Export yarns, being still much under contract, do not show more than a mere turn in favour of the buyer, but cop yarns have been scarcely saleable at full ¼d per lb less. The prospect for manufacturers who buy yarn has been very discouraging, and as prospects are equally in favour of cotton being maintained in value, proposals have been currently discussed for running numbers of looms on short time.

COMPARATIVE STATEMENT OF THE COTTON TRADE.

Raw Cotton.	Price Dec. 13, 1860	Price Dec. 1859	Price Dec. 1858	Price Dec. 1857	Price Dec. 1856	Price Dec. 1855

Bradford.—Wool—There is little or no change to report in in any branch of our trade. In noils and shorts there is no change in value, but less producing. Yarns—The yarn market remains in the same quiescent state as we have reported for some weeks back. The export houses are doing next to nothing, and the home consumption is curtailed. Pieces—There is no improved inquiry for pieces, and everything is unusually dull for the season of the year.

Leeds.—Prices are firm, consequent on the ruling prices of wool, yet some of the manufacturers are curtailing their productions, and a portion of the mills are limiting their hours of working.

Halifax.—The market is very dull. There is less business doing in long wools, and for short wools, which have met with so ready a sale for some time past, there is but a moderate demand. For yarns very few orders have been given out at present, and the spinners complain of the unremunerative rates that are offered.

Huddersfield.—Prices are very reasonable, and not likely to be lower for some time to come.

Birmingham.—The trade of this town is very inactive, but without leading to any change in prices. The manufacturing trades of the adjoining districts are rather more active than those of this town, but the iron trade of South Staffordshire continues wretchedly dull,

Nottingham.—Most branches in the lace trade continue very quiet. A little is doing in plain goods, but hardly an average amount of business. The foreign buyers purchase only in limited quantities, but those connected with the home department are doing about an average trade. Cotton fancy goods are a dull sale. The silk lace trade is without change. Very little is doing in hosiery.

Rochdale.—So dull is the weather that staplers do not exhibit their samples without being solicited so to do, and this has not often happened, as users are at present indisposed to buy at current quotations, from which holders are not inclined to make any abatement.

Leeds.—There was a rather numerous attendance in the cloth halls; a better feeling prevailed, and an improved business was transacted in several descriptions of goods.

Belfast.—Hand-loom linens have been rather scarce at several of the principal places of sale. Coarse goods are more looked for. Medium reeds of lawns are freely taken off, while in the finer qualities dulness exists. There is a more active demand for drills, and stocks have been greatly reduced. Were the supplies of flax equal to the prospective requirements of the trade, there would hardly be an idle spindle in this neighbourhood before the end of the first quarter of the coming year. Sales at present are pretty good in the home market; and, as manufacturers continue limited in stocks of yarns, the demand is steady for all counts from 80's to 150's. No change in the value of warp yarns. Spinners are generally well up in orders.

Wolverhampton.—Current prices of pig iron:—Staffordshire cold blast, 4*l* 5*s*; best native hydrate pigs, 3*l* 10s to 4*l*; first-class all mine grey forge pigs, 3*l* 5*s* to 3*l* 10s; mine pigs, with a modicum of flue cinder, 2*l* 12s 6d to 2*l* 17s 6d; mine pigs, deteriorated by cinder, 2*l* 7s 6d to 2*l* 15s; Cleator Moor hæmatites, 3*l* 10s to 3*l* 11s 3d; Barrow hæmatites, 3*l* 10s to 3*l* 11s 3d, none in the market; Workington hæmatites, 3*l* 7s 6d to 3*l* 8s 9d; Kirkless Hall hæmatites, 3*l* 5s to 3*l* 6s 3d; grey forge cinder pig iron, 2*l* 5s to 2*l* 10s; white forge cinder pigs, 2*l* 2s to 2*l* 7s 6d; melters, Nos. 1, 2, and 3, 2*l* 12s 6d to 2*l* 17s 6d; superior makes of all mine melting iron, 3*l* 2s 6d to 3*l* 15s, according to make and quality. The above prices are all delivered on to the wharfs at the South Staffordshire manufactories. Favourite Shropshire and Forest of Dean brands, 4*l* 10s delivered; Northern hæmatites from 3*l* 5*s* to 3*l* 11s 3d, according to brand or quality.

STATE OF THE CORN TRADE FOR THE WEEK.

Mark Lane, Friday Evening.

Only limited supplies of home-grown wheat have been on offer in the various country markets held since we last wrote. Millers, owing to the improved condition in which most of the samples have come to hand, have operated more freely than for some time past, and prices have advanced quite 1s per quarter. A large amount of business has been transacted in foreign wheats at the outports, chiefly for inland consumption, on rather higher terms. Flour, both English and foreign, has changed hands freely, and the quotations have had an upward tendency. Most descriptions of barley have commanded more attention, at 1s per quarter above previous rates. Malting parcels of fine quality continue very scarce. The malt trade has been in a very healthy state, at very full prices. There has been a good consumptive inquiry for oats, at 6d to 1s per quarter more money. The supplies on offer have fallen off to some extent. Beans and peas have maintained their previous rates.

Letters from New York to the 1st inst., state that supplies of produce were seasonably large, but that the demand for export purposes had almost wholly ceased. Prices, therefore, were in favour of buyers, with a heavy demand. The continental markets have continued in a most inactive state; nevertheless, prices of most kinds of produce have been supported. The stocks of grain in the hands of the growers in Germany and Russia appear to be large.

Our markets are still well supplied with potatoes in excellent condition. Prices, however, still were high, viz., from 90s to 150s per ton. It is presumed that the imports from the Continent during the winter will be on a very moderate scale.

In Scotland, there has been rather more business doing in wheat at very full prices. Barley, too, has changed hands freely, partly for shipment to the South. Other kinds of produce have commanded extreme rates with a fair demand.

The Irish markets have shown signs of improvement. The business doing in most descriptions of produce for home consumption has not increased; but the export trade has become much more active.

The few samples of English wheat on offer here, to-day were mostly disposed of at 1s per quarter more money. Foreign wheat was in improved request, and 1s dearer. All kinds of spring corn were quite as dear as on Monday; whilst flour was held for rather more money.

Mr E. Rainford thus reports the state of the floating trade:—Floating Cargoes—Since this day week 25 arrivals for orders are reported up to last night, consisting of 17 wheat, 4 maize, and 4 miscellaneous, viz.:—Wheat, 4 cargoes from Marianople, 2 Trieste, 2 Odessa, 1 Venice, 1 Bordeaux, 3 New York, 2 Taganrog, 2 Alexandria; flour, 1 Valparaiso; maize, 1 Ibraila, 1 New York, 1 Constantinople, 1 Saffi; barley, 1 Scala Nova, 1 Galatz, 1 Constantinople. Of these, about 7 or 8 were previously disposed of. Floating cargo transactions continue limited. The following are the sales reported since this day week:—Wheat, arrived, Marianople, at 56s 6d and 57s; Mantua, 59s; Odessa Ghirka, 55s; new Odessa Ghirka, at equal to 56s 9d, all reported in perfect condition; Taganrog Ghirka, some slight warmth, at 52s 6d, all per 492 lbs; red American, perfect, at equal to 57s 5d; amber Wisconsin, at equal to 57s 11d, damaged for sellers' account, both B. L. quantity; Wallachian, slight dry warmth, 47s, all per 480 lbs; Polish Odessa, perfect, 53s 6d per imperial quarter B. L. quantity. Maize, arrived, American mixed, at 37s 6d, and Ibraila, 2 cargoes, at 38s, both per 480 lbs. Barley, arrived, Scala Nova, 30s per 400 lbs; on passage, Egyptian, Ismail Pacha, 27s 7½d, and Egyptian 28s, both per imperial quarter. Beans, on passage, Egyptian, 36s per imperial quarter.

The Bankers' Gazette.

BANK RETURNS AND MONEY MARKET.

BANK OF ENGLAND.

(From the GAZETTE.)

AN ACCOUNT, pursuant to the Act 7th and 8th Victoria, cap. 32, for the week ending on Wednesday, the 12th day of December, 1860.

ISSUE DEPARTMENT.

	£		£
Notes issued	27,119,415	Government Debt	11,015,100
		Other Securities	3,459,900
		Gold Coin and Bullion	11,768,482
		Silver Bullion	875,933
	27,119,415		27,119,415

BANKING DEPARTMENT.

	£		£
Proprietors' Capital	14,553,000	Government Securities (including Dead Weight Annuity)	9,549,273
Rest	3,177,771	Other Securities	19,987,188
Public Deposits, including Exchequer, Savings Banks, Commissioners of National Debt, and Dividend Accounts	7,029,111	Notes	7,197,475
Other Deposits	12,104,219	Gold and Silver Coin	802,690
Seven Day and other Bills	663,523		
	37,527,623		37,527,626

Dated the 13th December, 1860. M. MARSHALL, Chief Cashier.

THE OLD FORM.

The above Bank accounts would, if made out in the old form, present the following result:—

Liabilities.	£	Assets.	£
Circulation (including Bank post bills)	20,583,465	Securities	29,449,461
Public Deposits	7,029,111	Coin and Bullion	13,447,105
Private Deposits	12,104,219		
	39,718,795		42,896,586

The balance of Assets above Liabilities being 3,177,771*l*, as stated in the above account under the head REST.

FRIDAY NIGHT.

The preceding accounts, compared with those of last week, exhibit—

A DECREASE of Circulation of	£338,142
An INCREASE of Public Deposits of	411,626
A DECREASE of Other Deposits of	368,129
An INCREASE of Government Securities of	50,000
A DECREASE of Other Securities of	117,147
A DECREASE of Bullion of	218,361
An INCREASE of Rest of	8,937
An INCREASE of Reserve of	66,588

The present Bank return does not present any feature of importance. The only unfavourable feature is the decrease of 218,561*l* in the bullion. It will be observed that the arrangement between the Banks of England and France is progressing: the silver bullion now held by the former amounts to 875,933*l*.

Subjoined is our usual weekly table, affording a comparative view of the Bank returns, the Bank rate of discount, the price of Consols, the price of wheat, and the leading exchanges, during a period of four years, corresponding with the present date, as well as ten years back, viz., in 1850:—

At corresponding dates with the present week	1850.	1857.	1858.	1859.	1860.
Circulation, including bank post bills	£ 19,527,978	£ 20,537,314	£ 20,510,117	£ 21,553,750	£ 20,583,465
Public deposits	10,274,389	6,944,352	9,526,771	8,938,987	7,029,111
Other deposits	9,275,629	15,077,428	12,666,131	13,636,760	12,104,219
Government securities	14,228,961	5,446,131	10,808,591	10,925,157	9,540,273
Other securities	12,678,322	22,264,940	13,988,503	19,405,557	19,987,188
Reserve of notes & coin	11,540,465	6,282,295	13,753,114	10,726,762	8,000,165

Price of Consols	96⅞ xd	91¼ xd	97 xd	95⅝ xd	93¾ xd
Average price of wheat	39s 9d	49s 5d	41s 10d	43s 11d	52s 7d
Exchange on Paris (short)	24 87½ 92½	25 30 40	25 7½ 15	25 10 13	25 17½ 25
— Amsterdam ditto	11 14 14½	11 17 18	11 15 18	11 13½ 15½	11 14½ 15
— Hamburg (3 months)	13 4	13 13 14	13 7 7½	13 5 5½	13 6 6½

In 1850, large exportations of silver were taking place. In Paris a commission had been appointed, composed of the most eminent financial authorities in France, to examine into all questions connected with the metallic currency, consequent upon the large discoveries of gold in California. A large speculation had arisen in English railway shares in anticipation of the gold discoveries giving a great impetus to trade.

In 1857, the effects of the panic were gradually passing off. Gold was flowing back from the United States; an increase of a million took place in the gold in the Bank within a week; the private deposits were still rapidly rising, and the private securities had begun to decrease. The Bank's reserve had consequently reached four millions and a quarter over and above the two millions of notes issued in excess of the legal limit. But although the rate of discount in the open market had receded to 9 per cent., the Bank of England maintained their terms at 10 per cent. Commercial failures were still occurring. The Illinois Central Railway Company had issued proposals for a loan of 640,000*l*. Consols stood at 91¾ ex div., yet the Turkish 6 per Cents. of 1854, now 72½, commanded 94 to 95.

In 1858, the reserve and bullion in the Bank were still increasing, although withdrawals of gold had commenced on account of the New Chilian Loan, which was quoted ¼ to ½ premium. The Turkish Loan of 1854 was quoted 93, and that of 1858 ½ discount. The prospectus of the Madras Irrigation Company had made its appearance, the first issue of capital being fixed at one million.

In 1859, the money market showed great abundance, the rate of discount being 2⅜ to ½ per cent. Securities of every description were rising, especially Indian and Brazilian railway shares. Lombardo-Venetian and Grand Trunk of Canada showed marked improvement, the latter having risen from 39 to 43. The bullion in the Bank was upwards of 17,000,000*l*.

The amount of the "other" deposits, as compared with the "other" securities, showed, in 1850, a deficiency of 3,402,693*l*; in 1857, a deficiency of 14,197,512*l*; in 1858, a deficiency of 3,382,372*l*; and in 1859, a deficiency of 5,768,797*l*. In 1860, the deficiency is 7,882,909*l*.

DISCOUNT AND MONEY MARKET.—The discount market has been remarkably steady during the week; the rate may fairly be quoted 4¾ to 5 per cent., and a very fair amount of business has been transacted at both rates. Money is decidedly abundant, but the demand keeps pace with the supply. The accounts from the United States are more favourable, politically speaking, and consequently the excitement in the money market is subsiding. They had received intelligence in New York of the Bank of England having raised the rate of discount to 6 per cent., and they were anticipating when the news of the adverse exchange reached this country that the Bank Act of 1844 would have to be suspended. When they hear, therefore, of the arrangement between the Banks of France and England, and that we have sent them 1,000,000*l* of bullion, and, moreover, that the Bank rate has been lowered to 5 per cent., and that American securities have not fallen in this country, it may reasonably be anticipated that a marked improvement will take place both in American securities and the exchange on England. On the other hand, the great disparity which exists between the prices of American securities here and in New York might cause large amounts to be sent to this market for realisation. The last quotation of exchange was 101 to 3 for second-class paper, and 103 to 105 for first. It must be borne in mind that even at 105 it will answer to send gold from this country to the United States, and we should not be surprised, as at present advised (for there is no telling until it actually sails), to hear that the steamer which leaves Liverpool for America to-morrow had taken 250,000 sovereigns. The rate of money on Government securities is 3 per cent. About 80,000*l* refined gold was sold to the Bank to-day, and 120,000 sovereigns withdrawn.

ENGLISH FUNDS.—The market for English securities during the week has been very steady—the fluctuations in Consols scarcely exceeding ¼ per cent. The market is firm to-day, and closes at 92¾ to ⅞ for the January account.

New Three per Cents. and Reduced are 92¼ to ½. The public have been exchanging Consols for them, but it will be seen there is still a very great margin of profit in so doing. Exchequer Bills are 5 to 3 discount. Money in the Stock Exchange is abundant at 3 per cent.

The Bank of France returns have been received by telegraph. There is a

DECREASE	£
In Bullion of	104,000
Bills discounted	952,000
Advances	250,000
Bank notes	370,000
Current account	790,000
INCREASE	
Treasury balance	30,000

FOREIGN FUNDS.—Mexican bonds have been very heavy at 21. On the announcement that the Miramon party had forcibly broken open the chest containing the bondholders' money and taken therefrom 1,000,000 of dols, although deposited with the British Embassy for safety, the bonds, under the presumption that this outrage will be taken up by the British Government, have recovered to 21⅝ ¾, at which price they close. The last price of French Rentes is 68.80.

The prospectus of the new Turkish Loan has been issued. Its amount is 16,000,000*l* sterling, of which a portion of 5,000,000*l* is offered in Paris, London, Antwerp, Brussels, Amsterdam, and Hamburg.

The loan will be represented by obligations of the Turkish Government of 500f, or 20*l* sterling, bearing interest at the rate of 6 per cent. per annum, payable half-yearly, at either London or Paris; and these obligations will be issued at the price of 312f 50c, or 12*l* 10s sterling, and will be redeemed at the rate of 500f, or 20*l* sterling. Interest to commence on the 1st of January, 1861.

Obligations of a larger denomination may be had if required.

These obligations will be issued on the following conditions, calculated on the price of issue, viz.:—20 per cent. as deposit on application; 16 per cent. within 10 days of allotment; 16 per cent. before the 30th day of January, 1861; 16 per cent. before the 28th of February, 1861; 16 per cent. before the 31st of March, 1861; and 16 per cent. before the 30th of April, 1861.

Any parties desirous of paying their obligations in full will be entitled to a reduction of 4s at the time of allotment.

It will be observed that the price at which the loan is offered to the public is at 62.10 per cent., but calculating the discount and the early operation of the sinking fund, the price is reduced to about 59¾. It is stated that the contract price of the loan was 53¼.

The fatal objection against this new loan being taken up in England is, that the price of the Bonds of 1858, secured by the hypothecation of Customs revenues of Constantinople, and all the revenues of Turkey, is quoted at 58 to ½. Besides, the loan contracted for by M. Mirès, amounts to 16,000,000*l* sterling, whereas only 5,000,000*l* represented by 250,000 bonds of 20*l* each, are brought on the market.

We perceive, however, that in consequence of agreements entered into, there have been allotted to the bankers of Constantinople, represented at Paris by MM. G. Couturier and Co., and A. Rostand, the latter acting for MM. G. Hava and Co., 100,000 bonds; to MM. Arlaud, G. Court, and Co., in their name, and in the names of their clients at Constantinople, 80,000 bonds; to the shareholders in the Caisse Générale des Chemins de Fer, 25,000 bonds; making altogether 455,000 bonds out of 800,000. Supposing the whole loan of 16,000,000*l* is issued in 20*l* bonds, there remain 345,000 bonds, or 6,900,000*l* more bonds to be issued at some future period, which is always detrimental to the success of any loan.

The securities hypothecated to the payment of the interest and redemption of these bonds amount to 1,282,560*l* sterling, of which only 1,094,400*l* is required to pay the interest and sinking fund of the new loan, and are said to include claims on the revenues of Smyrna, Salonica, Janina, Arbonia, Syria, Larissa, Bosnia and the Herzegovine, Sulina, Varna, Tripoli, Erzeroum, Philippopoli, Broussa, Adrianople, Meteline, Samsoun, and the islands of Crete and Cyprus, besides a lien on the salt and tobacco dues, &c. The other leading features of the loan are that the revenues will be remitted direct in monthly amounts, that the drawings are to take place twice a year, and that the principal is redeemable in thirty-six years.

According to a statement put forth by the contractors of the new loan—

	£
The foreign debt of Turkey amounts to	12,400,000
And the domestic debt to	18,560,000
	30,960,000

the interest on which is 1,800,000*l* per annum; but if they succeed in disposing of the new loan, the Turkish debt will amount to 46,960,000*l*, and the annual interest to 2,760,000*l* per annum.

It would be well, perhaps, to recapitulate the foreign loans raised by Turkey, and the security pledged to pay the dividends and sinking fund:—

1854. Loan for 3,000,000*l* sterling, bearing 6 per cent. interest, contracted for at 80. Security pledged, the general revenue of Turkey, and specially 282,000*l* tribute, payable under treaty by the Pacha of Egypt, which treaty was sanctioned by the great Powers of Europe.

1855. Loan for 5,000,000*l*, bearing 4 per cent. interest, under the direct guarantee of England and France, contracted for at 102⅝. Security pledged, the general revenues of Turkey, and especially the annual amount of the tribute of Egypt remaining over that part appropriated to the loan of 3,000,000*l* in 1854, and also on the Customs of Smyrna and Syria.

1858. Loan for 5,000,000*l*, bearing interest at 6 per cent.

£		
4,380,000	issued at	85
620,000	issued at	62½

BULLION.—We subjoin Messrs Pixley, Abell, and Langley's circular, which gives an account of the bullion transactions of the week, and also those in India Government loan notes:—

Gold.—The Anglesey has arrived from Melbourne with 230,000*l*, the whole of which has been sold, partly for the Continent and partly for refining purposes here; and some parcels of fine gold have been sent into the Bank during the past few days, amounting to about 200,000*l*, and further amounts will doubtless be sent in, as there is but little demand for refined gold in the market. The export of sovereigns to America still continues, the Persia having taken 620,000*l*, the Jura 2,900*l*, the Fulton 49,490*l*, and the City of Manchester 7,631*l*; and further amounts will be sent by the Canada on Saturday, and by the steamers leaving next week. The Australian telegram reports the sailing of the Roxburgh Castle, and the Great Britain, with a total of 641,000*l* in gold, for England. The Tyne has taken 16,000*l* to the Brazils, and the Ripon 30,900*l* to Bombay, and 10,000*l* to Alexandria. The Athenian has brought 11,000*l* from Africa, and the Alhambra 7,356*l* from the Peninsula.

Mexican dollars have been in good demand; we quote the price 5s 2¾d per ounce.

Silver.—There has been some activity in the silver market within the last few days. Some sales have been effected at 5s 1½d per ounce standard; this we quote as the price of the day. The West India steamer Atrato was off Hurst Castle this morning, and brings 1,500,000 dols value in specie. The Tyne has taken 14,500*l* to the Brazils, and the Ripon 80,985*l* to Bombay.

Exchange remains the same as at date of our last, banks' drafts on Bombay and Calcutta at 60 days' sight being 2s to 2s 0¼d;

bills with documents, 1s 11⅜d to ⅜d; Madras for banks 60 days' sight, 1s 11⅞d to 2s.

Indian Government Loan Notes have not maintained their late rise. We quote 5½ per Cents. 101 to 101½, and 5 per Cents. 95 to 95½, with very little doing.

Quotations for Bullion.—Gold—Bar gold, 77s 9d per oz std; bar gold, refinable, 78s per oz std; Spanish doubloons, 77s 6d per oz, last price. Silver—Bar silver, containing 5 grs gold, 5s 1⅝d per oz std, last price; fine cake silver, 5s 5⅞d per oz, last price; Mexican dollars, 5s 2⅝d per oz, last price; Spanish dollars (Carolus), 6s 2d per oz, last price.

FAILURES.—A meeting has taken place of the creditors of Mr William Moxon, of London and Dover, contractor for public works, Mr Rutter in the chair. It is understood that the debts were stated at 89,000*l*, including one of 37,000*l* to a single establishment, while the nominal assets, comprising plant, &c, were put down at a much larger amount. Also it was agreed to wind up under inspection, Messrs Reeves, Northam, Bevan, and Maynard being appointed a committee; and that Mr. Moxon should be allowed 1,000*l* per annum during the liquidation.

We are happy to learn that Messrs Nomico, of Manchester, in the Levant trade, whose bills were returned last Saturday, have resumed payment.

There was an examination meeting on Wednesday at the Bankruptcy Court in the case of Mr Joseph Clarke, of Kidderminster, leather factor. His liabilities amount to 60,000*l*, and his assets are between 10,000*l* and 20,000*l*. The examination was adjourned.

A meeting of the creditors of Messrs Piper and Son, the extensive builders and contractors, was held yesterday, but members of the press were not admitted. The estate shows liabilities at 52,236*l*, and the assets 15,617*l*. A composition of 4s 6d in the pound, payable in four, eight, and twelve months, was accepted.

A first dividend has been declared on the estate of Messrs Laurence, Mortimore, and Schrader, leather factors of St Mary axe, and Liverpool. The liabilities of the London house are 800,000*l*, and Mr Lee, the official assignee, has in hand about 50,000*l*, which will yield a dividend of about 15d in the pound. The liabilities of the Liverpool house are 200,000*l*, and Mr Lee has under that estate 20,000*l*, which will yield a dividend of 2s in the pound.

The letters from Manchester report another failure in the Levant trade, that of Messrs A. Mushlian, of Manchester and Bradford.

MISCELLANEOUS.—Notice has been given by the Treasury that the time for receiving tenders for the guaranteed loan of 50,000*l* for Jamaica has been extended from Thursday, the 20th of December, to 2 o'clock in the afternoon of Friday, the 21st of December.

It is stated that proposals for a new Sardinian loan will be presented on the reassembling of the Chambers.

A prospectus has been put forth of the Trust and Agency Company of Australia with a very respectable direction, and a capital of 500,000*l* in 10*l* shares, of which only one-fourth are to be issued in the first instance. The Company propose to borrow money on debentures in England at fixed rates, to be employed in the colony in loans secured by a first mortgage on real estate, and limited to the amount of half its selling value. They will also undertake general agency business.

The East Indian Railway Company have notified their desire to borrow 1,500,000*l*, on 5 per cent. debentures at par, redeemable in five years, with an option to the holders to demand a renewal for a second term of five years. The payments are to be 25 per cent. on allotment and 25 per cent. in each of the three subsequent months. This will complete the sum the Company are empowered to borrow on debentures not convertible into shares. The previous 1,500,000*l* were issued in July last, when Consols were at 93¼.

It is stated that the Chambers of Commerce of Marseilles, Montpellier, Nismes, Narbonne, and Beziers have again very recently sent pressing representations to the French Minister of Commerce on the scheme to come into force in this country on the 1st of January next of differential duties on wine by alcoholic tests. The President of the Association Viticole, of Burgundy, also summoned the Committee to meet him at Beaune, for a similar object; and at Perpignan equal hostility is said to exist, as their wines would be taxed 140 per cent. more than those of Bordeaux.

A supplementary report of the South Australian Company, to be presented on the 14th inst., embraces the accounts received from the colony for the half-year ending the 30th of June. The income for that period, after allowing for losses and reductions for rent, amounted to 13,325*l*. Nearly all the farms which had been relinquished in consequence of a period of drought have been relet, and in many instances at an advance of rent. Mr Giles, the manager in South Australia, will retire on account of age and infirmities on the 1st of January, and is to be succeeded by Mr Brind.

The thirtieth annual meeting of the Scottish Union Fire and Life Insurance Company was held on the 15th instant, at Edinburgh, when the directors' report was unanimously adopted.

The fourteenth annual meeting of the Consolidated Investment and Assurance Company was held on Wednesday, at the chief office in Cheapside.

COMPARATIVE EXCHANGES.

The quotation of gold at Paris is about 1 per mille premium, and the short exchange on London is 25.20 per 1*l* sterling. On comparing these rates with the English mint price of 3*l* 17s 10½d per ounce for standard gold, it appears that gold is about the same price in London and Paris.

By advices from Hamburg the price of gold is 424¾ per mark, and the short exchange on London is 13.4½ per 1*l* sterling. Standard gold at the English Mint price is, therefore, nearly 2-10ths per cent. dearer in Hamburg than in London.

The course of exchange at New York on London for bills at 60 days' sight is from 102 to 104 per cent., which, when compared with the Mint par between the two countries, shows that the exchange is against England; and at this rate gold yields a profit when sent to the United States.

COMMERCIAL EPITOME.

FRIDAY NIGHT.

A very limited quantity of English wheat was on offer at Mark lane this morning, and the demand for both red and white qualities ruled steady, at, in most transactions, an advance in the quotations, compared with Monday, of 1s per quarter. In foreign wheat—the supply of which was large—a full average business was transacted at 1s per quarter more money. Both barley and malt were quite as dear, and the value of oats had an upward tendency. Beans and peas were firm in price, and both English and foreign flour commanded extreme rates. The imports from abroad this week are liberal—viz., 24,030 quarters of wheat; 5,710 barley; 32,990 oats; 220 sacks and 14,870 barrels of flour.

At Liverpool, to-day, most kinds of produce were in fair request at Tuesday's currency.

There has been a fair business transacted in cotton during the week in the Liverpool cotton market, the sales amounting to 58,000 bales, and include 46,000 to spinners, 7,000 bales on speculation, and 5,000 bales for export. Quotations are reduced $\frac{1}{8}$d per lb on most descriptions, since Friday last; in some instances the decline has been even greater. The market closes, however, firmer, with steady prices. Sales to-day, 12,000 bales. The American accounts last received are decidedly in favour of the article. The decrease in the receipts is now becoming very considerable, and the crop estimates, consequently, dwindle down in proportion. Planters at present prefer to keep back their supplies to the ports during the financial crisis, and are quite in a position so to do.

Owing to increased supplies on offer, the tea market has been in a most inactive state, and prices have had a downward tendency.

IMPORT of TEA in London, from Jan. 1 to Nov. 30, 1860, and the STOCK on hand on Dec. 1, 1860, compared with the corresponding date in 1859.

The following commercial intelligence is dated Hong Kong, October 29:—

From Shanghai our dates are to the 20th inst. Tea—There appeared some improvement in tea, with more business doing. Stocks were light, but, as large quantities were reported as waiting tonnage at Ningpo for conveyance to market at Shanghai, it appeared probable that more business would arise than had been experienced this season. The reported settlements of black teas were as follows:—1,820 chests Hoochow, at 21 taels to 24 taels; 600 chests Souchong, at 23 taels; 1,750 chests com-

mon Congou, at 15½ taels to 17½ taels. Green Teas—There had been a moderate business, confined to Shanghai packed Japans and Pingaueys. The settlements amounted to about 7,400 packages of native and 5,900 packages Japan teas. Silk had displayed great activity, the settlements since preceding mail amounting to close on 9,000 bales. High grades were very firm in price. Dealers, however, appeared anxious to realise, and were freely met by buyers. No. 1 and No. 2 Tsatlees were not to be had. Foochow advices are of the 22nd of October. Tea—The accounts from home to the 26th of August, together with the large arrivals of tea at Canton, had caused buyers to withdraw from the market. Arrivals still continue in considerable quantities, amounting, of congous alone, and including contract teas of this description, to 72,000 chests. 42,000 packages Oolong had arrived during the same period, and about 41,000 packages of fancy teas. The settlements of congou for the fortnight amount to about 30,000, principally of inferior kinds, and for the colonies and America. The total export this year from Foochow alone to Great Britain now amounts to 15,500,000 lbs, being 100 per cent. in excess of last year's exportation for the same time. The export from Canton is little short of that from Foochow, and although the trade at Shanghai has been interrupted, there is a strong probability of its being resumed. These facts and considerations, with the increasing element of supply from Japan, all indicate a large and excessive crop, to which fact too much importance cannot be attached at home.

The controversy between the brokers and the principal wholesale tea dealers has narrowed down to a very short compass. The brokers have so far met the views of the dealers as to relinquish lot money upon lots under the value of 15*l*. The dealers, however, we understand, will not consent to this proposition, and do not mean to accept of any other condition than the total abolition of lot money.

We have to report a dull sale for all descriptions of raw sugar, and a decline in prices of from 6d to 1s per cwt. Refined goods have met a slow inquiry at barely late rates.

Rather large quantities of coffee have been brought forward, and for which the inquiry has ruled inactive. In the quotations no change of importance has taken place. Cocoa has continued dull in sale, at 1s per cwt less money.

There is a slight improvement in the demand for rice, and prices are supported. The business doing, however, is only moderate.

For the time of year the fruit trade, arising no doubt from the large crop, has been in a most inactive state.

Messrs Bradbury and Cook report the result of the last public sales of wool held in London as follows:—

The third series of public sales of colonial wool commenced on the 15th November, and closed on 7th December. The catalogues contained the following quantities:—Sydney, 6,052; Port Philip and Portland Bay, 8,209; Van Diemen's Land, 2,611; Adelaide, 1,730; Cape, 21,231; New Zealand, 5,932; Swan River, 232; total, 45,997 bales. Spanish and Portugal, 848; Buenos Ayres, 174; German, 411; Russian merino, 772; sundries, 378; total, 2,583 bales. There has been a well-sustained competition on the part of the home trade throughout these sales, but fewer foreign buyers have attended than usual, and their purchases have been extremely limited. Notwithstanding the adverse influence of a rise in the Bank rate of discount to 6 per cent. on the first day, there was an advance of 1d per lb on all the better descriptions of Australian wool; and as the sales progressed, the unusual scarcity of good sound stapled fleece wool became more apparent, causing a further advance of 1d per lb on this class; but for inferior-bred and ill-conditioned flocks, the prices were no higher than those obtained at the previous sales. A very large proportion of the Cape wool has again been rendered totally unfit for ordinary purposes by the obnoxious practice of double clipping, and, being brought to the market in very wasty condition, sold heavily, at a reduction of 2d per lb. Though we had a fair supply of New Zealand wool, there was very little above a medium class. The want of care and attention in packing wool in this colony acts prejudicially to the interests of growers,—the long and short stapled, and even the washed and unwashed, often being thrown indiscriminately together, makes it exceedingly difficult, if not impossible, to estimate correctly its real value, and renders it unfit for the trades for which this otherwise favourite wool is so well adapted. The low wool sales commenced on the 7th and terminated on the 8th inst. The following quantities have been offered, viz.:—East India, 540; Russian, 1,051; Egyptian, 318; Buenos Ayres, 83; Mogadore and Sfax, 873; Turkey 231; Spanish black skin, 244; sundries, 969; total, 4,309 bales. At the low wool sales, held on the 7th and 8th inst., there was an unusually large attendance of home and foreign buyers, and a very active competition for all descriptions. East India sold at an advance of ¼d to 1d per lb on the last Liverpool sales. For Mogadore there was a very active demand, especially for the long carding descriptions. Egyptian sold at a reduction of 1d per lb. About 900 bales Donskol were offered, and (with the exception of about 150 bales held at too high limits) were all sold at a slight advance on the prices lately current—a good, clean, long, combing parcel realising 9¼d to 9½d per lb. Turkey wool has lately commanded more attention from our home buyers, and the better classes have brought higher prices than at any former period. This wool is growing in favour, and is worthy the attention of importers.

Appended is a statement of the number of bales submitted to the hammer, in London, during the past three years, respectively:—

	1858.	1859.	1860.
Victoria	65,107	72,021	74,996
Sydney	53,434	47 755	46,375
Tasmania	16,869	16,975	17,616
Adelaide	22,460	23,249	24,290
New Zealand and Swan River	12,165	17,166	22,020
Cape of Good Hope	56,610	56,467	53,541
Sundries	7,123	11,227	9,224
Total	333,768	244,860	248,062

No quotable change has taken place in the value of either hemp or flax. Coir goods have ruled firm in price. The indigo market is firm, at 4d to 8d per lb above October rates.

M. Arles Dufour and Co., of Lyons, write as follows in reference to the silk trade:—"The activity in our market throughout October has suffered, during the last fortnight, from the unfavourable accounts which were received from the United States. Many orders have been cancelled, and buyers have expressed their intention of refusing any goods delivered behind time. However prices have not yet experienced any sensible decline, and the latest news received from the States being less alarming, an easier feeling is beginning to prevail amongst manufacturers. In China silk, transactions remain limited, buyers showing no desire to operate before the arrival of the larger shipments expected by sailing vessels."

Deliveries of Silk through the Lyons Condition House.

	bales.	kilogs.
From October 1 to 31, 1859	3,150	215,000
From October 1 to 31, 1860	3,892	281,200
From November 1 to 30, 1859	2,750	198,000
From November 1 to 30, 1860	3,383	251,300

Spirits generally have ruled about stationary, with a flat market. Oils have undergone very few changes. To-day, linseed oil, on the spot, has sold at 22*l* 5s. The demand for tallow is steady, at 60s for P.Y.C., on the spot; 60s all the year; 63s 3d January to March; 60s 9d March alone; 59s 6d April to June; and 58s October to December. Town tallow, 58s 6d net cash.

"The Banks continue to discount freely to their regular customers," says the New York *Shipping List* of the 1st instant, "but elsewhere there is as much indisposition as ever to buy paper not strictly A No. 1, and figures show but little abatement from the high rates ruling during the last fortnight. The minimum rate for "gilt edge" is 12 per cent.

	Per cent. per annum.

The following is a comparative statement of the imports of foreign dry goods at the port of New York for the week and since January 1st:—

For the Week.

	1859. dols	1860. dols
Entered at the port	1,668,473	1,202,031
Thrown on market	1,440,704	530,908

Since January 1.

	dols	dols
Entered at the port	104,395,718	96,217,379
Thrown on market	103,579,741	95,000,799

The receipts for Customs at this port for the month ending yesterday, amounted to 1,632,228 dols 05c; November, 1859, 2,147,278 dols 37c; decrease, 1860, 515,050 dols 32c. The stock market since our last has been dull and spiritless, with fewer operations than usual, and accompanied by a feeling of marked caution on the part of both buyers and sellers. Nearly every branch of the dry goods department continues in the same dull state noticed from time to time during the past several weeks. The bulk of the Western trade has become finished up, and for the City trade but little is doing except in a retail way. Some little is doing with the interior and South-Western States, but chiefly for cash or short credit. There has been quite a noticeable revival in the movement of domestic goods for export however, and the sales for shipment during the past week or two have been on a more extensive scale than for a long time previously."

CORN.

AMERICAN GRAIN AND FLOUR MARKETS.

New York, Dec. 1.—Flour and Meal.—The buoyancy which pervaded the market for State and Western flour at the date of our previous writing was superseded on Wednesday by a feeling of depression, under which prices receded 10c per barrel, with a moderate business at the reduction. The sales for the two days foot up to 22,000 barrels. Canada flour has been in moderate demand, at previously quoted rates; the sales are 800 barrels, of which 300 found purchasers yesterday. Southern flour has also been in limited demand, and the market continues depressed, though prices are without change. The sales comprise 1,400 barrels, of which 700 changed hands yesterday. Rye flour is dull and nominal. Corn meal is dull and lower, and may be quoted at 3.20 dols to 3.30 dols for Jersey, and 3.45 dols to 3.50 dols for Brandywine, with sales to the extent of 100 barrels yesterday at the outside price; puncheons are dull and nominal at a reduction of 50c, and may be quoted at 17.50 dols.

Export, from 1st to 27th November.

	1860 barrels	1859 barrels
Wheat Flour	220,267	121,003

Grain.—The demand for wheat was tolerably active on Wednesday, both for local milling and export, and the transactions were pretty heavy, though at a slight depreciation in values. The

market opened quiet yesterday, and only a moderate demand prevailed throughout the day. There was very little inquiry for export, and the home trade purchased very sparingly. The transactions for three days comprise 160,500 bushels, as follows:—1,000 bushels winter red Western, at 1.25 dol; 18,000 amber Wisconsin; 1.14 dol to 1.15 dol; 19,400 Milwaukee Club, 1.10 dol to 1.13 dol; 5,000 Racine spring, 1.10 dol; and 1,500 white Western, 1.30 dol. There is little or no change in the corn market; the demand has been fair, and the sales for the two days comprise 106,000 bushels.

Export, from 1st to 27th November.

	1860 bushels	1859 bushels
Wheat	2,405,647	138,659
Corn	546,570	2,530

COLONIAL AND FOREIGN PRODUCE MARKETS.

TRANSACTIONS OF THE WEEK.

For Report of This Day's Markets, see "Postscript."

Mincing Lane, Friday Morning.

Sugar.—The trade and refiners still show the same indisposition to extend their operations, consequently the market remains flat. At the public sales prices occasionally receded 6d to 1s, especially for some of the Mauritius brought forward. West India is less inquired after than of late, owing to the reduced production of refined at present unremunerating rates. 200 hhds and tierces Barbadoes partly sold at 40s 6d to 44s 6d. 187 casks grainy Demerara were chiefly bought in. Total transactions in the three days reached 664 casks. The landings last week were 2,710 tons, the deliveries only 3,600 tons, consequently the stock shows a diminution of 900 tons, and is 53,200 tons, against 60,500 tons at the same period in 1859.

Mauritius.—The public sales, on Tuesday, went off without animation, and 3,110 bags chiefly found buyers: low to good brown, 33s to 37s 6d; low grey, 38s; grainy low brown to good yellow, 38s 6d to 43s per cwt. A few parcels have been sold by private contract.

Bengal.—Business to the extent of 3,500 bags has taken place by private treaty: soft brown, 33s 6d to 34s; Gurpatta date, 40s 3d. At auction, on Tuesday, 945 bags were mostly taken in: Cossipore and Belly, 44s 6d to 45s 6d per cwt.

Penang.—2,252 bags sold steadily from 37s 6d to 43s 6d per cwt for soft brown to good grainy yellow.

Madras.—5,100 bags grocery were chiefly sold at 44s to 45s for middling to fine yellow; with some soft greyish Benares kind, 44s to 44s 6d per cwt.

Port Natal.—255 bags brown and low yellow mus covado kinds realised 40s to 40s 6d per cwt.

Foreign.—The public sales have been of moderate extent this week. 443 casks 100 barrels Porto Rico partly sold at 40s to 45s for brown to good yellow. 25,850 bags clayed Manilla were bought in at 39s to 40s 6d; and 1,264 boxes Havana, low brown to good yellow, from 37s 6d to 44s 6d per cwt.

Refined.—The market has been dull and prices are quite unsettled, viz., 50s 6d for low grocery goods. Crushed and pieces may be quoted at 48s 6d to 49s 6d, and 43s to 47s 6d per cwt respectively. No sales are reported in Dutch crushed.

Molasses.—There appears to be less inquiry, but with very small supplies full rates are maintained.

Rum.—The sales this week reach 200 puns West India, including Leewards at 1s 9d: 350 casks and puns East India, Bengal at 1s 8d; Penang at 1s 9d per proof gallon.

Cocoa.—Some small parcels of West India sold at barely previous rates in the sales, viz., 54 bags Trinidad at 65s to 67s 6d for grey to mixed greyish red; and 21 bags St Lucia at 62s. 3,714 bags Guayaquil were withdrawn above the value, viz., at 70s to 72s per cwt.

Tea.—Business in this market continues upon a very limited scale, and prices are nominally unaltered since last Friday. The news from China showing continued heavy shipments partly account for this dulness.

Coffee.—Further supplies of plantation Ceylon have arrived, and the market was rather lower at one time this week. The sales yesterday went off with more steadiness, 1,104 casks 1,024 barrels and bags chiefly finding buyers: fine ordinary to low midding, 65s to 69s; middling to good middling bold, 69s 6d to 74s. Native is firm, with little offering for sale. No further business has occurred in floating cargoes. The stock here is 6,800 tons, against an average of 7,950 tons in the three preceding years at the same date.

Rice continues dull. The sales privately during the week included low middling white Bengal at 12s 6d; fair pinky Madras, 11s 4½d. Yesterday, 4,000 bags old Necrancie Arracan brought 10s 4½d per cwt, about 6d decline from the late highest point.

Imports and Deliveries of Rice to December 8, with Stocks on hand.

	1860. tons	1859. tons	1858. tons	1857. tons
Imports	31900	34700	30400	72130
Deliveries for home use	72000	31500	34650	29000
Exported	*	20650	21900	25500
Stock	24950	70750	86200	67400

* The deliveries of duty-free goods for export are not given now, and the total will be shown under the head of home consumption.

Spices.—The market is quiet. 5,018 bags Singapore black pepper were sold at easier rates, from 3¾d to 4d. 638 bags Batavia: common, very dusty, 3⅝d to 3¾d. 174 bags middling to good Singapore white, 5¾d to 6⅛d. Of the latter, 250 bags realised 6d. 13 cases good Penang, 1s 4½d to 1s 5d; the remainder taken in at 1s 1d to 1s 6d. 9 casks Amboyna cloves were bought in at 5½d. 23 packages nutmegs: brown, 1s 2d to 1s 5d; middling, 1s 6d to 1s 7d. 4 cases mace, 10d to 11d per lb. 337 cases Cochin ginger, 43s to 104s per cwt for low to good bold. 170 boxes cassia lignea partly sold at 88s to 92s for second and first piles.

Sago.—1,856 boxes 1,886 bags sold as follows: good to fine small grain, 17s 6d to 20s 6d; good small medium, 17s 6d to 18s; good large, 17s 6d to 18s per cwt.

Sago Flour.—4,425 bags were taken in at 18s per cwt.

Saltpetre.—The sales have been of limited extent, and prices are unaltered. A few contracts made in Bengal were at 38s 6d to 42s 9d per cwt for refraction 11¼ to 2 per cent.

Imports and Deliveries of Saltpetre to December 8, with Stocks on hand.

	1860. tons	1859. tons	1858. tons	1857. tons
Imported	11825	17730	9600	16350
Delivered	12125	16800	13350	11800
Stock	3550	3950	2430	6560

Deliveries last week 174 tons.

Cochineal.—388 bags partly sold at easier rates for Honduras silvers ordinary to middling, 2s 10d to 3s 1d; blacks, 3s 4d to 3s 6d. Mexican bought in: silver, 2s 9d to 2s 10d; black, 3s 2d to 3s 6d. 54 bags Teneriffe found buyers: silvers, 2s 10d to 3s; blacks, 3s 2d to 3s 5d per lb.

Lac Dye.—107 chests partly sold as follows: I, 1s 6d to 1s 6½d. B Mirzapore bought in at 1s 7d. Middling to good marks are in steady demand by private contract.

Other Dyestuffs.—Cutch is very quiet, and the parcels brought to public sale have only partly found buyers at 25s to 25s 6d. 68 bales Bengal safflower went at 3*l* 5s to 7*l* 5s per cwt for ordinary to good.

Dyewoods.—Cuba fustic was bought in at 8*l* 10s per ton.

Rubber.—East India is still neglected, there being only buyers at a great reduction on previous rates. Fine Para has sold at 1s 9d to 1s 10d per lb.

Metals.—The sales have been generally unimportant, and prices exhibit little change to notice. Spelter on the spot has realised 19*l* 17s 6d, at which 100 tons are reported; and a parcel for arrival at 20*l* 12s 6d. Scotch pig iron is inactive, at 51s to 51s 6d per ton for mixed Nos. Manufactured descriptions steady. Foreign tin sells slowly at the quotations. Lead and copper are dull.

Hemp.—Of 350 bales Manilla, by auction, only a small portion good roping sold at 24*l*; fine white was bought in at 40*l*. Some speculative inquiry has prevailed for jute, and the public sales on Wednesday went off at full rates: ordinary to fine, 14*l* 10s to 20*l* per ton. A few parcels also changed hands by private contract. Russian hemp is quiet.

Linseed.—Arrivals have been large. The markets quiet. Calcutta, 58s to 58s 6d; Bombay, 63s per quarter.

Oils.—A floating cargo of olive has sold for the United Kingdom, consisting of Jaffa oil, at 55*l* per tun. On the spot few sales are reported. All kinds of fish oil are dull. There is a good supply of linseed, with sellers at 29s on the spot, and 30s for delivery in the next three months. Rape has been quiet: foreign refined, 43s to 45s; brown, 41s; and speculative parcels are still offering. Cocoa-nut remains firm: Ceylon, 55s 6d to 56s; Cochin 53s 6d to 54s. Fine palm is steady at 47s per cwt.

Turpentine offers at 10s 6d for rough. Spirits dull. American 32s to 32s 6d per cwt.

Tallow.—The market has not presented any new feature this week, being now steady, although rather quiet. First sort Petersburg Y. C., 60s to 60s 3d; for delivery in the first three months of next year, 60s 6d; April to June, 59s; October to December, 58s per cwt.

Particulars of Tallow.—Monday, December 10.

POSTSCRIPT. Friday Evening.

Sugar.—The market has been dull to-day, without further alteration in prices. 268 casks West India sold, making 932 casks for the week. 1,223 bags Penang, by auction, went at 36s to 43s for brown to good yellow. 550 bags Bengal and 150 casks crystallised Demerara were chiefly withdrawn. Privately 2,700 bags low Siam have sold at 33s 3d; 500 bags Gurpatta date Bengal at 41s 6d per cwt.

Copper.—304 casks 165 barrels and bags plantation Ceylon sold at previous rates. 625 bags native were partly disposed of at 63s 6d to 64s. 780 quarter bales Mocha, of indirect import, were taken in at 110s to 115s per cwt.

Cocoa.—37 bags Trinidad and 60 bags Surinam were withdrawn.

Spices.—61 cases brown nutmegs sold from 1s to 2s 3d for small to good. 24 cases mace, 11d to 1s 4d. 8 cases Penang cloves were taken in at 1s 5d. 102 cases cassia lignea of fair quality was taken in at 90s to 92s per cwt.

Sago Flour.—A large parcel has sold at 17s per cwt.

Cochineal.—227 bags went at previous rates.

Rubber.—Fine Para sold at 1s 9d to 1s 9½d per lb.

Oil.—Cochin sold at 54s 9d to 55s 6d; Ceylon, 53s; Sydney, 51s. Palm, 45s 6d to 47s 6d.

Tallow.—Town, 61s. 460 casks Australian, by auction: beef, 53s to 57s. 74 casks 271 cases East India, 57s to 59s 3d per cwt. Y. C. steady.

ADDITIONAL NOTICES.

Green Fruit.—Arrivals of all kinds have been received, and, owing to the approach of the Christmas holidays, demand is good. Some cargoes of oranges from St Michael, Terceira, and Fayal, sold by Kesling and Hunt, went at full prices. Lemons lower. Almeria grapes cleared from first hands. Nuts without alteration, a steady consumption going on. Chestnuts lower; quality not good this season.

Dry Fruit.—The market shows the usual symptoms of inactivity, which are expected at Christmas. All fruit is being consumed on a large scale. Currants, by recent advices, have again advanced in value at places of growth, and no signs are evident of any decline on this side. Valencias firm. Red Smyrna and Eleme raisins are in much favour at current rates.

English Wool.—Very little doing; no change in prices.

Colonial Wool.—The market continues firm.

Flax.—The value of this article is unaltered.

HEMP.—The market is very quiet, with but little business doing.

COTTON.—Sales of cotton wool from Friday, 7th December, to Thursday, 13th, inclusive:—800 bales Surat, at 4¼d and 4⅜d for middling fair Oomrawattee; ⅜d for good fair ditto; 4⅜d and 4⅞d for fair Dhollera; and 5⅜d for good fair Broach. The transactions have again been limited and the market dull, but as the quantity offering is small, and holders firm, prices remain unchanged. Yesterday, 250 bales and 150 bags Surat, mostly damaged and all faulty, were sold at public sale at 3¼d to 4⅜d per lb. 73 bales Surat (all faults) are advertised for public sale on Thursday, 20th inst.

SILK.—Silk market very quiet. Prices a downward tendancy for all except very best and fine silk. All waiting for China letters to-morrow.

TOBACCO.—There has been less activity in the market, and sales in most instances have been of a retail character. Prices remain unchanged.

LEATHER AND HIDES.—The leather market continues unaltered. The supplies of fresh leather at Leadenhall on Tuesday were small, but the demand was also limited. Prices remain stationary. The only article at all scarce is English butts, 25 lbs and upwards, for which there is a good inquiry. There has not been any public sale of foreign hides this week, but by private contract the sales of River Plate hides since the 1st instant amount to 8,068 hides, and consist of 4,304 salted Monte Video hides, 65 lbs to 69 lbs at 7d, tares 5 lbs and 6 lbs; 2,263 Buenos Ayres light ox, 41½ lbs at 6¼d; 46⅝ lbs to 46⅞ lbs at 6⅜d; 100 cow, 44 lbs at 6½d, tare 4 lbs; 1,639 Rosario, 48½ lbs at 6⅝d, tare 4 lbs; 362 damaged hides at 5¾d to 6¼d. Some sales of Australian hides have also been made at slightly reduced rates.

METALS.—We still report a limited business in metals. Copper keeps steady in price, and the demand is certainly not worse than for several weeks past. Iron is well maintained in Wales, but Staffordshire accounts are very flat. Scotch pig has receded in price to 51s 3d per ton. Tin is unchanged, and lead is the same. Spelter is a trifle lower, with but little doing. Tin plates still move off but slowly.

TALLOW.—Official market letter issued this evening:—

	s	d
Tawn tallow	61	0
Fat by ditto	8	2
Yellow Russian	61	6
Melted stuff	43	0
Rough ditto	26	0
Greaves	20	0
Good dregs	7	0

Imports this week 963 casks.

PROVISIONS.

More demand for bacon at previous rates. Irish butter selling better, at higher prices. Foreign butter, middling quality, very dull, at lower prices; best Friesland 4s higher than last week.

METROPOLITAN CATTLE MARKET.

MONDAY, Dec. 10.—The total imports of foreign stock into London last week amounted to 6,163 head. In the corresponding period in 1859 we received 4,311; in 1858, 4,322; in 1857, 1,773; in 1856, 1,622; in 1855, 4,752; and in 1854, 3,999 head.

There was only a moderate show of foreign stock here to-day, and the demand for it was inactive, at last week's prices. The arrivals of beasts fresh up this morning were by no means extensive, but we observed an improvement in their general condition. All prime breeds moved off freely, at fully last Monday's currency; but inferior beasts were a slow enquiry, on former terms. We were but moderately supplied with sheep, the general condition of which was inferior. Prime Downs and half-breds moved off steadily, at very full prices. Otherwise the mutton trade was in a sluggish state, on former terms. Calves, the supply of which was limited, moved off slowly at Thursday's decline in value of from 2d to 4d per 8 lbs.

SUPPLIES.

	Dec. 13, 1858.	Dec. 12, 1859.	Dec. 10, 1860.
Beasts	6424	7560	5020
Sheep	23200	24420	22840
Calves	115	160	159
Pigs	380	430	260

THURSDAY, Dec. 13.—Our market to-day was seasonably well, but not to say heavily, supplied with beasts, in somewhat improved condition. All breeds sold briskly, at an advance in the quotations, compared with Monday, of 4d per 8 lbs, the general top figure being 5s 4d per 8 lbs. The show of sheep was only moderate, and the mutton trade ruled firm, at very full prices. A few very superior Downs realised 5s 8d per 8 lbs. Calves, the supply of which was tolerably good, changed hands slowly, at late rates.

Per 8 lbs to sink the offal.

	s	d	s	d		s	d	s	d
Coarse and inferior beasts	3	4	3	8	Prime Southdown sheep	5	4	5	6
Second quality ditto	3	10	4	2	Large coarse calves	3	8	4	4

Prime small	4	2	4	4	Large pork	4	0	4	8
Veal	3	8	4	0	Small pork	4	10	5	2

HOP MARKET.

MONDAY, Dec. 10.—The stagnation which has so long prevailed in our market has been relieved during the last day or two by an inquiry for yearlings and fine old hops, several sales of which have been effected at the reduced quotations, and will it is expected lead to an improved trade. In the new growth there is scarcely any business doing:—Mid and East Kent, 6*l*, 14*l*, 18*l*; Weald of Kents, 4*l*, 8*l*, 14*l*; Sussex, 5*l*, 7*l*, 9*l*; Yearlings, 5*l*, 7*l* 7*s*, 9*l* 10*s*.

FRIDAY, Dec. 14.—There is a steady consumptive demand for the best grown samples of new hops, and considerably more doing in yearlings and old hops at very firm rates.

POTATO MARKET.

WATERSIDE, Thursday, Dec. 13.—The arrivals of potatoes coastwise continue limited at this market owing to the direction of the wind, but should it change in the course of a day or two a good many vessels are expected to arrive. By rail, also, only limited quantities have come to hand; but, although the market is thinly supplied, trade is still slow. Prices, however, are fairly maintained:—York Regents, from 120s to 140s: York Flukes, 140s to 150s; Scottish Regents, 120s to 140s; Dunbar ditto, 150s to 160s; French, 95s to 100s; Belgian, 90s to 95s per ton.

HAY MARKETS.—THURSDAY.

SMITHFIELD.—Meadow hay, 2*l* 0s to 5*l* 5s; clover, 3*l* 0s to 5*l* 10s; and straw, 1*l* 10s to 1*l* 14s per load. Trade dull.

CUMBERLAND.—Meadow hay, 2*l* 5s to 5*l* 5s; clover, 3*l* 0s to 5*l* 8s; and straw, 1*l* 10s to 1*l* 16s per load. Trade very inactive.

WHITECHAPEL.—Meadow hay, 2*l* 0s to 5*l* 5s; clover, 3*l* 0s to 5*l* 10s; and straw, 1*l* 10s to 1*l* 14s per load. A dull trade.

LIVERPOOL MARKETS.

WOOL.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, Dec. 14.—Our market exhibits great firmness, although the transactions are not extensive; but as consumers are constantly in the market, stocks are prevented from accumulating, and sellers show little disposition to give way in prices.

CORN.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, Dec. 14.—The trade has been a little quieter since Tuesday, yet a fair amount of business has been done in the finer descriptions of wheat and flour for consumption at about the rates then current. All other articles have met a retail demand at full prices.

METALS.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, Dec. 14.—There is no change to report this week in manufactured iron, for which there exists only a very languid demand. For Scotch pig iron there has been rather a declining market, and the transactions have been of a limited character. Copper remains dull, and little inquired for. Lead is also very quiet. Spelter is slightly lower. Other metals without change.

The Gazette.

TUESDAY, Dec. 11.

BANKRUPTCIES ANNULLED.

J. Linley, Sheffield, manufacturer of sheep shears.

J. Rae, boot and shoemaker, Dunse, Berwickshire.
J. Meighan, flesher, Glasgow.
J. Leckie, slater, Bellshill, Lanarkshire.

COVENT GARDEN THEATRE.—A new legendary opera, by W. Balfe entitled "Blanca; or, the Bravo's Bride," has been produced at this theatre. The music is effective, but there is a want of those pretty ballads for which Mr Balfe has gained a wide-spread renown. Miss Lousia Pyne has played the part of the Bravo's Bride with her usual skill, while Mr Harrison, as the Bravo, has been well received by a crowded audience. Mr Balfe's new opera may be considered successful.

COMMERCIAL TIMES

Weekly Price Current.

☞ the prices in the following list are carefully revised every Friday afternoon, by an eminent house in each department.

LONDON, FRIDAY EVENING.

Add 5 per cent. to duties on pepper, tobacco, wines, and timber, deals, wood, &c., from British Possessions.

EPITOME OF RAILWAY NEWS.

TRAFFIC RETURNS.—The traffic returns of railways in the United Kingdom for the week ending Dec. 1 amounted to 493,660*l*, and for the corresponding week of last year to 466,230*l*, showing an increase of 27,430*l*. The gross receipts of the eight railways having their termini in the metropolis amounted to 201,062*l*, and for the corresponding week of 1859 to 198,321*l*, showing an increase of 2,741*l*.

RAILWAY NOTICES FOR NEXT SESSION.—It appears that the number of notices given for Railway Bills to be brought under the consideration of Parliament next Session is 302, as compared with 225 for last Session, and 185 for the Session of 1859. The number of notices given for Railway Bills in the ensuing Session very much exceeds that for any preceding Session since the year 1847, when the number of notices amounted to 340. Of course, the notices are always more numerous than the number of Bills applied for. The number of Railway Bills applied for in the last Session of Parliament was 175, of which 54 were either rejected or withdrawn, and 121 received the Royal assent.

CRYSTAL PALACE COMPANY.—The report of the directors of this company states that the income for the year ending the 31st of October last, from all sources, amounted to 120,670*l*, while the expenditure was 72,262*l*, leaving a balance of 48,804*l*. To this balance of 48,804*l* must be added the reserve of 11,219*l* brought forward from October, 1859; making in all 59,627*l* available for dividend. This sum the directors proposed to divide in the following manner :—Preference dividend and interest on debentures and debenture stock for the year, 28,340*l*; dividend on the ordinary stock of 2 per cent. (being equivalent to 2s on each original share), 20,056*l*; leaving a balance to carry forward of 11,231*l*.

RAILWAY AND MINING SHARE MARKET.

LONDON.

MONDAY, Dec. 10.—The railway market to-day was in a quiet position, business generally being limited. The principal variation was an advance of nearly 1 per cent. in London and North-Western shares, but this was barely supported at the close. Midland, Lancashire and Yorkshire, and North-Eastern were rather lower, sales having augmented. Brazilian shares were without material change; and American, on the average, appeared to be well supported. Scarcely any transactions occurred in miscellaneous securities, but quotations exhibited steadiness.

TUESDAY, Dec. 11.—The railway market was heavy, particularly towards the end of the day, prices sympathising with the decline in Consols and other securities. London and North-Western shares were supported at a further slight advance, but there was a decline, ranging from ¼ to ½ per cent., in South-Eastern, Lancashire and York, Midland, and Caledonian. Great Western and Great Northern also exhibited flatness. A similar tendency was apparent in American and Brazilian railway securities. The business transacted in miscellaneous and mining shares was limited. The shares of the Marine Insurance Companies were lower, the late improvement not being now altogether supported.

WEDNESDAY, Dec. 12.—In the railway market to-day the arrangements for the approaching settlement chiefly occupied attention. Lancashire and Yorkshire was in demand on provincial account, the report still continuing that an important arrangement is being concluded between this company and the Midland. Midland stock was more supplied, as well as London and North-Western. The market closed firmly, especially for Lancashire and Yorkshire. Several other stocks also advanced. London and North-Western, on the other hand, slightly relapsed. In the colonial market an improvement took place in Atlantic and St Lawrence, Grand Trunk, and Great Western of Canada. Grand Trunk stock closed at 24¾ to 25¼; ordinary bonds, 49 to 51; preference, 77 to 79; and Great Western shares 11¼ to ½. There was a moderate business in the foreign market, and occasionally some heaviness was shown, especially in Brazilian and Lombardo-Venetian. A rise occured in Canadian, New Brunswick, and New South Wales Government debentures. American railway securities were rather dull, especially the shares of the New York and Erie and Illinois Central. The changes in mines were rather numerous; some of the larger dividend adventures improved, but other descriptions were flat.

THURSDAY, Dec. 13.—The railway market to-day was quiet, but steady. In the colonial market another rise occurred in Great Western of Canada shares. The bonds of the Grand Trunk likewise advanced, the ordinary closing at 50 to 52, and the preference 78 to 79. The stock remains at 24¾ to 25¼. The only important change in foreign descriptions was a further improvement in Dutch Rhenish. Cape and Australian debentures higher. American railway securities were in better demand. There was less business in mines, but a better tendency was shown. Joint stock banks also continued firm.

FRIDAY, Dec. 14.—This was "settling day" in the railway share market. The fresh transactions were consequently few. The principal feature was a fresh rise of nearly 1 per cent. in Caledonian railway stock. There was also a recovery of ¼ per cent. in Great Northern and ¼ per cent. in Great Western. Other description quoted much the same as yesterday.

FINE TEA CHEAPER.

STRACHAN & CO.'S justly celebrated DRAWING ROOM TEA is now reduced to 4s per lb. Guaranteed the Finest and Cheapest Tea in the United Kingdom.
26 Cornhill, London, E.C.

DINNEFORD'S

PURE FLUID MAGNESIA has been for many years sanctioned by the most eminent of the Medical Profession, as an excellent remedy for acidities, heartburn, headache, gout, and indigestion. As a mild aperient it is admirably adapted for delicate females, particularly during pregnancy; and it prevents the food of infants from turning sour during digestion. Combined with the Acidulated Lemon Syrup, it forms an effervescing aperient draught which is highly agreeable and efficacious.
Prepare by DINNEFORD and CO., Dispensing Chemists (and General Agents for the Improved Horse Hair Gloves and Belts), 172 New Bond street, London, and sold by all respectable Chemists throughout the empire.

CURE OF CHRONIC COUGH by DR LOCOCK'S PULMONIC WAFERS.—From Mr Smedley, bookseller, Sleaford. "GENTLEMEN,—I can speak with confidence, particularly of the Pulmonic Wafers, with which I have not only been relieved, but cured of a Chronic Winter Cough. Hundreds of boxes I have sold, and still the sale is as great as ever. Signed J. SMEDLEY."—DR LOCOCK'S WAFERS give instant relief and a rapid cure of asthma, consumption, coughs, and all disorders of the breath and lungs. They have a most pleasant taste. Price 1s 1½d, 2s 9d, and 11s per box. Sold by all medicine vendors. CAUTION.—Every box of the GENUINE medicine has the word "DR LOCOCK'S WAFERS" in white letters on a red ground in the Government Stamp, and without which words all are counterfeits and an imposition.

ON SPINAL AND OTHER DEFORMITIES.

PRACTICAL OBSERVATIONS on the CAUSES and TREATMENT of CURVATURES of the SPINE. Third edition, price 6s.
AND
Just published, second edition, price 1s 6d,
CASES and OBSERVATIONS illustrative of the beneficial results which may be obtained by close attention and perseverance, in some of the most unpromising instances of Spinal Deformity; with numerous Engravings. By SAMUEL HARE, F.R.C.S., &c.
"Mr Hare may take credit to himself for having effected much good in the treatment of the cases described."—BRITISH MEDICAL JOURNAL.
"Mr Hare is, we think, a sound and successful practitioner."—MEDICAL CIRCULAR.
"We unhesitatingly commend this work as a truthful and trustworthy statement of the power of scientific surgery and medicine over some of the most grievous hindrances to human activity and industry."—MEDICAL GAZETTE.
"The author has had much success in his plan of treatment, and we are of opinion that the principles on which he acts, in the treatment of these affections, are correct."—LANCET.
London: John Churchill; and may be had of all booksellers.

GENTLEMAN'S EXCURSION OUTFIT FOR THREE GUINEAS.

EXTRACTS FROM THE PRESS referring to the new Branch Establishment of E. MOSES and SON, at the corner of Tottenham Court road and Euston road.
"Upon each floor, there are small apartments called the 'trying-on rooms,' affording customers an opportunity of avoiding the guess-work which has hitherto prevailed in ready-made emporiums, and everywhere immense mirrors are placed in which the buyer may satisfy himself with the fit and shape of the garment which he proposes to purchase."—STANDARD, 21st Nov., 1860.
"On the whole, the new establishment of Messrs E. Moses and Son is decidedly the most complete of its class in the Metropolis."—MORNING HERALD, 21st Nov., 1860.
"The whole exterior of the building presents a noble aspect. It combines an appearance of lightness and solidity, grace, and strength."—ILLUSTRATED NEWS OF THE WORLD, Dec. 1st, 1860.
"The interior arrangements are in a corresponding scale of elegance, whilst convenience and comfort have not been lost sight of.....Nothing, in fact, that goes to constitute the completeness of an organised whole can be said to have been omitted."—DAILY NEWS, Dec. 11th, 1860.
"Like skilful logicians, they laid down the solid premises of their trade syllogism in the Minories; they next constructed their middle term in Oxford street; and they have just now brought out their conclusion to Tottenham Court road."—EXPRESS, Dec. 11th, 1860.
E. MOSES and SON,

The Establishments are closed every Friday evening at sunset until Saturday sunset, when business is resumed until 11 o'clock.

ALLEN'S PATENT PORTMANTEAUS and TRAVELLING BAGS, with Square Opening; Ladies' Dress Trunks; Dressing Bags, with silver fittings; Despatch Boxes, Writing and Dressing Cases, and 500 other articles, for home or continental travelling. Illustrated Catalogues for 1860, by post for two stamps.—J. W. ALLEN, Manufacturer of Officers' Barrack Furniture and Military Outfitter (see separate catalogue), 18 and 22 Strand London

SAUCES.—CONNOISEURS have Pronounced LEA and PERRINS' "WORCESTERSHIRE SAUCE" one of the best additions to Soup, Fish, Joints, and Game. The large and increasing demand has caused unprincipled traders to manufacture a spurious article; but the "GENUINE" all bear Lea and Perrins' name on Bottle, Label, and Stopper.
Sold by Crosse and Blackwell, London, and all respectable Oilmen and Grocers. Sole manufacturers—Lea and Perrins, Worcester.

DR DE JONGH'S
(Knight of the Order of Leopold of Belgium)
LIGHT-BROWN COD LIVER OIL.
Prescribed by the most Eminent Medical Men as the safest, speediest, and most effectual remedy for CONSUMPTION, CHRONIC BRONCHITIS, ASTHMA, COUGHS, RHEUMATISM, GOUT, GENERAL DEBILITY, DISEASES OF THE SKIN, RICKETS, INFANTILE WASTING, AND ALL SCROFULOUS AFFECTIONS.

Extensive experience, and the recorded testimony of numberless eminent medical practitioners, prove that a half-pint of Dr de Jongh's Oil is far more efficacious than a quart of any other kind. Hence, as it is incomparably the best, so it is likewise unquestionably the cheapest.

Palatableness, speedy efficacy, safety, and economy, unitedly recommend this unrivalled preparation to invalids. NO OTHER OIL CAN POSSIBLY PRODUCE THE SAME BENEFICIAL RESULTS.

Opinion of Sir HENRY MARSH, Bart., M.D., T.C.D., Physician in Ordinary to the Queen, in Ireland; President of the Royal College of Physicians in Ireland; Visiting Physician to Steevens' Hospital; Consulting Physician to the City of Dublin, St. Vincent, and Rotunda Hospitals, &c., &c.

"I have frequently prescribed Dr de Jongh's Light Brown Cod Liver Oil. I consider it to be a very pure Oil, not likely to create disgust, and a therapeutic agent of great value.
"Merrion Square, Dublin,
"September 6, 1860."

Sold ONLY in IMPERIAL Half-Pints, 2s. 6d.; Pints, 4s. 9d.; Quarts, 9s., capsuled, and labelled with DR DE JONGH'S stamp and signature, WITHOUT WHICH NONE CAN POSSIBLY BE GENUINE, by respectable Chemists.

SOLE CONSIGNEES,
ANSAR, HARFORD, and CO., 77, STRAND, London, W.C.

CAUTION.—Beware of Proposed Substitutions.

KEATING'S COUGH LOZENGES.—Statistics show that 50,000 persons annually fall victims to Pulmonary Disorders, including Consumption, Diseases of the Chest, and the Respiratory Organs. Prevention is at all times better than cure; be, therefore, prepared, during the wet and wintry season, with a supply of KEATING'S COUGH LOZENGES, which possess the virtue of averting, as well as of curing a Cough or Cold; they are good alike for the young or for the aged.

RESTORATION OF VOICE BY KEATING'S COUGH LOZENGES. Glasgow.
SIR,—I have great pleasure in informing you of the great good your excellent COUGH LOZENGES have done me. In December, 1845, I caught a severe cold from riding two or three miles, one very wet night, which settled in my lungs, and quite took away my voice, so that I could not speak above a whisper from that time until December last. I tried all kinds of medicines, but they were of no avail. I was then advised to try your Lozenges, which I did only to please my friends, but before I had finished a 2s 9d tin, my voice, to my great joy, came back as strong as ever.—I am, Sir, yours respectfully, JAMES MARTIN.
THOMAS KEATING, Esq.

Prepared and Sold in Boxes, 1s 1½d; and Tins, 2s 9d, 4s 6d, and 10s 6d each, by Thomas Keating, chemist, &c., 76 St Paul's Churchyard, London. Retail by all Druggists, &c.

NO MORE PILLS OR ANY other Physic.—For Constipation, Indigestion (Dyspepsia), Palpitation, Nervous, Bilious, and Liver Complaints, Debility, Dropsy, Epilepsy, Paralysis, Cough, Asthma, Consumption, Bronchitis, Sore Throat, Fevers.

DU BARRY'S delicious Health-restoring REVALENTA ARABICA FOOD, which, at a few pence per day, saves fifty times its cost in medicine, and cures without purging or any of the uncertainties, annoyances, and ruinous expenses incurred by medicine, cod liver oil, or visits to distant climates.

Certificate No. 34,418.—We find it the safest remedy (Andrew Ure, M.D., F.R.S.; Dr Harvey; Dr Wraser Dr Shorland; Dr Campbell.

We extract a few out of 50,000 cures:—

Cure No. 1,771.—Lord Stuart de Decies of many years' dyspepsia.——Cure No. 49,832.—"Of fifty years' indescribable agony from dyspepsia, nervousness, asthma, cough, constipation, flatulency, spasms, sickness and vomiting." Maria Joly, of Lynn, Norfolk.——Cure No. 7,121.—Miss Elizabeth Jacobs, of extreme nervousness, indigestion, gatherings, low spirits, and nervous fancies.——Cure No. 54,816.—The Rev. James T. Campbell, Tydenstone Rectory, near Fakenham, Norfolk, of indigestion and liver complaints.——Cure No. 56,814.—Mr Samuel Laxton, Leicester, of two years' diarrhœa.——Cure No. 180.—Mr W Reeves, 131 Fleet street, London, of 25 years' nervousness, constipation, indigestion, and debility.——Cure No. 4,024. Eight years' dyspepsia, nervousness, debility, with cramps, spasms, and nausea." Rev. John W. Flavel, Ridlington Rectory, Norfolk.——Cure No. 3,906.—"Thirteen years' cough, indigestion, and general debility." James Porter, Athol street, Perth.——Cure No. 56,314.—Miss Elizabeth Yeoman, Gateacre, near Liverpool, of ten years' dyspepsia and all the horrors of nervous irritability."——Cure No. 46,270.—Mr James Roberts, banker merchant, of Frimley, Surrey, of 30 years' diseased lungs, spitting of blood, liver derangement, partial deafness.

Similar testimonials from 50,000 patients who can be referred to.

The food is sold in canisters, 1lb, 2s 9d; 2 lbs, 4s 6d; 5 lbs, 22s; 24 lbs, 40s. Super-refined quality, 5 lbs, 22s; 10 lbs, 33s. The 10 lb, 12 lb, and 24 lb canisters carriage free, on receipt of post-office order by Barry Du Barry and Co., 77 Regent street, London; Fortnum, Mason, and Co., 182 Piccadilly; also at 60 Gracechurch street, 9 Cheapside, 230 Strand, 63 and 150 Oxford street, London; and all grocers and chemists.

FIRST-CLASS EDUCATION, at the Royal Continental Collegiate Institution, Bushey heath, Herts.—In addition to all its qualities as a first-rate classical (preparatory to Harrow and Eton) and commercial school, it is also highly recommended for a thorough French education, and as preferable to going abroad. Some of the parents who are continually visiting France, and whose sons have scarcely been two years at this school, are most happy to assure those parents who are desirous that their children should acquire a thorough knowledge of the French language, without wishing them to neglect their English and classical education, that their sons speak far better and more grammatically than any of the sons of their friends who have spent two or three years in schools in France merely for the purpose of acquiring that language. No corporal punishment. Terms inclusive, and vary according to age and requirements, from £40, £50, to £60 per annum. Not one case of illness has occurred since the school has been established.—Address, stating age and requirements, Professor Vellère (late of the Harrow Preparatory School), Bushey heath, Herts. The pupils wear a uniform very elegant and becoming, but optional to parents.

DR BUCHAN'S PATENT SUGAR-COATED VEGETABLE PILLS, VEGETABLE SKIN OINTMENT, and CONCENTRATED VEGETABLE ESSENCE, for Purifying the Blood, Regulating the Bowels, and Removing Vitiated Humours, Bilious and Liver Complaints, Rheumatism, Gout, Scorbutic Affections, Costiveness, Skin Eruptions, deep-seated Ulcers, and all Diseases of the Nervous System, from whatever cause, &c., affording at once a new lease of life to the sickly and aged of both sexes, whilst in addition imparting a beautiful and clear complexion, so anxiously sought for by all. Proved by the sworn testimonies made before the Lord Mayor of London, and sitting Magistrates. Sold by Buchan and Co., Patentees, 22 Newman street, Oxford street, London, W., and all chemists in town and country. Prices:—Pills, per box, 1s 1½d, 2s 9d, and 11s; Ointment, per pot, 1s 1½d, and 2s 9d; Essence, per bottle, 11s, or family bottle containing four times that quantity, 33s. Agents:—Barclay, 75 Farringdon street; J. Sanger, 150 Oxford street; Hannay, 63 Oxford street; Butler, 4 Cheapside; Hooper, 43 King William street, London Bridge; R. Howden, 78 Gracechurch street; Front, 229 Strand, &c., &c.

Just published, gratis, or post free for one stamp, to be had of all agents, and at 22 Newman street, Extracts from Dr Buchan's Work, entitled BUCHAN'S DOMESTIC MEDICINES, being a Book of Reference, containing instructions for the cure of every ailment incidental to man, woman, or child.

A BOON TO NERVOUS SUFFERERS.—Twenty Thousand Copies of a Medical Book for gratuitous circulation. HENRY SMITH, Doctor of Medicine of the Royal University of Jena, &c., who has devoted fifteen years to the study and treatment of Nervous Debility, Loss of Memory, Dimness of Sight, Lassitude, and Indigestion, will send free, for the benefit of Nervous Sufferers, a copy of the New Medical Guide, containing his highly successful mode of treatment, with necessary instructions by which sufferers may obtain a cure. Post free on receipt of a stamped directed envelope. Address Dr Henry Smith, 3 Burton crescent, Tavistock square, London, W.C.

RUPTURES.—BY ROYAL LETTERS PATENT
WHITE'S MOC-MAIN LEVER TRUSS is allowed by upwards of 200 Medical Gentlemen to be the most effective invention in the curative treatment of HERNIA. The use of the steel spring, so often hurtful in its effects, is here avoided, a soft bandage being worn round the body while the requisite resisting power is supplied by the MOC-MAIN PAD and PATENT LEVER, fitting with so much ease and closeness that it cannot be detected, and may be worn during sleep. A descriptive circular may be had, and the Truss (which cannot fail to fit) forwarded by post, on the circumference of the body two inches below the hips being sent to the Manufacturer,
Mr WHITE, 228 Piccadilly, London.
Price of a single Truss 16s, 21s, 26s 6d and 31s 6d; Postage, 1s. Double ditto, 31s 6d, 42s, and 52s 6d; postage, 1s 8d. Post-office orders to be made payable to John White, Post-office, Piccadilly.

ELASTIC STOCKINGS KNEE CAPS, &c., for VARICOSE VEINS, and all cases of WEAKNESS and SWELLING of the LEGS, SPRAINS, &c. They are porous, light of texture, and inexpensive, and are drawn on like an ordinary stocking. Price from 7s 6d to 16s each; postage, 6d
WHITE, MANUFACTURER 228 Piccadilly, London

VALUABLE INFORMATION.—GRATUITOUS EDITIONS of the following LECTURES, delivered at the Royal Institute of Anatomy Science, and Medicine, 369 Oxford street, London, by W. H. MARSTON, the Principal, are being issued, with plain directions for SELF-TREATMENT and CURE in each of them.

No. II. MARRIAGE: Its Obligations and Impediments. Addressed to those who contemplate Marriage, and to the Married who desire Children.
No. III.—THE BRAHMIN'S ELIXIR OF LIFE: Its History—Secret Remedies of the Hindoos no Fable—Full Particulars of this Extraordinary Specific—Its Amazing Powers as a Reinvigorator of the Impaired Functions, and in all Cases of Nervous Debility.
No. IV.—THE DISEASES INFLICTED UPON MANKIND BY THE GREAT SOCIAL EVIL. With a simple means of complete Cure without Mercury.
Each Lecture, neatly printed and bound, will be sent GRATIS, on receipt of two stamps to prepay postage, or THE WHOLE FOUR, BOUND TOGETHER, with numerous additions, and full directions for SELF-TREATMENT and CURE, 150 pages, 8vo, post free, for Six Stamps. Address, Treasurer, Royal Institute, 369 Oxford street, London.

DEANE'S TWO-HOLE BLACK PENS which are unequalled for their durability and easy action, are adopted by the gentlemen of the Stock Exchange, and the principal bankers, merchants, and public companies of the city of London, besides several of Her Majesty's judges, the most eminent counsel, and the reverend the clergy. Their cheapness and popularity has induced many unprincipled people to put forth imitations of the genuine articles, which are equally useless to the purchaser, and disgraceful to the vender. The public are therefore cautioned, and respectfully requested not to purchase any as DEANE'S GENUINE TWO-HOLE BLACK PENS, unless each pen is stamped
"G. and J. Deane, London Bridge,"
and the box, which contains exactly twelve dozen, has thereon a variously coloured label, inscribed
"G. and J. DEANE'S Two-Hole Black Pens, 46 King William street, London bridge."

DR ROBERT ROWE ON INDIGESTION.
This day is published, price 2s 6d, the fifteenth edition,
NERVOUS DISEASES, Liver and Stomach Complaints, Low Spirits, General Debility, and Diseases of Warm Climates; the Result of Thirty Years' Practice.
By G. ROBERT ROWE, M.D.
"Dr Rowe claims with justice a priority of authorship, while he yields to none in his treatment. The value of this work is enhanced by its practical nature."—LANCET.
"We have no hesitation in placing this work among the first ranks. We entertain a high opinion of its value."—MEDICAL TIMES.
"This is a clever and useful work; contains much that is worthy of attention, and should be read by all martyrs to indigestion and other ills."—TIMES.
Also, by the same Author, 2nd edition, price 4s 6d, On some of the Important Diseases of Females and Children.
London: J. Churchill, and to be had of all booksellers.

A New Edition of
THE PHILOSOPHY OF MARRIAGE.
By JOSEPH KAHN,
Graduate in Medicine, Surgery, and Midwifery, in the Royal and Imperial Universities of Vienna, Erlangen, &c., &c.
This popular work (which has been translated into four different languages) has now gone through forty-one Editions of 10,000 each, and is designed to impart accurate knowledge on subjects which involve the means of securing moral and physical happiness.
Price One Shilling, or free by post (in an envelope) for eighteen stamps.
J. Allen, 20 Warwick lane, Paternoster row; or from the Author's address, 17 Harley street, Cavendish square, W.

Just published, 71st thousand, price 1s, post free for 13 stamps. Sold by Mann, 39 Cornhill, or direct from the Author.
DR LA'MERT ON SPERMATORRHŒA; an Original Essay on the Treatment and Cure of NERVOUS and PHYSICAL DEBILITY, resulting from pernicious habits contracted in Youth, excesses in Manhood, or residence in Tropical Climates. With Cases and Engravings from Life, representing the various Organs in Health and Disease.
CONTENTS.
SECTION I.—The Physiology of the Generative Organs.
SECTION II.—Puberty—Manhood—The Morals of Generative Physiology—True and False Morality.
SECTION III.—Marriage in its Moral, and Physical Relations—Happy and Unhappy Unions—How to secure Healthy Offspring.
SECTION IV.—Youthful Abuse—The Secret Causes of Nervous Debility, Impotence in Man, and Sterility in Man and Woman.
SECTION V.—Spermatorrhœa, or Chronic Impotence: its History, Causes, and Moral Consequences—The Sterility of Age.
Dr LA'MERT, Honorary Member of the London Hospital Medical Society, Registered Licentiate of the Royal Society of Apothecaries, &c., is the only legally qualified practitioner who, for 20 years, has devoted his attention to the treatment of these disorders, which are so frequently aggravated by the unskilfulness of ignorant empirics, either self-styled physicians or surgeons, sometimes assuming names of eminent medical men, &c. At home for consultation daily, from Ten till Two, and from Six till Eight.
37 Bedford square, London.

TO THE NERVOUS AND DEBILITATED.
Just published, the 125th thousand, with numerous plates, in a sealed envelope, price 1s, sold by all booksellers, or post paid, by the Author, for 12 stamps,
MANHOOD: THE CAUSE AND CURE of PREMATURE DECLINE, with Plain Directions for Perfect Restoration to Health and Vigour. By Dr J. L. CURTIS, 15 Albemarle street, Piccadilly, London.
CONTENTS.
INTRODUCTORY CHAPTER on the Physiological Structure and Functions of the Reproductive Organs.
CHAPTER II.—Causes of Spermatorrhœa and Impotence; Early Vicious Indulgences; Dangers of Neglect.
CHAPTER III.—A Review of the Disqualifications of Marriage; whether resulting from the Youthful Abuse, the Follies of Maturity, the Effects of Climate, or Infection.
CHAPTER IV.—Plan of Treatment, Medical and Moral, with observations on a new and successful mode of detecting Spermatorrhœa and other Urethral discharges by microscopic examination.
CHAPTER V. and VI. on the modern Treatment of Gonorrhœa and Syphilis.
The Book concludes with numerous interesting cases, to which is added the Author's receipt of a preventive Lotion.
Mr CURTIS, author of the above Medical Treatise, may be consulted from 10 till 2, and 6 till 8. Sundays from 10 till 1.
Sold by Piper and Co., 23 Paternoster row and Mann, 39 Cornhill, London.

HUBBUCK'S PATENT WHITE ZINC PAINT.

By their process, which is patented, Pure White Zinc Paint is cheaper than White Lead. It is the most durable and beautiful paint known, and does not stain or discolour with the London atmosphere.

CHEAPNESS.—Two hundred-weight of this Paint, with six gallons of Oil, covers as much surface as three hundred-weight of White Lead and twelve gallons of Oil. It is cheaper in the first instance, as well as desirable on every consideration.

ADULTERATIONS.—Prejudice is caused by some Paint Grinders selling Zinc Paint adulterated with Sulphate of Barytes, some even to the extent of thirty per cent. Whether this is sold under the name of "Improved Zinc Paint," or is candidly sold as Number Two or Three qualities, no Painter can produce good work with it. He naturally condemns Zinc Paint altogether.

That Painters have never seen the best Zinc Paint is evident, or they would not use any other paint for their best work. To prevent the prejudice which the inferior article must produce, each Cask of Pure White Zinc is stamped

"HUBBUCK, LONDON, PATENT."

THOMAS HUBBUCK and SON, WHITE LEAD, OIL, PAINT and VARNISH WORKS, 24 LIME STREET.

KINAHAN'S LL WHISKY

v. COGNAC BRANDY.—This celebrated old Irish Whisky rivals the finest French Brandy. It is pure, mild, mellow, delicious, and very wholesome. Sold in bottles, 3s 8d each, at most of the respectable retail houses in London; by the appointed agents in the principal towns in England; or wholesale at 8 Great Windmill street, Haymarket.—Observe the red seal, pink label, and cork branded "Kinahan's LL Whisky."

EAU-DE-VIE.—THIS PURE PALE

BRANDY, though only 18s per gallon, is demonstrated, upon analysis, to be peculiarly free from acidity, and very superior to recent importations of veritable Cognac. In French bottles, 38s per dozen; or securely packed in a case for the country, 39s.

HENRY BRETT and CO.,
Old Furnival's Distillery, Holborn.
To be obtained only at their Distillery.

JULLIEN FUND.

Committee Room—50 New Bond street.

The Committee of the Jullien Fund, fearing that the subscriptions have been materially checked by the unfortunate death of Mons. Jullien, desire to explain that a widow and others, members of his family, can be protected from want only by the kind aid of those who appreciate the great services rendered by the late lamented maestro to the cause of the musical education of the English people.

The Committee confidently appeal to that benevolence for which their countrymen are so distinguished, for such prompt and liberal additions to the subscription list as shall enable them to do some justice to the memory of M. Jullien, and at the same time afford adequate relief to his bereaved family.

COMMITTEE for the DISTRIBUTION of the JULLIEN FUND.

KEATING'S COD LIVER OIL.

Just Imported. The Pale from Newfoundland, and the Light Brown from Norway. The supplies of the present season have never been surpassed, the fish being unusually fine, and the oil nearly tasteless. Professors Taylor and Thompson, of Guy's and St Thomas's Hospitals, have analysed, and pronounced the PALE NEWFOUNDLAND OIL the best and most desirable for invalids of very delicate constitution. The Light Brown being more economical in price, is brought within the reach of all classes. NO HIGHER PRICE NEED BE PAID than the following:—Light Brown, 1s 8d per pint, or 3s per quart. Pale, 1s 6d half-pints, 2s 6d pints, 4s 6d quarts, or in five-pint bottles, 10s 6d, imperial measure, at 79 St Paul's Churchyard.

FREDERICK DENT,

Chronometer, Watch, and Clock Maker to the Queen and Prince Consort, and maker of the Great Clock for the Houses of Parliament, 61 Strand, and 34 Royal Exchange.

THE MOST UNIQUE CHRISTMAS

CHUBB'S PATENT SAFES

—the most secure against Fire and Thieves.—CHUBB'S FIRE-PROOF STRONG ROOM DOORS. CHUBB'S PATENT DETECTOR and STREET-DOOR LATCHES. CHUBB'S CASH and DEED BOXES. Illustrated Price-list gratis and post free.

CHUBB and SON, 57 St Paul's churchyard, London; 28 Lord street, Liverpool; 16 Market street, Manchester; and Wolverhampton.

MR LEWIS AND SON,

113 Strand.—The Royal Lewisian Systema of Writing, Arithmetic, Bookkeeping, and Shorthand, as taught for upwards of fifty years by Mr Lewis, the real inventor and first teacher of these world-renowned and only infallible systems, insures perfection in any of the above branches after a few easy and interesting lessons. Persons unable to take the lessons may obtain the inventor's works for self-instruction at his only institution, 113 Strand.

IMPORTANT NOTICE.

GLENFIELD PATENT STARCH

is the only STARCH used in
HER MAJESTY'S LAUNDRY.

And as some unprincipal Parties are now making and offering for Sale an Imitation of the

GLENFIELD STARCH,

we hereby caution all our Customers to be careful, when purchasing, to see that the word GLENFIELD is on each Packet, to copy which is Felony.

WOTHERSPOON and CO., Glasgow and London.

TRADE 6/0 MARK.

BROWN AND POLSON'S
PATENT CORN FLOUR.

The LANCET states,

"This is superior to anything of the kind known."

FIRST OF THE KIND

Manufactured and Patented in the United Kingdom and France, as explained with Engravings in THE ILLUSTRATED LONDON NEWS, of May 26th. Supplied by BROWN and POLSON, to Her Majesty the Queen, by order from Buckingham Palace. It is in great favour wherever it has been made known, for Puddings, Blancmange, &c., preferred to the best arrow root, and especially suited to the delicacy of Children and Invalids.—BROWN and POLSON, Manufacturers and Purveyors to Her Majesty: Paisley, Manchester, Dublin, and London.

1860.

IMPERIAL TURKISH SIX PER CENT. LOAN.

(Sanctioned by Special Firman of his Imperial Majesty the Sultan.)

Messrs J. MIRES and CO., the Contractors for a Turkish Loan, have instructed the London Agency of the BANK of TURKEY to receive subscriptions on account of the 125,000,000 francs, or £5,000,000 sterling, offered to the public at Paris, London, Antwerp, Brussels, Amsterdam, and Hamburg,

This Loan will be redeemed at par by means of a sinking fund in 36 years, in half-yearly drawings, the first drawing to take place in June, 1861, and the obligations drawn will be paid at par on the 1st July following, with interest.

Special revenues are assigned for the payment of interest and sinking fund, which revenues were farmed last year for £1,282,560 sterling. This amount will be sent in equal monthly remittances to the contractors or their representatives. The above amount exceeds the requirements, and the balance will be handed over to the Turkish Finance Minister,

The contractors, with the approval of the Turkish Government, have appointed four Commissioners at Constantinople to receive the revenues, as well as four at Paris, and the London Directors of the Bank of Turkey, to see to their application. The duties of this Commission will be confirmed by an Imperial firman.

The loan will be represented by obligations of the Turkish Government of 500 francs, or £20 sterling, bearing interest at the rate of 6 per cent. per annum, payable half-yearly, at either London or Paris; and these obligations will be issued at the price of 312.50 francs or £12 10s sterling, and will be redeemed at the rate of 500 francs or £20 sterling. Interest to commence on the 1st January, 1861.

Obligations of a larger denomination may be had, if required.

These obligations will be issued on the following conditions, calculated on the price of issue, viz.:—

20 per cent.	as deposit	on application.
16	—	within 10 days of allotment
16	—	before the 30th January, 1861.
16	—	— 28th February, —
16	—	— 31st March, —
16	—	— 30th April, —

Any parties desirous of paying their obligations in full will be entitled to a deduction of 4s at the time of allotment.

On default of payment of any instalments at the time named, previous payments to be forfeited.

The deposits on application will be carried to the credit of each subscriber, and, in the event of such deposit exceeding the amount payable upon allotment, the balance will be immediately returned.

The drawings of the obligations will be conducted in the usual manner, in the presence of the Ambassador of the Sublime Porte, in London or at Paris, the Contractors of the loan or their representatives, and a Notary Public.

The numbers of the obligations drawn will be advertised in one or more of the daily papers in London and at Paris.

Applications for allotment to be sent to the
Agency of the Bank of Turkey, 64 Moorgate street;
Messrs Roberts, Lubbock, and Co., Mansion house street;
Union Bank of London, Princes street.
Forms of application may be obtained of the above, or from
Messrs J. Hutchinson and Sons, Angel court;
Messrs Ricardo, 11 Angel court.

FORM OF APPLICATION.

Imperial Turkish Six per Cent. Loan in Obligations payable to bearer of 500 francs, or £20 each, issued under the Special Firman of his Imperial Mageaty the Sultan.

To the Agency of the Bank of Turkey.

GENTLEMEN,—Having paid to Messrs the sum of , being a deposit on Obligations in the above loan, I hereby request you to allot me that amount of Obligations, and I agree to accept the same, or any less number that may be allotted to me, subject to the terms of your notice.

SALE OF LAMPS, CHANDELIERS, AND GAS FITTINGS.

TUCKER and SON having purchased of Messrs Pearce and Son (of Ludgate hill) their entire stock of Lamps, Gas Chandeliers, &c., (on their relinquishing that branch of their business to devote exclusive attention to the China and Glass Trade) have distributed it among their three Show Rooms as under; and being good of first-rate quality, and offered to the public at a reduction of one-third from their usual price, to insure their immediate realisation, they most command the attention of purchasers.

City Show Rooms, 36 King William street (4 doors from London Bridge); Central do., 190 Strand (opposite St Clement's church, and near Temple Bar).

TUCKER and SON—Established 43 years.

Manufactory, Essex Works, W.C.—November, 1860.

DUTY OFF MODERATOR LAMPS.

—J. Schlossmacher's celebrated Manufacture. Burner of every Lamp stamped J. S. The duty being now off, and J. S. being enabled by machinery to reduce the prices of his Lamps to the charges of other makers for their commonest qualities, the full benefit of both reductions is given to the public through his London Agents, TUCKER and SON, at their Establishments, as under:—

Central Show Rooms, 190 Strand (near Temple Bar); City Show Rooms, 36 King William street (4 doors from London Bridge). Established 43 years.

Engravings free by Post.

The Political Economist.

THE NEW TURKISH LOAN.

We have been anxious not to speak hastily of the New Turkish Loan. We have wished that the necessary details should be freely made public and thoroughly apprehended before we offered any criticism upon them. The subject is a very important one, politically as well as financially, and we should not like to offer any remarks respecting it which we did not know to be well weighed and which we did not believe to be correct.

Every thoughtful person who has carefully considered the present state of European politics would be glad if the financial credit of Turkey were good, and if she could successfully carry out this loan or any loan abroad which would enable her to effect the reforms which she so much needs at home. What is to be done with Turkey, is a question which the highest order of statesmanship has been long considering, but to which hitherto it has given no definite reply. All sensible men would, therefore, rejoice if Turkey solved the difficulty for herself,—if she showed resources of statesmanship proportionate to her material capabilities for commerce and for industry,—if she were able to achieve for herself that real power and substantial respect of which financial credit is the certain effect and best criterion.

To the persons we have described the recommendatory paper put forth by M. Mirès and Co. on behalf of the New Loan will be a disappointing document. One half of it answers the other half. It states that the imports into the Constantinople market only amount to 9,000,000*l*; that 'if the political and administrative régime of Turkey offers 'a curious physiognomy, its aspect is still more striking 'when we examine the situation of this vast Empire in a 'financial point of view, and particularly with respect to 'taxation. It may be said that under this last head, far 'from being an exhausted country, the Ottoman Empire is 'the least burdened of all States. In fact, the taxation 'varies from 5 to 2½ per cent., and, in fine, its importance 'is but from 275 to 300 millions of francs for a population 'of thirty millions of inhabitants: that is 10f per head. Now, 'the taxes are in England 55f per head; in Austria, 30f, &c."; that its debt is only about 30,000,000*l*, and its revenue 1,000,000*l* or 12,000,000*l*; that this is an insignificant debt for so rich an Empire; that in every conceivable way its financial condition is good; and then M. Mirès continues:—"Though the rank of the Ottoman Empire in Europe, its "immense resources, the relatively trifling amount of its "debt, offer to capitalists absolute security and great "advantages, the contractors felt bound nevertheless, "though it appeared unnecessary, to demand special "guarantees beyond the general assignment of all the "revenues of the Empire. These guarantees have been "granted with the greatest sincerity and the most perfect "honour. They rest not on contingent revenues, suscep-"tible of reduction, but on the most important and surest "returns, for they are all farmed and easy of realisation. "Their amount exceeds by a great deal the sum necessary "for provision for the interest and redemption of the loan in "a period of thirty-six years." The most obvious observation is a conclusive one. If with such an increasing commerce, with such material resources which we know, such a trifling debt, the credit of Turkey is so bad that she cannot borrow money without pledging certain specific securities, there must unquestionably be something wholly wrong and rotten. It is to no purpose to assure us that the securities in question are good; they may be so or they may not be so; but the fact of a State in flourishing circumstances having to give security is conclusive upon the most material point—the financial reputation must be indifferent, and no panegyrics, however ingenious, from the sellers of the loan should disguise that defect from us.

The second observation is of great importance, though it is one which must be made carefully and delicately, because it in some degree affects existing loans. Loans made on specific securities to a foreign State are never the most satisfactory sort of loans, and this for a single plain reason:—the property which is pledged is almost always wholly under the control of the indebted State, and if that State is inclined to repudiate, there is a necessary difficulty in getting at the security. Such is especially the case if the security consists, as is ordinarily the case, of a certain part of the State revenue. First, it depends on the State itself whether that revenue is ever collected; and, secondly, it depends on the State itself whether that revenue shall be paid to the creditor. Certain persons may be nominated to receive that revenue, and while the debtor means to pay they will receive it; but securities are of use only in a time of difficulty, and if the indebted State should at any time not wish to pay its debts, the *very existence* of the security is in its hands: it need not collect the hypothecated revenue if it does not please; and when it is collected, it may do as it likes with it; it may or may not pay it to the creditor.

It is quite true that the creditors may apply to their own Government for protection. If the English, for example, lend their money to Turkey upon certain specific securities, they may apply more or less successfully to their own Government to obtain for them the annual income of those securities. But if the Government consent to give its aid, the probable result will be a political complication of which no one can foresee the end: *and this is the best event*, for if the Government decline to aid by force the claims of its subjects, we may be sure they will receive nothing from their repudiating debtor.

Subtle difficulties may arise too in ranking the securities one among another. For example, the revenues of certain towns in Syria are to be pledged specifically to those who

take a share in the present loan to Turkey. But *all* the revenues of Turkey are expressly pledged for the previous loans of 1854 and 1858. Which is to have a preference? What is the meaning of a pledge of all the revenues of a State? In some sense, all the revenues of every country are pledged, or at least are liable for its debts, just as all a man's private wealth is liable for his private debts. But could a single Turkish bondholder enter by virtue of the stipulations in his bond on the revenues of the whole Turkish Empire, pay himself, and hand over the balance to the Ottoman Porte? A general mortgage of all the revenues of a State is not difficult to word in vague language, but it is exceeding difficult to realise *in money*. Again, both the loans of 1854 and 1858 are secured by a mortgage of certain specific securities,—in the one case the tribute from Egypt, in the other the Customs revenues of Constantinople, as well as the general mortgage of the whole revenue of the State. May it not be said that the holders of these loans must realise their specific claims before they resort to the general fund; that they must get into their possession respectively the whole tribute of Egypt and the whole Customs revenue of Constantinople, and only in the event of this proving insufficient make a claim on the other resources of the Empire?

These questions may seem technical and refined, but they would arise *in real life*, and many others also, if the specific securities offered by Turkey to its various creditors should ever be tested in practice. They seem remote from our experience, and we hope that they may long be equally so; but it is only so because of the good faith of Turkey—because the event against which the securities are to guard us has not as yet arisen.

M. Mirès, we apprehend, would say that he could offer to his bondholders a first charge on the specific securities on which he gives them a mortgage, and therein is the political difficulty of the problem. These are said to include the revenues.* And the Parisian calculation undoubtedly is that "the "Emperor" will sooner or later be in possession of these towns and provinces; and, whatever may be the fate of Turkey, he will see that the subscribers to this loan, brought out in the French capital and issued under French auspices, shall not be losers. It is this that has encouraged the promoters to issue the loan at 62.10 per cent., a considerably higher price than that of the loan of 1858, secured on the Customs revenue of Constantinople.

We are far from saying that the Bourse of Paris is right in its anticipations, or that it reads correctly the unknown and mysterious intentions of its own Sovereign. Extreme long-sightedness in money matters is not a good business habit; the distant future must be in fact unknown to us all, and it is absurd to put out our money upon guesses. Still, it is certain that such a calculation is made, and that some people—not many, perhaps, but some certainly—are found to rely upon it.

We hardly anticipate that M. Mirès will get his money. The amount for which he asks is large: 16,000,000*l* is a considerable sum in itself, and is larger still in proportion to the previous debt of Turkey, which the promoters tell us is, in all, but 30 millions. But the loan of 1858 was largely taken by brokers and dealers in this country, and has even yet hardly "shaken down" into general consumption. Few people will in these circumstances seek for a new loan of a similar kind. The real importance of the subject arises out of the political ideas which some at least of its promoters do not hesitate to put forth. Even if a small sum were subscribed, the French, it is said, would be bound to stay in Syria to protect the securities on which French subjects have lent their money, and on which under the guaranteed loan of 1854 the French Government may be said to have a contingent claim. We know that in truth the French Government is not so bound to stay in Syria; we hope that it would not be desirous of staying there. But the difficulties of the Eastern question are too great to bear any addition. The breaking up of the Turkish Empire, if it should break up, would be complicated by the wish of France to occupy Syria; and it is impossible to say that the same difficulty might not be as much felt in the most probable contingency—the continued existence of Turkey in lassitude and in decay.

* See ECONOMIST City Article of last week.

THE RANSOM OF VENICE:—THE DUTY OF ENGLAND.

THE Powers of Europe naturally and almost unanimously shrink from the prospect of the renewal of the war on the plains of Italy in the ensuing spring, for the rescue of Venetia from the dominion of Austria and its amalgamation with the rest of the consolidated Italian Kingdom. It is seen that such a war must be a bloody and a desperate one in any case, and may, in certain very probable contingencies, become a general and prolonged one; and it is felt that on both sides it would be an unwarrantable and a foolish war, inasmuch as its only aim could be, on the one part to hasten, and on the other to postpone, an issue which, sooner or later, all foresee to be inevitable. Yet the Italians, however unprepared, are vehemently impatient for the conflict; and the Austrians feel that anything would be preferable to a state of armed expectation which has all the burdens and incidental evils, and none of the advantages, of a decisive campaign. Hostilities, therefore, are almost certain to break out within six months, unless some arrangement can be come to in the meantime to preclude the menaced conflict.

Under such circumstances, it is not surprising that the scheme (originally suggested, we believe, by this journal and long perseveringly urged in these columns)—of a negotiation for the cession of Venetia for a fair pecuniary consideration, the payment of which should be guaranteed by the Great Powers,—should have found favour in the eyes of diplomatists and statesmen, and should now be seriously under discussion. Ultimately every one perceives that Venetia *must* form part of the new Kingdom; and that it can only be retained by Austria, even for a time, at the cost to the inhabitants of an amount of cruelty and oppression which Europe could not stand by and tamely witness; and at the cost to Austria of a military occupation which would exhaust her resources and reduce her to political impotence as a European Power. Every one, too, is becoming well aware that Austria herself has long contemplated such a final issue to the strife; inasmuch as for many years she has been treating the Province in question as spendthrifts treat an estate in which they have only a life interest, and in the future welfare of which they feel no concern;—she has drained away its wealth by overwhelming taxation; she has laboured hard and successfully to alienate and disgust that small portion of the population that was formerly not discontented with her rule; and she has systematically endeavoured to ruin Venice in order to encourage and aggrandise her own rival seaport of Trieste. No wonder then that all thinking politicians should be most anxious to do quickly, and if possible without bloodshed, what must be done ultimately, whatever bloodshed it may cost. The conservative and unteachable party in Austria on the one side, and the wilder and more enthusiastic Italian patriots on the other, are the only parties who are not striving and longing for an amicable settlement of this irritating and endangering question. The continental newspapers are filled with the discussion; a very judicious and conclusive pamphlet has been published in Paris, with the Emperor's sanction and possibly by his own direction (*L'Empereur Francois-Joseph I. et l'Europe*), advocating the sale of Venetia in the strongest manner;—and it is well known that the statesmen of France, Sardinia, England, and Prussia (and perhaps of Russia also), are earnestly considering the matter. Austria is by no means inclined to entertain the proposal of cession; but will do so if a sufficient pressure is put upon her, and if the compensation offered is ample and to her mind. The practical question, therefore, is what this compensation shall be:—and herein lies all the difficulty and the danger.

The actual situation of affairs at the moment at which we write is this. Austria says to the other Powers:—"You "desire to despoil me, or you ask me to divest myself of a "Province of great wealth and containing the most formidable military position in Europe, which Province I have "long regarded as my most impregnable outlying bulwark "to the South. You propose this in order to aggrandise and "complete your pet scheme—this Kingdom of Italy which I "hate and refuse to recognise; and in order to save yourselves from the embarrassments and perils consequent on a "European war—which you say my obstinacy may very "probably bring on. Very well:—if I entertain your pro-

"posal, what will you give me in exchange? what equiva-
"lent will you offer? what pecuniary compensation will you
"name? You wish to take from me a large slice of my
"Empire, and two millions and a half of my subjects:—
"where and how will you indemnify me? You weaken and
"rob me on one side:—will you strengthen and enlarge me
"on another? In plain language, will you, in addition to a
"guaranteed 20,000,000*l*, as the pecuniary purchase-money
"of Venetia, *guarantee to me my remaining possessions, or give*
"*me the Danubian Principalities in exchange?*" This is the question that has to be considered and answered. We have no reason to believe, and we will not insult Lord Palmerston's Ministry by supposing, that English statesmen *could* dream of answering such a demand otherwise than by the promptest and most peremptory negative;—but it is sometimes a great assistance to a Government to have its hands strengthened and its path cleared by an early and decided expression of the national feeling and determination.

We are convinced that we are only expressing these national sentiments by saying that no such proposal can be for one moment listened to. There can be no objection to a joint guarantee by France and England of a loan of twenty millions for the ransom of Venetia, if the credit of the new Kingdom of Italy should be found insufficient to raise such a sum on decent terms without our aid. But there we must stop. The scheme of giving to Austria an equivalent in the shape of the Danubian Principalities is, on the face of it, inadmissible—for three conclusive reasons. In the *first* place, we have no right to barter race against race, and to purchase the emancipation of one people by sacrificing the independence or by transferring the allegiance of another. Such a bargain would be insolent and immoral; and the times are gone by, we rejoice to say, when such high-handed sales and "arrangements" were the daily transactions of British Ministers. In the *second* place, scarcely four years have elapsed since we guaranteed to those Provinces their virtual independence under the *suzerainete* of Turkey, and the ink is barely dry with which we signed that parchment which it is now proposed to us to tear. If, indeed, the people of the Principalities were willing and desirous to be annexed to the Austrian Empire, and Turkey could be persuaded to acquiesce in such an arrangement, then the arrangement might at least be considered. But, in the *third* place, it is well known to all who have resided in Wallachia and Moldavia, that the Austrians are immeasurably more abhorred there than either the Russians or the Turks. It was not, perhaps, always so; but since the occupation in 1854, during our Crimean war, the feeling has been unmistakeable and universal. Wherever Austria passes or sojourns with her civil and military *functionarism*—wherever she carries the corrosive sublimate of her stupid and insolent brutality—she seems to leave a burning track of detestation and contempt behind her. We said five years ago, and we repeat it now,—England must never be instrumental in placing one additional square mile of territory under that untractable and oppressive rule.

It is suggested that we should "guarantee to Austria the retention of all the remaining Provinces of her Empire." We say—God forbid! We have no desire that any of them should be wrested or separated from her,—nor would England ever take a step in that direction. But when we remember what the Austrian Empire is—what a mere aggregation of incongruous States and inharmonious nationalities, some acquired by marriage, some by cession, some by perfidy, and some by conquest—the bare idea of such a guarantee becomes ludicrously monstrous. A mere glance at the map is sufficient to settle the whole question. Never before did such a heap of heterogeneous elements call itself an Empire. Austria Proper is a mere district. Hungary, already almost in open insurrection, constitutes nearly one half of the whole. Gallicia, torn from Poland, was only a few years ago crushed by the most barbarous proceedings. Then there is Lombardy, already gone—Venetia and the Quadrilateral, only held for a moment by overwhelming force—Tyrol, Styria, Croatia, Sclavonia, the Banat of Temesvar, Transylvania, Bukovina, Bohemia, Moravia, Carinthia, and Dalmatia. Never was seen—bound together in one Imperial circle—such an ill-assorted, confused, and fermenting mass. Guarantee the retention or the continued cohesion of such an artificial and incoherent combination! *Against what* are we to guarantee the Austrian rule? Is it against the discontent and rebellion of her own subjects? If so, are we to guarantee it, however just the discontent, however unendurable the rule? If not—if we are to judge how much oppression and misgovernment is to be borne and when endurance should give way—what would be the worth of our guarantee, and what the obligations of our judgeship? Are we to guarantee to her that power of continual misgovernment and anti-national proceedings in Hungary and Bohemia, which we have just declared the necessity of putting an end to in Italy? It is obvious at a glance that we can venture on no such guilty inconsistency.

But it may be suggested: "You can guarantee to Austria "her remaining Provinces, not against internal rebellion, "but against foreign aggression." Reflect for an instant in what entangled and onerous obligations such an engagement would involve us. Supposing a war arose between France and Russia, in which Austria took part voluntarily or was called on as a member of the German Confederation to take part; and that France, either as a strategic measure, or in pursuit of her advantage, seized and occupied one of the Austrian Provinces:—should we be obliged by our guarantee to interfere with France by force? Supposing a war took place between Switzerland and Austria, in which, as is probable enough, Austria was the aggressor; and that Switzerland, either by herself or by the aid of her allies, took possession of the Tyrol or the Vorarlberg:—would our engagement impose upon us the duty of compelling the Swiss to surrender their advantage and disgorge their spoil? Supposing Hungary free and independent—assuredly no very remote or chimerical supposition—and a war *then* between Hungary and Austria:—should we have to regard Hungary as a foreign Power, or as a rebellious Province? and if the former, must we forbid her to proceed? Or are we to tell her that she may fight Austria single-handed, but that she must call in the aid of no foreign State?

Finally,—in what position would such a guarantee, whether against insurgent subjects or against external foes, place the Minister who wrote and the Cabinet which sanctioned the famous despatch of Oct. 27th? How could men, who proclaimed so courageously and unreservedly the right of oppressed subjects to revolt if the oppression were severe, and to be themselves the judges whether that severity reached the rebellion-pitch,—and who defended also the right of other nations to aid them if their cause was good,—how could these men interpose either to prohibit the insurrection of Hungary, or to prevent the sympathising aid of Italy?—How, then, can we suppose that these Ministers can entertain for one instant the proposal of a guarantee which would impose upon them, almost certainly and probably very soon, the obligation of such inconsistent and unwarrantable intervention? Surely, we may dismiss the fear from our minds at once, as both idle and injurious to the fair fame of English Ministers.

SOUTHERN SECESSION AND THE PRESIDENT'S MESSAGE.

Mr Buchanan has crowned a weak and corrupt administration with a feeble and wavering message. The doctrine that secession is illegal and revolutionary, is fitly balanced by the doctrine that the constitution gives him no power to resist it; and the assertion that the aggression of the North is the sole cause of all the present evils, by the reproaches heaped upon the hasty action of the South.

But nothing from Mr Buchanan is likely to have any weight at the present moment. The hour is far too eventful for the man. The administration now drawing to its close has been on every important question a succession of weak compromises, but not the less unprincipled because they were weak. The great Kansas question was immorally evaded, and, when the people refused Mr Buchanan's compromise, left unsettled. The policy on the Slave Trade has undergone cold and hot fits like the rest. In the San Juan question, General Harney's disgraceful conduct met with the mildest possible censure; and the filibuster General Walker, when within the grasp of the Government, was dismissed unpunished to a new career of brigandage which, no thanks to Mr Buchanan, terminated in his well-merited end. Such a policy, taken in connection with the gross corruptness of the administration as proved before a Committee of the House of Representatives, would have robbed the outgoing Pre-

sident of all moral authority, even had he not chosen still to pursue the same feebly diplomatic course in his last message. It was competent to him to say that he had full power to use force like General Jackson in 1832, but that it was not expedient. He preferred, however, to trim as usual, and to balance his blame of South Carolina with the allegation that the law she was breaking was a law without a penalty attached, so that it was his *duty* to let her do it without opposition.

We will, however, leave President Buchanan to find his retribution in the natural regrets which must pursue any statesman who has so availed himself of a great political crisis as to enhance all its perils, and leave a legacy of anarchy to his successor: merely remarking that he has justified Mr Emerson's recent assertion, that "strong transgressors like Jackson" make after all better Presidents, and leave less mischief behind them, than the weaker men whom the respectability of the country usually prefers. They do at least clear the issues and help the people to understand their own mind. Governments like that of Mr Buchanan confuse the whole political atmosphere and relax the nerves of party conflict.

The real situation in the United States is perilous beyond precedent. South Carolina and Mississippi are both virtually gone. It is not improbable that Texas, Alabama, Georgia, and Florida may soon follow. The dilemma is this. For the North, we believe the secession would be almost pure gain, if it could be peaceably managed,—but the North-Western States can never permit that the mouths of the Mississippi, down which their traffic must pass, should fall into the hands of strangers. Unless the river can be neutralised, the secession of the States through which the Mississippi débouches into the Gulf of Mexico can never be permitted by the North-West. On the other hand, the solution of the difficulty which is by far the best for the North, is by far the worst for the South and for the world in general. The Southern States, once constituted into a distinct Republic of which Slavery would be the dominant feature, would rapidly degrade. Free discussion would be no longer known. As Mr Clingman, the Senator for North Carolina, himself observed the other day in the Senate:—"They [the Republicans] want to get "up a free debate, as the Senator from New York (Mr "Seward) expressed it in one of his speeches. But a Senator "from Texas told me the other day that a great many of the "free debaters are hanging from the trees of that country." And this is the great policy of the South. Governor Gist, of South Carolina, recommended a week or two ago in his message to the Legislature of that State, that a law should be passed punishing with some very serious penalty, "*if not with death*," any one professing Abolition opinions Now, what possible fate can be in store for a country left to itself with a large slave population,—a large white population of the most degraded description, expressively called "mean" by the Southern aristocracy themselves,—and the thinnest possible sprinkling of wealthy but greedy planters,—with no free press, and laws punishing anything like the exposure of abuses with death? What can come of it, except rapid decline into a position lower than that of the half-caste Spanish Republics,—lower, because Slavery and all its attendant horrors is not found in the Spanish Republics, while it would be the very heart and soul of the Southern Confederacy?

We confess the way out of this labyrinth of difficulties is far from clear to us. One thing we do see:—that it is the duty of the Republicans to stand firm as to the right of Congress to rule the Territories, and not, on any pretence, to permit the re-enactment of the Missouri Compromise, even if the line be extended to the Pacific. The example of Kansas has shown that Slavery is not likely, in any case, to be acclimatised North of this line. But it may be extended indefinitely South of it. Nor is there any equivalent for such a sacrifice of principle. Suppose the Union were for a time preserved by such a compromise. Still all power to resist the future Slave-extensions of the South would be deliberately surrendered The whole policy of the two great sections in the Confederation would be as completely opposed as if the Union had been dissolved,—without the freedom from responsibility for that fatal policy which the North would in the latter case gain. The conflict of interests would necessarily break out afresh, and when it did so, the North would be hampered by a contract which they would know was immoral as well as oppressive.

The crisis is really at hand, and ought to be met *now*. If the North has the power to prevent secession, and still retain in her hands the right to restrict Slavery absolutely to its present area, let her use it, and risk something for the attainment of so great an end. But let not the Northern Republicans deliberate for a moment over any terms that would surrender the power to restrict absolutely the area of Slavery within its present limits. That is the sole condition on which their alliance can arrest the South in the rapid moral descent produced by their domestic institution. To purchase a temporary truce by the surrender of that condition, would be to sacrifice their independence and degrade themselves, without any moral equivalent whatever.

THE COMMERCIAL CRISIS IN AMERICA.

WHATEVER may be thought of the political news which we have just received from America, the commercial is as favourable as could be fairly anticipated. The Banks at New York continued to hold their ground well and firmly; their credit was unimpaired; and they had been able to give a considerable increase of accommodation to the public without any important diminution in their reserve of specie. The full Bank return is as follows:—

	Nov. 24.	Dec. 1.	Increase.	Decrease
	£	£	£	£
Discounts	24,503,669	25,907,091	1,403,422	...
Specie	3,771,911	3,709,350	...	62,561
Circulation	1,791,210	1,760,190	...	31,020
Deposits net	14,807,159	16,144,163	1,337,004	...

which shows a specie reserve of between one-quarter and one-fifth the total Bank liabilities, or thereabouts. This, as we pointed out a fortnight since, is exactly the proportion which that reserve bore to those liabilities this time last year, and while it is preserved, we may consider the New York Banks to be nearly in their normal state.

The arrangement mentioned in our article a fortnight since, by which all the specie reserve belonging to the Banks was to be considered as a common stock, and be made liable to a rate for general purposes, appeared to be working well,—one Bank only, 'the Chymical,' believing that its resources were sufficient for itself, and being unwilling to share them with others, had dissented, and was in consequence no longer to be admitted to the 'Clearing House'; but in general the arrangement, anomalous as it sounds to English ears, had proved hitherto to be suited to American habits, and to be adequate to the occasion.

The Banks of the South had of course for the most part succumbed to the political crisis which continues to rage there; but as far as England is concerned, we may fairly assume, that, as long as New York is in its present state, the political fever and the consequent banking panic will not produce any alarming effect on us here. The high rate of interest will perhaps produce "some effect," from 10 to 12 per cent. on "prime endorsed bills." But experience shows that a very great interest is necessary to tempt much capital across the Atlantic, much greater than is necessary to determine the distribution of capital between the different countries of Europe. But, nevertheless, we may be assured that so long as the New York Banks, through which the exchange business with England is managed, continue in their usual state, the effect of the banking panic at the South cannot be critical or dangerous to England.

We must be careful, however, not to pause here. In considering the probable effect of the American crisis on the European market, we must not confine our attention to the banking and political elements of it. There is a commercial element also, which may be very briefly described, but which is very important.

Up to the present time it has been said that the large exports of grain from America to Europe which we must this year anticipate, would not cause a corresponding export of bullion to America, or anything approximating to a corresponding export, because the plentifulness of the harvest in America would naturally increase the wealth and comforts of the population there, and so augment the Transatlantic demand for European manufactures. The political crisis which has ensued must modify this expectation. Connected as it has been with the suspension of specie payments by the Banks of the South, it must make this season one not

of unusual plenty, but of unusual alarm. Mr Buchanan has stated, perhaps rhetorically, that at the South there is no longer "safety round the family altar," and if this be in any degree so—if there be but a pretext for alleging that it is so—the demand for European luxuries and conveniences must this year rather be diminished than augmented.

On the other hand, the exports from America to Europe are this year much augmented. The following comparison of the exports from the port of New York alone shows this;—

	1858.	1859.	1860.
	£	£	£
For the week	130,168	249,003	395,337
Previously	11,339,302	12,130,532	18,123,225

and the pressure of the panic will probably tend to increase these exports. It is true that the derangement of internal credit throws many difficulties in the way of internal transit and of shipment; still in a time of panic the price of commodities is always low, and the effect always is to stimulate the export of those for which there is a demand abroad.

If we look, therefore, to the two items of the American balance of trade—to the increase of America's exports to Europe, and to the non-increase, if not the decrease, of the imports of America from Europe,—we see reason to believe that it must for some time be the tendency of the American trade to weaken the money market of this country, and rather to attract specie from this side of the Atlantic, than to give us the usual supplies of bullion from the other.

THE LIEUTENANT-GOVERNOR OF BENGAL AND THE INDIGO PLANTERS.

A VERY serious charge was brought by the *Times* a few weeks ago against the present Lieutenant-Governor of Bengal, Mr J. P. Grant. On the strength of a memorial to Lord Canning (printed in the same issue) from the Indigo Planters' Association in Calcutta, he was accused of an unwarrantable interference with the course of justice between the planters and the ryots. It was stated that in his desire to espouse the cause of the latter he had sacrificed the great indigo trade in the midst of a serious financial crisis, and it was implied that even the motive of shielding the natives from injustice was probably but a cloak for a contemptible official jealousy of the planters. On these grounds, an appeal was made to Sir C. Wood to protect the settlers from such gross injustice and official misconduct.

The memorial published with these remarks was in the form of a reply to a Minute which appeared to have been drawn up by Mr Grant on the subject of the disagreement between the planters and the ryots; but as the Minute itself was not given, it was manifestly impossible to form any impartial conclusion on the charges contained in the memorial: and the impeachment of a high officer of State on such data was out of the question.

We have now received a copy of the Minute, and are therefore able to form something like a judicial opinion as to the merits of the case. In the first place, we learn that so far from the Minute being a spontaneous and uncalled for attack upon the planters, as might have been supposed, it really consists of a categorical reply to a series of charges which the memorialists had on a previous occasion preferred to Lord Canning against Mr Grant, and which Mr Grant was bound to notice, whether he desired to do so or not. We consider it highly essential that the whole of this case should be laid fully and impartially before the English public, not merely because it affects the character of the present Governor of an immense territory and of the Indian civil administration generally,—but because it throws a valuable light upon the real nature of the serious contest now going on between the planters and the ryots. The credit of our administration is at stake,—our reputation with the natives for fair dealing and equitable government is at stake,—and the prospects of an important branch of trade are at stake, involving an immense amount of private property and the fortunes of a great number of enterprising persons long settled in Bengal.

We have not before us the original memorial, but Mr Grant's reply to it specifies *seriatim* the charges it contained, and we shall now give an abstract of the more important ones and of Mr Grant's comments on them.

1. He was charged with causing a report to be spread through the villages that the Government was opposed to the cultivation of indigo. This Mr Grant had formally denied on a previous occasion; and the only fact brought forward in support of it is, that in a communication to the Legislative Council proposing a special law *in favour of the planters* for enforcing indigo contracts (pending the investigation of the Indigo Commission), Mr Grant stated that the ryots "had long had great and increasing ground "of just complaint against the whole system of indigo "cultivation."

In noticing this reckless charge, he makes the following distinct statement as to his general opinion on the questions at issue:—

"I have never formed or expressed but one opinion on "indigo planting. This opinion is, that so far as it is "conducted justly and lawfully, in accordance with the rights "of all parties, upon sound commercial principles, and by the "free will, and to the mutual benefit of all concerned, like the "trade in other staples, it is a source of national wealth, "deserving of the same high consideration as all other great "branches of trade. But so far as it is conducted unjustly, "unlawfully, in disregard of the rights of any class, upon the "false principle of a forced cultivation unprofitable or "oppressive to the cultivator of the raw material, it is an "evil of great magnitude, whether in its political or in its "commercial aspect, and one which urgently requires cor-"rection."

2. The planters charged Mr Grant with interfering with the magistrates in their proceedings under the Act just alluded to, in such a way as to prevent the termination of the disputes between the planters and the ryots. This interference, it appears, simply consisted in the fact that on the passing of the Act,—one of extreme severity as regards the ryots,—Mr Grant directed that its provisions should be most carefully explained to them. The Act was passed for the protection of the planting interests, in consequence of an extensive refusal to sow indigo; but in doing so, the Legislature took care to calm the excitement and apprehensions it would cause among the native population by inserting a provision for a commission of inquiry into the whole system of indigo planting. It was most especially Mr Grant's duty to make this consolatory assurance known, in order to prevent an amount of discontent which would have proved fatal to the planters and most dangerous to our administration.

3. The next complaint is that Mr Grant instructed the magistrates to make it known that those ryots who had received *cash advances* upon their agreement to cultivate indigo during the current season must fulfil their agreement. Mr Grant asks pertinently enough whether the planters wished that the ryots should be led to suppose (falsely) that the intention of the Act was to force them to cultivate whether they were under obligation to do so or not.

4. Again, the memorialists object to an order informing the magistrates "that the Act was only to apply to the cur-"rent season": the only meaning of which could be, as Mr Grant remarks, that although the Legislature had passed the law for the moment, pending a formal inquiry,—the fact ought to have been concealed from the very class for whose assurance the provision was made.

5. Mr Grant is then charged with threatening to remove any magistrate who interpreted the Act contrary to his views. He replies that he never said anything that could be made to have the appearance of such a threat,—and that he never interpreted the Act or any part of it. He further says that the Act involved an immense increase to the ordinary work of the magistrates,—that these officers were quite inexperienced in the trial of such cases (equity and civil suits),—while the Act allowed of no appeal from their decision. Such a "duty was in "itself a difficult one, requiring much more than usual calmness "and caution by reason of the excitement, clamour, and mis-"representation on all sides which prevailed." He, therefore, informed the Commissioners (to whom the magistrates are subordinate) that these powers should not be retained by any officers who did not show themselves competent to do full justice to all parties.

6. The next charge was that Mr Grant had improperly interfered with the magistrate's sentences. He replies that the Bengal Government has always had the power of mitigation or remission in criminal sentences, and that the circumstances just explained made it his duty to see that these great powers were not abused by hasty and unjust convictions.

The Commissioners were, therefore, instructed to watch the proceedings and report any decisions which required revision. Except upon the recommendation of those experienced officers, Mr Grant did not remit or mitigate a single sentence. The total number of prisoners in all the districts who benefited by this review was 126, while the number of cultivators imprisoned at the prosecution of the planters under this Act in one district alone was 588.

Mr Grant's Minute then proceeds to deal with a number of other allegations equally frivolous and reckless. They only serve to show how little real ground there is for the constant complaints brought by the planters and their supporters in this country against the civil administration, of hostility to their interests.

We are not surprised to learn that Lord Canning has conveyed an assurance to Mr Grant of his approval of the course adopted by him and of his determination to support him. We have already stated that the memorial which appeared in the *Times* a few weeks since was intended to be a rejoinder to Mr Grant's Minute. All that it attempts to do, however, is to show that in two out of the numerous cases brought forward by Mr Grant in illustration of the conduct of the planters, he had been misinformed. Whether he was so or not, we cannot tell until he has replied. The memorialists charge Mr Grant with prejudice because he speaks of the "unlawful carrying off of crops and cattle, the "plough-"ing up of other men's lands, confinement in houses," &c., as practices of frequent occurrence on the part of the planters. But the report of the Indigo Commission contains overwhelming evidence of the fact that such proceedings are not uncommon. "Indeed," it says, "the practice of confining "recusant or obstructive parties in the interior of the country "is so common as to be spoken to without reserve." Among many others, the case of a landed proprietor and a respectable yeoman is mentioned, who was placed in confinement merely because he objected to have his rent raised, his lease being hereditary and inalienable! When Mr Wingrove Cooke, the *Times* correspondent, asked a well known planter why his tenants did not complain at the magistrate's court when he flogged them, he replied because they would get a worse flogging on their return, and have to repay whatever fine the court levied from him! Again, the memorialists are very indignant that Mr Grant should have given credence to a report that in a particular case a planter's agent had sued on a forged contract. But the Indigo Commission reports that the planters are in the habit of requiring the ryots to sign *blank* papers as their deeds of contract!

Does not much of this violent hostility to the Government of India,—these angry recriminations,—this serious crisis in an important branch of trade, arise out of the simple fact that the English settlers are too ready to ignore the just rights of the native possessors of the soil,—too much inclined to think of them as an inferior race,—and as having no legal equality with themselves? Whatever hostility the authorities in India may incur in their attempt to assert the equal rights of all British subjects, whether Englishmen or natives, they must persevere in spite of clamour and misrepresentation. National honour and true policy are alike concerned. Let the public and the Government at home give the Indian authorities their best support in the performance of their arduous task.

THE COVENTRY WEAVERS.

The distress in Coventry is now on that large scale which must be regarded as a national and not as a local calamity,—appealing to the nation rather than to the locality for its relief. During the terrible winter of 1854-5, when the whole nation was making every exertion in its power to relieve the distress of the army in the Crimea, the number of sufferers did not very greatly exceed those who are now, apparently, in absolute destitution in Coventry. The estimates of the men out of work and almost helpless in the district are given by the *Times* at 40,000, and even if this be over the mark, there is at least an army of sufferers considerably more than half as numerous as our soldiers in the Crimea.

We imagine that we see among the circumstances of the case some which give the Coventry weavers especial claims, we will not say on the consciences, but at least on the compassion of the readers of this journal. It is, indeed, now generally admitted that the French Treaty is quite guiltless of any important share in the sudden failure of trade in this region. As Mr Milner Gibson pointed out the other day, the importation under the treaty has increased so slightly, so far as it has increased at all, that it is absurd to assign this wide-spread distress to that cause. The last Board of Trade Tables sufficiently prove this. We find under the head "Silk Manufactures of Europe," the following returns for the ten months ended 31st October, 1860:—

	1858. lbs.		1859. lbs.		1860. lbs.
Broad stuffs—Silk or satin	230,885	...	239,220	...	376,673
Ganze, crape, and velvet	28,360	...	36,598	...	61,049
Ribbons of all kinds	330,686	...	429,226	...	425,447
Plush for making hats	108,786	...	125,497	...	76,819

—so that the importation of ribbons, which is the department of the silk trade in which the Coventry weavers are more especially interested, seems actually to have been less this year than last,—though there has been an increase in the import of "broad stuffs." We cannot, therefore, in any way ascribe this distress to the operation of our great economical reform. But there is evidence that the distress does, in some considerable measure, arise from that most necessary and beneficial, and yet for a time most painful process,—the disuse and abandonment of antiquated machines. The return from one of the districts of Coventry alone shows that there are still nearly 2,000 of the single hand-looms—that is the early and slow-working looms—in use there, while there were 375 of the second stage of improvement, and 1,868 of the best. Now, the least falling off in the demand,—whether arising from foreign supplies or changes in fashion,—is sure to fall heavily on the possessors of antiquated machines. The capitalist naturally employs to the last those who can work off his orders quickest and in the best way; and so it will often happen that the owners of the poorest machines will lose *all* their work even before the owners of the better looms lose any. The failure of demand, instead of being spread equably among all, falls with absolute ruin on the class of which we have spoken.

The more firmly economists and capitalists insist on the advantage and necessity to the country of these improvements in machinery,—the more willing we ought to be to alleviate by every means in our power the temporary suffering which all such changes necessarily inflict. Capital sunk in antiquated machinery cannot be virtually destroyed without considerable suffering somewhere. The future gain is doubtless far greater,—but for a time it must be *future*. And while that suffering lasts, no one ought to be,—and we believe no one will be,—more forward to relieve it, than those who, as a class, have the strongest and clearest experience of the wholesome results which the change must bring. Nor should we at such a time insist on the errors which the weavers may be but too apt to fall into, of combining fruitlessly to prevent the pressure of a change the salutary nature of which they cannot be expected to see. They do see that starvation is likely to be one of its results to them, and this is, in itself, enough to blind their reason. The season, which at present seems likely to be severe, will bring dismay and pain and hunger to the silk weavers generally, and most of all to the Coventry ribbon weavers, and we are sure that those numberless capitalists who have profited so largely by the past revolutions in mechanical invention will be eager to alleviate the sufferings of the victims of that which is now taking place.

Agriculture.

DECLINE OF AGRICULTURE IN EAST LOTHIAN.

One of the most potent causes of the eminence attained by the agriculture of East Lothian has been the judicious liberality of the landed proprietors. They have, as the rule, granted leases upon such terms and otherwise so dealt with their tenants as to attract men of capital and enterprise, and having attracted them, have left them free to cultivate their farms as best suited their own interests. The result has been that the high farming of East Lothian has passed into a proverb. The husbandry of that county has been the standard by which good husbandry elsewhere has been tested; and conformity or nonconformity to that standard has often been deemed the measure of agricultural merit or demerit.

Foremost amongst the farmers of East Lothian have long been the tenants of the Dirleton and Belhaven estates, a magnificent property, the yearly rental of which approaches 30,000*l*, and

amongst the liberal proprietors of that county, the late owners of those, Mr Ferguson, and after his death his widow Mrs Ferguson, were conspicuous. The buildings on their farms were of the best kind, no vexatious restrictions on cultivation were imposed on the tenants, and the game, where game there was, belonged to those who fed it, the occupiers of the land.

On Mrs Ferguson's death, a few years ago, a sad change occurred. A gentleman, who has undergone many transformations of name, succeeded to these estates, in right, we believe, of his wife. First known as Mr Dundas, he became Mr Christopher and a large acred magnate of Lincolnshire, and was for some time one of the members for that county and a member of several Tory administrations. Subsequently, he has assumed successively the names of Nesbit and then of Hamilton, by the last of which it seems he is now known. With each change of name he obtained some large accession of fortune, becoming eventually a man of vast wealth;—so large, indeed, that it would appear he can afford to trifle with so fine a property as that he unfortunately holds in East Lothian, by introducing into its management all the petty despotism prevalent on the worst-managed English estates.

We learn from the *North British Agriculturist* and its correspondents, that the lease of the farm of Newhouse, on the Dirleton estate, having expired, that farm has been advertised to be let, and that the applicants who have gone over it have been supplied with a series of printed conditions as those to which all tenants of the estate, as leases expire, are to be subjected.

Game has for many years constituted a grievance upon some of the East Lothian estates, and the tenant-farmers of that county, whether themselves actually suffering from game depredations or not, feel strongly upon the subject. The game law of Scotland differs from that of England, inasmuch as here, if nothing is said about game in the contract for the farm, the game by law belongs exclusively to the tenant; but in Scotland, if no express grant of the game is made by the tenant's lease, the law holds it to be the retained right of the landlord. It has not been usual in Scotland to make any stipulation about the game, consequently the tenants there hold their farms subject to their landlords exercising their legal right of preserving and taking the game. This benefit, however, has grown out of the actual state of the game law in Scotland,—viz., the tenants have been held entitled to recover against the landlords any proved damage done to the crops by reason of an increase of the game during the currency of the tenants' leases. Scotch tenants holding leases are far more independent than English tenant-farmers, and therefore the increase of game has been kept in check on many estates by the fact that the tenants may and do seek and recover damages for injuries sustained by game. This will render the full force of Mr Hamilton's clause about game damages intelligible. We may mention that one of Mr Hamilton's earliest acts on acceding to the estate was to withdraw from the tenants the control over the game on their farms which they had enjoyed completely during the lifetime of their late excellent landlord and landlady. One of the correspondents we have referred to mentions that the farm of Newhouse requires the use of a capital of 3,000*l* for stocking it; and it is by no means improbable that that sum will be the whole means of any farmer who may undertake it. Possibly a portion of the necessary capital may be borrowed. We all know the activity and enterprise of the Scotch farmers, protected by leases, have brought them through many a crisis and have enabled them to increase the value of the farms they occupied, while they have benefited themselves. Freedom of action has been a material element of success. But Mr Hamilton, who seems to have adopted the notions of English landlords, seeks to tie down and hamper his tenants in every direction, and a certain high-handed spirit on the landlord's side is obvious throughout the conditions. By one clause the person offering for the farm must satisfy himself of its extent in statute acres, as no abatement of rent will be allowed in case of error of measurement. This is shifting the burden of proof upon the wrong person. The landlord has the means of knowing whether the measurement of his farm which he holds out to the public as the true one is correct or not, but the offering tenant has no means of testing the accuracy of the asserted measurement until he has taken the farm, and then he has precluded himself from compensation by having signed this condition.

By the 5th condition "all trees and brushwood are reserved to the proprietor, with full power to cut down and remove them without compensation for damage done in such removal." This is a most arbitrary provision, quite contrary to the ordinary rule on the subject. Trees when standing are injurious enough to tenants, without subjecting them to indefinite damage whenever the landlord or his steward may think fit to have a fall of timber. Oak trees felled in the spring can seldom be removed without great injury to the occupier of the land. But from compensation for such damage, Mr Hamilton requires his tenant to preclude himself by contract.

Next is the condition "reserving to the proprietor the game on the farm, with the exclusive right to him and those deputed by him to shoot and sport thereon, the tenant renouncing all claim for damage occasioned by such game, or shooting or sporting." Here we see a power retained by the landlord which may at any time be so used as to utterly ruin the tenant. These game reservations, and the oppressive way in which they may be and sometimes are used, have had much to do with the disuse of leases in England. The farmer will not, if he has had any experience of a game-preserved district, bind himself for a term of years to occupy a game farm, though he may venture to "risk it" as a yearly tenant. Is it Mr Hamilton's object to substitute yearly holdings for leases on the Dirleton and Belhaven estates? If so, there is nothing more likely to effect his purpose than this condition as to game. But will yearly tenants keep up the cultivation hitherto pursued in East Lothian? No rational man can suppose it possible that they will.

Then the 8th condition is about as obnoxious a restrictive clause as, in a pretty long and wide experience, we have met with. It is this:—"The tenant shall reside on the farm, and keep a sufficient stock thereon; and shall labour, crop, and manure the same, in all respects agreeably to the rules of good husbandry, as nearly as possible in six divisions, of which one shall be in turnips, another in wheat, a third in grass, a fourth in oats, a fifth in beans, or, in the option of the tenant, *half in beans and half in potatoes*, except in the last year of this lease, when the said division shall be wholly in beans or other given crop, *except potatoes*; and in the event of the tenant going beyond the prescribed restriction as to the quantity of potatoes sown, he shall be bound to lay 20 tons of well-made stable-yard manure, or Edinburgh police dung, on every acre so over-planted; and the sixth division in oats, barley, or wheat, but in no case shall lint be grown. And in case the tenant shall alter the mode of management above prescribed, or deviate therefrom in any respect without previous authority in writing from the proprietor or factor, he shall be bound to pay 5*l* of additional rent for each acre so altered or deviated, payable at the same terms as the original rent, and that yearly during such alteration or deviation, without prejudice nevertheless to the proprietor insisting for specific observance of the management and system of cultivation above stipulated."

Now some of the best farmers in East Lothian have adopted potatoes as a regular part of their rotation, but here we find they are to be restricted to one-half that quantity. The other restrictions are worthy only of the most backward and arbitrary management, and will inevitably produce a decline in the husbandry of any property to which they are applied.

Passing other conditions open to remark, but which our limits forbid notice, we find that by the 16th condition "the tenant shall at all times endeavour to promote and enforce cleanliness, neatness, and good order among his cottagers; and shall, *on notice, dismiss any person in his employment objected to by the proprietor*." Can comment on such a provision be required? How will the sturdy Scotch peasants and the hitherto independent farmers of East Lothian bear themselves under this new *regime* of restriction and coercion?

By the 18th condition we have one of the old seignorial services reintroduced. "The tenant shall perform any carting of materials for the improvement of the farm or buildings, when required by the landlord, free of charge; and shall also assist in the carting of bark from the landlord's woods and plantations, to a market or railway station, provided the distance does not exceed miles."

It is really lamentable, when not a few English landowners are awakening to a better sense of the rights and duties of proprietorship, to find a wealthy Scotch proprietor adopting a retrograde system which cannot fail to produce a decline in the agriculture of the district.

COMMERCIAL LITERATURE.

Novelties in Life Assurance. Effingham Wilson, Royal Exchange.

Life assurance may indeed be denominated one of the great moneyed institutions of the day, and on its being conducted on sound or unsound principles will depend the future welfare or the ruin of thousands. There are now about 120 offices established for the assurance of lives. Their liabilities are estimated to amount to 250,000,000*l*, and not less than 1,500,000 persons are interested in their solvency.

The pamphlet before us is intended to expose "a life office of considerable standing," which has put forth a scheme entitled a "new scheme for unconditional assurance on life, by policies non-forfeitable and unquestionable," which it is contended is subversive of the true principles on which life assurance is based. But why is not the name of this office given? We are positively reviewing an anonymous attack on an anonymous office, and we should drop our pen immediately were it not that the principles attacked are principles in the solution of which the public are most deeply interested.

It would appear that the first regulation attacked in the new scheme is, that "the policy cannot be forfeited by omission to pay a premium at the proper time, through accident or oversight; and, after five years (if not a short period assurance or survivorship assurance), it will not be forfeited by non-payment of a premium from whatever cause, provided payment be made within a year. *In no case is any new evidence of health required*; but, in order to encourage regularity in payments, and in justice to other policy-holders, a small fine is imposed."

This new feature is attacked as being injurious to all "the honest assured who pay their premiums when due," as the losses that

might arise under this regulation are "equitably avoided" by "other offices" which conduct their business under the "ordinary system." And it is asked by the pamphleteer, why the operation should be limited to one year?—why not extend it to two or five years? This is begging the question. What may be comparatively safe and sound and an act of grace for one year, may and most assuredly would be very unsafe and unsound for three or five years. There does not seem to us anything in this regulation inconsistent with the interests of either assurers or assured.

The other regulations of the new scheme which are attacked are, that "Under the policy no restriction whatever is imposed as regards occupation, or place of residence, or travelling; and no extra premium, beyond the premium originally stipulated in the policy, is payable, even if the assured join the army or navy or become a mariner. Persons, however, who are in the army or navy when they take out their policies, or whose cases are otherwise special, are dealt with separately."

3. "The office is liable for the sum assured at death whether it happen by suicide, or by duelling, or in any other manner."

4. That "the validity of the policy cannot at any time be questioned, in so far as an assignee is concerned; and, under any circumstances, it becomes unquestionable and indefeasible by the lapse of five years."

For such regulations as these of course an equivalent should be paid in a decidedly higher premium, and anything tending to remove the check upon fraud is no doubt objectionable; but with regard to the following regulation, namely, "For ordinary policies for the whole of life, there shall be allowed a value, in cash, at any time after the first year, namely:—after five years (that is, payment of six years' premiums), one-half of all the premiums paid or due at the time; and previously to five years, one-third of all the premiums paid or due at the time," there can be no valid ground of objection to the *principle*, always supposing that the risks are duly covered by the premiums.

If there is one thing more than another of which the public complain in respect to assurance, and which more than any other deters them from assuring, it is that in the event of their not being able to continue the payments on a policy, they can obtain little or nothing for it from the office.

This "new scheme" intimates that it will give after six years one-half of the premiums received, or previously to five years one-third of the premiums, or it will give a policy for the whole amount of the premiums received, payable at the death of the assured. Now with regard to this latter plan, we confess to have grave doubts as to the soundness of this principle, and in the absence of any calculation, we think the objection urged against it valid, viz.:—"That it is not likely that any person will pay in more than the amount of his policy; and the regulation, therefore, comes practically to be this, that the assured are released from the obligation to pay more premiums than will amount to the sum assured, while the office has to pay all the losses in full of those who die before paying up their policies."

The questions, we think, which have to be decided, are these:—1. Would an office be able to pay its policies on the bad lives, provided it returned half or one-third of the premiums it received? or 2nd, to give policies for the whole of the premiums it received after their being paid for five years?

These are questions for actuaries, not for ourselves to settle; but they are questions which would, if settled in the affirmative, greatly increase the business of life assurance.

THE MODERN CAMBIST. Forming a Manual of Foreign Exchange in the Different Operations of Bills of Exchange and Bullion, according to the Practice of all Trading Nations; with Tables of Foreign Weights and Measures, and their Equivalents in English and French. By WILLIAM TATE. Tenth Edition, extensively enlarged. 1861.

THIS very valuable work has received new and important additions in its present form. It contains some exceedingly useful tables for turning specific French duties into the corresponding English duties at varying rates of Exchange between England and France. We have also an account of the new moneys of Turkey, Austria, the Zollverein States, Tuscany, Lombardy, and Sweden, "with the new division of the weights and measures of the latter kingdom." This book has always been invaluable to the commercial world, and Mr Tate has rendered a useful service in bringing it up to the latest date.

POST OFFICE LONDON DIRECTORY. 1861. Comprising, amongst other Information, Official Directory; Street Directory; Trades' Directory; Law Directory; Court Directory; Parliamentary Directory; Postal Directory; City Directory; Conveyance Directory; Banking Directory. Kelly and Co., London.

THIS is the sixty-second year of the publication of this gigantic volume. It surpasses, we think, all the other London Directories in accuracy as well as fulness,—appearing to be more carefully revised every year than is usual with most of them. We do not know what the business world would do without it.

The Post Office Map of London which accompanies it is also of the highest value.

GENERAL LITERATURE.

AUTOBIOGRAPHY OF THE REV. DR ALEXANDER CARLYLE, MINISTER OF INVERESK; containing Memorials of the Men and Events of his Time. William Blackwood and Sons, Edinburgh and London. 1860.

DR CARLYLE was one of the patriarchs of that literary society which added so much renown to the capital of Scotland in the latter half of the eighteenth and early part of the nineteenth centuries. He was himself born in 1722, and lived to 1805, so that he mixed with two generations, the contemporaries of David Hume and Robertson, and the circles which sat at the feet of Walter Scott and trembled under the dictatorship of the first "Edinburgh Reviewers." Sir Walter speaks of him as having the bearing of a demi-god—adding, characteristically enough, "and a shrewd clever old carle was he." Nor does the present autobiography belie Sir Walter's estimate of its author. Independently of its intrinsic interest as a contemporary record of bygone and stirring times, it is full of keen and vivid analyses of character, and of amusing anecdotes of men who have written their names indelibly on the history of their country, which make us more fully acquainted with them than a hundred elaborate descriptions could have done. Nor need the reader be alarmed with the idea of finding in Dr Carlyle a blind panegyrist of his distinguished associates. However much he may have loved his friends, he loved them also with a frank—perhaps some people will think a too frank—recognition of their personal foibles. The portraits are here drawn with all their natural irregularities of feature; and, except when the blind spirit of party politics raises to the skies a man like Dundas, Lord Melville, we have no deductions to make on the score of friendly partialities. Dr Carlyle himself was evidently a capital table companion, and as formidable as an opponent as he was an agreeable conversationalist. His natural satirical humour adds piquancy to his narrative, and imparts to an autobiography, which he only commenced in its present shape when entering on his 79th year, all the freshness and vigour of early manhood. It seems that he kept short diaries through a portion of his life, probably during the whole, and from these, and from a memory strengthened by the habit of *extempore* preaching, he seems to have drawn the recollections of men and events contained in the present volume, which, but for some desultory transitions of time and subject, have a strictly contemporary character. Dr Carlyle was a minister of the Scotch Kirk and a leader of the party which defended the lay-patronage sanctioned by the Revolution settlement. Several of his visits to London were connected with Church business, though he always contrived to make it subservient to a large amount of miscellaneous social intercourse. The earlier part of his autobiography contains some curious illustrations of some of the historical events which Sir Walter Scott has invested with such interest by his Waverly Novels. The Porteous Riots, and the first successes of the young Chevalier's army in 1745, are both described by Dr Carlyle as an eye-witness. He himself was present at the escape of Robertson from the Tolbooth church, and at the subsequent execution of his associate Wilson. He was one of the volunteers raised in Edinburgh to oppose Charles Edward, and acted as a scout to Sir John Cope immediately before the battle of Prestonpans. Carlyle's version of Robertson's escape differs slightly from the popular version followed by Scott:—

> We went early into the church on purpose to see them come in, and were seated in a pew before the gallery in front of the pulpit. Soon after we went into the church by the door from Parliament Close, the criminals were brought in by the door next the Tolbooth, and placed in a long pew, not far from the pulpit. Four soldiers came in with them, and placed Robertson at the head of the pew, and Wilson below him, two of themselves sitting below Wilson, and two in a pew behind him.
>
> The bells were ringing and the doors were open, while the people were coming into church. Robertson watched his opportunity, and suddenly springing up, got over the pew into the passage that led in to the door in the Parliament Close, and, no person offering to lay hands on him, made his escape in a moment—so much the more easily, perhaps, as everybody's attention was drawn to Wilson, who was a stronger man, and who, attempting to follow Robertson, was seized by the soldiers, and struggled so long with them that the two who at last followed Robertson were too late. It was reported that he had maintained his struggle that he might let his companion have time. That might be his second thought, but his first certainly was to escape himself, for I saw him set his foot on the seat to leap over, when the soldiers pulled him back. Wilson was immediately carried out to the Tolbooth, and Robertson, getting uninterrupted through the Parliament square, down the back stairs into the Cowgate, was heard of no more till he arrived in Holland. This was an interesting scene, and by filling the public mind with compassion for the unhappy person who did not escape, and who was the better character of the two, had probably some influence in producing what followed.

He confirms the general account of Captain Porteous' conduct at the execution of Wilson:—

> Mr Baillie had taken windows in a house on the north side of the Grassmarket, for his pupils and me, in the second floor, about seventy or eighty yards westward of the place of execution, where we went in due time to see the show; to which I had no small aversion, having seen one at Dumfries, the execution of Jock Johnstone, which shocked me very much. When we arrived at the house, some people who were looking from the windows were displaced, and went to a window in the common stair, about two feet below the level of ours. The [illegible] long

and wide, and there was a very great crowd assembled. The execution went on with the usual forms, and Wilson behaved in a manner very becoming his situation. There was not the least appearance of an attempt to rescue; but soon after the executioner had done his duty, there was an attack made upon him, as usual on such occasions, by the boys and blackguards throwing stones and dirt in testimony of their abhorrence of the hangman. But there was no attempt to break through the guard and cut down the prisoner. It was generally said that there was very little, if any, more violence than had usually happened on such occasions. Porteous, however, inflamed with wine and jealousy, thought proper to order his guard to fire, their muskets being loaded with slugs; and when the soldiers showed reluctance, I saw him turn to them with threatening gesture and an inflamed countenance. They obeyed, and fired; but wishing to do as little harm as possible, many of them elevated their pieces, the effect of which was that some people were wounded in the windows; and one unfortunate lad, whom we had displaced, was killed in the stair window by a slug entering his head. His name was Henry Black, a journeyman tailor, whose bride was the daughter of the house we were in. She fainted away when he was brought into the house speechless, where he only lived till nine or ten o'clock. We had seen many people, women and men, fall on the street, and at first thought it was only through fear, and by their crowding on one another to escape. But when the crowd dispersed, we saw them lying dead or wounded, and had no longer any doubt of what had happened. The numbers were said to be eight or nine killed, and double the number wounded; but this was never exactly known.

After passing some years at the Universities of Edinburgh and Glasgow, Dr Carlyle spent another year at that of Leyden, preparatory to his entering on his ministerial functions. He gives a curious account of the society among the British students at Leyden, where he encountered Charles Townshend and the celebrated Wilkes. Of the latter he says:—

On the first Sunday evening I was in Leyden, I walked round the Cingle—a fine walk on the outside of the Rhine, which formed the wet ditch of the town—with John Gregory, who introduced me to the British students as we met them, not without giving me a short character of them, which I found in general a very just outline. When we came to John Wilkes, whose ugly countenance in early youth was very striking, I asked earnestly who he was. His answer was, that he was the son of a London distiller or brewer, who wanted to be a fine gentleman and man of taste, which he could never be, for God and nature had been against him. I came to know Wilkes very well afterwards, and found him to be a sprightly entertaining fellow—too much so for his years, as he was but eighteen; for even then he showed something of daring profligacy, for which he was afterwards notorious. Though he was fond of learning, and passionately fond of being thought something extraordinary, he was unlucky in having an old ignorant pedant of a dissenting parson for his tutor.

Our readers will be amused to see Carlyle's estimate of his friend Adam Smith, the political economist:—

Adam Smith, though perhaps only second to David [Hume] in learning and ingenuity, was far inferior to him in conversational talents. In that of public speaking they were equal—David never tried it, and I never heard Adam but once, which was at the first meeting of the Select Society, when he opened up the design of the meeting. His voice was harsh and enunciation thick, approaching to stammering. His conversation was not colloquial, but like lecturing, in which I have been told he was not deficient, especially when he grew warm. He was the most absent man in company that I ever saw, moving his lips, and talking to himself, and smiling, in the midst of large companies. If you awaked him from his reverie and made him attend to the subject of conversation, he immediately began an harangue, and never stopped till he told you all about it, with the utmost philosophical ingenuity. He knew nothing of characters, and yet was ready to draw them on the slightest invitation. But when you checked him or doubted, he retracted with the utmost ease, and contradicted all he had been saying. His journey abroad with the Duke of Buccleuch cured him in part of those foibles; but still he appeared very unfit for the intercourse of the world as a travelling tutor. But the Duke was a character, both in point of heart and understanding, to surmount all disadvantages—he could learn nothing ill from a philosopher of the utmost probity and benevolence. If he [Smith] had been more a man of address and of the world, he might perhaps have given a ply to the Duke's fine mind which was much better when to its own energy. Charles Townshend had chosen Smith, not for his fitness for the purpose, but for his own glory in having sent an eminent Scottish philosopher to travel with the Duke.

Smith had from the Duke a bond for a life annuity of 300*l*, till an office of equal value was obtained for him in Britain. When the Duke got him appointed a Commissioner of the Customs in Scotland, he went out to Dalkeith with the bond in his pocket, and, offering it to the Duke, told him that he thought himself bound in honour to surrender the bond, as his Grace had now got him a place of 500*l*. The Duke answered that Mr Smith seemed more careful of his own honour than of his, which he found wounded by the proposal.

Though Smith had some little jealousy in his temper, he had the most unbounded benevolence. His smile of approbation was truly captivating. His affectionate temper was proved by his dutiful attendance on his mother.

Smith's fine writing is chiefly displayed in his book on Moral Sentiment, which is the pleasantest and most eloquent book on the subject. His *Wealth of Nations*, from which he was judged to be an inventive genius of the first order, is tedious and full of repetition. His separate essays in the second volume have the air of being occasional pamphlets, without much force or determination. On political subjects his opinions were not very sound.

Dr Carlyle's social qualities naturally enough brought him into collision with the stricter brethren of his Church, and even subjected him to an ecclesiastical "Libel." But he not only maintained his ground, but carried the war with success into the enemies' territories. He became a prominent member of the General Assembly, and gives us some curious sketches of his principal associates and opponents in Church matters. His domestic life seems to have been in many respects a very happy one. His wife, a woman of very congenial character and tastes, died a little more than a year before her husband, but all their children had preceded them to the grave. The autobiography, however, does not give us any account of these last years of his life, as it terminates abruptly in the year 1770, with the accession to power of Lord North. In politics, Dr Carlyle was a hot Tory, full of anti-Jacobin fears and prejudices. That the graver Presbyters of the Scotch Kirk were not without grounds for their doubts as to the existence of the essential of "grace" and as to the disqualification of "levity" in their reverend associate, perhaps the following passage (with which we must conclude our notice of this interesting and amusing book) may be thought to afford some evidence:—

There were so many diverting scenes occurred in the course of our journey, that we often regretted since that we had not drawn a journal of it. Our debates about trifles were infinitely amusing. Our man Anthony was at once a source of much jangling and no small amusement. He was never ready when we mounted, and went slowly on, but he was generally half a mile behind us, and we had to halt when we wanted anything. I had got a hickory stick from Jackson, not worth 1*s* 6*d*, which I would have left at the first stage had not Home and Robertson insisted on my not doing it; but as I had less baggage, and an equal right in Anthony and his horse, and was treasurer withal, which they were afraid I would throw up, I carried my point; and this stick being five feet long, and sometimes, by lying across the clothes-bag, entangled with hedges, furnished him with a ready excuse. It was very warm weather in May, and we rode in the hottest of the day; we seldom got on horseback before ten o'clock, for there was no getting Robertson and Home to bed, and Jamie Adam could not get up, and had, besides, a very tedious toilet. Our two friends wanted sometimes to go before us, but I would not pay the bill till James and Anthony were both ready, and till then the ostler would not draw or lead out the horses from the stable. As I perceived that Robertson and Home were commenting on all my actions, I, with the privacy of James Adam, did odd things on purpose to astonish them: as, for instance, at the inn near Studley, where we breakfasted, having felt my long hair intolerably warm about my neck, I cut off five or six inches of a bit of ragged green galloon that was hanging down from a chairback in the room, with which I tied my hair behind. This made a very motley appearance. But when we came to take horse, in spite of the heat I appeared with my great coat, and had fastened the cape of it round my head; and in this guise I rode through the town of Ripon, at the end of which I disengaged myself from my greatcoat, and my friends saw the reason of this masquerade. Another day, between twelve and one, riding through very close hedges near Cornhill, we were all like to die of heat, and were able only to walk our horses. I fell behind, pulled my greatcoat from Anthony, put it on, and came up with my friends at a hard trot. They then thought that I had certainly gone mad, but they did not advert to it, that the chief oppression of heat is before the perspiration. My receipt had relieved my frenzy, and I reined in my horse till they came up to me.

Wearing the Willow; or, Bride Fielding. A Tale of Ireland and of Scotland Sixty Years Ago. By the Author of "Nut-Brown Maids." John W. Parker and Son, West Strand.

Old times have evidently a strong attraction for this writer; perhaps because, in laying the scene of his tales in the past, and thus looking back upon them "through the golden mist of years," he feels privileged to retain some of that mistiness about his characters and their doings, to dispense with clearness of outline, and to give free play to the meditative and moralising humour in which he delights to indulge. His books are not so much tales as sketches of the life and manners of some especial age and country, with just enough of story to bind them (often loosely enough) together. His characters are generally well conceived, and up to a certain point well drawn; but a dreamy air hangs about them; we cannot persuade ourselves sufficiently of their reality to get up any great interest in their fortunes. The happiest parts of his works are where he describes the influence of the times upon the characters, and consequently upon the manners and habits of the age he has chosen to illustrate, or where he gives us a chance bit of rural scenery. His plots are simple, but unhackneyed; they would be interesting if better worked up. Yet, taken as a whole, in spite of many merits, and more thought than goes to the composition of many a three-volumed circulating library novel, these one-volumed tales are heavy reading for a novel reader. This is owing in a great measure to a rambling discursive style, neglectful of the claims of grammar, and heedless of the due proportions between nominative and accusative cases. In these respects, perhaps, "Wearing the Willow" is an improvement upon "Nut-Brown Maids"; it is likewise more concentrated in its story; but the principal character in it—Bride Fielding—is not at all equal to the heroine of the former tale.

The scene is shifted in the course of the story from Ireland in 1800, and the gay, dissipated, hospitable, wild city of Dublin, in which the heroine makes her début, to an old manor house near a market town in Scotland, towards the close of the war. This change of scene gives play to some effective contrasts between the impulsive, free-hearted, and by no means rigid companions with whom her youth was spent, and the decorous, reserved, kindly, but rigid people among whom she is afterwards thrown, by whose means the broken thread of her life is taken up again, and amongst whom she lays down the "Willow" she has well and faithfully worn.

We cannot, owing to the writer's diffuseness, give any extracts in illustration of our remarks that would come within our present limits. To those who wish to test their correctness we recommend the book itself as one whose healthy, kindly tone and general pleasantness makes us regret our inability to give it less blame or more decided praise.

The Graduated Series of Reading-Lesson Books for all Classes of English Schools. In Five Books. Book the First. Longman, Green, Longman, and Roberts.

Any one who has had to teach a young child the first rudiments of learning, knows of what importance it is to his pupil's progress, and to his own comfort, that the lesson book should be, not merely simple and easy, but suited and attractive to the childish taste. *Instruction* at this early stage is not so necessary, as to awaken the desire for learning; the reading lesson, therefore, should be such as to inspire the child with a love of reading, and to leave a pleasant impression of his daily task. The little book that begins this "Graduated Series" is well-fitted to do this, from its judicious mixture of old nursery rhymes and established favourites, with new, amusing, and very simple stories and verses. The wording is easy enough in the first part for the youngest beginner; perhaps it increases in difficulty with too much rapidity towards the end. This may be remedied by confining the pupil to the first half of the volume till he has mastered all the simple words. We wish this useful little series the success it deserves.

Clever Boys of Our Time; and how they became Famous Men. Dedicated to Youths and Young Men anxious to Rise in the World. By the Author of "Famous Boys," and "Heroines of Our Time." London: Darton and Co., 58 Holborn hill.

This is a collection of twenty short biographies, of unequal merit. Some contain very interesting details; others are mere generalisations which can be of little interest to any one. The memoirs of Faraday, Dickens, and Abel Heywood are among the most entertaining. We must, however, express our dislike of the author's tone, half-worldly, half-didactic,—a tone which does much injustice to many of the characters described, while in the case of Mr Disraeli, it elevates the mere "desire to rise in the world" to a place of honour, of which that desire is by no means worthy. But the author's moralisings will probably be skipped by most young readers, and as the book is harmless, and often amusing, it may, with its pretty Magenta binding and rather superior woodcuts, prove an acceptable present to many.

Strange and Surprising Adventures of the Venerable Gooroo Simple and his Five Disciples, Noodle, Doodle, Wiseacre, Zany, and Foozle. Adorned with Fifty Illustrations, drawn on Wood, by Alfred Crowquill. London: Trübner and Co., Paternoster row. 1861.

This is a compilation of satirical anecdotes from the Tamul, of considerable antiquity, and is accompanied by learned and curious notes on Indian literature. The book is splendidly bound, and is set off by extremely clever and beautiful wood engravings. Whoever is induced by these adventitious charms to buy the volume, will find that he has wasted half-a-guinea on some of the most tedious and pointless jests that were ever perpetrated. Worse still, this collection is polluted by heathen indecencies whose reproduction in a drawing-room book is intolerable. We are astonished to find so respectable a firm as Trübner's sending forth so discreditable a work, and stooping to recommend it with such a barefaced puff as the "Publisher's Advertisement" prefixed.

Stories in Verse for the Street and Lane: being the Second Series of "Homely Ballads for the Working Man's Fireside." By Mrs Sewell. London: Smith, Elder, and Co., 65 Cornhill.

Most of these ballads are very commonplace, but a few of them possess a mild humour which indicates more ability than the rest. By far the best is "The little Schismatics," which is not only clever of its kind, but displays an amount of sense and good feeling upon religious differences which we do not always find in the quarter from which these ballads appear to issue.

The Autobiography of Frank; the Happiest Little Dog that ever Lived By the Author of "The Gipsy's Daughter," &c. London: Darton and Co., 58 Holborn hill.

The best part of this little book is the history of Frank's first master, but the story of the poor boy's sufferings and death is almost too sad to be wholesome for young children. The second half of the dog's adventures is lively and unobjectionable. The frontispiece and vignette are exquisite, both in design and execution.

A Voice from a Mask. By Domino. London: Walker and Co., 196 Strand. 1861.

A collection of stale and vulgar clerical anecdotes, upon which beautiful toned paper and elegant binding have, unfortunately, been wasted.

Lost in Ceylon: The Story of a Boy and Girl's Adventures in the Woods and the Wilds of the Lion King of Kandy. By William Dalton, Author of "The White Elephant," "The War Tiger," &c. With Illustrations by Harrison Weir. London: Griffith and Farran, corner of St Paul's churchyard. 1861.

This is a sort of Crusoe story, the aim of which is to give children a popular acquaintance with some of the wonders and beauties of Ceylon. It has evidently been suggested by Sir J. E. Tennent's work, which the author seems to know by heart. The adventures of the boy and girl, and of their two protectors, a Cingalese lad, and an English sailor, are not absolutely impossible, and are told very pleasantly and gracefully. All children who love tales of adventure, and can appreciate the romance of such natural history as Ceylon affords, will find this an extremely attractive book.

Foreign Correspondence.

(FROM OUR CORRESPONDENT.)

PARIS, Thursday.

Reports are current that the present Minister of Commerce, M. Rouher, is about to be relieved of the active duties of his office, and to be named Minister without portfolio, but with a salary of 4,000*l*. Different notabilities are named as likely to succeed him; but it is to be hoped that the best man in all France for such a place will be taken, and who he is your readers well know.

M. Mirès is making the newspapers proclaim that the subscription to his Turkish Loan is being filled up fast. This may be, but in that case the subscribers must be almost exclusively of the lower class of society, for bankers and capitalists who understand financial matters have, generally speaking, certainly declined to invest.

This honourable M. Mirès is in a very painful position just now. A serious dissension, it appears, lately arose between him and one of his former partners, M. de Pontalba, owing, I believe, to his having made a claim on the latter for a very large sum of money, which he (Pontalba) did not conceive to be due. In consequence M. de Pontalba addressed to the Ministers and judicial authorities a *memoir*, as such things are called, on certain of the operations of M. Mirès, and specially in connection with the Roman Railways and the Caisse Générale des Chemins de fer. The statements made in this document were of such a very startling nature, that the judicial authorities summoned M. Mirès before them to give explanations. This gentleman was at first somewhat arrogant, but on an intimation from the magistrates that the matter was too serious a one to be trifled with, he became modest. The impression left on the minds of the magistrates was not quite favourable, inasmuch as they, as I understand, consented to receive from M. de Pontalba a formal complaint against M. Mirès. On this, M. Mirès sent his son-in-law, the Prince de Polignac, to the Emperor to beg that the matter might be hushed up, and intimating that if it were not, revelations likely to be disagreeable to some very important personages connected with the Government would most probably be made. The Emperor, who is friendly to Prince de Polignac, returned a reply which was neither a promise nor a refusal to do what was wanted. But it is contended that the Emperor has no power, and certainly not the right, to interfere in a matter which has been brought before justice; that in fact for him to stop a judicial investigation would be a sort of *coup d'état* against the law and against justice. In this position the matter stands at this moment, and what the upshot of it will be I cannot tell. I need not say that the affair excites extraordinary interest in financial circles. Observe, that I do not say that the complaint made against M. Mirès is well founded; no doubt, in fact, he will be able to show that it is not. But still the circumstance of its having been made is a painful one.

The Bourse during the week has been depressed, and the following are the quotations:—

The monthly Customs returns have appeared. In the month of November last the import duties amounted to 10,349,000f, and in the corresponding month of last year they were 15,485,134f, and in that of the year before 12,627,411f. In the first eleven months of the present year they were 121,222,000f, whereas in the eleven months of 1859 they were 173,165,308f, and in the same period of the year before 167,365,099f. The decline here presented will occasion no surprise to your readers; it is owing to the large reductions in import duties on articles of general consumption made in the course of the present year.

On the 1st of November, under the treaty with England, a new tariff was imposed on various articles, and among them copper, lead, tin, zinc, and machinery. The following shows the quantities of the last five objects imported in the month of November, compared with those of the same month of the two preceding years; the quantities given are not those from England exclusively, but from all countries, England included, and they comprise all that was brought into the country, whether for immediate consumption, or to remain in bond, or to be exported:—

	Nov., 1860.	Nov., 1859.	Nov., 1858.
Copper ....quintals*	9046	6314	12108
Lead	31759	20000	11960
Tin	2742	3383	3836
Zinc	28215	8446	12624
Machinery ....francs	138453	159347	...

* The quintal is very nearly 2 cwts.

The returns do not specify from what countries these articles were brought, but merely give the general totals; that, however, a large part of them came from England may be considered certain. This being so, we may say that the treaty has already begun to work well, since in one short month, and a month in which unusual commercial depression prevailed, a marked increase compared with last year has taken place in three out of five articles.

On cast iron, bar iron, and steel, the new tariff under the treaty came into force on the 1st of October, and on coal at a previous date. The following were the quantities of these articles brought in:—

	Nov., 1860.	Nov., 1859.	Nov., 1858.
Cast iron .... quintals	66417	58415	92984
Iron in bars	27527	7551	16849
Steel	180	3801	1164
Coal	5552037	4657686	4204173

These figures may also be considered a testimony to the value of the treaty.

The following is a general account of the principal articles imported *for consumption* in France, in the first eleven months of each of the last three years; those that have been exported, or are now remaining in bond, not being included:—

	First Eleven months of 1860.	First Eleven months of 1859.	First Eleven months of 1858.
Oxen and sheep ....head	516805	515370	398568

Prepared skins and gloves	64030	66245	52515
Ditto with drawbacks	4401	4761	4932

Of the wines, England received this year 98,627 hectolitres, whereas last year only 42,529 where sent to her. Of alcohols, however, she received less this last year.

Subjoined are details of the precious metals:—

Annexed is an account of the markets:—

FLOUR.—At *Paris*, this week, business has been more active, and prices have advanced. Yesterday, the quotation was 61f to 64f and 65f the sack of 159 kilogs. Four marks were 62f 75c to 63f for disposable; 62f for the current month; January, 62f.

WHEAT.—At *Paris*, yesterday, the demand was rather active, and prices rose; the quotations being from 34f to 36f 50c the sack of 120 kilogs. Of the provincial markets, 5 present a rise of from 7c to 1f 34c the hectolitre, 25 a fall of 11c to 75c; 36 are reported firm; 31 without variation.

COTTON.—At *Havre*, in the week ending Friday, a fair amount of business was done, the sales having been 17,307 bales. Prices rose 1f for very low qualities, leaving all other descriptions unchanged. Low New Orleans was consequently 91f the 50 kilogs; and very ordinary ditto, 98f. This week, business has been extraordinarily active, and yesterday prices were about 3f higher than those of the preceding Friday.

COFFEE.—The demand at *Havre*, in the week ending Friday, was regular:—60 sacks Hayti Port-au-Prince disposable went at 75f the 50 kilogs in bond; 355 sacks ditto Cape, 81f to 82f; 320 ditto ditto for delivery, 80f; 274 sacks Rio not washed for delivery, 69f to 75f 50c; 650 sacks Porto Cabello disposable, 84f. The arrivals were about 6,000 sacks. This week, Hayti Cape has been at 80f 50c to 82f; Rio, 72f 25c to 74f. The sales of Rio have been rather numerous.

TALLOW.—At *Havre*, last week, 25 casks Russian were sold at 72f the 50 kilogs duty paid. The arrivals were 26 casks.

COMMERCIAL AND MISCELLANEOUS NEWS.

A letter from Melbourne mentions that a solid cake of gold, worth 9,500*l* the produce of the crushing of only ten tons of quartz from a reef near Inglewood—a locality scarcely known 12 months ago—had been sold to the Bank of New South Wales. The Bank had also purchased at Sandhurst a cake weighing 501 ounces, the produce of 35 tons of quartz, and it is affirmed that the same reef will produce 30,000*l* a year for many years to come. The dates from Adelaide, South Australia, are to the 27th of October. Trade is represented as being in a wholesome state, but with limited transactions. The anticipations as to the coming harvest were favourable, and the pastoral interests were said to be in a satisfactory condition. The Customs returns for the year ending June 30, 1860, had been published, and show that the total value of imports amounted to 1,557,604*l*, while the exports during the same year were 1,462,096*l*. The Borra Borra Company had held their usual half-yearly meeting, and declared a dividend of 5*l* per share, payable on the 3rd of November. The price of these shares had receded from 147*l* to 135*l* to 137*l*. Copper was quoted at 95*l* per ton. Rates of exchange were 1 per cent. premium for draughts on London, and 1 per cent discount on purchase of bills by banks. Sydney accounts mention that the Bank of New South Wales on the 25th of October declared a dividend at the rate of 15 per cent. for the half-year ending the 30th of September last.

A commercial letter from Bombay, dated the 24th ult., says:—In exports there has been a good business doing since the Dewallee came to a termination, and more demand has arisen for money. The cash balance in the Bank of Bombay had fallen on the 17th inst. to 16,369,993 rs, which, though still indicating abundance, enabled the Directors to raise the rate of discount by 2 per cent. all round, say to 5 per cent. on Government, and 7 per cent. on short private bills. The change has

affected the value of shares and securities in general, and Government paper has experienced a decline of from ¾ to 1½ per cent., the quotations now being only 81¼ for four, 96¾ for five, and 101⅛ for five-and-a-half per cent. paper. Imports.—We have not a single transaction to report, and little, therefore, can be said respecting the position of the markets. Of cotton piece goods in general the stocks in first hands are not excessive, and we are inclined to look for some slight reaction when purchases commence again.

James Low's Indian circular, December 26, 1860:—

PUBLIC DEBT of INDIA on the LONDON BOOKS, Dec. 20, 1860.

	Interest when payable.	Registered as Notes.	Registered as Stock.

Grand total to the East for 1860	2,378,029	10,576,950

The annexed report has reached us from Calcutta under date the 17th ult:—Money Market—There is still an ample supply of money at previous rates, and with no present prospect of an increased demand, the more so as trade shows no sign of improvement. Sugar—The five days' holidays that have intervened since the date of our last issue have tended to check business for England, but the transactions in Benares kinds for Bombay and the Persian Gulf have been rather extensive, and prices have advanced four to six annas per maund. Supplies are very scanty, and the stock of all qualities is reduced to 14,000 bags. Saltpetre—The principal transactions during the past week have been for refining purposes; one or two small shipments have been made to England and America at late prices.

The *Moniteur* has published the following monthly debtor and creditor account of the Bank of France, made up to Thursday se'nnight. The corresponding figures of last month and of the corresponding period in 1859 are added:—

The annexed report shows the state of the Albany lumber market during the week ending Nov. 28:—Very little lumber has arrived during the week, and the amount afloat on the canals is small. There are some receipts of spruce, &c, by railroad, but not to any extent, as the roads are overburdened with other freights. The sales are light, but shipments of previous sales have been very large, and have afforded freight to the fleet of vessels arriving during the week. The stock on hand is not large but pretty well assorted, h mlock, spruce and common pine being in least supply. Prices have remained steady, and will so continue to the end of the season. The receipts by the Erie and Champlain canals, during the third week in November, in the years named, were as follows:—

	Boards and Scantling, ft.	Shingles. M.	Timber. C. ft.	Staves. lbs.
1858	10374380	1751	4450	1776571
1859	8420000	1725	...	1701000
1860	7376700	558	4500	...

The receipts by the Erie and Champlain canals, from the opening of navigation to November 23rd, in the years named, were as follows:—

	Boards and Scantling, ft.	Shingles. M.	Timber. C. ft.	Staves. lbs.
1858	261940931	33012	115347	140567801
1859	281214762	47194	66231	111889503
1860	296742300	31122	44530	141558877

The quantity of coal and coke exported from the various coal ports of Great Britain during the month of November was, of coal, 524,230 tons; and of coke, 23,573 tons. Of this quantity, which shows when compared with the returns for the preceding month a considerable falling off in the exports, Newcastle-on-Tyne exported 129,973 tons of coal, and 13,262 tons of coke; Blyth, 7,415 tons of coal; Shields, 4,499 tons of coal, and 195 tons of coke; Amble, 4,500 tons of coal; Sunderland, 60,354 tons of coal, and 2,068 tons of coke; Seaham, 1,088 tons of coal; Hartlepool and West Hartlepool, 41,205 tons of coal, and 3,960 tons of coke; Middlesborough, 7,873 tons of coal, and 2,305 tons of coke; Hull, 20,210 tons of coal, and 13 tons of coke; Goole, 1,736 tons of coal; Liverpool, 30,065 tons of coal, and 202 tons of coke; Cardiff, 108,185 tons of coal, and 154 tons of coke; Swansea, 39,286 tons of coal, and 132 tons of coke; Newport, 12,875 tons of coal, and 407 tons of coke; Llanelly, 5,441 tons of coal, and 780 tons of coke; Glasgow, 7,679 tons of coal; Greenock, 2,916 tons of coal; Grangemouth, 6,141 tons of coal, and 95 tons of coke; Alloa, 6,258 tons of coal; Borrowstoness, 2,410 tons of coal; Charlestown, 3,030 tons of coal; Troon, 13,393 tons of coal; Ardrossan, 1,950 tons of coal; and St David's, 4,447 tons of coal. The total quantity of coal and coke shipped during the month to ports in the United Kingdom was of coal, 789,848 tons; of coke, 2,096 tons, in addition to 3,202 tons of culm. Of this quantity, which shows a considerable decrease from the returns for October, Newcastle shipped 196,027 tons of coal, and 1,006 tons of coke; Blyth, 6,707 tons of coal; Sunderland, 166,841 tons of coal; Seaham, 38,573 tons of coal; Hartlepool and West Hartlepool, 104,423 tons of coal, and 425 tons of coke; Hull, 1,349 tons of coal; Middlesborough, 17,160 tons of coal, and 270 tons of coke; Goole, 6,735 tons of coal; Swansea, 15,409 tons of coal, and 2,096 tons of culm; Cardiff, 61,240 tons of coal, and 314 tons of coke; Troon, 20,951 tons of coal; Ardrossan, 9,752 tons of coal; Llanelly, 21,802 tons of coal, and 1,070 tons of coke; Ayr, 4,757 tons of coal; Newport, 55,514 tons of coal, and 32 tons of coke; Irvine, 4,007 tons of coal; Borrowstoness, 4,314 tons of coal; Maryport, 58,272 tons of coal, and 52 tons of coke; Charlestown, 6,244 tons of coal; Whitehaven, 17,171 tons of coal, and 97 tons of coke. During the month 6,552 British and foreign vessels were engaged in the coal trade, of which number 4,279 were engaged in the home and 2,273 in the foreign trade.

The Bankers' Gazette.

BANK RETURNS AND MONEY MARKET.

BANK OF ENGLAND.

(From the GAZETTE.)

AN ACCOUNT, pursuant to the Act 7th and 8th Victoria, cap. 32, for the week ending on Wednesday, the 19th day of December, 1860.

ISSUE DEPARTMENT.

	£		£
Notes issued	27,044,595	Government Debt	11,015,100
		Other Securities	3,459,900
		Gold Coin and Bullion	11,455,828
		Silver Bullion	1,113,767
	27,044,595		27,044,595

BANKING DEPARTMENT.

	£		£
Proprietors' Capital	14,553,000	Government Securities (including Dead Weight Annuity)	9,540,273
Rest	3,184,326	Other Securities	19,855,590
Public Deposits, including Exchequer, Savings Banks, Commissioners of National Debt, and Dividend Accounts	7,384,841	Notes	7,346,560
		Gold and Silver Coin	761,675
Other Deposits	11,759,820		
Seven Day and other Bills	652,051		
	37,534,038		37,534,038

Dated the 20th December, 1860. M. MARSHALL, Chief Cashier.

THE OLD FORM.

The above Bank accounts would, if made out in the old form, present the following result:—

Liabilities.	£	Assets.	£
Circulation (including Bank post bills)	20,350,146	Securities	29,347,863
Public Deposits	7,384,841	Coin and Bullion	13,331,270
Private Deposits	11,759,820		
	39,494,807		42,679,133

The balance of Assets above Liabilities being 3,184,326*l*, as stated in the above account under the head REST.

FRIDAY NIGHT.

The preceding accounts, compared with those of last week, exhibit—

A DECREASE of Circulation of	£235,319
An INCREASE of Public Deposits of	355,730
A DECREASE of Other Deposits of	344,399
No change in the amount of Government Securities.	
A DECREASE of Other Securities of	101,598
A DECREASE of Bullion of	115,835
An INCREASE of Rest of	6,355
An INCREASE of Reserve of	108,010

The present Bank return shows but trifling alterations. the only unfavourable feature is the reduction of the stock of bullion by 115,835*l*, which is compensated so far as the position of the Bank is concerned by the increase in the reserve of 108,010*l*, and a decrease in the circulation of 235,319*l*.

Subjoined is our usual weekly table, affording a comparative view of the Bank returns, the Bank rate of discount, the price of Consols, the price of wheat, and the leading exchanges, during a period of four years, corresponding with the present date, as well as ten years back, viz., in 1850:—

At corresponding dates with the present week	1850.	1857.	1858.	1859.	1860.
Circulation, including bank post bills	£ 19,715,187	£ 20,133,558	£ 20,458,684	£ 21,401,717	£ 20,350,146
Public deposits	10,783,808	7,428,807	9,660,818	9,575,026	7,384,841
Other deposits	9,201,634	15,151,818	13,149,007	13,310,224	11,759,820
Government securities	14,233,252	5,492,756	10,808,591	10,925,157	9,540,273
Other securities	13,762,797	28,088,186	16,494,120	19,586,996	19,885,590
Reserve of notes & coin	10,863,350	7,971,161	13,918,007	10,831,130	8,108,175

Bank rate of discount	3 p. c.	8 p. c.	2½ p. c.	2½ p. c.	3 p. c.
Price of Consols	96⅝ xd	93½ xd	96¼ xd	95⅛ xd	94 xd
Average price of wheat	39s 5d	49s 7d	40s 2d	43s 8d	51s 5d
Exchange on Paris (shrt)	24 87½ 92½	25 22½ 32½	25 10 15	25 10 15	25 15 22½
— Amsterdam ditto	11 14½ 15	11 15 17	11 15 15½	11 13½ 13⅝	11 14⅛ 15
— Hamburg (3 months)	13 5 5½	13 10	13 6½ 7	13 5 5½	13 6½ 6⅝

In 1850, a great sensation was caused by the Bank of England raising the rate of discount from 2½ to 3 per cent. in consequence of the large exports of bullion and the increase of the private securities, arising from the great increase of trade. Belgium had adopted the example of Holland in making silver the sole standard.

In 1857, it was on the 24th December that the Bank of England reduced their terms of discount from 10 to 8 per cent. The rate in the open market had fallen to 7. The value of money was declining all over the Continent, and at Hamburg had receded to 5 per cent. News had been received of the resumption of specie payments by the New York banks. After six days' hard fighting, Lucknow had been relieved, and the women and children passed down in safety to Cawnpore. A terrific earthquake had taken place at Naples.

In 1858, M. de Montalembert's appeal to the Supreme Court had resulted in a mitigation of the sentence passed on him. The bullion in the Bank of England had risen to 19,148,997*l*. The new Turkish loan had fallen to ½ discount. An issue of 750,000*l* Victoria Government bonds was looked for.

In 1859, Indian enfaced paper was placed upon the official Stock Exchange daily list, and in consequence the transactions in it were daily becoming more extensive. By a circular issued by Mr James Low, the export of gold from Great Britain to the East for nine years amounted to 5,633,445*l*, in gold and silver to 66,977,706*l*. The St Paulo Railway, guaranteed 7 per cent. on a capital of 2,000,000*l*, was introduced by Messrs Rothschild.

The amount of the "other" deposits, as compared with the "other" securities, showed, in 1850, a deficiency of 4,561,163*l*; in 1857, a deficiency of 12,936,368*l*; in 1858, a deficiency of 3,345,113*l*; and in 1859, a deficiency of 5,676,772*l*. In 1860, the deficiency is 8,125,770*l*.

DISCOUNT AND MONEY MARKET.—The discount market has been steady during the week at 4¾ to 5 per cent., but for the last two days the tendency has been towards an increased demand at the latter rate, and to-day it has been very active both at the Bank and in Lombard street.

The intelligence from America is not so satisfactory as could be wished. The arrangement effected between the Banks of England and France was known in New York, but the reduction in the Bank rate of discount to 5 per cent. and the transmission of bullion from this side to America were not known.

The question is whether the 1,400,000*l* bullion we have already sent, and the further sums which will doubtless still continue to be sent so long as the exchange remains at 104½ for bankers' bills, and 102 to 4 for bills less known, will have the effect of raising the exchange so much as to render the sending of gold unprofitable. We have grave doubts on the subject; even American houses, who at first treated the American crisis financially and politically as a mere passing storm, seem now to be of opinion that it will not be speedily allayed, and that possibly it will require another million of gold to be sent from this country before any material change from the present aspect of affairs can be hoped for. It must not be forgotten that American securities are much higher in this country than in New York, and the probability is that large amounts may be sent over here for realisation. Such is the distrust also between the North and the South that the South, cannot sell their bills on England; the consequence is that cotton has been falling, and it might probably answer to send gold from this country to purchase it. Altogether, it looks as if more gold would be sent from this country to the United States,—and when to this is added that we have seen for the last day or two symptoms of more gold being sent to France, and also that the exchange from India comes more unfavourable to this country, we certainly cannot hope for a cheaper money market for the present. There has been a growing demand for money in the Stock Exchange during the week, and the rate has gradually risen from 3½ per cent. to 5. There has been about 20,000*l* bar gold taken from the Bank to-day.

ENGLISH FUNDS.—The intelligence from China that a treaty of peace had been signed caused the English funds to improve, and Consols have been as high as 93⅜. Since then, the market has become gradually flatter, and has receded to 92⅞ 3, which is the closing price this afternoon. Three per Cent. Reduced and New 3 per Cents. are 92⅝ ¾, and Exchequer Bills 5 to 2 discount. The demand for money to-day at 5 per cent. has been considerable.

The only new feature in the market during the week has been purchases of 3 per Cent. Reduced and New 3 per Cents. on account of the Savings Banks, which have been going on for many days at the rate of 10,000*l* a day, and are expected to continue. It will be remembered that no money has been invested in the purchase of stock for the Savings Banks in the open market for a year, and, consequently, it is probable there may be a good round sum to invest. Some complaints are made in the Stock Exchange that these purchases are not made publicly from the Commissioners' box, as they unquestionably ought to be.

FOREIGN FUNDS.—Apparently little or no progress has been made in the New Turkish Loan, nor can any be reasonably expected, so long as the Turkish Loan of 1858

remains so much below the stock offered by M. Mirès and Co., which, after all, is thought by many to have only the security of a second mortgage. Besides, there is this very great disadvantage in the New Turkish Loan—that the contract price is stated to be 53¼, and it is offered to the public at nearly 60, after making allowances for discount, &c.; therefore the contractors might deluge the market with stock at a much lower price than that at which the public are invited to subscribe, and still obtain a very large profit.

These are the reasons which cause the new loan to be looked on with disfavour here, and they appear to us to be valid. One thing is certain, that the English public will not subscribe to M. Mirès' loan so long as Turkish bonds of 1858 remain below it, and this truth has, we are informed, been recognised by the contractors; and they have commenced purchases of the bonds of 1858, which have been heavy all the week at 58, but to-day, in consequence of these purchases, have risen to 59, and close this afternoon 58¾ 9, and the old bonds 72 to ½.

Peruvian bonds have been in demand at improved quotations.

Mexican bonds have been in rather greater demand to-day, because it is regarded as impossible that the British Government can with any regard to its own dignity suffer such an outrage to be perpetrated with impunity as the forcibly breaking open, by order of the Government (if the faction in possession of Mexico can be called a Government), the chest containing 1,000,000 of dollars belonging to the bondholders, which was deposited for safety with the British Minister, and on which he had fixed his seal. It is supposed that the recognition of the Juarez Government established at Vera Cruz will be the first measure by which the British Government will show its displeasure of the outrage, and that possibly more active measures will be adopted against the Government of Miramon, under whose sanction and by whose orders this robbery was committed. Mexican bonds close this afternoon at 21⅞ 2. Spanish bonds have also been firm. Mr MacGarel, the deputy-chairman of the Mexican bondholders, has had an interview with Lord Wodehouse on the subject.

Subjoined is our usual list of the highest and lowest prices of Consols every day, and the closing prices of the principal English and foreign stocks last Friday and this day:—

BULLION.—We subjoin Messrs Pixley, Abell, and Langley's circular, which gives an account of the bullion transactions of the week, and also those in India Government loan notes:—

Gold.—A further sum of 80,000*l* of gold has been sent into the Bank since the date of our last circular (13th inst.), but this has been more than counterbalanced by the sovereigns withdrawn for New York, which have been sent as follows:—by the North American 5,000*l*, by the Canada 202,000*l*, and by the Kangaroo 82,000*l*. Further amounts will probably go by the Australasian, and as the accounts from America by the last mail are considered unsatisfactory, it is expected that the drain of gold from England will be rather largely increased. The Roxburgh Castle with 167,000*l*, and the Great Britain with 474,000*l*, have now been at sea 72 and 63 days respectively. The Atrato has brought 110,000*l* refinable gold from the West Indies, and this has been purchased for abroad. The Tamar has taken 10,000*l* to the West Indies, and the Indus 53,538*l* to Alexandria and India. 20,000*l* in bar gold has been withdrawn for the Indian mail.

Silver.—The silver brought by the Atrato from the West Indies, amounting to 185,000*l*, has been sold at 61⅜d per ounce standard. There has been rather a good demand for the Bombay mail of the 27th inst., which has been supplied at the above price. The Tamar has taken 10,000*l* to the West Indies, and the Indus 149,877*l* to India and China.

Mexican Dollars.—The dollars ex Tamar have been sold at 63¼d per oz; there is but little doing now, and until the next mail from China arrives, we do not look for much demand.

Exchange on India is 2s to 2s 0⅛d for Bank drafts at 60 days' sight on Bombay and Calcutta; bills with documents, 1s 11⅜d to 1s 11⅝d; Madras drafts by Banks at 60 days' sight, 1s 11⅜d to 2s.

India Government Loan Notes continue very inactive at our last quotations. 5½ per Cents. are 101 to 101½, and 5 per Cents. 95 to 95½.

Quotations for Bullion.—Gold—Bar gold, 77s 9d per oz std; bar gold, fine, 77s 11d per oz. std; bar gold, refinable, 78s per oz std. Silver—Bar silver, 5s 1⅞d per oz std; bar silver, containing 5 grs gold, 5s 1⅝d per oz std; fine cake silver, 5s 6¾d per oz; Mexican dollars, 5s 2¼d per oz, last price; Spanish dollars (Carolus), 6s 2d per oz, last price.

FAILURES.—At a meeting of the creditors of Mr A. D. Blagomeno, of Manchester, who failed last week, in the Levant trade, the liabilities were stated to be 131,230*l*, of which 62,730*l* will rank upon the estate. The assets (including 60,048*l*, the value of goods consigned to Constantinople) are estimated to be worth 88,514*l*. A large surplus is thus shown, and a proposition for payment in full in four quarterly instalments, commencing in June next, with interest at 5 per cent., was readily agreed to.

The suspension has been announced of Mr John Eades, timber merchant, of Millwall, with liabilities for about 45,000*l*. The books have been placed in the hands of Messrs Harding, Pullein, and Co.

Two failures have been announced at Glasgow—Messrs Johnston and Walker, manufacturers, and Versanio and Co., Greek merchants.

The suspension of Messrs Dodge and Giandonatti, of St Paul's churchyard, india-rubber manufacturers, has been announced. Their liabilities are above 40,000*l*.

At an adjourned meeting of the creditors of Messrs Sofiano Brothers and Co., of Manchester, who failed a short time back, the Committee appointed at the former meeting announced that in the present state of the affairs of the firm they had not been able to arrange any plan of composition. It was therefore resolved that the estate should be wound up under inspection, the inspectors holding themselves ready to consider any proposal that Messrs Sofiano may find themselves able to make in the course of the liquidation.

There is to be a meeting on Monday next of the creditors of Messrs Vedova Brothers, of Manchester.

The suspension of Messrs Charles Villatte and Co., South

American merchants, of Birmingham, appears to have occasioned some surprise. The firm called their creditors together in May, 1859, this step having been principally occasioned by the failure of Alfred Villiers and Co., of Hamburg. The affairs of Messrs Villatte were placed under inspection —Messrs W. Middlemore, Joseph Bent, and Councillor Atkins being the inspectors. A dividend of 5s in the pound was paid to the creditors in cash, and the acceptance of Charles Villatte and Co., guaranteed by John Villatte and Sons, of Buenos Ayres, was given for the remaining 15s; the firm purposing to pay in full. The first of these "instalment bills" has been returned this week.

The suspension has been announced of Mr F. H. Schröder, of St George's East, sugar refiner, for about 20,000*l*.

Miscellaneous.—The Foreign Minister of the Republic of Chili has, in a letter to Messrs Baring, promised during the session of 1861 to introduce a Bill to increase the sinking fund for the purchase and extinction of the 4½ per Cent. Loan.

A new article of commerce from America seems likely soon to attract much attention. On the western border of New York State, at a place called Union Mills, some working men a year or two back observed a quantity of dark oily matter floating on pools abounding in that district. Subsequent experiments led to the discovery that the oil is highly adaptable for illuminating purposes, and by sinking wells to the depth of from 70 to 500 feet it can readily be obtained throughout a very extensive area. In addition to its illuminating capacity, it is alleged likewise to be suitable, when mixed with fish oil, for the processes of lubrication.

The report to the 25th annual meeting of the National Provident Institution states that during the year 988 policies have been completed, assuring 481,231*l*, yielding annual premiums of 16,053*l*, in addition to 1,145*l* received for single premiums.

A desire has been expressed that the next outgoing India mail should be postponed from the 26th to the 27th inst., the letters by the China mail, with dates from Pekin to the 30th or 31st of October (four days after the conclusion of peace), being expected to arrive on that day, so as to admit of answers being despatched.

The payment of the dividend on the first mortgage bonds of the Atlantic and Great Western Railway Company has been advertised.

The Committee of Bondholders of the Grand Trunk Railway of Canada have published a report preparatory to the meeting of the Company called for the 2d of January. It details the constitution and present state of the Company, points out that 2,500,000*l* will be required to meet the floating claims (including over-due interest) and to provide rolling stock, and recommends a thoroughly searching investigation in Canada into the history of the undertaking—a recommendation which the London Directors will be desirous to promote. It is to be hoped that the utmost unanimity will prevail at the meeting of the 2d instant, for on it will greatly depend the success or otherwise of the application for assistance made to the Canadian Government.

A holder of First Preference Bonds of the Grand Trunk of Canada Railway has taken steps to ascertain if these bonds carry a first charge, not only on the railway but the rolling stock, certain judgment creditors having claimed a right over the latter. Annexed is the legal opinion obtained by Messrs Ashurst, Son, and Morris, who have been instructed, however, to acquaint the solicitors of the Company that no hostile proceedings are contemplated unless in case of absolute necessity, and that every disposition exists upon the part of their client to assist in getting in a friendly manner an authoritative settlement of the question, so that all parties may be put into the best position for acting harmoniously to mitigate the condition of the undertaking :—

1. We are of opinion that, by the terms of their bonds and of the Canadian statutes, the first preferential bondholders of the Grand Trunk Railway of Canada possess a hypothic, mortgage, charge, or lien, of the same nature, covering the same kinds of property, and ranking in the same order of priority with that which the Province had previous to the Act of 1856, statute 19th and 20th of Victoria, chap. 111; and that such charge extends to the rolling stock and plant of the Company as well as to the road and works, and is a first charge thereon.

2. We are of opinion that the said first preferential bondholders are entitled, in case of any danger to their security, to have receivers appointed, or such other means employed as by the law of the respective jurisdictions through which the railway passes may be provided, for protecting and making available the property included in their charge; and assuming that there is an evident prospect of the revenue of the Company proving insufficient to pay the interest becoming due on their bonds, and that judgments to large amounts have been obtained against the Company in Upper Canada, we consider that an application to the Court of Chancery in Upper Canada for a receiver, and an injunction to restrain the judgment creditors from issuing execution, would be successful.

H. M Cairns.
R. Paul Amphlett, Q.C.
John Westlake.

The following table will show the lamentable effects of the civil war which has been so long raging in Mexico :—

The news by the present steamer from Australia is in one respect the most important ever received. The problem as to the possibility of crossing the continent from South to North has been virtually solved, and no question now remains that a land transit may be opened up available, not only for the general purposes of commerce, but also for telegraphic communication. Mr Stuart, who started from Adelaide about last March on an exploring expedition, with two companions and a number of horses, has returned, after having crossed the country to a distance of about 1,600 miles from Adelaide, and to within 300 miles of the Victoria river. Here he was turned back by a body of hostile natives; but, as he had already reached 100 miles further North than the point to which Gregory's expedition in 1856 descended from the Victoria, the continent may be considered, by the joint results of these surveys, to have been fairly opened up from one end to the other. Instead of an arid desert, it is described to be a practicable country throughout.

COMPARATIVE EXCHANGES.

The quotation of gold at Paris is about 1⅛ per mille premium, and the short exchange on London is 25.20 per 1*l* sterling. On comparing these rates with the English mint price of 3*l* 17s 10½d per ounce for standard gold, it appears that gold is at about the same price in Paris and London.

By advices from Hamburg the price of gold is 424 per mark, and the short exchange on London is 13.4½ per 1*l* sterling. Standard gold at the English Mint price is, therefore, about 1-10th per cent. dearer in Hamburg than in London.

The course of exchange at New York on London for bills at 60 days' sight is quoted at 104 to 105 per cent., at which rate there is a profit on sending gold to the United States.

COMMERCIAL EPITOME.

FRIDAY NIGHT.

At Mark lane, to-day, the show of English wheat was very limited, and the demand for selected samples ruled steady at an advance in the quotations, compared with Monday, of 1s per quarter. Low and damp qualities moved off slowly at late rates. Barley, oats, beans, peas, and flour realised full prices; but the demand for them was not to say active. The imports from abroad this week amount to 16,150 quarters of wheat; 4,560 barley; 11,770 oats; 20 sacks and 9,990 barrels of flour.

The Liverpool market this morning was active for wheat at a further improvement in value of 1d to 2d per cental. Flour was the turn dearer.

The state of the grain trade at Alexandria to the 3rd inst., is thus reported by Messrs Briggs and Co.:—

The unfavourable advices received by last mail have produced a heavy decline in the value of all descriptions of breadstuffs, although, on the other hand, the lightness of receipts from the interior, coupled with the arrival of a considerable number of vessels, causes some tendency towards a reaction. The decline in the price of beans, it will be observed, is less important. Receipts of Indian corn continue very light. Of linseed the arrivals have now practically ceased. The following are sales since our last report of 27th ultimo, with present prices free on board:—Wheat—Saide, 2,700 qrs, 36s 6d to 38s; Beheireh, 730 qrs, 33s to 34s 10: beans—Saide, 1,200 qrs, 28s 3d to 28s 9d; Beheireh, 125 qrs, 27s 10: Indian corn, 1,060 qrs, 26s 9d to 27s 9d: barley, 610 qrs, 22s to 24s per qr. Freights—For beans, to the United Kingdom for orders, 6s 3d to 6s 6d per qr, other grain in proportion; to a direct port, 5s 6d to 6s; grain ballast to Liverpool by sailing vessel, 4s 6d to 5s; by steamer, 6s to 6s 6d; cotton to Liverpool by sailing vessel, ½d to 9-16ths. Exchange on London at 3 months' date at 94¼ piastres per £; Marseilles, 5f 30c to 5f 31c per dollar of 20 tariff piastres.

The New York market on the 7th instant was dull for wheat and flour on easier terms. Very little was doing for export purposes.

There has been a very animated demand in the Liverpool cotton

market throughout the week, and the total sales have reached the large cipher of 133,000 bales, including 94,000 bales to spinners, 31,000 bales to speculators, and 8,000 bales to exporters. Quotations in general may be called fully ¼d per lb higher than on Friday last. To-day the market closes very firm, with sales of 12,000 bales at full rates. The week opened with an excitement in the market, which has increased from day to day, resulting in the above-named large transactions. The accounts from America were considered advantageous for holders, the crop prospects being regarded as less favourable; the diminished stocks here and on the Continent are also watched with some interest; and an increased feeling of confidence was manifested by the cheerful news just received from China. In the London market a large business has been done, say 4,800 bales, at an advance of ⅛d to ¼d per lb upon last week's prices.

Our latest advices from New York are to the effect that the cotton market was dull and unsettled. Middling sold at 9¾ cents. At New Orleans, on the 6th inst., cotton was quiet. About 7,500 bales were disposed of at 9⅛c to 9½c for middling.

Owing to the news from China, and the increased supplies on offer, all kinds of tea have met a dull inquiry, and prices have had a drooping tendency. The latest advices from China are as follows:—Our export of tea for this season, from 1st July to 29th October, 1860, is,—from Canton, 14,616,200 lbs; Foochow, 14,974,000; Shanghai, 3,008,000, giving total for the season 1860-61, as far as yet ascertained, 32,599,100 lbs, against 24,454,300 at the same date last year—showing an increase of 8,144,800 lbs. The silk export has been 26,160 bales, against 23,922 last season—the increase being 2,238 bales.

The sugar market has continued in a most unsatisfactory state. Dealers have operated cautiously, and, in most instances, prices have further declined 6d to 1s per cwt.

COMPARATIVE STATEMENT of SHIPMENTS of SUGAR from the Mauritius, from the 1st August to the 31st October of each Crop.

There has been a very inactive inquiry for all kinds of coffee; but, compared with last week, no change of importance has taken place in the quotations.

The coffee trade at Ceylon is thus reported by Messrs Volkart Brothers to the 15th November:—

The disposal of the present season's crop to date, is as follows:—

PLANTATION COFFEE.

To Great Britain	cwts 25,181	against last year,	cwts	23,613
Foreign Ports	...	—	—	1,262
Australia and India	3,236	—	—	...
	28,417			24,875

NATIVE COFFEE.

To Great Britain	cwts 11,201	against last year,	cwts	13,761
Foreign Ports	1,496	—	—	822
Australia and India	986	—	—	...
	13,683			14,583

The receipts of plantation coffee from the interior are unusually light to date. A large portion of the crop is now secured and awaiting transport to Colombo. There have been a few contracts in native coffee at higher rates, but there is not any great anxiety to purchase, and value is maintained entirely by the very scanty supplies in our market. Plantation coffee, mountain, 11s 3d to 11s 6d per bbl; native coffee, unpicked, 41s to 42s per cwt; ditto, picked and dried, 44s to 45s per cwt: cinnamon, plantation, 9d to 10d per lb; ditto, inferior, 6d to 7½d per lb.

Although the grain trade continues firm, with advancing quotations, rice has met a dull inquiry, at about previous rates.

For the time of year, the fruit market has ruled inactive, at late currencies.

We have received the following communication in reference to the state of the indigo trade from Messrs Moran and Co., of Calcutta. It is dated Nov. 8:—

In this market nothing has yet been done, nor has the new crop begun to arrive, but we doubt not some parcels will make their appearance in the course of a week, and the arrivals will rapidly increase after the 1st December, when the railway will be available from Rajmehal, about 200 miles in the direction of Tirhoot, Purneah, &c., and in future we may always expect our selling season to commence earlier than hitherto in consequence of the time which will be saved in bringing the indigo to market by rail. We have to increase our estimate of Tirhoot and Chuprah 1,000 maunds, the result of the manufacturing season having exceeded all expectations; otherwise our opinion as to the total amount of the crop remains unchanged. Present estimate of the crop:—Bengal, 51,000; Tirhoot and Chuprah, 35,000; Benares, 13,000; Dueb, 12,000; total, 1,11,000 fy mds. Exports of indigo from 1st November, 1859, to the evening of the 31st October:—To Great Britain, 18,933; Havre and Bordeaux, 5,186; foreign Europe, 64; America, 1,526; Gulf, &c., 1,766; sundry ports, 11; total, 27,486 chests.

We have no change to notice in the value of saltpetre, hemp, or flax. Wool has moved off slowly, on former terms. The metal market, generally, has been devoid of animation.

Linseed oil has mostly sold at 29*l*. Other oils have ruled about stationary. The tallow market may be considered steady. To-day, P. Y. C., on the spot has sold at 60s; January to March, 60s;, March only, 60s 9d; April to June, 59s 3d; October to December 57s 6d to 58s per cwt.

"The week commenced," says the New York *Shipping List* of the 5th inst., "with the general features of the money market unchanged from those noticed in our last review. The demand is active, but rates of interest outside of Bank are hard and unyielding, and even at Bank only the very best descriptions of paper are in favour. We hear of grocers' bills selling as high as from 18 to 20 per cent. per annum, and some dry goods signatures at 24. These are ruinously high rates, and show that the pressure is about as severe as ever. We quote:—

	Per cent. per annum.
Loans on call, stock securities	7 to 9
Do. other good securities	9 10
Prime endorsed bills, 60 to 90 days	10 12
Do. 4 to 6 months	12 15
First class single signatures	15 18
Other good bills	24 36
Names less known	... ...

The Banks continue to pursue as liberal a policy with the business community as the trying exigencies of the times will allow. The expansion policy is faithfully adhered to, and great relief is experienced in consequence. The specie reserves do not tell quite so well as was expected, perhaps, but the average, nevertheless, is a rising one. The footings are as follows:—

	Nov. 24. dols.		Dec. 1. dols.			dols.
Loans	122,548,454	...	129,539,459	...	Inc. ...	7,019,005
Specie	18,759,373	...	18,541,762	...	Dec....	217,411
Circulation	8,968,442	...	8,805,944	...	Dec....	162,498
Deposits	74,035,799	...	80,722,718	...	Inc. ...	6,687,919

The foreign and domestic exchanges continue irregular and unsettled. In regard to general trade, there is but little to be said of an encouraging character. Stagnation is the prevailing characteristic in almost every department, and until an improvement takes place in monetary affairs, there is but little prospect of an immediate alteration for the better. The balance in the Sub-Treasury here is rapidly diminishing. Yesterday it stood at 3,305,506 dols 4c. The foreign trade of the port continues moderately active, with a substantial increase in the exports, compared with previous seasons, as the most attractive feature."

The cotton market has been animated throughout the week, and, since the arrival of the American mail, even excited. A very large business has been done in the last three days by the trade, and extensive purchases have been made by speculators. An advance has been established in the prices of almost all grades of American of ¼d per lb since last week; and in many cases still more has been paid. Egyptian have been more saleable, some large sales having been made to the trade. Brazil are firm, at last week's rates. East India have advanced ⅛d per lb. The sales to-day are 10,000 bales. The market is quieter, but very firm. The reported export amounts to 8,140 bales, consisting of 5,520 American, 220 Brazil, and 2,400 East India. No business will be transacted in the cotton market on Monday next, the 24th instant.

MARKETS IN THE MANUFACTURING DISTRICTS.

The arrival of news to the effect that peace has been concluded with China, has produced considerable firmness in the demand for goods for shipment to the East, and a steady, though not important, advance in the quotations. For France and Germany, rather more business has been passing, and the home trade is remarkably healthy. Iron, however, has continued very dull, at low quotations. Coals have realised high rates, with a good consumptive demand.

MANCHESTER, Dec. 20.—The announcement of peace with China occasioned on Monday and Tuesday an animated demand for water twist and shirtings; the transactions in these articles throughout the week have been considerable, and we now advance our quotations for them to a point higher than they were at before the reduction of last week. This business, with the occasion of it, has impelled other things in the same direction. Orders for printing cloths, madapollams, jacconets, and such like, which had been held in abeyance whilst the market was declining, have been freely given out, adding to the strength of prices, and causing a demand for eop yarns. The latter have advanced accordingly about ¼d per lb; whilst the final effect of these movements has been shown in cotton, the extensive buying of which by spinners seems to assist a position already so far secured by the contracts they have taken for their production.

COMPARATIVE STATEMENT OF THE COTTON TRADE.

BRADFORD.—The wool market is in a very inactive state. The stocks on hand for the time of year are not an average. Noils and brokes are firm, and taken up as produced. There is no new feature of importance to note in the yarn market either as to demand or price.

LEEDS.—The woollen trade in general in this town and district remains steady, and is undoubtedly in a sound condition; but, as is common at this period of the year, the markets in the cloth halls to-day have not been attended by many buyers, and a comparatively small amount of business has been done. The goods bought were chiefly to assort stocks, but a few parcels for the spring trade were purchased. Prices remain firm.

ROCHDALE.—The news of the treaty of peace with China has imparted cheerfulness to our market, though it has not had the effect of increasing sales, as merchants are limiting their stocks as much as possible, prior to the annual balancing. Yorkshire goods are still in fair demand, and prices of every description of flannel are unaltered.

LEICESTER.—Most classes of goods meet a dull inquiry, but the slackness is only supposed to be temporary, and in a short time business will probably resume its wonted activity. In the adjacent hosiery districts trade is dull, and many workmen are unemployed. No change in wools, which continue firm. Not much doing in yarns.

NOTTINGHAM.—The lace trade in nearly every branch continues in a very dull state; the business doing for the home market is more than usually dull for the period of the year. A few plain goods are selling, and some small orders for fancies are being received. As respects the foreign demand, there are some orders in course of completion for the United States, and a little is doing for Germany.

HALIFAX.—The business doing in wools is confined to the purchase of small lots required to assort. Prices continue very firm.

HUDDERSFIELD.—The trade of the district generally is in a very healthy state. Prices are very moderate, more so, indeed, than the prices of all kinds of raw material would seem to warrant.

ROCHDALE.—We have had rather more inquiry for wool, but no business except for pressing sorts. Prices are quite firm. All sorts of dyed goods, together with low heavy sorts, are readily picked up. The Yorkshire trade is also very active.

GLASGOW.—There is no variation to report. Trade continues quiet, and prices are quite steady, there being no alteration whatever.

BELFAST.—There has been rather more activity in the market for white goods, but, as a whole, the trade must be reported as very quiet, especially in the movements for export. The crisis in America has had remarkable influence on sales, not only as relates to the lines of goods for that outlet, but on the general business. Even the home trade, which, previous to the backward turn of affairs, had been looking better, became exceedingly dull, and, for the first ten days of the present month, was under the lowest point of the season. As already noted, a slight improvement has taken place within the last few days.

BIRMINGHAM.—In the gilt toy trades the slackness is becoming general, and the jewelry factors' reports are very discouraging as to the state of that branch. The brassfounders and lamp and chandelier makers are in a better position. With America there is scarcely anything doing.

WOLVERHAMPTON.—Current prices of pig iron:—Staffordshire blast, 4*l* 5s; Old Windmill End All Mine, Nos. 1 and 2 melters, made with Lord Ward's thick coal warm air, 4*l*; Old Windmill End All Mine forge mine pig iron, made with Lord Ward's thick coal, Nos. 3 to 6, 3*l* 12s 6d; best native hydrate pigs, 3*l* 10s to 4*l*; first-class All Mine grey forge pigs, 3*l* 5s to 3*l* 10s; good mine pigs, with a modicum of flue cinder, 2*l* 12s 6d to 2*l* 17s 6d; mine pigs, deteriorated by cinder, 2*l* 7s 6d to 2*l* 12s 6d; Cleator Moor hæmatites, 3*l* 10s to 3s 11*l* 6d; Barrow hæmatites, 3*l* 10s to 3s 11s 3d; Workington hæmatites, 3*l* 7s 6d to 3*l* 8s 9d; Kirkless Hall hæmatites, 3*l* 5s to 3*l* 6s 3d; grey forge cinder pig iron, 2*l* 5s to 2*l* 10s; white forge cinder pigs, 2*l* 2s to 2*l* 7s 6d; ordinary

melters, Nos. 1, 2, and 3, 2*l* 12s 6d to 2*l* 17s 6d; superior makes of mine melting iron, 3*l* 2s 6d to 3*l* 15s, according to make and quality. The above prices are all delivered on the wharfs at the South Staffordshire manufactories. Favourite Shropshire and Forest of Dean brands, 4*l* 10s delivered; Northern hæmatites, from 3*l* 5s to 3*l* 11s 3d, according to brand or quality.

CORN.

AMERICAN GRAIN AND FLOUR MARKETS.

NEW YORK, Dec. 5.—FLOUR AND MEAL.—Under a moderate inquiry from the local and Eastern trade, and a limited demand for export, the market for State and Western has ruled dull, heavy, and irregular during the preceding three days, and prices strongly favoured the purchaser. On some grades we note a decline of 5c to 15c per barrel, chiefly on the poorer kinds, which have been dealt in very sparingly. The receipts have been pretty heavy, but the West end of the canal having been closed for the winter, only a moderate amount remains to come down the river by the boats, and the stock cannot be largely augmented; transactions for the three days foot up 35,000 barrels, the market leaving off dull and heavy at the revised rates annexed. Canada flour has also met with limited inquiry, and the sales comprise only 1,200 barrels, including 400 yesterday. We quote:—State, superfine brands, 4.65 dols to 4.70 dols; State, extra brands, 4.80 dols to 5 dols; Michigan, fancy brands, 4.70 dols to 4.80 dols; Ohio, common brands, 4.80 dols to 4.90 dols; Ohio, fancy brands, 4.90 dols to 5 dols; Ohio, fair extra, 5.10 dols to 5.20 dols; Ohio, good and choice extra brands, 5.30 dols to 7 dols; Michigan, Wisconsin, Indiana, &c., 4.80 dols to 5.10 dols; Genesee fancy brands, 5.10 dols to 5.25 dols; Genesee, extra brands, 5.30 dols to 7 dols; Missouri, 4.90 dols to 7 dols; Canada, 4.90 dols to 7.25 dols. The market for Southern flour presents no new features.

EXPORT, from 1st to 30th November.

	1860 barrels	1859 barrels
Wheat Flour	228,583	130,609

EXPORT from Jan. 1 to Nov. 30.

EXPORT, from 1st to 4th December.

	1860 barrels	1859 barrels
Wheat Flour	24,801	20,469

GRAIN.—We have to report a continuance of the dullness and irregularity in the market for wheat, which have constituted the prevailing features for some time past, and under which prices have further slightly depreciated. The demand has been very moderate, both for local milling and export, and transactions have been restricted by the slight advance in freights. The receipts have been fair. The sales for the three days amount in the aggregate to 266,000 bushels, as follows:—400 bushels Michigan at 1.30 dol; 6,000 Canada Club, 1.11 dol; 9,500 amber Wisconsin, 1.11 dol to 1.12 dol; 19,200 winter red Western, 1.18 dol to 1.20 dol, and 11,800 Chicago spring, 1.03 dol to 1.06 dol. The market for corn has ruled exceedingly heavy, and in order to effect sales to any extent holders have been compelled to accept of lower rates, daily amounting, in the average, to 2c to 4c per bushel. The sales comprise 185,000 bushels, closing dull at 70c to 75c for white Southern, 65c to 66c for yellow ditto, 64c to 65c for mixed ditto, 65c to 66c for round yellow, 62c to 62½c for Western mixed, and 60c to 61c for unsound.

LONDON MARKETS.

STATE OF THE CORN TRADE FOR THE WEEK.

MARK LANE, FRIDAY EVENING.

Notwithstanding that the imports of foreign produce, both into London and at the outports, have continued at a full average scale for the time of year, there has been a steady demand for all kinds of English wheat—the supplies of which have continued limited—at a further improvement in value of 1s to 2s per quarter. Foreign wheat has been disposed of in rather large quantities, at a limited advance in price. Most kinds of barley have realised quite previous rates, and there has been a moderate demand for malt at late quotations. Oats have somewhat improved in value, and the demand for beans and peas has continued steady, at full prices. Most kinds of flour have sold on quite as good terms as in the previous week.

The total imports of foreign and colonial grain into the United Kingdom during November, current year, amounted to 1,710,552 quarters; of flour and meal to 532,643 cwts. The importations of produce in the corresponding month in the four previous years were as under:—

	Nov. 1856.	Nov. 1857.	Nov. 1858.	Nov. 1859.
Wheat.....qrs	429,881	456,804	276,007	327,278
Barley	105,668	100,597	146,228	211,776
Oats	133,310	197,296	236,650	109,758
Rye	7,121	21,882	14,985	7,987
Beans.....	29,935	36,368	43,679	45,950
Peas	11,082	14,830	13,690	31,146
Indian corn	125,537	152,770	139,254	171,581
Flour.....cwts	205,883	267,159	236,849	174,111

The latest advices from the United States are to the effect that both wheat and flour were very dull, and rather drooping in price. The shipments to England had fallen off considerably. Throughout the Continent, there has been more firmness in the demand for wheat, barley, and oats for spring shipment, and prices have shown a tendency to improve. The supplies on offer have not increased.

In Ireland, wheat and some other kinds of grain have become firmer; but the business done has not increased to any extent.

The Scotch markets have been fairly supplied with produce. Wheat has commanded rather more money, and other articles have realised quite previous rates.

To-day's market was scantily supplied with English wheat. Really good samples sold at 1s per quarter above Monday's currency, and other kinds were firm. Foreign wheat was the turn dearer, with a good consumptive demand. All other produce ruled steady in price.

The state of the floating trade is thus reported by Mr E. Rainford:—Only eleven arrivals off coast for orders are reported up to last night since the 13th inst., consisting of 5 cargoes of wheat, 3 maize, and 3 barley, viz.:—Wheat, 1 from Trieste, 1 Venice, 1 Odessa, 1 Taganrog, 1 New York; maize, 2 Philadelphia, 1 New York; barley, 1 Odessa, 2 Nantes. Of these, 5 or 6 cargoes were previously disposed of. There has been more doing this week in cargoes afloat, and prices are moving upwards. The following transactions are mentioned:—Wheat, arrived, Mantua at 60s, Taganrog Ghirka 53s 6d, and hard Taganrog at 54s per 492 lbs; Sandomirka, a small cargo at 64s, and American 59s 3d per 480 lbs; on passage, Sandomirka, 59s per 480 lbs; Egyptian Saide 44s, and Behara 43s per imperial quarter; now shipping, Sandomirka, 60s; ditto, shipping or shipped, 60s, both per 480 lbs. Maize, arrived, Ibraila, at 38s 6d and 38s 9d per 480 lbs; on passage, Galatz, 2 cargoes (in Greek vessels), 39s 6d; another cargo, 39s 7½d per 492 lbs; Ibraila (per Greek ship), 35s per imperial quarter; ditto, 4 cargoes at 38s, 2 at 38s 3d, 1 at 38s 6d; now shipping, Ibraila, 38s 3d, all per 480 lbs; to be shipped up to the end of March, Odessa, 41s per 492 lbs. Barley, on passage, Ibraila at 29s and 29s 3d, and Salonica at 28s 6d per 480 lbs. Beans, on passage, Egyptian 37s 6d, and Saide 38s per imperial quarter. Lentils, on passage, Egyptian, to London direct, 36s 6d per imperial quarter.

COLONIAL AND FOREIGN PRODUCE MARKETS.

TRANSACTIONS OF THE WEEK.

For Report of This Day's Markets, see "Postscript."

Mincing Lane, Friday Morning.

Sugar.—There was not any improvement in the demand to yesterday, and sales could only be made at a further reduction, which has occasionally been accepted, principally for Penang. About 630 casks West India had sold to yesterday (Thureday), including 200 casks Barbadoes by auction, from 40s 6d to 44s 6d per cwt. The refiners have made small purchases. The week's delivery was 3,450 tons, making an increase of 8,000 tons for home use since the beginning of the year. As 2,055 tons were landed, the stock is reduced to 51,800 tons.

Mauritius.—Of 3,100 bags by auction, a small portion found buyers at 34s 6d to 36s 6d per cwt for low to good brown. A limited business has also been done privately.

Bengal.—6,500 bags are reported sold by private contract: low brown, 33s to 33s 6d; Gurpatta date, 41s 6d to 43s 6d. In public sale, yesterday, 1,640 bags Gurpatta date realised 40s 6d to 41s per cwt.

Penang.—2,083 bags sold as follows: low to good brown realised 33s 6d to 37s 6d; low to good yellow, 38s to 41s 6d per cwt, being quite 6d under the quotations.

Foreign.—2,000 bags unclayed Manilla have realised 33s 9d; 2,500 bags clayed, at 38s 6d; and a floating cargo of Havana, No. 12, sold for the United Kingdom yesterday at 27s 6d. By auction, 1,643 baskets Java were chiefly taken in: fine grey, 46s 6d; good, 44s.

Refined.—Transactions continue rather limited, and prices are nominal for dry goods. The last sales of crushed and pieces were at easier rates.

Rum.—The Government have accepted tenders for nearly 100,000 gallons, at an average price of 1s 10d proof Leewards. This has not influenced the market, which remains inactive, with very moderate sales at previous quotations. The stock (inclusive of vatted) is about 24,000 puns 3,300 hhds, against 25,500 puns 1,300 hhds in 1859.

Cocoa is dull, and no business of importance has transpired.

Coffee.—The reduced supplies brought forward have chiefly sold at former rates. 187 casks 442 barrels and bags plantation Ceylon went at 65s to 71s for fine ordinary to middling. 746 bags very good ordinary to good native realised 63s to 64s. 33 half-bales common ungarbled Alexandria Mocha were withdrawn at 80s. 290 bags East India brought 61s to 62s for polish Malabar kind. 2,500 bags Rio rather more than half sold at 56s to 59s per cwt for ordinary to fine ordinary, being rather cheaper.

Tea.—Moderate purchases have been made by the dealers from the recent arrivals, including the better sorts of new green tea, which realised full rates for the latter. Other descriptions barely sustained their late value. Public sales are already declared for the 2nd January.

Rice.—The sales have been upon a very limited scale this week, including Necranolie Arracan at 11s 4½d to 11s 6d; pinky Madras at 11s 1½d; and white Bengal at 12s 4½d to 12s 7½d per cwt.

Imports and Deliveries of Rice to December 15, with Stocks on hand.

* The deliveries of duty-free goods for export are not given now, and the total will be shown under the head of home consumption.

Sago.—1,800 boxes partly sold: good medium, 16s to 16s 6d; bold taken in at 17s to 21s per cwt for dull to fine bold, being rather lower for the portion disposed of.

Spices.—940 bags Singapore black pepper sold at the previous decline, from 3¾d to 4d for good. Of 519 bags white pepper, about 400 bags found buyers at easier rates, excepting for a small portion of good Batavia, which realised 7½d, middling dull Singapore, comprising the bulk of the quantity sold, went at 5¾d. 47 cases mace brought 11d to 1s 2d for ordinary to fair, and 9d to 10d for low. 18 cases brown nutmegs: low small to middling brown rather bold, 1s 1d to 1s 7d. 662 bags pimento sold at former rates, from 2⅞d to 3⅛d for ordinary to fair. Cassia lignea was rather cheaper: 112 boxes went from 87s to 92s for pile 2 and 1. 63 boxes cassia buds were taken in at 9*l* 10s to 9*l* 12s 6d per cwt.

Saltpetre.—No sales have been reported this week, as the market remains exceedingly dull.

Imports and Deliveries of Saltpetre to December 15, with Stocks on hand.

	1860.	859.	1858.	1857.
	tons	tons	tons	tons
Imported	12400	18000	9900	16400
Delivered	12400	17000	13450	12000
Stock	3850	2950	2600	6650

Cochineal.—The business of the week has been principally confined to 271 bags in public sale, which chiefly found buyers at previous rates: low small to superior shelly black, 3s 1d to 4s; silver, 2s 11d to 3s 1d; blacks, out of condition, 2s 5d to 3s; a portion of party Honduras silver, 2s 4d to 2s 6d per lb.

Lac Dye is firm, but not at all active. 224 chests were partly sold: fine at 2s 5d; common, 6½d. B Mirzapore and DT bought in at 1s 6d and 1s 11d per lb respectively.

Other Dyestuffs.—Cutch and Gambier remain very dull. There is not much inquiry for safflower. 40 bales low to middling Bengal sold from 3*l* 10s to 5*l* 15s per cwt.

Shellac.—Some kinds show a decline of quite 1*l* from the late highest point. This week some fine orange sold at 12*l* to 12*l* 5s; mixed livery orange, 11*l* 15s; good garnet, 10*l* 12s 6d to 10s 15s per cwt.

Rubber.—Further business has been done in fine Para at 1s 9d to 1s 9½d. The sound portion of 524 packages East India, by auction, was withdrawn. Good quality may now be quoted 1s 5d to 1s 6d per lb.

Brazil Wood was bought in at 60*l* to 75*l* for branch wood; a few lots roots and chumps sold at 18*l* to 20*l* per ton.

Metals.—Nothing of interest has transpired in the market, which continues quite devoid of animation. The last sales made in Scotch pig iron were at 50s 9d for mixed Nos. Manufactured is dull at the quotations. Spelter has sold for spring shipment at 20*l*; the nearest value on the spot is 19*l* 15s per ton. No business has been done in tin. Copper sells slowly at the smelters' prices.

Hemp.—The transactions in Russian have been on a limited scale. Petersburg clean is quoted 34*l* to 34*l* 10s per ton. Manilla remains quiet at 22*l* to 25*l* for roping sorts. The improved feeling in the jute market noticed last week has not been maintained, and the sales on Wednesday went off without spirit. Quotations, however, showed little variation, and 2,770 bales partly sold at 14*l* 5s 6d to 21*l* per ton, according to quality.

Oil.—Few changes have taken place this week. Linseed oil is quiet at 29s. Rape firm: foreign refined, 43s 6d to 44s; brown, 41s 6d per cwt. Cocoa-nut and palm have been quiet, at last week's quotations.

Linseed.—The market is rather firmer. Calcutta, 57s to 58s; Bombay, 60s per quarter.

Hides.—101,000 East India were partly sold, and prices showed little alteration.

Tallow.—Prices of foreign have ruled rather cheaper this week with limited purchases by the trade, and the market is still inactive. This morning, 1st sort Petersburg Y. C., 60s to 60s 3d on the spot and to the end of March; April to June, 59s; October to December, 57s 6d to 58s per cwt.

Particulars of Tallow.—Monday, December 17.

POSTSCRIPT. Friday Evening.

Sugar.—The market experienced little change to-day, but there was rather more inquiry for some kinds. By auction, 196 casks Barbadoes sold from 38s to 43s 6d. 5,670 bags grainy Mauritius were bought in, but about half since sold at 42s to 45s 6d. A floating cargo of Havana, No. 10½, sold for a near port at 26s 6d. The week's business in West India amounts to 950 casks.

Coffee.—A floating cargo of Rio sold, but particulars did not transpire.

Rice.—About 9,000 bags soft grain descriptions sold to-day for immediate cash, chiefly at 10s to 10s 6d.

Pimento.—190 bags, by auction, realised 3d to 3⅛d per lb.

Cochineal.—200 bags sold at full rates: Honduras silvers, 2s 10d to 3s; black, 3s 2d to 3s 3d. Teneriffa silvers, 2s 11d to 3s 1d; black, 3s 1d to 3s 9d per lb.

Tallow was unaltered.

ADDITIONAL NOTICES.

Refined Sugar.—The home market for refined sugar presents no alteration either last or this week as respects prices. The demand is very limited. Unstoved goods move off steadily. Treacle is rather lower. Some sales have been made in Dutch crushed in V O at 33s 3d, and 33s 6d for B & H No. 1, all in barrels f.o.b in Holland, together about 250 tons.

Green Fruit.—A brisk market for all kinds at advanced prices. Some cargoes of oranges from St. Michael, sold by Keeling and Hunt at public auction, went at 5s per box higher. Terceira in character. Nuts of all kinds sell freely. Black Spanish at an advance. Para cleared off, Barcelona improved in value. Lemons without alteration. Chestnuts in demand.

Dry Fruit.—The market has closed for the year, and no business has been transacted for some days. All fruit firmly held.

English Wool.—There is not any improvement in the English wool trade, and present prices are barely supported.

Colonial Wool.—The market remains quite firm.

Flax unaltered.

Hemp.—Market very quiet; not any transactions to report this week.

Cotton.—Sales of cotton wool from Friday, 14th Dec. to Thursday, 20th, inclusive:—4,100 bales Surat, at 4⅜d to 4½d for fair to fully fair Compta; 4½d for middling fair Mangarole; 4¼d to 5⅛d for middling to good fair Oomrawattee; 4¾d to 5⅛d for middling fair to good Dholleras; 5⅛d for good fair Broach; 5⅛d for good fair sawginned; 700 bales Madras, at 4¼d to 4⅜d for fair to fully fair Western; 5¼d for fully fair Tinnivelly. The market opened quietly, but the activity in Liverpool was reciprocated here on Wednesday and yesterday, when about 4,400 bales were sold at an advance on Surat of ⅛d to ¼d per lb on last week's prices, the buying being pretty equally divided between exporters and speculators. Yesterday about 150 bales Surat, all faulty, mostly sea-damaged and repacked, were sold at public sale, at 3¼d to 5⅛d per lb. P.S.—Good demand at full prices. Sales to-day, 500 bales Surat, at 4⅛d to 5⅛d; 400 Tinnivelly, at 5d to 5⅞d per lb.

Silk.—The silk market continues quiet. Some business has been done in the China silk just landed by the Challenger, being of rather better quality than recent imports overland. Bengal silk unaltered.

Tobacco.—The market remains steady at present quotations, but sales have been chiefly of a limited character.

LEATHER AND HIDES.—The leather market, as is usual at this season of the year, has been very inactive during the past week. At Leadenhall, on Tuesday, very little business was done; prices were unaltered. The public sales, this week, have not been large; the 1,670 Buenos Ayres were not sold. Of 10,000 Australian 6,000 were sold at 4¼d to 5d; seconds, 3d to 4d. Cape hides all sold (2,350) at 3¼d to 6d. Of 102,000 East India kips, 66,000 were sold generally at last prices, with a slight declension on the more inferior qualities. By private sale, 798 Buenos Ayres have been sold: heavy at 7⅞d, light at 6¾d. 795 Uruguay at 7¼d for heavy, 6½d for light. 250 Buenos Ayres horse hides at 7s 6d for dry, 11s for salted, 33 lbs; and 6,000 Australian at former rates.

METALS.—There is no change in the state of our market, everything being stagnant. Copper is just maintained in prices nominally, but some underselling of English is reported. Foreign is neglected. Iron keeps depressed, without change in prices of manufactured; but pig is very flat, and lower rates are submitted to. Tin is unchanged, and lead the same. Spelter lower in price, and but few buyers still coming forward. Tin plates unchanged.

TALLOW.—Official market letter issued this evening:—

	s	d
Town tallow	51	0
Fat by ditto	3	2
Yellow Russian	61	6
Melted stuff	43	0
Rough ditto	26	0
Greaves	20	0
Good dregs	7	0

Imports this week 1,156 casks.

PROVISIONS.

Notwithstanding a dull inquiry for bacon, prime sizeable has advanced 2s. The chief ports of Holland being blocked with ice, we have no arrivals to-day. Jersey butters in consequence find a rapid sale at increased rates. Irish butter market steady at same prices as last week.

METROPOLITAN CATTLE MARKET.

MONDAY, Dec. 17.—The number of beasts here to-day being unusually large, the demand for most kinds was by no means active. However, the primest breeds were in fair request at somewhat high currencies. A few very superior Scots, &c., realised 5s 6d per 8 lbs, but the general top figure for beef was 5s 4d per 8 lbs. There was a moderate show of sheep. The best breeds moved off steadily, and in some instances prices had an upward tendency, a few very fine Downs having sold at 6s per 8 lbs, otherwise the mutton trade was inactive, but at full prices. We were fairly supplied with calves. Prime veal was rather dearer, otherwise the trade was rather heavy.

SUPPLIES.

	Dec. 12, 1859.	Dec. 17, 1860.
Beasts	7560	7860
Sheep	24420	19550
Calves	160	210
Pigs	430	515

THURSDAY, Dec. 20.—The number of beasts was large at this market to-day, a good many having been turned out unsold on Monday last, and this, with a limited attendance of buyers, caused the beef trade to rule extremely heavy. Prime qualities, consequently, of which there was above an average supply, were difficult to dispose of at 5s per 8 lbs, being a reduction of 4d per stone on the rates current on Monday. Inferior descriptions found but few buyers, and went at 4s 10d per stone. The mutton trade was brisk, the number of sheep being rather short, and Southdowns sold readily at 5s 8d, and inferior kinds at from 4s, being an advance of 2d per stone from Monday. There was a moderate demand for veal and pork at previous rates. Price per stone of 8 lbs, sinking the offal:—Beef, 4s 10d to 5s; mutton, 4s to 5s 8d; veal, 3s 4d to 4s 10d; pork, 4s to 5s. Head of cattle at market—Beasts, 2,040; calves, 180; sheep, 3,800; pigs, 130.

NEWGATE AND LEADENHALL.

FRIDAYf Dec. 21.—Although the supplies of meat are seasonably large, the trade generally is active, as follows:—

Per 8 lbs by the carcase.

	s	d	s	d		s	d	s	d
Inferior beef	2	8	3	0	Mutton, inferior	3	4	3	10
Middling ditto	3	2	3	6	— middling	4	0	4	6
Prime large	3	8	4	2	— prime	4	8	4	10
Prime small	4	4	4	8	Large pork	4	0	4	6
Veal	4	0	4	10	Small pork	4	8	5	4

HOP MARKET.

BOROUGH, Monday, Dec. 17.—Our market during the past week has exhibited great steadiness. A fair amount of business has been transacted in yearlings, and hops of earlier date, and for these descriptions prices are firm. In 1860's we have scarcely any trade. Mid and East Kent, 6*l*, 14*l*, 18*l*; Weald of Kents, 4*l*, 8*l*, 14*l*; Sussex, 5*l*, 7*l*, 9*l*; Yearlings, 5*l*, 7*l* 7s, 9 10s.

FRIDAY, Dec. 21.—The market is very quiet and will continue so until Christmas is over.

POTATO MARKET.

SOUTHWARK WATERSIDE, Monday, Dec. 17.—During the past week the arrivals, both coastwise and by rail, have been more liberal, and quite equal to the demand; the trade continues dull, and prices have a downward tendency. The following are this day's quotations:—York Regents, 110s to 130s; Lincolnshire ditto, 100s to 120s; Dunbar ditto, 120s to 140s; Perth, Forfar, and Fifeshire ditto, 110s to 120s; Rocks and Reds, 90s to 100s; French whites, 90s to 100s; Belgian ditto, 85s to 90s; Dutch ditto, 80s to 85s per ton.

THURSDAY, Dec. 20.—The arrivals of potatoes, coastwise and by rail, have been more plentiful at this market, and there is a fair supply now on hand. Should the present frosty weather, however, continue, the arrivals will be limited. There is no material improvement in trade, and the present rates are as follows:—York Regents, from 120s to 140s; York Flukes, 140s to 150s; Scottish Regents, 115s to 130s; Cups, 90s to 100s; Dunbar ditto, 150s to 160s; French, 95s to 100s; Belgian, 90s to 95s per ton.

HAY MARKETS.—THURSDAY.

SMITHFIELD.—Fine upland meadow and rye grass hay, 100s to 105s; inferior ditto, 40s to 45s; superior clover, 105s to 110s; inferior ditto, 60s 65s; straw, 30s to 34s per load of 36 trusses.

WHITECHAPEL.—There was a good supply of hay and straw at this market to-day, and trade was very brisk at the following quotations:—Hay, good, from 100s to 105s; ditto, inferior, 50s to 80s; clover, good, 100s to 120s; ditto, inferior, 50s to 90s; straw, 34s to 36s per load.

COAL MARKET.

FRIDAY, Dec. 21.—Wall's-end Hetton 22s 6d—Haswell 22s 6d—Stewart's 22s 6d—South Hetton 22s 6d—Hartlepool 22s—Braddyll's Hetton 21s. 105 ships at market.

LIVERPOOL MARKETS.

WOOL.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, Dec. 21.—We have no material change to report either as regards the demand or prices, and stocks continue very light.

CORN.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, Dec. 21.—Market moderately attended. Good consumptive inquiry for wheat, at an advance of 1d to 2d per cental. Barrel flour fair sale, at Tuesday's rates; French 6d per sack dearer. Indian corn in moderate business, 39s for mixed, and 39s 6d for Galatz. Beans steady, at late rates. Oats and oatmeal fair trade, at late quotations.

METALS.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, Dec. 21.—The market for manufactured iron continues dull, but the prices of the best descriptions of iron remain unaltered. In Scotch pig iron there has been little or no animation during the past week, and with little variation to note in prices. The copper market continues dull. Lead is also in limited demand.

The Gazette.

TUESDAY, Dec. 18.

BANKRUPTS.

F. Young, Basinghall street, woollen warehouseman.
P. Ings, Morestown Ringwood, Hampshire, artificial manure manufacturer.
J. George, Pemberton row, licensed victualler.

SCOTCH BANKRUPTS.

Mrs M. Lyall, glass merchant, Glasgow.
D. Rodgers, lace and muslin merchant, Edinburgh.
A. Cameron, farmer, Haughland, near Elgin.

The total shipments of flax, &c., from St Petersburg in the last three years have been as follows:—

	1860	1859	1858
	tons	tons	tons
Flax	16,145	14,855	15,857
Tow and codilla	2,972	6,425	3,013
Itemp	27,819	28,611	22,942

The returns of course do not extend further than about the close of November in each year. Of the flax forwarded this year from St Petersburg, about 4,000 tons were of a description generally shipped from Riga and other Southern ports.

The Crystal Palace is likely to be the scene of great gaiety this Christmas. The movement for making Monday a general holiday has met with so much success, that it has been determined to commence the usual Christmas festivities on that day instead of on Boxing-day, as before. The centre transept and naves of the Palace will be garlanded and festooned with holly and evergreens, and decorated with shields and flags of various nations, and coloured lanterns; and in the centre of each twenty-four feet girder is hung a banner with an appropriate Christmas inscription. In the great transept, a spacious stage is placed, on which a variety of amusements, by many of the most popular artistes of the day, will be continued from mid-day until dusk, when the shadow pantomime will be displayed on the great screen in front of the stage.

COMMERCIAL TIMES

Weekly Price Current.

☞ the prices in the following list are carefully revised every Friday afternoon, by an eminent house in each department.

EPITOME OF RAILWAY NEWS.

TRAFFIC RETURNS.—The traffic returns of railways in the United Kingdom for the week ending Dec. 8 amounted to 486,790*l*, and for the corresponding week of last year to 466,560*l*, showing an increase of 20,230*l*. The gross receipts of the eight railways having their termini in the metropolis amounted to 198,312*l*, and for the corresponding week of 1859 to 199,888*l*, showing an increase of 1,576*l*.

RAILWAY AND MINING SHARE MARKET.

LONDON.

MONDAY, Dec. 17.—In the railway market, South-Eastern improved nearly 1½ per cent., on the expectation that the abolition of passports for English subjects in France will give a great stimulus to continental travelling, and consequently bring a large accession of traffic to this line. The principal feature in the colonial market was a renewed inquiry for Grand Trunk securities, the stock improving to 25½ to 26, and the ordinary bonds to 53 to 55. In foreign railways, Brazilian shares, Dutch Rhenish, and Lombardo-Venetian were better. Cape, New Brunswick, and Nova Scotia debentures advanced. American securities were flat, especially Illinois Central and New York and Erie shares, both of which showed a decline of 2 dols to 3 dols. Mines were in moderate demand at an occasional improvement. Bank of Egypt were again higher. In miscellaneous descriptions there was a fresh rise in Crystal Palace stock. Madras Irrigation and Peninsular and Oriental Steam also improved.

TUESDAY, Dec. 18.—In the railway market to-day the principal changes were in South-Eastern, which was quoted in the morning as high as 88⅝ to ¾, but relapsed at the close to 88¼ to ⅜, or the same as yesterday. Another important advance took place in Sheffield, chiefly from large purchases on provincial account. Midland, Great Western, and Lancashire and Yorkshire also improved, especially the first. Caledonian, North British, York and North Midland, and London and North-Western, on the other hand, showed a decline. The general business was rather limited, owing to the approach of the holidays. In the colonial market, Grand Trunk securities continued in demand, and the stock improved to 25½ to 26, and the ordinary bonds to 54 to 56. There was less inquiry for the preference bonds, however, and the final price was 80 to 81. Great Western of Canada shares were flat, and East Indian stock less steady, at 101¼ to ⅜. In foreign descriptions, Lombardo-Venetian and Dutch-Rhenish were firmer. American railway securities were dull, but showed no material change. Mines also exhibited rather an unfavourable tendency. In joint stock banks, London Chartered of Australia were flat. In miscellaneous descriptions a further rise took place in Crystal Palace stock, while Madras Irrigation shares relapsed.

WEDNESDAY, Dec. 19.—In the railway market to-day, business was again limited, but in some stocks, especially Midland, West Midland, Sheffield, South-Western, and Eastern Counties, a rather considerable rise took place. London and North-Western and Lancashire and Yorkshire were also a fraction higher. South-Eastern and Great Northern, on the other hand, showed a reduction, and North British and Leeds Northern were likewise flat. There were no fluctuations of importance in the colonial market. Grand Trunk of Canada stock left off at 25½ to ¾, being a little flatter; the ordinary bonds, 54 to 56; and the preference, 80 to 81. Foreign descriptions were steady, at former prices. Another rise of ½ per cent. took place in Cape debentures. In American securites the bonds and shares of the New York Central were firmer. Mines were dull, and in one or two cases exhibited a decline.

THURSDAY, Dec. 20.—The railway market remained intrinsically good, although to-day some depression was caused partly by the fall in the funds and partly by sales to close speculative accounts, preparatory to the holidays. Most of the leading stocks left off ¼ to ¾ per cent. lower, the principal exceptions being South-Eastern and Eastern Counties, which showed no alteration. The general business continued limited. In the colonial market a further decline occurred in Grand Trunk stock, the last price being 52 to 54 the ordinary, and 80 to 81 the preference. Great Western of Canada and Buffalo and Lake Huron receded. Foreign shares closed about the same as yesterday. American railway securities were likewise without material change. Mines were inactive, and occasionally heavy. Bank of Egypt shares again improved. In miscellaneous descriptions a reduction took place in Australian Agricultural, Crystal Palace, and Peninsular and Oriental Steam.

FRIDAY, Dec. 21.—The railway share market to-day was heavy. Business was scanty, but sellers predominated. A decline of ¼ to ½ per cent. took place in most of the principal stocks. Lombardo-Venetian railway shares were dull, at 13-16 to 11-16 dis. Those of the two principal Canadian lines remained heavy. Sambre and Meuse were inquired for.

GLENFIELD STARCH,
we hereby caution all our Customers to be careful, when purchasing, to see that the word GLENFIELD is on each Packet, to copy which is Felony.
WOTHERSPOON and CO., Glasgow and London.

DR DE JONGH'S
(Knight of the Order of Leopold of Belgium)
LIGHT-BROWN COD LIVER OIL
Prescribed by the most Eminent Medical Men as the safest, speediest, and most effectual remedy for CONSUMPTION, CHRONIC BRONCHITIS, ASTHMA, COUGHS, RHEUMATISM, GOUT, GENERAL DEBILITY, DISEASES OF THE SKIN, RICKETS, INFANTILE WASTING, AND ALL SCROFULOUS AFFECTIONS.

Extensive experience, and the recorded testimony of numberless eminent medical practitioners, prove that a half-pint of Dr de Jongh's Oil is far more efficacious than a quart of any other kind. Hence, as it is incomparably the best, so it is likewise unquestionably the cheapest.
Palatableness, speedy efficacy, safety, and economy, unitedly recommend this unrivalled preparation to invalids. NO OTHER OIL CAN POSSIBLY PRODUCE THE SAME BENEFICIAL RESULTS.

Opinion of Sir HENRY MARSH, Bart., M.D., T.C.D., Physician in Ordinary to the Queen, in Ireland; President of the Royal College of Physicians in Ireland, Visiting Physician to Steevens' Hospital; Consulting Physician to the City of Dublin, St Vincent, and Rotunda Hospitals, &c., &c.
"I have frequently prescribed Dr de Jongh's Light Brown Cod Liver Oil. I consider it to be a very pure Oil, not likely to create disgust, and a therapeutic agent of great value.
"Merrion Square, Dublin.
"September 6, 1860."

Sold ONLY IN IMPERIAL Half-Pints, 2s. 6d.; Pints, 4s. 9d.; Quarts, 9s., capsuled, and labelled with DR DE JONGH'S stamp and signature, WITHOUT WHICH NONE CAN POSSIBLY BE GENUINE, by respectable Chemists.

SOLE CONSIGNEES,
ANSAR, HARFORD, and CO., 77, STRAND, London, W.C

CAUTION.—Beware of Proposed Substitutions.

Free for Six Stamps.
ENGLISH, FRENCH, AND AMERICAN MODE of TREATING DISEASE. Proving the fallacy of the former, the non-success of the other, and the unequalled efficacy of the latter, as demonstrated in thousands of cases, whereby the sufferer can easily cure himself privately, safely, and at a trifling cost, without the aid of the Faculty with their mineral poisons. The New Mode has been recently introduced into Great Britain by an eminent practitioner, who has studied in the three kingdoms, and has from each distinguished Titles and Diplomas, including that of the National Academy of Sciences, Paris, who approve the new Self-Cure Discovery, which is sent free to any address on receipt of six stamps by the Doctor's private secretary, Wm. Hill, Esq., M.A., 27 Alfred place, Bedford square, London, W.C.

Preparing for publication, price One Shilling,
THE HEAD AND HEART LEGACY.
Dedicated to the Rising Generation.
Profits devoted to the Mechanics' Institution and the School Charities of Paisley.
PREFACE.
"The author publishes the OUTLINE of a CHEQUERED LIFE, not with a view to fame, name, or gain, but solely to stimulate youth to emulation by showing how an untaught boy rose step by step to the honourable position mentioned in these pages."
Sale, 340 Strand; Simpkin and Marshall, Paternoster row; Darton, Holborn hill; and all booksellers.

FREDERICK DENT,
Chronometer, Watch, and Clock Maker to the Queen and Prince Consort, and maker of the Great Clock for the Houses of Parliament, 61 Strand, and 34 Royal Exchange.

EXTRACTS FROM THE PRESS referring to the new Branch Establishment of E. MOSES and SON, at the corner of Tottenham Court road and Euston road.
"Upon each floor, there are small apartments called the 'trying-on rooms,' affording customers an opportunity of avoiding the guess-work which has hitherto prevailed in ready-made emporiums, and everywhere immense mirrors are placed in which the buyer may satisfy himself with the fit and shape of the garment which he proposes to purchase."—STANDARD, 21st Nov., 1860.
"On the whole, the new establishment of Messrs E. Moses and Son is decidedly the most complete of its class in the Metropolis."—MORNING HERALD, 21st Nov., 1860.
"The whole exterior of the building presents a noble aspect. It combines an appearance of lightness and solidity, grace, and strength."—ILLUSTRATED NEWS OF THE WORLD, Dec. 1st, 1860.
"The interior arrangements are in a corresponding scale of elegance, whilst convenience and comfort have not been lost sight of.....Nothing, in fact, that goes to constitute the completeness of an organised whole can be said to have been omitted."—DAILY NEWS, Dec. 11th, 1860.
"Like skilful legicians, they laid down the solid premises of their dasyllogism in the Minories; they next constructed their middle term in Oxford street; and they have just now brought out their conclusion to Tottenham Court road."—EXPRESS, Dec. 11th, 1860.
E. MOSES and SON,
Merchant Tailors, Woollen Drapers, Hatters, Hosiers, Boot and Shoe Makers, and General Outfitters.

Illustrated Catalogues for 1860, by post for two stamps.—J. W. ALLEN, Manufacturer of Officers' Barrack Furniture and Military Outfitter (see separate catalogue), 18 and 22 Strand London

DINNEFORD'S

PURE FLUID MAGNESIA has been for many years sanctioned by the most eminent of the Medical Profession, as an excellent remedy for acidities, heartburn, headache, gout, and indigestion. As a mild aperient it is admirably adapted for delicate females, particularly during pregnancy; and it prevents the food of infants from turning sour during digestion. Combined with the Acidulated Lemon Syrup, it forms an effervescing aperient draught which is highly agreeable and efficacious.

Prepare by DINNEFORD and CO., Dispensing Chemists (and General Agents for the Improved Horse Hair Gloves and Belts), 172 New Bond street, London, and sold by all respectable Chemists throughout the empire.

KEATING'S COUGH LOZENGES.—Statistics show that 50,000 persons annually fall victims to Pulmonary Disorders, including Consumption, Diseases of the Chest, and the Respiratory Organs. Prevention is at all times better than cure; he, therefore, prepared, during the wet and wintry season, with a supply of KEATING'S COUGH LOZENGES, which possess the virtue of averting, as well as of curing a Cough or Cold; they are good alike for the young or for the aged.

RESTORATION OF VOICE BY KEATING'S COUGH LOZENGES. Glasgow.

SIR,—I have great pleasure in informing you of the great good your excellent COUGH LOZENGES have done me. In December, 1845, I caught a severe cold from riding two or three miles, one very wet night, which settled in my lungs, and quite took away my voice, so that I could not speak above a whisper from that time until December last. I tried all kinds of medicines, but they were of no avail. I was then advised to try your Lozenges, which I did only to please my friends, but before I had finished a 2s 9d tin, my voice, to my great joy, came back as strong as ever.—I am, Sir, yours respectfully, JAMES MARTIN.

THOMAS KEATING, Esq

Prepared and Sold in Boxes, 1s 1½d; and Tins, 2s 9d, 4s 6d, and 10s 6d each, by Thomas Keating, chemist, &c., 76 St Paul's Churchyard, London. Retail by all Druggists, &c.

HOLLOWAY'S OINTMENT AND PILLS.—Safe Surgery.—In all external diseases, whether originating in the body itself, or accidentally produced by violence or casualty, nothing can be more soothing, safe, and healing, than this famous Ointment, which never can be applied without producing beneficial results, and is incapable of doing harm. This cannot be said of the most skilful surgery sometimes human judgment must err. Before resorting to extreme measures, let the patient always try Holloway's remedies, which, assisting nature, banish the knife, render cutting-surgery both inexpedient and unnecessary. The double action of Ointment and Pills is irresistible; before their magic powers all diseases vanish; and limbs previously condemned to amputation have repeatedly, by their means, been mercifully restored.

NO MORE PILLS OR ANY other Physic.—For Constipation, Indigestion (Dyspepsia), Palpitation, Nervous, Bilious, and Liver Complaints, Debility, Dropsy, Epilepsy, Paralysis, Cough, Asthma, Consumption, Bronchitis, Sore Throat, Fevers.

DR BARRY'S delicious Health-restoring REVALENTA ARABICA Food, which, at a few pence per day, saves fifty times its cost in medicine, and cures without purging or any of the uncertainties, annoyances, and ruinous expenses incurred by medicine, cod liver oil, or visits to distant climates.

Certificate No. 36,418.—We find it the safest remedy Andrew Ure, M.D., F.R.S; Dr Harvey; Dr Wosner Dr Shorland; Dr Campbell.

We extract a few out of 56,000 cures:—

Cure No. 1,771.—Lord Stuart de Decies of many years' dyspepsia.——Cure No. 49,832.—"Of fifty years' indescribable agony from dyspepsia, nervousness, asthma, cough, constipation, flatulency, spasms, sickness and vomiting." Maria Joly, of Lynn, Norfolk.——Cure No. 47,121.—Miss Elizabeth Jacobs, of extreme nervousness, indigestion, sufferings, low spirits, and nervous fancies.——Cure No. 54,816.—The Rev. James T. Campbell Syderstone Rectory, near Fakenham, Norfolk, of indigestion and liver complaint.——Cure No. 56,814.—Mr Samuel Laxton, Leicester, of two years' diarrhœa.——Cure No. 180.—Mr W. Reeves, 181 Fleet street, London, of 25 years' nervousness, constipation, indigestion, and debility.——Cure No. 4,028. Eight years' dyspepsia, nervousness, debility, with cramps, spasms, and nausea." Rev. John W. Flavel, Riddington Rectory, Norfolk.——Cure No. 3 908.—"Thirteen years' cough, indigestion, and general debility." James Porter, Atnol street, Perth.——Cure No 58,314.—Miss Elizabeth Yeoman, Gateacre, near Liverpool, of two years' dyspepsia and all the horrors of nervous irritability."——Cure No. 46,270.—Mr James Roberts, timber merchant, of Farnley, Surrey, of 30 years' diseased lungs, spitting of blood, liver derangement, partial deafness.

Similar testimonials from 50,000 patients who can be referred to

The food is sold in canisters, 1lb, 2s 9d; 2 lbs, 4s 6d; 12 lbs, 22s; 24 lbs, 40s. Super-refined quality, 5 lbs. 22s; 10 lbs, 33s. The 10 lb, 12 lb, and 24 lb are sent carriage free, on receipt of post-office order by Barry Du Barry and Co., 77 Regent street, London; Fortnum, Mason, and Co., 182 Piccadilly; also at 60 Gracechurch street, 4 Cheapside, 330 Strand, 63 and 150 Oxford street, London; and all grocers and chemists.

FIRST-CLASS EDUCATION, at the Royal Continental Collegiate Institution, Bushey heath, Herts.—In addition to all its qualities as a first-rate classical (preparatory to Harrow and Eton) and commercial school, it is also highly recommended for a thorough French education, and as preferable to going abroad. Some of the parents who are continually visiting France, and whose sons have scarcely been two years at this school, are most happy to assure those parents who are desirous that their children should acquire a thorough knowledge of the French language, without wishing them to neglect their English and class most education, that their sons speak far better and more grammatically than any of the sons of their friends who have spent two or three years in schools in France merely for the purpose of acquiring that language. No corporal punishment. Terms inclusive, and vary according to age and requirements, from £40, £50, to £60 per annum. Not one case of illness has occurred since the school has been established.—Address, stating age and requirements, Professor Vellère (late of the Harrow Preparatory School), Bushey heath, Herts. The pupils wear a uniform very elegant and becoming, but optional to parents.

DR BUCHAN'S PATENT SUGAR-COATED VEGETABLE PILLS, VEGETABLE SKIN OINTMENT, and CONCENTRATED VEGETABLE ESSENCE, for Purifying the Blood, Regulating the Bowels, and Removing Vitiated Humours, Bilious and Liver Complaints, Rheumatism, Gout, Scorbutic Affections, Costiveness, Skin Eruptions, deep-seated Ulcers, and all Diseases of the Nervous System, from whatever cause, &c., affording at once a new lease of life to the sickly and aged of both sexes, whilst in addition imparting a beautiful and clear complexion, so anxiously sought for by all. Proved by the sworn testimonies made before the Lord Mayor of London, and sitting Magistrates. Sold by Buchan and Co., Patentees, 22 Newman street, Oxford street, London, W., and all chemists in town and country. Prices:—Pills, per box, 1s 1½d, 2s 9d, and 11s; Ointment, per pot, 1s 1½d, and 2s 9d; Essence, per bottle, 11s, or family bottle containing four times that quantity, 33s. Agents:—Barclay, 75 Farringdon street; J. Sanger, 150 Oxford street; Hannay, 63 Oxford street; Butler, 4 Cheapside; Hooper, 43 King William street, London Bridge; R. Howden, 78 Gracechurch street; Prout, 229 Strand, &c., &c.

Just published, gratis, or post free for one stamp, to be had of all agents, and at 22 Newman street, Extracts from Dr Buchan's Work, entitled BUCHAN'S DOMESTIC MEDICINES, being a Book of Reference, containing instructions for the cure of every ailment incidental to man, woman, or child.

A BOON TO NERVOUS SUFFERERS.—Twenty Thousand Copies of a Medical Book for gratuitous circulation. HENRY SMITH, Doctor of Medicine of the Royal University of Jena, &c., who has devoted fifteen years to the study and treatment of Nervous Debility, Loss of Memory, Dimness of Sight, Lassitude, and Indigestion, will send free, for the benefit of Nervous Sufferers, a copy of the New Medical Guide, containing his highly successful mode of treatment, with necessary instructions by which sufferers may obtain a cure Post free on receipt of a stamped directed envelope. Address Dr Henry Smith, 8 Barton crescent, Tavistock square, London, W.C.

RUPTURES.—BY ROYAL LETTERS PATENT

WHITE'S MOC-MAIN LEVER TRUSS is allowed by upwards of 200 Medical Gentlemen to be the most effective invention in the curative treatment of HERNIA. The use of the steel spring, so often hurtful in its effects, is here avoided, a soft bandage being worn round the body while the requisite resisting power is supplied by the MOC-MAIN PAD and PATENT LEVER, fitting with so much ease and closeness that it cannot be detected, and may be worn during sleep. A descriptive circular may be had, and the Truss (which cannot fail to fit) forwarded by post, on the circumference of the body two inches below the hips being sent to the Manufacturer.

Mr WHITE, 228 Piccadilly London.

Price of a single Truss 16s, 21s, 26s 6d and 31s 6d; Postage, 1s. Double ditto, 31s 6d, 42s, and 52s 6d; postage, 1s 8d. Post-office orders to be made payable to John White, Post-office, Piccadilly.

ELASTIC STOCKINGS KNEE CAPS, &c, for VARICOSE VEINS, and all cases of WEAKNESS and SWELLING of the LEGS, SPRAINS, &c. They are porous light of texture, and inexpensive, and are drawn on like an ordinary stocking. Price from 7s 6d to 16s each; postage, 6d

WHITE, Manufacturer, 228 Piccadilly, London

VALUABLE INFORMATION.—GRATUITOUS EDITIONS of the following LECTURES, delivered at the Royal Institute of Anatomy Science, and Medicine, 369 Oxford street London, by W. H. MARSTON, the Principal, are being issued, with plain directions for SELF-TREATMENT and CURE in each of them.

No. I.—NERVOUS DEBILITY (the result of youthful error), loss of memory, shortness of breath, dimness of sight, exhaustion, and general incapacity. Addressed specially to Young Men.

No. II. MARRIAGE: its Obligations and Impediments. Addressed to those who contemplate Marriage, and to the Married who doubt their Children.

No III.—THE BRAHMIN'S ELIXIR OF LIFE: Its History—Secret Remedies of the Hindoo an Fable—Full Particulars of this Extraordinary Specific—Its Amazing Powers as a Renovigorator of the Impaired Functions, and in all Cases of Nervous Debility.

No. IV.—THE DISEASES INFLICTED UPON MANKIND BY THE GREAT SOCIAL EVIL. With a simple means of complete Cure without Mercury.

Each Lecture, now in print and bound, will be sent GRATIS, on receipt of two stamps to repay postage, or the whole four, bound together, with numerous additions, and full directions for SELF-TREATMENT and CURE, 160 pages, 8vo, post free, for Six Stamps. Address, Treasurer, Royal Institute, 369 Oxford street, London.

DEANE'S TWO-HOLE BLACK PENS which are unequalled for their durability and easy action, are adopted by the gentlemen of the Stock Exchange, and the principal bankers, merchants, and public companies of the city of London, besides several of Her Majesty's judges, the most eminent counsel, and the reverend the clergy. Their cheapness and popularity has induced many unprincipled people to put forth imitations of the genuine articles, which are equally useless to the purchaser, and disgraceful to the vender. The public are therefore cautioned, and respectfully requested not to purchase any as DEANE'S GENUINE TWO-HOLE BLACK PENS, unless each pen is stamped

"G. and J. Deane, London Bridge,"

and the box, which contains exactly twelve dozen, has thereon a variously coloured label, inscribed

"G. and J. DEANE'S Two-Hole Black Pens, 46 King William street, London bridge."

DR ROBERT ROWE ON INDIGESTION.

This day is published, price 2s 6d, the fifteenth edition,

NERVOUS DISEASES, Liver and Stomach Complaints, Low Spirits, General Debility, and Diseases of Warm Climates; the Result of Thirty Years' Practice.

By G. ROBERT ROWE, M.D.

"Dr Rowe claims with justice a priority of authorship, while he yields to none in his treatment. The value of this work is enhanced by its practical nature."—LANCET.

"We have no hesitation in placing this work among the first ranks. We entertain a high opinion of its value."—MEDICAL TIMES.

"This is a clever and useful work; contains much that is worthy of attention, and should be read by all martyrs to indigestion and other ills."—TIMES.

Also, by the same Author, 2nd edition, price 4s 6d, On some of the Important Diseases of Females and Children.

London: J. Churchill, and to be had of all booksellers.

A New Edition of

THE PHILOSOPHY OF MARRIAGE. By JOSEPH KAHN,

Graduate in Medicine, Surgery, and Midwifery, in the Royal and Imperial Universities of Vienna, Erlangen, &c., &c.

This popular work (which has been translated into four different languages) has now gone through forty-one Editions of 10 000 each, and is designed to impart accurate knowledge on subjects which involve the means of securing moral and physical happiness.

Price One Shilling, or free by post (in an envelope) for eighteen stamps.

J. Allen, 20 Warwick lane, Paternoster row; or from the Author's address, 17 Harley street, Cavendish square, W.

Just published, 71st thousand, price 1s, post free for 13 stamps. Sold by Mann, 39 Cornhill, or direct from the Author.

DR LA'MERT ON SPERMATORRHŒA; an Original Essay on the Treatment and Cure of NERVOUS and PHYSICAL DEBILITY, resulting from pernicious habits contracted in Youth, excesses in Manhood, or residence in Tropical Climates. With Cases and Engravings from Life, representing the various Organs in Health and Disease.

CONTENTS.

SECTION I.—The Physiology of the Generative Organs.

SECTION II.—Puberty—Manhood—The Morale of Generative Physiology—True and False Morality.

SECTION III.—Marriage in its Moral, and Physical Relations—Happy and Unhappy Unions—How to secure Healthy Offspring

SECTION IV.—Youthful Abuse—The Secret Causes of Nervous Debility, Impotence in Man, and Sterility in Man and Woman.

SECTION V.—Spermatorrhœa, or Chronic Impotence: its History, Causes, and Moral Consequences—The Sterility of Age.

Dr LA'MERT, Honorary Member of the London Hospital Medical Society, Registered Licentiate of the Royal Society of Apothecaries, &c., is the only legally qualified practitioner who, for 20 years, has devoted his attention to the treatment of these disorders, which are so frequently aggravated by the unskilfulness of ignorant empirics, either self-styled physicians or surgeons, sometimes assuming names of eminent medical men, &c. At home for consultation daily, from Ten till Two, and from Six till Eight.

37 Bedford square, London.

TO THE NERVOUS AND DEBILITATED.

Just published, the 125th thousand, with numerous plates, in a sealed envelope, price 1s, sold by all booksellers, or post paid, by the Author, for 12 stamps,

MANHOOD: THE CAUSE AND CURE of PREMATURE DECLINE, with Plain Directions for Perfect Restoration to Health and Vigour. By Dr J. L. CURTIS, 15 Albemarle street, Piccadilly, London.

CONTENTS.

INTRODUCTORY CHAPTER on the Physiological Structure and Functions of the Reproductive Organs.

CHAPTER II.—Causes of Spermatorrhœa and Impotence; Early Vicious Indulgences; Dangers of Neglect.

CHAPTER III.—A Review of the Disqualifications of Marriage; whether resulting from the Youthful Abuse, the Follies of Maturity, the Effects of Climate, or Infection.

CHAPTER IV.—Plan of Treatment, Medical and Moral, with observations on a new and successful mode of detecting Spermatorrhœa and other Urethral discharges by microscopic examination.

CHAPTER V. and VI. on the modern Treatment of Gonorrhœa and Syphilis.

The Book concludes with numerous interesting cases, to which is added the Author's receipt of a preventive Lotion

Mr CURTIS, author of the above Medical Treatise, may be consulted from 10 till 3, and 6 till 8. Sundays from 10 till 1.

Sold by Piper and Co., 23 Paternoster row and Mann, 39 Cornhill, London

HUBBUCK'S PATENT WHITE ZINC PAINT.

By their process, which is patented, Pure White Zinc Paint is cheaper than White Lead. It is the most durable and beautiful paint known, and does not stain or discolour with the London atmosphere.

CHEAPNESS.—Two hundred-weight of this Paint, with six gallons of Oil, covers as much surface as three hundred-weight of White Lead and twelve gallons of Oil. It is cheaper in the first instance, as well as desirable on every consideration.

ADULTERATIONS.—Prejudice is caused by some Paint Grinders selling Zinc Paint adulterated with Sulphate of Barytes, some even to the extent of thirty per cent. Whether this is sold under the name of "Improved Zinc Paint," or is candidly sold as Number Two or Three qualities, no Painter can produce good work with it. He naturally condemns Zinc Paint altogether.

That Painters have never seen the best Zinc Paint is evident, or they would not use any other paint for their best work. To prevent the prejudice which the inferior article must produce, each Cask of Pure White Zinc is stamped

"HUBBUCK, LONDON, PATENT."

THOMAS HUBBUCK and SON, WHITE LEAD, OIL, PAINT and VARNISH WORKS, 24 LIME STREET.

VOLUNTEER PIPE.—

RIFLE BORE.—The most delightful, economical, and permanent medium for the enjoyment of tobacco ever invented. This new pipe only to be had of the patentee. Sample pipe in case sent post free for 28 stamps.—EDWARD PILLINER, 53 Great Queen street, London, W.C.

OVERLAND ROUTE.—

COMMUNICATION by STEAM to INDIA, AUSTRALIA, &c., via Egypt.—The PENINSULAR and ORIENTAL STEAM NAVIGATION COMPANY BOOK PASSENGERS and receive Cargo and Parcels for Gibraltar, Malta, Egypt, Aden, Ceylon, Madras, Calcutta, the Straits, and China, by their steamers leaving Southampton on the 4th and 20th of every month; for Gibraltar, Malta, Egypt, Aden, and Bombay, by those of the 12th and 27th of each month; and for Mauritius, Hanoion, King George's Sound, Melbourne, and Sydney by the steamers leaving Southampton on the 20th of every month.—For further particulars apply at the Company's offices, 122 Leadenhall street, London, E. C., or Oriental place, Southampton.

NOTICE.—The Steamers call at Cork Harbour, on both outward and homeward passages, to land and receive Mails.

BRITISH AND NORTH

TRADE  MARK.

BROWN AND POLSON'S PATENT CORN FLOUR.

The LANCET states,

"This is superior to anything of the kind known."

FIRST OF THE KIND

Manufactured and Patented in the United Kingdom and France, as explained with Engravings in THE ILLUSTRATED LONDON NEWS, of May 26th. Supplied by BROWN and POLSON, to Her Majesty the Queen, by order from Buckingham Palace. It is in great favour wherever it has been made known, for Puddings, Blancmange, &c., preferred to the best arrow root, and especially suited to the delicacy of Children and Invalids.—BROWN and POLSON, Manufacturers and Purveyors to Her Majesty: Paisley, Manchester, Dublin, and London.

JULLIEN FUND.

Committee Room—50 New Bond street.

The Committee of the Jullien Fund, fearing that the subscriptions have been materially checked by the unfortunate death of Mons. Jullien, desire to explain that a widow and others, members of his family, can be protected from want only by the kind aid of those who appreciate the great services rendered by the late lamented maestro to the cause of the musical education of the English people.

The Committee confidently appeal to that benevolence for which their countrymen are so distinguished, for such prompt and liberal additions to the subscription list as shall enable them to do some justice to the memory of M. Jullien, and at the same time afford adequate relief to his bereaved family

COMMITTEE for the DISTRIBUTION of the JULLIEN FUND.

Mr John Mitchel	Mr W. Duncan Davison
Mr W. R. Sams	Mr Jules Benedict
Mr Thomas Chappell	Mr A. Blumenthal

HONORARY TREASURERS

Mr John Mitchell, 33 Old Bond street

CURE OF ASTHMATIC COUGHS

BY DR LOCOCK'S PULMONIC WAFERS.—From Mr Ince Gamis, Medicine Warehouse, opposite Stukey's Bank, Yeovil.—"A lady purchased a 2s 9d box, and observed that she had suffered for years from an asthmatic cough, and spent many pounds on other medicines to no purpose. Weeks after the same lady called again, when she had been completely cured by them, merely one 2s 9d box. Other instances are from time to time occurring, which prove the value of these Wafers above other medicines for pulmonary diseases, coughs, colds, &c.—INCE GAMIS." To singers and public speakers they are invaluable for clearing and strengthening the voice. They have a pleasant taste. Price 1s 1½d, 2s 9d, and 11s per box. Sold by all druggists. Beware of counterfeits.

CANADA LANDED CREDIT COMPANY.

Incorporated by Act of the Parliament of Canada.
Capital, £100,000.

PRESIDENT—Lewis Moffatt, Esq.
VICE-PRESIDENT—W. P. Howland, Esq., M.P.P.

DIRECTORS.

The Hon. G. W. Allan, M.L.C.	Thomas D. Harris, Esq.
R. D. Chatterton, Esq.	Lewis Moffatt, Esq.
The Hon. Malcolm Cameron, M.L.C.	William M'Master, Esq.
Richard L. Denison, Esq.	Samuel Sprculi, Esq
Charles Donaldson, Esq.	Mr Sheriff Smith Collingwood.
W. P. Howland, Esq., M.P.P.	E. W. Thomson, Esq.

BANKERS—Messrs Smith, Payne, and Smiths, London.

The Company are prepared to receive loans against their debentures of £50, £100, and £1,000 sterling, for periods of five, seven, or ten years, bearing interest at 6 per cent. per annum, both principal and interest being made payable in London.

The amount received is invested in and secured by mortgages of freehold land in Canada West, of ample value.

The Company by its charter is always first mortgagee.

The evils, uncertainties, and delays of the old mortgage system are avoided by the lender.

He has no care or anxiety as to the character of the borrower, or the value of the land mortgaged.

The Company assumes all responsibilities and guarantees the payment of interest to the day, viz., 1st January and 1st July.

Investors incur no risk as in a railway or similar undertaking; the Company's profits beforehand being well ascertained and sure.

The half-yearly returns of business done, made to the Government of Canada, prospectuses, and further information, may be had at Messrs Brunton and Son's, Stock Brokers, Auction Mart chambers, Bartholomew lane, London.

CANADA LANDED CREDIT COMPANY.

Notice is hereby given, that the Half-yearly Interest on the Company's Debentures will be paid on and after the 1st January, on presentation of the coupons at the banking house of Messrs Smith, Payne, and Smiths.

BRUNTON and SON.

Auction Mart chambers, December 15, 1860.

TRUSTEES, SOLICITORS, AND

OTHERS desiring to meet with a well-secured Investment for Money, yielding a liberal Rate of Interest, the principal sum being withdrawable on short notice, may do so by communicating with THOMAS H. BAYLIS, 429 Strand, London.

SOYER'S SULTANA SAUCE

Relish, Succulate, Aromatic Mustard, &c.—These excellent preparations, of which the LANCET, in its sanitary analysation of Articles of Food, reported so favourably of their purity and wholesomeness, are to be obtained of all grocers and Italian warehousemen in the United Kingdom. They are indispensable with Fish, Meat, Game, Poultry, Hashes, Stews, and all made dishes, impart also to Chops, Steaks, and Cutlets a most delicious flavour. Wholesale, CROSSE and BLACKWELL, Purveyors to the Queen, 21 Soho square, London.

S. W. SILVER AND CO.,

OUTFITTING WAREHOUSES, 66 and 67 CORNHILL, E.C.

Special Outfits for Australia, India, and China, for Naval and Military Officers, Cadets, Midshipmen, and Civilians. Clothing for Gentlemen's Home Use,—viz., Naval and Military Uniforms and Civilian Dress of the best Materials and Workmanship. Shirts, Hosiery, Gloves, &c. Ladies' Outfits. Furniture for Camp, Barrack, Cabin and Colonial use, embracing every variety of Cabinet Work, Canteens, Trunks, Portmanteaus, &c., portable and suited to all climates.

Manufactory, Silvertown, opposite H.M. Dockyards Woolwich.

ADOPTED LARGELY BY HER MAJESTY'S GOVERNMENT.

CHEAP, LIGHT AND DURABLE ROOFING.

CROGGON'S PATENT ASPHALTE ROOFING FELT has been extensively used and pronounced efficient and particularly applicable for warm climates

1st. It is a non-conductor.

2nd. It is portable, being packed in rolls, and not liable to damage in carriage.

3rd. It effects a saving of half the timber usually required.

4th. It can easily be applied by any unpractised person.

5th. From its lightness, weighing only about 42 lbs to the square of 100 feet, the cost of carriage is small.

INODOROUS FELT, for damp walls and for damp floors, under carpets and floor cloths; also for lining iron houses, to equalise the temperature.

Price ONE PENNY PER SQUARE FOOT.

CROGGON and CO'S PATENT FELTED SHEATHING for Covering Ships' Bottoms, &c., and

DRY HAIR FELT, for Covering Steam Boilers, Pipes, &c., preventing the radiation of Heat, and saving 25 per cent. of Fuel.

Samples, testimonials, and full instruction on application to CROGGON and CO, 2 Dowgate hill, London and at 2 Goree Piazzas, Liverpool.

KEATING'S COD LIVER OIL.

Just Imported. The Pale from Newfoundland, and the Light Brown from Norway. The supplies of the present season have never been surpassed, the fish being unusually fine, and the oil nearly tasteless. Professors Taylor and Thompson, of Guy's and St Thomas's Hospitals, have analysed, and pronounced the PALE NEWFOUNDLAND OIL the best and most desirable for invalids of very delicate constitution. The Light Brown being more economical in price, is brought within the reach of all classes. NO HIGHER PRICE NEED BE PAID than the following:—Light Brown, 1s 8d per pint, or 3s per quart. Pale, 1s 6d half-pints, 2s 6d pints, 4s 6d quarts, or in five-pint bottles, 10s 6d, imperial measure, at 79 St Paul's Churchyard.

THE FRENCH TREATY.

It is not from want of interest in the subject that we have made but little mention of the French Treaty since the French Tariff on our principal exports was published. It was not possible without preparation to deal with a subject involving changes so extensive, upon which various persons in the trades affected by them as yet form different opinions. We hope early in the year to give, in a short series of articles, some estimate of the probable effect, whether commercial or moral, of this most remarkable Treaty.

THE TREATY OF TIEN-TSIN AND THE CONVENTION OF PEKIN.

HOW SHOULD WE USE OUR SUCCESS?

The unexpected and brilliant termination of the Chinese campaign,—a termination which has evidently surprised and delighted those who recommended most eagerly the aggressive policy, quite as much as it has surprised and gratified those of us who anticipated from it endless fresh complications of the situation,—opens the way for English statesmen to turn over a completely new leaf in our Chinese diplomacy. If the opportunity thus held out to us is honestly seized, Lord Elgin's second great Chinese success may, and, we trust, *will*, prove far more final and advantageous to the British Government than the first, which did but inaugurate a new series of calamitous disputes. But it will not do so unless we are fully prepared to expect new evasions on the part of the Chinese so soon as the first impulse of terror caused by the advance of our troops has subsided; unless we are firmly resolved that such evasions shall not lightly tempt us into new threats, and the natural consequences of such threats, new wars.

The *Times* boasts with some truth and much *naif* self-gratulation, "that whilst most of our public speakers and "some of our public writers were wandering in mazes lost, "predicting the most disastrous events and advising the "most absurd courses of action, it was quite possible, by a "moderate acquaintance with the subject, to foresee the "natural course of events and to judge closely of probabi-"lities even in the affairs of China." If this were the case with respect to the minuter points of policy, such as the impression made by the destruction of the Summer Palace, to which, we believe, reference is here made, it is certainly far more true with respect to the broader phenomena of Chinese diplomacy. We have learned something reliable as to the mode in which the Chinese bear defeat and fulfil treaties. If Lord Elgin's brilliant personal successes in China have taught us anything, it is that the Chinese Government yield easily, and retract again at the earliest opportunity concessions which they made reluctantly and in terror; in short, that we can never hope to enforce permanently the provisions of a distasteful treaty, unless we keep always on the spot a force powerful enough to bear down all opposition. Lord Elgin cautious, able, and successful as he is in person, when backed by able commanders, an army, and a fleet, knows better than any of us that his back will not have been turned a year, perhaps not many months on China, before some of the most important articles in the treaty will be either limited by fettering conditions or practically cancelled; and that in future, if we are to keep at peace with the Chinese, we must either undertake to rule them altogether, or acquiesce eventually in the necessity of letting the most disagreeable and onerous provisions of the treaty become practically a dead letter. There is no middle course. Now, while the prestige of our victory is still fresh upon us, we had better at once ponder on the mode in which it may best be used. It will be far more fatal than our worst disaster if it encourage us to insist pertinaciously on the literal fulfilment of those parts of the treaty which prescribe the attitude of the Chinese Government towards us for an indefinite future, under the penalty of reiterated invasions like the last. The indemnity, the apology, and all the concessions which can be at once extorted, may no doubt and ought to be strictly demanded. But our success will bear its fruits only, if, content with the brilliant display we have made of British energy and valour and the immediate concessions to which it has reduced the Chinese Government, we make up our minds to be less punctilious with the Chinese in future, to overlook as far as possible evasions which nothing but a new war could prevent, and take our victory rather as an honourable excuse for overlooking petty annoyances, than as a precedent teaching us how we should resent them. We accept heartily the words—surely very remarkable in that quarter—in which the *Times* concluded its congratulations on the peace, and only hope that all the public organs which helped to precipitate the war may accept them as the practical guide of their counsels whenever—as surely must soon happen, if there be any constancy at all in Chinese diplomatic habits—new occasions of dissatisfaction arise:—"If we act wisely for the future, "the necessity for these expensive periodical expeditions is "at an end. Let us, then, act wisely; let us resolve never "again to rush into a war to resent an imaginary insult, or "to vindicate British etiquette against Chinese etiquette. "Let us make it certain to our Consuls and also to our Pro-"consuls that they are in China to preserve peace and not "to be the cause of war; and let us make it understood by our "merchants that it is their interest to render commerce a "bond of peace,—for that, come what will, we will never "again render it a pretext for war."

These are good resolutions; and they are especially hopeful in the quarter in which they appear, as indications that the folly and danger of the policy we have recently pursued in China is clear even to some of those who have done the most to uphold it. They now see, no doubt, that we canno

half-govern such an Empire as the Chinese; that there, as in Hindostan, the real alternative lies between completely subjecting it to our rule, or meddling with it as little as is consistent with the relations of trading nations. This, we say, is now as clear to those who advocated the march on Pekin, as it would have been if our troops had before them the prospect of being besieged through the severe winter by hordes of Tartars, and having to deal in the spring with a double enemy in the revolutionary Taeping forces and the Imperial army. Everybody is thankful that the peace is come to give us a decent *locus penitentiæ*, an honourable opportunity for a complete change of policy without the discredit of yielding to arrogant or treacherous threats. We are more than content, we are grateful, that so brilliant an opportunity for such a change of policy should be opened to us. But we are anxious that the English public should themselves deliberately avow that they do wish for such a change,—that they are bent upon abolishing the hectoring and interfering policy in China, and do not wish to avail themselves even of the express terms of our treaty for the purpose of providing fresh room for contention and jealousy between us and the Chinese. But if this be, as we hope, our present purpose, it becomes us to calculate beforehand the position of the rocks on which it may be wrecked. As the treaty of Tien-tsin signed in 1858 was the direct cause of war in 1859,—the same treaty as ratified in 1860 with the supplementary provisions now annexed, may be the direct cause of war in 1861 or 1862, if we do not make up our minds to make considerable sacrifices rather than again engage in this endless and aimless policy of temporarily overawing and impressing a nation too obstinate and too vain to retain any impression long, after the immediate alarm is over.

Now the great danger which cannot but be the cause of innumerable future disputes, is the attempt which is to be made under the treaty to establish regular diplomatic relations with the Central Government of China in connection with the opening of the whole Empire to our commerce. This of course really means that our merchants will expect to be permitted to trade without restriction in the interior of China, and that if they meet with either unexpected restraints on their traffic, or unexpected danger to their persons, they will expect our Ambassador at Pekin to take the matter up, to fix the responsibility on the Imperial Government, and demand from it the literal fulfilment of the provisions of the treaty, and indemnity for all breaches of it. Now to what must such expectations necessarily lead? We all know what the Imperial Government of China is,—that it has neither the will nor the power to carry out, to the limits of its loosely compacted Empire, the provisions on which the British merchants rely. We know that it will not try to carry them out longer than the present impulses of fear last. We know that if it had the will, it would not have the power. If, then, our diplomatic establishment at Pekin is to be used for the purpose of carrying out the treaty efficiently, it will become even more odious to the Chinese Government than was the proposal to establish it; it will become the centre of endless disputes and the origin of new wars. We must dismiss the idea entirely that this Pekin embassy, for which we have incurred so much expense and loss, is to be a real working machine, like a similar embassy to a European State. It cannot be so, unless we are prepared to enforce all its demands by new expeditions. Least of all can it be, as was originally proposed, the efficient means by which the nominal opening of the whole Chinese Empire to English commerce shall be made into a reality.

Now, in the moment of our success, let us open our eyes frankly to the real condition of our relations with China. We cannot, and must not, expect to establish with China such relations as we could establish with a European Government. The interior commerce of China can only be rendered safe and accessible to our countrymen by local governments really predisposed everywhere in our favour. Such local governments have all their own special classes of prejudices and corruptions, which are little, if at all, under the control of the Central Government, and, so far as they are under its control, are seldom diminished by any influence by it exerted. These obstacles may be made the subjects of interminable conflicts, but they can only be removed by our governing the Chinese ourselves. For that we are certainly not prepared. We can do little more, permanently, than keep the authorities of the principal seaports to good faith and honourable dealing, if we can do so much. Diplomacy can do less than nothing for us. Backed by expeditions, it may be all-powerful; without them, it will be simply a great source of irritation. Let us, then, make up our minds at once, that if we are to have peace, we must not think of wringing out of the Chinese the literal fulfilment of the permanent provisions of the Treaty,—and that, though we have got our Ambassador, and got nominal freedom of commerce throughout the Empire, we are not going to keep up a permanent pressure in order to make them working realities.

After compelling a full performance of the immediate terms, the best thing we can do with regard to the permanent conditions of the Treaty, is to use them so far as we peacefully can, but lay it down once for all, that we are *not* going to insist on them at the cost of a new war. Let it be well understood that commerce with the interior must be carried on at the individual risk of our merchants; and that the sooner our nominal Ambassador at Pekin disembarrasses himself of those ideas of duty usually connected with his post in a European country, and ceases to raise questions which only a force in China could settle, the better it will be for himself and for England.

THE MANAGEMENT OF THE STATE BANK.

It may startle some of our readers to hear that we have in England a State Bank. It would generally be thought and said that the English Government had no function of that kind, and did not pretend to have any such. Yet, though the expression may be new, the fact which it expresses is familiar. We have, under the name of Savings Bank deposits, large sums of money, belonging to individuals, intrusted to the Government, but repayable when the owners please. If this is not a State Bank, at least it is something like it. The operations are on a great scale. The Committee of 1858 give the following table of the operations since 1841:—

A Statement of the Sums received from and paid to the Trustees of Savings Banks by the Commissioners for the Reduction of the National Debt, and the Excess of Sums received or paid, from 20 November, 1841, to 20 November, 1857, inclusive.

	Received from Trustees.	Paid to Trustees.	Excess. Received.	Excess. Paid.
	£	£	£	£
1841	1,053,194	934,960	118,234	...
1842	1,045,267	1,080,532	...	35,265
1843	1,591,753	712,468	879,285	...
1844	1,988,875	637,216	1,351,659	...
1845	1,503,931	1,151,140	352,791	...
1846	1,211,050	1,290,258	...	79,208
1847	632,124	3,209,033	...	2,576,909
1848	465,139	3,349,958	...	2,884,819
1849	843,296	1,255,062	...	411,766
1850	936,057	1,396,404	...	460,347
1851	1,108,370	725,863	382,507	...
1852	1,106,980	617,393	489,587	...
1853	1,346,437	786,192	560,245	...
1854	747,185	1,410,390	...	663,205
1855	659,053	1,234,123	...	575,070
1856	897,303	1,282,784	...	385,481
1857	741,053	1,717,529	...	976,476
	17,877,067	22,791,305	4,134,308	9,048,546

and the general debt we have thus incurred is more than thirty-eight millions.

Whether it was wise in the English Government to assume for itself this great liability, may perhaps be doubtful. It was unquestionably assumed with the best motives. The sole design was to improve the condition of the working classes, and to give them a secure place in which to deposit their savings. And this object it has certainly in some measure accomplished. But it is at least a question whether private enterprise would not have effected the same result as well, though it might not have achieved it as soon. If the State Savings Bank had not existed, it is probable that trustworthy associations of well-known individuals would have been formed in each locality for the purpose of receiving at interest the money of the humbler classes. In some of these there might have been frauds and failures, but, on the whole, the general success and solvency of the rest of our banking system justifies us in saying that the money of the poor would have been well kept, just as the money of the rich, who are not always in money matters wiser than the poor, has been well kept. And private

associations would have at least had this advantage, that they would have been known to be such, and such only. At present the poor man does not in one case out of ten thousand know whom he is trusting. He fancies when he leaves his money with the local trustee or the local clerk, that from that moment the Government is intrusted with that money and is responsible for it. But the real fact is not so. There is an interval. The Government is only responsible for the sum of money which it actually receives—for what is really paid to the Commissioners of the National Debt in London. If the local authorities, as has often happened, do not pay over the money to the Government, but abscond with it, the poor have no remedy. There is always, it has been shown, more than a quarter of a million in this irregular and ambiguous position. We think it a very disputable question whether the real security of the poor might not by this time have been equally perfect, if the Government had never intervened in the matter at all; and it would certainly have been more intelligible.

We admit, however, that this question is now a speculative one. The English Government has chosen to assume this huge liability—this *liability of millions*—and it must make the best of it,' and the principles on which it shall do so are worthy of careful consideration. The public are used to see a new Savings Bank Bill proposed every year: for the most part they do not really understand the nature of the problem with which such Bills more or less propose to deal.

The question to be first answered is,—What is the duty of the State with reference to this money? One party, and a strong party, contend that the State is to be a banker for the purposes of loss, but not for the purposes of profit. This is not, indeed, their language, but it is their meaning. They say the Chancellor of the Exchequer has no right to 'play 'with this money. It was intrusted to him to keep safe, 'and for no other purpose. He ought not to use it to aid 'him in financial exigencies. It is the money of others, and 'it is scarcely honest to appropriate it.' It is evident, however, that in practice this reasoning would impose on the Government a large liability, and not allow it to derive any incidental benefit from it. And *why* should it not obtain any legitimate advantage from the custody of these vast sums? It is idle to say that they belong to the depositors, for such an argument would apply equally to the deposits with an ordinary banker. The banker uses them for his own benefit; thereby he lives, and no one blames him. All he promises is to pay his debts when he is called upon. The State does no more. It promises to repay the money of the State depositors on demand, and if it does so, it performs its contract. Whatever incidental benefit or temporary advantage it may derive from the use of the money, is only its fair reward—the fair compensation for the risk it runs.

Lord Monteagle has well explained a case in which the Chancellor of the Exchequer did make use of the funds of the Savings Banks to great advantage:—"I give "the Committee, as an example (and there are others), that "which was done by my late noble and respected friend "Lord Althorp in a case in which he accomplished a great "financial operation in which the public were largely in-"terested—I allude to the reduction of the interest of the "Four per Cents. in the year 1834. Lord Althorp could "not have accomplished that object except by having funds "at his disposal by which he could meet with punctuality "the demands of the dissentients, or of those parties who "would not accept the terms he proposed for reducing the "interest of that debt. The Committee will observe here, "that the object was one in which the public at large had a "great interest, namely, the reduction of the debt. That "and similar operations have been the great causes of our "effecting a saving in the charge of the debt, through the "means of our public credit, independent of any real, and "still more of any fictitious sinking fund investments. "What did Lord Althorp do? On the 9th of June, 1834, "Lord Althorp, by realising and laying by funds out of the "Savings Banks, had money enough provided when the Act "of Parliament was passed for reducing the interest of the "Four per Cents. to enable him to pay off the dissentients, "whoever and whatever they might be. That was the best "arrangement which could have been made for all parties. "The amount taken was nothing that endangered the "real security of any depositors in the Savings Banks. "This fund was employed for an important public ob-"ject. The public wanted this fund; how else could "you have got it? If your income had been close "run, and you had no surplus, or no adequate surplus, "you would have had to go through the formality of entering "into a loan, the amount of which might be, perhaps, in itself "above what you wanted to meet those depositors, the number "of, or the extent of whose claims you were not acquainted "with. But the Savings Banks in a time like that became, "as it were, a credit which you had at your bankers, to be "used to the amount that you yourself required. Lord "Althorp stated to Parliament the whole of the case, and "there was a Parliamentary authority obtained for the ope-"ration. There was no concealment; it was not the mere "*arbitrium* of the Finance Minister, but it was the Finance "Minister acting with a fund which he could employ without "danger to the parties primarily entitled to it. In explain-"ing the operation to the House of Commons, he stated that "he was fully prepared to redeem such portions of the Four "per Cents. as the holders might dissent from, according to "the proposal he had made. A greater number of dissen-"tients than he had anticipated came in, amounting to 469 "persons, and representing the sum of 4,600,000*l*. The "House of Commons thereon resolved that the dissentients "should be paid off out of such monies, stock, or Exchequer "bills, as might be deposited in the names of the Commis-"sioners of the National Debt, or monies which might be "invested on account of the Savings Banks. There was "thus a resolution of the House of Commons passed; there "was no concealment; it was done by just and legitimate "authority. I should be sorry indeed to see the Finance "Minister prohibited from meeting similar cases by similar "means."

We are aware that the power of the Chancellor of the Exchequer to make such use of the funds of Savings Banks is by no means popular on the Stock Exchange. It is regarded as a kind of jugglery: no definite objection perhaps is made to it in words, but expressive looks are exchanged, and an obvious dislike is unmistakably shown.

We will not undertake to say that the whole of this dislike could be removed; but we believe that a great part of it might be so. At present there is, perhaps, a small element of good reason for it. The Chancellor of the Exchequer is "an unknown quantity" in the money market. It is never known what funds he has in hand; what investments he has made; what investments he is going to make. In consequence the popular impression of the extent of his powers and of the magnitude of his operations is far greater than the reality. There is five times as much conversation about the operations of the Savings Bank as there need to be, or as there should be.

It would be easy to devise a plan by which the mystery might be removed. Let a *weekly account* be published of the sums received by the Commissioners of the National Debt and of the investments they have made. The public would then have the means of knowing what had been done, would be able to watch the management, would be able to conjecture what would be done. The nation would then be able to derive, upon occasion, some financial advantages to compensate for its vast liabilities, and yet the dealers in public securities would be relieved from the constant dread of the possible operations of an unknown agent whose face now haunts them.

We are anxious not to be mistaken. We do not advocate what has been called an independent management of these deposits. The Commissioners of the National Debt are, in fact, for this purpose a synonyme for the Chancellor of the Exchequer, and such we believe they should remain. The Executive Government has undertaken these vast liabilities, and it should control them. Experience shows that an officer of rank in Parliament, and responsible to Parliament, is the best depository of all important powers under our parliamentary constitution. If, moreover, the nation is to use the money, when wanted, to help its other financial operations, the responsible authority over this money should be the responsible authority over the national finance—should be the Chancellor of the Exchequer. We only say that the Chancellor of the Exchequer should tell us from week to week what he is doing, and then, if he knows his business, few people would find fault with him.

THE *INEVITABLE* EMBARRASSMENTS OF ENGLAND.

It would be difficult for any combination of circumstances to exemplify more strikingly or to impress more forcibly upon the mind the extension, the ramification, and the complication of the interests of England, than that which surrounds us at the present moment. It is a consideration which may well make us proud, but which assuredly ought to make us anxious also. If there is much that is exciting in the spectacle, there is at least as much that is sobering; and as much, too, that should suggest warning of the most grave and peremptory sort. As far as Europe is concerned, we are in a state of profound peace; we are in amity with all our neighbours; even as regards the stirring drama now evolving in Italy we are mere spectators, though interested and influential ones; and we have no reason to fear that our most powerful and closest ally, though his restless temperament and tortuous ways keep us in hot water and put us to great expense, is really otherwise than amicably and peaceably inclined. We have rarely been so free from "pending questions" or diplomatic discussions with civilised Powers:—our chronic "misunderstandings" with America, even, are now reduced to the insignificant and almost forgotten one of the St Juan. Now, therefore, if ever, we ought, it should seem, to be resting on our oars and sleeping in our beds,—taking our repose, pushing our trade, recruiting our finances, concentrating all our attention on domestic politics and internal reforms.

Instead of this, we have seldom been so occupied with foreign questions; we are spending frightfully; we feel as if we had our hands and our minds full; we are anxiously watching the horizon:—in fact, we are on the look-out for squalls. We have one war on hand and one barely ended—both of them as near the antipodes as possible. We are fighting the Maories, and we have just been fighting the Chinese. We are troubled with some misgivings as to the justice of both conflicts; we deeply regret that they should have been forced upon us; and we may have many qualms as to the issue;—not that we doubt for a moment the ultimate victory of our arms in New Zealand any more than in China, but that we dread and deprecate the possible issue in which either victory may land us. In New Zealand we may have to suppress, if not in the end to exterminate one of the few promising and energetic aboriginal races of the earth. In China we had a month since a few troops encamped in the heart of a vast Empire, which might have needed reinforcements, or which might have needed to be avenged. We had allies there, whom it is a shade less embarrassing and unsatisfactory to fight with, than to fight against. We even now have to return with a parchment full of promises and a chest full of plunder, having taken vengeance for a past reverse, but having positively secured but little for the future. Or we may have to return in order to complete and perpetuate our work; we may find it necessary to take possession of some fraction or island of the Chinese territory, whereon to establish a standing force, sufficient to keep the Celestial barbarians permanently in awe;—sufficient also, alas, to drain our resources both of men and money for indefinite years to come.

Then we have another Empire in the East, half as large as that of China, with embarrassed finances and a disaffected population; where our rule is no doubt beneficent and with which our commerce is enormous; but which occupies half our regular army, which occasionally hampers our money market by its unseasonable loans, and perpetually decimates our residents by its unhealthy climate. India is a magnificent dependency, beyond all question; but for years, perhaps generations, to come, it must be a source of trouble, of anxiety, and most probably of peril also. It is an especially vulnerable point of our dominions, and a difficult and costly one as well.

Coming westward we find rocks ahead in the form of Syrian disturbances, in the arrangement of which our naval and diplomatic service, though not our army, are employed. At present, to a superficial glance, the troubles seem quieted, and the case not immediately serious; but statesmen who take in the whole bearings of the matter estimate the embarrassments which are brewing for us in that quarter very differently. There is a population composed of many subjects and of few masters,—divided and made hostile by those fanatical religious dissensions which are more sanguinary and more incurable than any others,—and the more depressed portion of whom we are, in a manner, bound to protect, because it is mainly our doing that their depression has continued feasible. We see there an Empire hopelessly rotten, an administration ingrainedly corrupt, a government inherently weak and unimprovable, whom we, in the pursuance of a generous impulse and (under the circumstances) perhaps a wise and a necessary policy, kept upon its feet and sustained in the hope of its possible recovery, or, at least, of its prolonged duration;—and we are now beginning to see that our efforts have been vain and our hopes chimerical, and that the final dissolution of the Ottoman Power, which we wasted so much life and treasure to avert, is once more imminent; and is bringing in its train all its insoluble problems and all its complicated issues. We have, lastly, the more immediate uneasiness arising from the sojourn of the French troops in Syria, which under the pressure of the Christian massacres we could not well discourage or forbid, but to which we consented with manifold misgivings, and the prolongation of which cannot but be a source of much uneasiness and probably of forthcoming diplomatic difficulties.

Still proceeding westward, we cannot be quite without anxiety lest the possible outbreak of war between Austria and the new Italian Kingdom in the spring should involve us more actively and decidedly than we could wish. But putting this aside as a mere contingency which it is reasonable to hope may be averted, and crossing the Atlantic we see already in full fermentation elements of perplexity and complication which may well alarm us. If the United States, as some among them menace and some dread, should split up into two or three distinct confederations, our relations with them may perhaps not in the end be more troublesome and vexatious than they have often been before, but they will require to be reconstructed on a somewhat different footing; and the first steps at reconstruction will be very thorny and not wholly free from danger. The Southern States, arguing from the fact that England is their chief customer, conceive that she will be their readiest and most cordial ally. But they forget two considerations, with respect to which we shall have to give them, perhaps painful, and certainly unwelcome, reminders. The North is our market as we are the market of the South; and we shall be as little disposed to offend the one as the other:—our connection with the two is almost equally close and equally essential, and assuredly we shall keep aloof from their strife, however it may end. Then the first step of the seceding South will apparently be to reopen the African Slave Trade, and the second to seize on Cuba:—and the one would certainly bring them into immediate, and the second probably into ultimate, collision with the British nation. The Northern States, too, when once separated, and cleansed from the temptations and the stain of Slavery, might endeavour to compensate for loss in one direction by annexation in another. They have already cast a longing glance at Canada, and given forth audible mutterings of illegitimate desires;—and though assuredly we should not go to war to prevent the *voluntary* absorption of British North America with the Federal Republic, yet as certainly we should resist by force and to the death any attempt to put in action the filibustering tricks which were tried against Cuba, Mexico, and Nicaragua.

Now, of all these political *imbroglios* actual and prospective, which menace us in every quarter of the globe, it cannot be alleged that we are wittingly and of our own free will responsible for a single one. We may have brought some of them upon ourselves by former follies or by ancestral sins, but as far as regards *proximate* and immediate causes we may (with perhaps the single exception of the Chinese difficulty) pronounce ourselves wholly innocent. We have not voluntarily sought or incurred the peril or the perplexity. They are the nearly inevitable consequences of a position perhaps the most powerful, and of commerce and dominion certainly the most extended, in the world. We have ships in every sea; we have settlements on every shore; we have interests in every country; we have connections and obligations with every nation. Nothing can happen anywhere without affecting us: few things can happen anywhere without entailing upon us the inescapable duty of action or remonstrance, of some nature and in some shape. We cannot help

ourselves if we would: we cannot become secure by becoming selfish; we cannot purchase inaction and repose except by becoming feeble and small. We must, therefore, accept our lot in these respects; but we must accept it with our eyes open and with manly resolution—not, as some would have us do, with affected amazement and disgust on every fresh occasion. We must be careful, most especially, not needlessly to multiply or aggravate its complications. We must set ourselves to work above all—(and this is the warning we were anxious to give, but which we have left ourselves no space at present to enforce)—earnestly to reflect and clearly and firmly to determine on what *principles* we will fashion our future policy, so as to apply it with steady consistency and unhesitating promptitude to each special case as it arises;—so as to know how we intend to deal with the advanced nations of Europe and America, with the semi-civilised Empires of the East, and with the barbarous tribes of Australasia,—with France and Austria, with Turkey and China, with New Zealand and with Labuan.

THE BOARD OF TRADE RETURNS FOR NOVEMBER.

The Returns of our exports and imports for the eleven months ending 30th November last, which we print as usual in our monthly Supplement, present no very remarkable or new features. The declared value of the exports of British and Irish produce for the month of November in the last three years and of the eleven months ending 30th November is as follows:—

November.		
1858.	1859.	1860.
£	£	£
9,976,436	10,856,001	10,757,749
Eleven Months ended November 30.		
1858.	1859.	1860.
£	£	£
106,555,562	119,613,185	123,714,276

so that the month's exports of home produce are nearly the same as those of the same month in last year,—while on the the eleven months we have an increase of 4,101,091*l*, or about 3½ per cent.

There is no appearance of any general increase in the exports to the United States to compensate the largely increased imports of American corn. On the contrary, the export trade to the United States is either entirely stationary, or rather on the decline. The imports of corn from all quarters and of course from the United States are very large. In the month of October alone we imported to the value of 1,300,000*l* from the United States in wheat, wheatmeal, and flour, more than we had imported in the same month of the previous year,—and the importation even for November is large. But no part of this largely increased import from the States seems likely to be paid for this year by an increased consumption of British and Irish produce. Probably the balance will be settled in great measure by the Californian gold, which, instead of coming to England, will be sent to the United States. That this process has been, indeed, going on for the last three months, ever since it was known that our harvests here would be deficient, the monthly imports of gold and silver bullion from the United States sufficiently show:—

Computed Real Value of Imports of Gold and Silver Bullion from the United States.

	1858.	1859.	1860.
	£	£	£
September	289,970 ...	1,104,957 ...	584,712
October	488,250 ...	926,299 ...	107,872
November	200,274 ...	791,937 ...	94,419
Total of three months ...	978,494 ...	2,823,193 ...	787,003

showing a progressive decline in the importation of the precious metals from this quarter,—and, in the three months, even a falling off as compared with the year 1858. This indicates no doubt the method in which a good portion of our increased debt to the United States will in all probability be paid.

In the value of the exports to France there seems to be some slight tendency to increase, which may probably develop itself further hereafter. It shows itself at present principally in the export of hardware and cutlery, and of some of the metals, iron and lead in the pig. The following shows the consumption of the more important articles of food as compared with the same month in last year:—

	Taken for Home Consumption. Month ending November 30.

THE MOVEMENT ON BEHALF OF DESTITUTE INCURABLES.

In our issue of Nov. 17 we explained the hardships to which paupers who are afflicted with incurable diseases are at present subjected in the common workhouses of this country, in the absence of hospitals devoted to the purpose of alleviating the diseases for which there is no cure;—and we detailed the simple and admirable scheme by which it has been proposed to provide for their relief, without any fresh claims on the poor rates. We have now the satisfaction of stating that there is every reason to hope for considerable success; since an appeal which has been sent by the members of the Workhouse Visiting Society (one of the most valuable branches of the Social Science Association) to all the Boards of Guardians in England, requesting them to permit the appropriation of a special ward for the incurable among the denizens of the workhouse, to be fitted up with every comfort by the *voluntary* charity of the neighbourhood, has already received the full consideration and unanimous assent of the Plymouth Board of Guardians. Thus sanctioned, it will no doubt quickly receive fresh adherents; and we may shortly have the satisfaction of seeing the lot of this most unfortunate class of paupers ameliorated by all the comforts which voluntary charity can bestow, without any infraction of the wholesome severity of our ordinary Poor Law Regulations. We subjoin the appeal of the members of the Workhouse Visiting Society, warmly recommending it to the careful consideration of the different Boards of Guardians in this country:—

To the Chairman and Gentlemen of the Board of Guardians.

Office of the National Association for the Promotion of Social Science, 3 Waterloo place, S.W.

Gentlemen,—Permit us respectfully to call your attention to the peculiar condition of the persons in workhouses suffering from *incurable disease*; and to solicit your favourable consideration of a proposal we desire to make on their behalf.

It appears from the Registrar-General's reports that there die every year in England of dropsy, cancer, and consumption 80,000 persons. Of these, 40,000 at least belong to the working classes, and must need an asylum under such visitations. The 270 hospitals we maintain for curable patients reject all such cases, and the one hospital for incurables at Putney receives only 127 patients. Thus between 30,000 and 40,000 persons are annually compelled to seek shelter during the last months of their lives in the workhouse. The Poor Laws, however, being properly designed to discourage pauperism, and the regulations of workhouses being framed principally to meet the case of the idle and improvident pauper, it is obvious that such abodes are necessarily ill-adapted to the needs of those unfortunate sufferers, whose present extreme anguish and, often, whose former industry and respectability, give them the highest claims on the compassion of their fellow-creatures. The hard beds, untrained nurses, and general absence of minor hospital comforts of refreshing drinks, comfortable seats, cushions, &c., which usually characterise the infirm wards of a workhouse, deprive these patients of many alleviations which their sufferings might receive. Even the usual kindness of workhouse surgeons and the liberality of many Boards of Guardians are unable wholly to remedy these defects which inhere in the unfortunate circumstances themselves, whereby persons who are not properly *paupers*, but *patients*, are driven into asylums designed for paupers only. The case is even more exceptional than that of the insane, and appears equally to deserve that exceptional rules be made to meet it.

Permit us respectfully to suggest that some remedy should be sought for an evil of such great magnitude, since it involves the needless aggravation of the dying sufferings of some 30,000 persons annually. We cannot hope that it will be removed by the opening of hospitals for incurables adequate to the demand, since this would require a revenue of 900,000*l* per annum. Neither does it seem altogether just to the ratepayers that they should be compelled to provide for the inmates of workhouses the comforts of hospitals supported by free charity. We, therefore, venture to hope that the following plan may approve itself to you from its simplicity and economy, and from the fact that, while relieving the sufferings of the incurables, it will involve no additional charge whatever on the rates:—

Let all persons in the workhouses suffering from acute and distressing disease, such as dropsy, consumption, cancer, &c., be placed by themselves in wards apart, to be called the wards for male and female sick and incurables. In these particular wards let private charity be admitted to introduce whatever may alleviate the condition of the inmates.

On the passing of such rules by any Board of Guardians, it would follow that the members of the Workhouse Visiting Society would raise and employ the moderate subscriptions needful to convert these wards into suitable and comfortable hospitals for incurables. Under the sanction and with the co-operation of the surgeon, and in concert with the other officials, they would provide good beds, for the bedridden; easy chairs, both for those who cannot lie down and for those who ought for some hours each day to leave their beds; the salaries of trained nurses, if required; and such other trifles as lemonade, extra tea, books, &c., as may seem desirable.

It is submitted that this little plan possesses the following recommendations:—

While relieving much suffering, at small cost, it involves no injustice to the ratepayers, as it does not call on them for any extra expense whatever.

It cannot encourage pauperism, seeing that no person will incur mortal disease to profit by it; and if it be suspected that any patient could be supported by his friends, it would remain in the power of the Board, as at present, to deny him admission after examination by the relieving officer.

In conclusion, as it is undoubtedly in the power of each local Board of Guardians to frame, for the regulation of its own workhouse, such bye-laws as are above respectfully suggested, we beg to urge your favourable consideration of them. Should you be willing to accede to the plan, we hereby offer the services of our Society in carrying it into execution in raising and applying the needful subscriptions. In unions where no lady visitors of the Society at present reside, it will no doubt be possible for the chaplain or guardians to find other ladies willing to carry out the plan with the sanction and approval of the Board.—We are, Gentlemen, respectfully yours,

THE MEMBERS OF THE WORKHOUSE VISITING SOCIETY.
(Signed) LOUISA TWINING, Hon. Sec.

Agriculture.

A CHAPTER ON STRAW.

AT this season of the year straw performs very important offices in the economy of a farm. On arable farms, especially in the light land districts of the West and South of England, straw is commonly superabundant. Forbidden to sell straw, and unable or unaccustomed to turn it to good account for feeding purposes, the farmers of those districts not unfrequently let it lie about and rot uselessly in heaps, or tread it down in yards by means of a few store beasts fed on straw only, a process which gives profit neither from the beasts nor the manure. It is true that where the barley or oats contain clover, store stock will thrive wonderfully at "straw-yard;" but that is rather exceptional, and most farmers use all the best of such straw for their cart horses. On the other hand, we have some agricultural chemists and amateur farmers who are eloquent on the large proportion of nutritive matter they believe they find in straw, and would have us use all the straw of the farm as fodder, and keep our stock on boards without litter. This is perhaps a more unprofitable extreme than the old practice of treading down straw in the farm-yard. It is to be noted, however, that comparatively few farmers now keep any cattle in straw-yard without giving them a few roots, and that the practice of the chalk districts of the West of England, of spreading straw in the sheep-folds, is now admitted not to be a bad method of utilising straw. Thus Mr Spooner, in his paper on "The Use and Economy of Straw," published in the Journal of the Bath and West of England Agricultural Society, says,—"On light sandy or chalky soils the *direct* application of straw has been known to exercise a beneficial effect; this is probably owing to the deficiency, in such soils, of silicates and alkalies, and likewise to their power when the straw is partially rotten of fixing the ammonia from the atmosphere, since during the progress of decay various organic acids, such as humic acid, almic acid, geic acid, &c., are formed, and all these acids have a strong affinity for ammonia.....Perhaps the best mode of applying straw as a manure for light lands is to spread it thinly over the soil, and allow the sheep to run over it and eat as much as they will. By thus folding the sheep on it the straw is trodden down and its decomposition is much assisted; it also furnishes for the sheep a drier bed, which in itself is of no small value." Of course farm-yard manure used in this way would be of more value.

In a paper by Mr Evershed, on "The Proper Office of Straw on a Farm," he strongly objects to the plan of treading down straw in open yards as a miscalculation, while he partly considers litter to be one of the most important uses of straw, "a warm, soft bed being quite indispensable for the comfort of all the larger animals." Of the feeding on boards plan, he says:—"Some, as an experiment for saving straw, put twelve three-year-old oxen on boards to fatten, and found it a very cruel experiment. The animals were always in a state of distress; one of them refused to lie down, and remained standing for four days, until the muscles of the thigh swelled from the unnatural tension. A comfortable layer of straw soon set all right again." And he adds:—"A wish to save straw occasionally leads to a sparing use of it in the yards, always resulting, however, in the immediate discomfort of every head of stock. In fact the best of food and unremitting attention will not compensate for the want of a comfortable bed." Indeed it may be laid down as an axiom in stock farming, that to succeed with stock—whether breeding or feeding—the animals must be kept well littered. This constitutes a limit to the numbers of stock which can be kept through the winter on farms where the proportion of arable land is small. Stock will thrive in open yards if well sheltered and plenty of straw is used, but then straw must be used wastefully, the manure being inferior and the amount of cartage greater. Covered yards and cattle boxes furnish the best means of economising the use of straw, and contribute at the same time most effectually to the comfort and well-being of the stock. Mr Evershed estimates that about 20 lbs of straw per head of stock is used in covered yards and boxes, while more than twice that quantity, or 48 lbs, must be used for cattle in an open yard. It is found that 20 lbs of straw a day used to litter an ox feeding in a box will produce at the end of six months 8 tons of manure; 6 tons 8 cwts are derived from the ox, and 1 ton 12 cwts from the straw. Shelter of some kind for the stock is, therefore, necessary on every farm, both for the sake of making the stock profitable and for economising the use of the straw.

Without troubling the reader with details of analyses, we may state that barley and oat straw, apart from the clover fodder they often have gathered with them, contain more nutriment than wheat straw; that bean straw is more nutritious still, but, containing some bitter flavour, cattle will eat it best in the coldest weather; and that pea straw is the best of all, being greedily eaten by both sheep and cattle. Indeed it is commonly reserved for the breeding ewes. It is also well ascertained that where all the crops are cut as unripe as possible, the value of the straw for feeding purposes is greatly enhanced. Now straw cut into chaff can be given with meal or roots, but Mr Evershed says he has found cattle do better with straw and roots than on straw and meal, even where the quantity of roots did not exceed ½ cwt per head per day, as with straw and meal only cattle become hide-bound. If straw is given not cut in racks and roots whole, cattle do very well, though they sometimes choke from the smaller roots sticking in the throat. But the neater and, upon the whole, the better plan is to cut the straw into chaff. This may be effected by horse-driven machinery at about 6s per ton. If steam power is used on the farm, the chaff may be cut somewhat cheaper. It is found that chaff cut when the straw is fresh thrashed and stored away in a dry place, is as fresh and useful for cattle as if newly cut, but it is essential that it should be kept quite dry, as otherwise the stock will not eat it with relish.

With regard to the question as to the benefit of steaming straw chaff for cattle, Mr Evershed agrees with those who consider that, though rendered more palatable, the animals do not yield any increase of weight for the extra cost of steaming. Pulped roots mixed with chaff and allowed to ferment for twenty-four hours form a mixture fully as palatable and beneficial as steamed chaff. He finds his fatting cattle will eat from 10 lbs to 14 lbs of straw daily thus prepared and mixed with their cake or corn, while his cows eat 18 lbs of straw chaff daily. The cows, too, will eat ground rape cake when mixed with the fermented chaff and roots, which they would not touch when given in any other way.

The editor of the Royal Agricultural Society's Journal appends to Mr Evershed's paper a letter from Mr Samuel Jonas explaining his method of preparing chaff for his cattle. When he thrashes his corn with steam power, a powerful chaff-cutter is attached to the thrashing machine, the whole being driven by a 9-horse-power steam engine. A small quantity of green fodder is mixed with the straw. This when cut into chaff is sifted and carried to an empty barn or chaff house, and well trodden down, about one bushel of salt being mixed with each ton of chaff. The chaff thus prepared through the summer, is used in the autumn and winter for feeding cattle. Mr Jonas says,—"None but those who have tried this plan of old chaff so managed, as compared with

fresh cut chaff, can believe the advantage in value of the old chaff for feeding stock. I can work off the produce of about 9 acres of good strong wheat per day, the chaff being cut shorter and better than by hand box. The cost is about 1d per fan—*i.e.*, 5 bushels, weighing 28 lbs. The rapidly extending use of chaff-cutters of every size and description sufficiently proves the benefits farmers find they derive from the use of cut food. We believe that it is by the combined use of straw chaff and pulped roots with moderate quantities of oil cake or corn, that the present and future demands for meat are to be met. The saving of both roots and artificial food—the cake or the corn—is the most important element in estimating the value of straw for feeding purposes. In this way fully one-half of the straw of all kinds grown on an arable farm may be used for feeding, the other part being required for litter.

SCIENTIFIC FARMING.

So much has been said and written about science applied to husbandry which is of little real value, that although modern farmers are desirous of availing themselves of all the aids well-applied science can afford them, a sort of reaction has of late taken place in the agricultural mind on the subject. Some twenty years ago a great impetus was given by Liebig and others to chemical studies as bearing on the culture of land, and it is beyond question that much good has been done, but the tendency amongst chemists to overstate and exaggerate the practical benefits derived from their researches have of late rather abated the confidence of our best farmers in recommendations. One effect has been to render accessible and familiar to farmers the general knowledge of the principles of agricultural chemistry, the habits and food of plants, and the operation of manures, upon which they may really found a more comprehensive study of such subjects as will probably not be without use to them in noting the successes and failures on their farms. Under the title of "Scientific Farming made Easy," Mr Thos. C. Fletcher, an agricultural and analytical chemist, has collected a very useful and interesting series of passages from the best agricultural works of the day under two divisions—1, The Soil and its Fertilisers; and 2, Cattle Feeding. These have been substantiated and tested by the writer's own experience and that of his friends, spread over many years, and the result is a very compact manual of the science of agriculture, which farmers, young and old, will not read without deriving many instructive hints. His chapter on waste manures is well worth notice. The part in which he has collected evidence as to the advantage of pulping roots is especially useful this year, when everything tending to economise roots is of great practical importance to farmers. He refers to Lord Kinnaird's experiment, in which he found that pulped turnips and straw chaff given fresh did not produce so much increase of weight in cattle as whole turnips and straw, while pulped turnips and chaff fermented produced the greatest weight of all; while the following year, when the experiment was repeated, the unfermented pulped roots and chaff gave the largest return. This is a subject which requires further consideration. It is certain that pulping saves roots. Another moot point in husbandry is whether cattle thrive more on cooked food than raw; and another is as to the value of salt in feeding cattle. There is an appendix on advertised cattle foods which may be read to advantage.

Literature.

COMMERCIAL LITERATURE.

STATISTICAL PAPERS BASED ON THE CENSUS OF ENGLAND AND WALES, 1851; AND RELATING TO THE OCCUPATIONS OF THE PEOPLE. Saville and Edwards, Chandos street.

THIS is a most useful work, compiled with a view of enabling those who have not time to pore over the pages of a Census to grasp the principal results it contains, especially with regard to the occupations of the people.

Hitherto statistics of this kind have been most imperfect, which is admitted by the Census Commissioners themselves; but they consider what has been done may lay the foundation, when the next Census is taken, of a complete knowledge of the organisation of the labour of Great Britain. We consider that Mr Welton's work will greatly tend to facilitate these ends. He divides his work into sections, and these sections into classes, the aggregates of which are as follows:—

Table I. exhibits the employments of the population distributed according to the foregoing classification, with the numbers employed; and an abstract is attached showing the aggregate numbers belonging to each class. From this abstract the larger features of our national occupation may be obtained.

Classes 1 to 5, or those employed in productive industry, include 6,897,770 persons. Classes 6 to 8, or those otherwise employed, include 1,353,218 persons.

Besides these, there are "unclassified" 9,676,621 persons, chiefly women and children. The numbers included in the 8 classes are thus composed:—

Males aged 20 and upwards	4,300,140
Females aged 20 and upwards	2,984,089
Males under 20 years of age	1,103,948
Females under 20 years of age	762,811

The aggregates of the classes are as follows:—

Class 1, employed in	Agriculture, &c.		2,039,402
Class 2,	—	Mining, &c.	297,184
Class 3,	—	Manufactures	1,458,699
Class 4,	—	Trades, &c.	2,499,880
Class 5,	—	Commerce and Conveyance	602,605
Class 6,	Menial Employments		1,006,452
Class 7,	Professional		172,855
Class 8,	Governmental		173,911

This work of Mr Welton's might serve as a text book by which the Commissioners for the Census of 1861 would be guided in the production of a system of classification of an improved character compared with those hitherto used.

THE UNITED KINGDOM MUTUAL ANNUITY SOCIETY AND BENEVOLENT ANNUITY FUND. Effingham Wilson, Royal Exchange.

THIS is a very painful narrative by Mr H. S. Selfe. The charges are most serious which are brought against the Directors of the Company, who it appears "stand upon their legal rights," consequently Mr Selfe cites them at "the bar of public opinion." The accounts of the Society were referred by the Directors to Messrs Harding and Pullein, highly respectable accountants, and we subjoin the balance sheet, as the figures are far more eloquent than words:—

THE UNITED KINGDOM BENEVOLENT ANNUITY FUND, from 16th Dec., 1851, to 31st July, 1860.

Dr.	£	s	d
To sundry donations and subscriptions	3,479	2	2
	3,479	2	2

Cr.	£	s	d
By amount paid to the United Kingdom Mutual Annuity Society as the purchase money of 18 annuities of £10 each, granted by the Annuity Society to sundry persons elected to the same at meetings of subscribers to the benevolent fund	1,612	1	10
By amount paid to the Anglo-Australian and Universal Family Life Assurance Company, as the purchase money for 11 annuities of £10 each, for sundry persons elected to the same at meetings of the benevolent fund	1,156	2	9
By amount transferred to the debit of the United Kingdom Mutual Annuity Society against the general expenses of both societies included in the account of the Annuity Society, it being impossible to apportion such expenses correctly	710	17	7
	3,479	2	2

This is certainly not what we should call a satisfactory state of affairs, especially to the annuitants, for, so far as we can understand the accounts, and unfortunately they seem but too plain, the cash of the Company consists of 13*l* 13s 2d at the London and County Bank, and 2s at Messrs Barnett and Co.'s, and on the other side of the account the amount due for printing is 12*l* 6s 7d. The question is, who is liable to the annuitants? The answer we presume is the United Kingdom Mutual Annuity Society. Then comes the question, where is the United Kingdom Mutual Annuity Society? Alas! it is nowhere.

GENERAL LITERATURE.

ANTIQUARIAN, ETHNOLOGICAL, AND OTHER RESEARCHES IN NEW GRANADA, EQUADOR, PERU, AND CHILE, with Observations on the Pre-Incarial, Incarial, and other Monuments of Peruvian Nations. By WILLIAM BOLLAERT, F.R.G.S., Corresponding Member of the University of Chile, &c., &c. With Plates. London: Trübner and Co., Paternoster row. 1860.

THIS work is a compilation from various writers on the ethnology and antiquities of South America. The author cites many interesting details from Domenech, Rivero, and Tschudi, and other authors whose works are accessible here, but he also gives us translations from several writers who have not come before an English public, and who have much that is curious to communicate. The largest portion of the book, however, is devoted to Mr Bollaert's own observations and researches, which are well worth publication. Unfortunately, the book is pervaded by a fault which the reader is never able to lose sight of,—viz., that the author is utterly incompetent to grasp his subject as a whole, and lets all his materials hang loose of each other, like grains of sand. He has not even sufficient acquaintance with our language to write tolerable English, and his deficiencies in grammar and syntax sometimes go to the length of seriously obscuring his meaning. Nevertheless, the book is worth the trouble of wading through, for those readers who take a real interest in the subject. Although Mr Bollaert is without the literary ability to write an attractive book, he seems to be a zealous and careful observer, and can tell what he has seen in a straightforward way. His volume may, therefore, be useful as a quarry of facts for future compilers. Of some of those facts we will endeavour to give our readers an idea.

The book is divided into five sections: New Granada; Equador or Quito; Peru and Bolivia; Chile; and Pre-Incarial, Incarial, and other Monuments of Peruvian Nations. In each of the four first sections the author presents all the facts he can gather con-

cerning the physical characteristics, the language, the history, the religion, and the monuments of the inhabitants, ancient and modern. He gives several vocabularies, and various hieroglyphic signs, of religious import; and of two nations (the Muiscas of New Granada, and the Peruvians) he narrates some very curious particulars respecting their calendars, which differ from each other and from the Mexican calendar, though all have features in common. The calendar of the Muiscas is complicated in the extreme. These people, otherwise called the Chibchas, have a quaint version of the deluge, apparently suggested by a real and sudden change which occurred at some remote period in the course of their rivers. Mr Bollaert thus translates the story from the Spanish "Compendio" of Colonel Acosta (Paris, 1848):—

It is said that Chibchacum, angry at the excesses of the inhabitants of Bogotà, resolved to punish them. He caused the waters of the Sapò and Tibitò (principal affluents of the Funza, which formerly ran towards other regions, but were transformed into a lake) to deluge the country. The Chibchas fled to the mountains, and implored Bochics, who appeared at sunset on a rainbow; he convoked the nation, promised to remedy their ills, by not damming up their rivers, so that their lands might be properly watered. Then, throwing the rod of gold he had in his hands, he opened a breach at Tequendama; the waters fell down the precipice, discovering to them the plain, and more fertile than before. Bochica did not limit his power to this act, and to chastise Chibchacum for having thus afflicted man, he obliged him to bear the burthen of [the] earth, which was previously supported by pillars of guyacan wood. Unfortunately, this measure has brought with it its inconvenience, for since then, at times, there are severe earthquakes, which the Indians say are caused by Chibchacum, [who,] tired of being in one position, shifts the weight of [the] earth from one shoulder, and, according to the care with which he does this hoisting, so is the intensity of the earthquake. (P. 13.)

The following details on the monuments of New Granada show how little we know, and how much there is to be known of the early history of this province:—

The following, on the antiquities of New Grenada, is from the "Bulletin de la Societé de Geographie," Paris, 1847. The researches were made by Senor Velez de Barrientes. Velez was informed that there existed in the Canton of Leiva, in Tunja, ruins of a temple and palace of the ancient Indians. He went in search of them in June, 1846. He got to Moniquirà (about 6 degs. N., 73 degs. 45 min. W.), and first fell in with stone columns, one 4 to 5 yards in length, by 3½ in diameter. He then found 13 large columns, arranged in a circle of 50 yards in circumference, appearing to him as if designed for a temple or palace.....Four hundred yards from the 13 columns he found the main ruins, composed of cylindrical columns, some 29 in number, well finished, fixed in the earth, and occupying 45 yards in length E. and W., by 22 broad.

The columns were 1⅓ yards in circumference; their original length cannot be determined, as they are so worn, the highest not being more than one yard above the ground, [while] others are hardly visible. These are, by their lightness and elegance, a great contrast with the 13 columns before mentioned; some of these looked as if they had been worked on their sides.....The ground on which these ruins stand may be about two miles in extent, and had been the site of a city.....

Velez's opinion is, that this country was anciently inhabited by a more civilised people than those found by the Spaniards. As a proof, in the district of San Augustin, in the elevated parts of Nieva, 3 degs. 15 min. N., are found monuments, such as the great stone table, said to be of sacrifice, supported by cariatides, statues of large dimensions, and numberless other objects, artistically wrought. At the conquest the Spaniards only found hereabouts the Pijados, Pantagosos, and other tribes, who, although brave, were barbarous. We cannot attribute to these the construction of the works now in ruins, such are of more ancient and civilised times.

Another proof of ancient origin, and that this part of the country was well populated [is the following], in Antioquia, in the Canton of Santa Rosa, Velez's parents had occasion to dig: it was through granitic debris, and, at eight yards' depth, a thick bed of well-preserved trees was met with, particularly the oaks, and like the forest above. Under this bed of trees, buried by inundations, was discovered an ancient weapon, the macana, of palm wood, two yards long, one end like a lance, the other a narrow blade like a sword, with curious carvings: this was given to a Dr Jervis, who sent it to England.....

The museum of Bogotà has lost the rare pentagonal calendar stone investigated by Humboldt. Since then was found in the ravine of San Diego, near Bogotà, another calendar, now in the possession of Velez: it is small, long, squared, and of basalt, with similar signs to those described by Humboldt. Velez mentions that his collection contains five such pentagonal stones, idols, collars, and other ornaments in hard stone and gold, mummy cloth, printed in colours and rich in design, probably from Leiva. (Pp. 35-38.)

But of course the royal Incas are the chief objects of interest to European students of South American antiquities. Mr Bollaert gives a brief abridgment of their history from Montesinos, who visited Peru 100 years after the conquest. That he had access to genuine data appears highly probable from the kind of events he narrates; but of his accuracy in detail Mr Bollaert seems to have great doubts. Passing on, therefore, to the records of stone that never tell aught but the truth, we would direct attention to the chapter on the Pre-Incarial and Incarial Monuments, as the most interesting in the book. That the Incas were neither the first nor the only civilisers of South America, appears to be established beyond a doubt, and the wonderful ruins of Tia-Huanacu, Pachacamac, and other cities, are equal to anything we know of in the relics of Central America. But still more interesting are some of the legends concerning the great deity Pachacamac (whose name signified the creator of the world, from Pacha, the earth, and camac, participle of camani, I create), to whom the grandest of Peruvian temples was dedicated, and from whom the city in which it was built took its name.

As there is some confusion in regard to the history of the Peruvian deities, I will here offer a few remarks thereon:—Con is first heard of as the Supreme power, the invisible and omnipotent spirit in Quito, under the Scyris, and in Peru, long before the times of the Incas. Con was a spirit without bones or flesh; he made the world, and, flying rapidly from North to South in America, caused the mountains and valleys to appear; he then formed man, giving him every species of food and pleasure. Man offended Con, and was chastised by having the previous abundance of food taken from him; the land became a desert, and the human race was changed into ugly cats and other black animals.

Pacha-Camac is generally looked upon as the son of Con; he had pity for the degraded position of the human race, took the government of the world into his hands, and created all things anew, including that of the present form of man and woman.

We then find that temples were raised to this new power, one particularly on the coast of Peru, south of Lima, called after him Pachacamac.....It would appear that many nations, even from distant parts of Peru, came to this temple, making rich offerings; their sacrifices on the altar and adoration were simple and pure, to this great deity. They entered the sacred place barefooted; in invoking his name, they prostrated themselves to the earth. There was no image to represent this deity, as he was considered to be there in spirit only.....

It must be admitted that the worship of Con and Pachacamac was widely extended long before the Incarial times, and it was only under the 9th Inca that the country of the Curys-mancus, whose capital was at Pachacamac, was conquered by the Incas of Cuzco, and the intrusive religion of the sun was in danger from the older and purer one of Pachacamac; however, after much negotiation, it was arranged that Pachacamac should retain his temple, and that another should be built there to the sun, as the father of the 1st Inca and Pachacamac. After a time the Incarial priests erected a statue of wood to represent the formerly-invisible Pachacamac, and invented oracles. Faith in the immortality of the soul was one of the fundamental ideas among all the Peruvian nations: and first Con, then Pachacamac, and lastly, the Sun, were the judges of the human race. Supay, the evil spirit, is found early among this people, and in some places children were sacrificed to it. (Pp. 219-20.)

One more anecdote we must give, relating to the piles of stones which the traveller finds on the mountain tracts of the Andes:—

The Mercurio Peruano for 1794 says, that these piles of stones were adored as deities, they are found in all the mountain roads, and appear to have had their origin among the early Indians; for when they ascended a mountain, or passed over a dangerous track laden, they put the load down, and, as a sign of gratitude, offered the first thing they got hold of (which was generally a stone) to Pachacamac, saying "Apachecta," which means, "To him who has given me strength." (Pp. 163-4.)

Whirlwinds and Dust-storms of India. Illustrated by numerous Diagrams and Sketches from Nature. By P. F. H. Baddeley, Surgeon Bengal Army. Bell and Daldy.

Respect is due to any person who, like Mr Baddeley, carefully and faithfully describes instructive natural facts which come under his notice. Even in this age of progress, too, many branches of knowledge, meteorology especially, are so little advanced that obvious every-day phenomena are open and almost new questions.

The phenomena described and figured in this work are of two kinds—whirlwinds and dust-storms, of which the former are the most curious, and were thus observed by Mr Baddeley when encamped in 1850 and 1851 on the extensive plain of Meanmeer, near Lahore.

I erected before the door of my tent a wind-vane and an electrical conductor, and watched the passage of the dust whirlwinds as they swept by; and when the sun's rays were not too overpowering, I followed them on foot, or on horseback, or in a buggy, at the risk of being accounted mad (for who could see a man chasing the dust, and looking up towards the sky when nothing appeared to be there, without some such conclusion), note-book and pencil in hand, noting and sketching as I went along.

These whirlwinds appear as columns of dust from a foot or less to many feet in diameter, rising in a vertical or inclined direction to a great height in the air. They occur *only during the day*, and most perfectly in calm hot weather during the dry months of April, May, and June. They move over the plains in a straight or tortuous path, and at any rate up to 25 or 30 miles per hour,—sometimes almost standing still. When passing close they convulse the wind-vane, and give strong symptoms of atmospheric electricity, but they cause no harm. Numerous kites and other birds are usually seen hovering round them at all heights.

More closely observed, a whirlwind is seen to have a spiral structure, and about the lower part singular incurving streams of dust, like comets' tails, are seen flowing in. The larger whirlwinds, of 40 or 50 feet in diameter, often consist of a circle of smaller spirals.

Valuable and trustworthy as we think Mr Baddeley's notes and descriptions, chiefly contained in Part III. of the work, to be,—nothing more wild and futile than the theory he founds upon them has come under our notice. He *imagines* that certain magnetic spiral bodies, like immense corkscrews, exist in the upper regions of the air, always ready to descend and disturb the calm of the lower regions. We should characterise this style of speculation more severely did we not know that electrical theories are a general weakness of amateur meteorologists, and seem as indispensable to them as poetical license to a bad poet. The same tendency to theorise concerning unexplained facts leads to the belief of the moon's influence on the weather, which, although never proved, and often most emphatically disproved by scientific men (see

Lardner's "Museum of Science"), yet enthrals the public belief almost universally.

So far from being caused by electricity, this agent is entirely incapable of producing any such dynamical effects as whirlwinds, and is, as Faraday actually informed Mr Baddeley, itself *an effect and not a cause*. Whirlwinds are a beautiful instance of those movements of air, a careful and profound study of which will some day elucidate the winds, clouds, storms, and the dynamical condition of the atmosphere generally, now so obscurely understood. It is plain that such knowledge has a direct bearing on the safety and speed of navigation.

Mr Baddeley also carefully records various curious facts concerning the formation of hail, the eccentric movement of stars, showers of falling stars, the zodiacal light, &c., which are worthy of notice by students of such matters.

THE LITERARY AND SCIENTIFIC REGISTER AND ALMANACK FOR 1861. Dedicated by special Permission to, and under the immediate Patronage of, His Royal Highness the Prince Consort. By J. W. G. GUTCH, M.R.C.S.L. W. Kent and Co.

THE fact of this almanack having reached its twentieth year is a sufficient proof of its general usefulness. It contains a vast amount of miscellaneous information put in a succinct and intelligible form, and has half a dozen blank pages between each leaf of the almanack to afford space for memoranda. The price is three and sixpence, and the binding and general "get up" plain and useful.

A KEY TO HUNTER'S INTRODUCTION TO THE WRITING OF PRECIS OR DIGESTS; Giving the Required Abridgments of all the Exercises in that Treatise. By the Rev. JOHN HUNTER, M.A., Formerly Vice-Principal of the National Society's Training College at Battersea.

A SCHOOL MANUAL OF LETTER-WRITING. By the Rev. JOHN HUNTER, M.A. Longman, Green, Longman, and Roberts.

THOSE who have already made use of Mr Hunter's introduction to the art of writing digests will find this newly-published key a great convenience and help in correcting or confirming the results of their own endeavours. To be able to analyse written language thoroughly, and to express one's meaning with correctness, clearness, and brevity, are great advantages to all,—and an absolutely necessary part of the education of those for whom this manual and key are written, viz., candidates for the civil service examinations. To such we should conceive that they will prove eminently serviceable.

The art of letter-writing, in so far as it relates to familiar correspondence, is better untaught. The study of our standard writers in this line—of Cowper, Pope, Gray, and others more modern—will do more to form the style of a pupil than any number of set exercises from which nature and life are wanting. For purely business letters, on the other hand, or those of a formal complimentary character, some such assistance is most useful. It could not be found in a clearer or better form than in Mr Hunter's little volume.

A MANUAL OF ILLUMINATION ON PAPER AND VELLUM. By J. W. BRADLEY, B.A. And an Appendix by T. GOODWIN, B.A.; with Twelve Lithographic Illustrations. Winsor and Newton.

THIS is the second edition of a very carefully compiled and practical little treatise on the art of illumination. It does not profess to enter into the history of the art,—for which the author refers the student to Mr Digby Wyatt's works,—but it gives the result of considerable experience, and contains much practical advice that would be invaluable to the beginner, and many hints that would be useful to those more advanced in the elegant art of illumination. The illustrations are not coloured, but they are very delicately drawn, and sufficiently numerous to be of great use in elucidating the text.

PARADISE AND THE PERI. THOMAS MOORE. Day and Son.

THIS elegant volume is unquestionably one of the handsomest and most elaborate of the Christmas books that have come under our notice. The illustrations are fine specimens of chromolithography, and are the joint productions of Mr Henry Warren and Mr Owen Jones,—the former artist having undertaken the figures, and the latter the ornamental part of the illumination. The figures are not quite satisfactory; they are simply drawn, with little more than outlines, and some of the attitudes are given with considerable spirit; but owing either to a want of grace in the drawing, or to the inevitable thickness and heaviness of the lines in stone engraving, the figures are in some cases clumsy, and in all the expression is devoid of delicacy. They are on grounds of colour or gold, surrounded by rich illuminated borders, and nothing can be more successful than this portion of the work. The patterns are very elegant, and there is a combination of boldness and richness in the colouring which nothing but the most correct and cultivated taste could have handled with so unimpeachable a result.

THE ILLUSTRATED PAPER MODEL MAKER. Containing Twelve Engravings of the Subjects, and Descriptive Letterpress, with Practical Diagrams for their Construction. By E. LANDELLS, Author of the "Boy's Own Toymaker," &c.

THOSE who have found amusement in following out the ingenious contrivances of Mr Landell's paper amusements, will find in this fresh volume a more advanced series of the same subjects. It strikes us that there may be some difficulty in coming up to the proposed diagrams,—their smoothness and completeness is suspicious; but probably a steady course of study under the author's instructions would enable the student to make something creditable to his patience and skill.

THE NURSERY PLAYMATE. Illustrated with more than Two Hundred Engravings. Sampson Low, Son, and Co., 47 Ludgate hill.

AMONG the more juvenile gift books of the season, none, we think, will be more popular in the nursery than this pretty collection of old rhymes and favourite tales. Its gay cover will be its first recommendation, and a nearer acquaintance will confirm the favourable impression. The selection is well made, though we might object to the mutilation of some old favourites in order to fit them to the size of the volume, in which we must own they otherwise make a creditable appearance. The illustrations are numerous and remarkably good for a work of the kind.

Foreign Correspondence.

(FROM OUR CORRESPONDENT.)

PARIS, Thursday.

The affair of M. Mirès mentioned in my last has come to nothing. The Emperor expressed the wish, in other words issued the command, that no legal investigation into the complaint against that gentleman for alleged irregularities in connection with the Roman railways and the Caisse Générale des Chemins de Fer should be instituted, and of course His Majesty was obeyed. Some people denounce this meddling as an unwarrantable interference with the administration of justice; and others think that it is to be regretted for the sake of M. Mirès himself, inasmuch as it has deprived him of the opportunity of demonstrating,—what of course he could have done—that all his transactions will stand the test of the strictest scrutiny. The affair has given rise to a great deal of scandalous gossip, in which the names of some high personages have been mentioned unfavourably.

It is this day that the subscription to M. Mirès Turkish loan is advertised to close. Should he announce that he has obtained the entire sum he wanted, great surprise would be felt.

The negotiations which are being carried on at the Ministry for Foreign Affairs for a new treaty of commerce between France and Belgium are stated to be advancing as satisfactorily and as rapidly as could be wished. The principal negotiators are nominally M. Thouvenel, the French Minister of Foreign Affairs, and M. Rogier, the Belgian Ambassador; but in reality they are M. Rouher, Minister of Commerce, and M. Liedts, who is a high dignitary of State in Belgium of great repute in commercial matters.

The Bank of France advertises that the dividend of the second half of the present year is to be 72f per share, payable from the 2d January next. The first half-year's dividend was 68f. The total is consequently 140f (5*l* 12s). In 1859, it was 115f; 1858, 114f; 1857, 343f; 1856, 272f; 1855, 200; 1854, 191f.

A report from the Minister of Finance to the Emperor on the financial situation is expected very shortly, the usage being to bring one out about this time of the year. It will probably settle the question whether or not a loan is to be raised.

It is rumoured that the Government seriously contemplates abolishing the tax which was imposed some time back on railway shares and other securities negotiated at the Bourse. Although not large, this impost is an obstacle to the ready disposal of such *valeurs*.

The speculators of the Bourse flattered themselves that the payment levied for admission to that establishment would be abolished at the beginning of the new year; but to-day, to their grievous vexation, a notification has appeared that it is to be maintained. By keeping away a number of persons who would be willing to go to the Bourse *gratis*, and when there would be tempted to speculate, this tax evidently diminishes business; but it is not true, as some people affirm, that it is the sole cause of the stagnation which for some time has prevailed.

The Bourse since last Thursday has been greatly depressed, and

to-day there has been rather a heavy fall, caused partly by the maintenance of the charge for admission, partly by bad news callged to have been received from America. The quotations are as follow:—

	Thursday, Dec. 20.	Thursday, Dec. 27.
	f c	f c

An Imperial decree abolishes the prohibition to export bark for tanning from Algeria.

A journal of Beaune (centre of an important wine-producing country) states that the English Government is disposed to consent to a modification of the system of levying the import duties on French wines imposed by the treaty of commerce. Against that system which divides wines into categories, according to the proportion of alcohol they contain, there is a general protest in the wine districts.

The Sous-Comptoir des Metaux, which was established after the revolution of February 1848, for the purpose of discounting bills for persons engaged in the trade in iron and other metals, on deposit of goods, has just been authorised by Imperial decree to exchange its name to "Sous-Comptoir du Commerce et de l'Industrie," to raise its nominal capital to 20,000,000f, and to extend its operations so as to procure to private persons or companies, by direct engagement or indorsement, the discount of their bills at discount banks or other establishments, in return for securities or goods deposited. It has believed that thus modified the Comptoir will be able to render important services to the metal trades, and to others as well.

A considerable number of persons engaged in the export trade have just formed in this city an association under the name of Chambre du Commerce de l'Exportation for, among other things, conciliating differences which may arise among themselves, so as to prevent recourse to law; obtaining advice and information on the commercial jurisprudence of foreign countries; recording changes made in the Customs laws and regulations of such countries; forming a commercial library and collecting foreign commercial journals; bringing before the Government the cases of injury to French commerce or traders occurring abroad, &c. The association is likely to be useful, and it may be considered a proof that the French intend to take advantage of the recent commercial changes to push their trade abroad as much as they can.

A petition bearing a great many signatures has been sent to the Minister of Commerce from Marseilles, praying that lead from Spain and other countries may be imported into France on the same terms as English lead under the treaty of commerce. At present English lead in pigs, bars, or plates, pays 3f the 100 kilogs, and in 1864 is to be free; Spanish and other leads pay 6f. The petitioners consequently complain that whilst the manufacturers and all other persons who use lead in the North of France will on account of their proximity to England be able to get their supplies at 3f duty, they on account of the distance will continue to have to obtain their lead from Spain and to pay 6f for it; and this they say is unfair. They complain, moreover, that by the difference of the tariffs the English can buy up Spanish lead and send it into France *via* England, whereby the French will be deprived of a branch of trade with Spain of a certain degree of importance. They affirm, too, that if their prayer be not granted, the numerous establishments at Marseilles in which lead ore is treated, or articles in lead are made, will be grievously injured. In the course of the petition it is stated that the consumption of lead in France is increasing in a very marked manner; it was in 1853 14,000 to 15,000 tons, but in 1859 was 26,000. The statement is also made that the import of ore into France and the export of manufactured articles in lead give merchant shipping a freight of about 40,000 tons annually.

The Minister of Commerce has received another petition of a different kind. It is from the manufacturers of Cambrai and the neighbourhood in the North of France, and is in substance as follows:—"The fixing of the same epoch for carrying into effect the new Customs tariff on flax yarn and tissues will place the manufacturers of cambrics, lawns, and fine linen in the greatest embarrassment; for, as we obtain from England four-fifths of the yarn we use, and as the preparation and bleaching of our articles takes from four to five months, it follows that in order to continue our operations, to keep our workmen employed during the winter, and to have in the month of June a stock to oppose to that of our new competitors, we shall be obliged to import now, and to manufacture with dear materials; the consequence of which will be that our production will have to compete with similar objects made of yarn which will come into France at the reduced duties. We are, therefore, placed under the alternative either of entirely ceasing our manufacture and thereby leave the market free to the new imports, or of subjecting ourselves in advance to a certain loss, which will be enormous by the depreciation which the new tariff will occasion in our stock. As it is certain that Government must desire to see us support competition with chances of success, we pray you, Monsieur le Ministre, to take measures for authorising *us to receive from the month of January* flax yarns of the categories of 36,000 metres and upwards at the rates fixed in the new tariff." In other words, the manufacturers of Cambrai want to have the new treaty of commerce in so far as it affects them brought into operation without delay; and they allege that this might be done without causing injury to spinners. Other manufacturers would be ready to sign a similar petition; and everybody who is affected by the treaty is anxious, at all events, that the precise date at which the new tariff on yarns and textile fabrics is to come into operation shall be fixed as quickly as possible. The convention published at the early part of the month merely provides that the new tariff shall take effect at a date "not later than the 1st June, 1861."

In a recent letter it was stated that a company had been formed under the name of Colonial Credit, for the purpose of making loans to the planters of the French West India colonies for building or improving sugar manufactories. The journals of the colony brought by the last mail complain that the terms on which these loans are to be made are very onerous—nearly 12 per cent. including the sum required for gradually repaying them. The sum is made up in this way:—Interest 6 per cent.; for paying off the loan in annual instalments, 2¾; commission, 1; assurance, 2. Whether the planters can afford to borrow at such a rate remains to be seen.

An Imperial decree enacts that pulse and the meal made from it shall be imported at 25c the 100 kilogs (2 cwts), either by land or in French or foreign vessels, up to the 30th September next.

M. Maurice Block, who occupies a high and honourable place in economic science, has just had published (*chez* Amyot in this city), two volumes which deserve to be known to economists, journalists, merchants, and statesmen, and all others who in any way have to occupy themselves with statistical questions. They are entitled "Statistique de la France comparée avec les autres Etats de l'Europe"; and their title describes their object—a statistical comparison between France and other countries. The mass of information contained in these two volumes is truly prodigious, and it is arranged with marvellous clearness. The collection of it must have required an extraordinary exercise of industry, and the sifting, classification, and commenting on it have called into play sagacity of a high order. There is no one subject on which statistical information can be required which is not to be found here: population, agriculture, manufactures, commerce, army, navy, railways, canals, post office, public instruction, worship, &c., &c.,—nothing is neglected. In studying such a work as this we can form a correct idea of the relative importance of different States, and of the degree of prosperity, intelligence, and morality of each. Take, for example, the chapter on population: in it we have all manner of statistics on that great subject relative to France and other countries, and we are shown the startling conclusion that the increase of the population in the former does not keep pace with that which is witnessed in the latter. The agricultural statistics, which are remarkable copious, are however more favourable to France than would be generally thought. Thus it appears that she produces on an average more wheat even than Russia, and incomparably more than Austria, Prussia, the Two Sicilies, and England, which, after Russia, are the most productive of European countries; also that her mode of cultivation has so improved that she now obtains nearly 13¾ hectolitres per hectare (the hectolitre is upwards of 22 gallons, and the hectare 2½ acres), whereas from 1815 to 1825 she only got about 11 hectolitres: it appears, too, that her production of oxen, sheep, and swine (especially of the latter) has increased also, though not in proportion to the increased demand for meat which has arisen of late years. The facts here quoted are selected by chance out of ten thousand others equally valuable; indeed every page of the two volumes (and the total number of pages exceeds 1,000 in compact type) teems with information which is both useful and curious. Judge then if the hearty commendation which I venture to give to the book is undeserved. M. Block may indeed boast of having produced a work which presents the *status* of the different European nations more completely than has ever been, I will not say done, but even attempted, and which consequently will not only be eagerly consulted by contemporaries, but be prized by posterity.

The Government has published a report on the Savings Banks in 1859, which, among other things, shows that the total number of banks in operation was 415; that the total number of depositors at the end of the year was 1,121,465, which was at the rate of 1 for every 32 of the population; and that the deposits made in the course of the year were 146,535,172f. Compared with 1858, there was an increase both in the number of depositors and in the amount deposited, and altogether the report testifies to the gratifying fact that the utility of Savings Banks becomes more and more appre-

ciated by the classes for which such establishments are specially destined.

Subjoined is an account of the markets:—

FLOUR, at *Paris*, has made a new advance, the quotation yesterday having been from 63f to 66f the sack of 159 kilogrammes. Four marks, disposable, were 64f and 64f 25c; current month, 64f; January and February, 63f 25c.

WHEAT.—At *Paris*, yesterday, the attendance both of buyers and sellers was not large, but prices rose. The quotations varied from 34f to 37f 50c and 38f the sack of 120 kilogs. In nearly all the provincial markets there has also been a rise. In the week ending yesterday, not fewer than 122 had advanced from 5c to 1f 34c the hectolitre, whilst in only 8 was there a fall, which varied from 20c to 42c. In 33 markets there was no change.

COTTON.—Business at *Havre*, in the week ending Friday, was active, the total sales having been 35,922 bales, and prices rose considerably, the closing quotations being 3f to 4f higher for the very low and low qualities. 1f to 2f for the very ordinary, 1f for the ordinary and other sorts. Low New Orleans was consequently 94f the 50 kilogs, and very ordinary ditto, 100f. This week sales have been very active, and yesterday low New Orleans was 95f to 96f.

COFFEE.—At *Havre*, in the week ending Friday, the demand was regular: 70 sacks Hayti Port au-Prince went at 79f the 50 kilogs in bond; 410 ditto Cape disposable, 81f 50c to 82f; 107 sacks ditto for delivery, 80f 50c; 2,850 sacks Rio not washed, for delivery, 72f 50c to 74f 50c. Some lots of damaged Hayti and Ceylon were also sold. The arrivals were about 5,000 sacks. This week, the sole sales have been of damaged Hayti. At *Bordeaux*, last week, business was not active: 292 sacks Mysore at 111f the 50 kilogs duty paid; 392 sacks Malabar "triage," 93f; 35 sacks Guayra, 87f 50c in bond. Nothing done this week. At *Nantes*, last week, there were no sales, and there have been none this week. At *Marseilles*, last week, 3,000 sacks Hayti went at 78f, and another large lot at 80f.

SUGAR.—Business was animated at *Havre* in the week ending Friday: 1,170 casks French West India went at 49f 50c to 50f 50c the 50 kilogs in bond; 10,000 bales Reunion for delivery at 53f; and a large lot of ditto expected, 54f. Some lots of damaged Havana were also sold. The arrivals were 1,125 sacks and 168 casks. This week, a large lot of Mauritius has been sold at 55f 50c, and another of Reunion at 54f. At *Bordeaux*, last week, a small lot of French West India went at 48f 75c; 3,000 bales Reunion for delivery, 52f 50c; 1,613 Mauritius, 54f. No sales this week. At *Nantes*, this week, a large lot of Reunion "gross grain" has been sold at 57f, and one of French West India at 49f 50c.

INDIGO.—At *Havre*, in the week ending Friday, the sales were 27 cases Bengal at prices kept secret, but at about established rates. The arrivals were 25 cases from England. This week, only 2 cases have been sold, and the prices are not given. At *Bordeaux*, last week, 75 cases Kurpah, 8 Bengal, and 8 Madras were sold at established prices. Nothing done this week.

HIDES.—At *Havre*, in the week ending Friday, there was a public sale, but out of 71,620 hides, 17,620 skins, and 475 bales of skins offered, only 8,675 hides, 1,021 skins, and 107 bales ditto were disposed of. In this sale, Buenos Ayres dry went at 107f to 130f 50c the 50 kilogs duty paid; ditto salted mataderos, 54f to 77f; Monte Video dry, 123f 50c; ditto salted damaged, 54f 50c to 65f 50c; Guatemala dry, 97f 50c; Odessa salted, 53f; Guadaloupe salted, 59f 50c to 62f; Ireland, 45f 50c to 46f 50c; Pernambuco, 97f 50c; Peru dry, 105f 50c; Arica drysalted, 100f 50c; New York salted, 53f. Skins—Horse, Buenos Ayres dry, 9f to 9f 50c each: La Plata calf dry, 90f to 93f the 50 kilogs; Calcutta cow, 42f to 78f 50c; Monte Video calf dry, 79f. In addition to this sale, 506 Buenos Ayres dry went at 120f; 1,800 salted La Plata, 76f to 77f 50c; 500 Rio Grande salted, 75f; 118 New York salted, 53f; 1,000 New Orleans salted, 52f; 900 La Plata salted, 77f 50c to 78f, 999 Valparaiso dry, 108f; and 1,400 ditto drysalted, 108f 50c. The arrivals were 16,000. This week, Monte Video salted has been at 75f; Buenos salted, 75f; ditto dry, 125f. Some LaPlata dry have also been sold, but at a price kept secret.

WOOL.—At *Havre*, in the week ending Friday, 25 bales La Plata unwashed went at 2f 22½c to 2f 30c the kilog; 25 Donskoy, 2f 75c; 5 Peru unwashed about 2f; 40 bales sheepskin La Plata unwashed, 1f 5c to 1f 65c. The arrivals exceeded 500 bales. This week, Buenos Ayres unwashed has been at 1f 95c.

TALLOW.—At *Havre*, last week, there were neither sales nor arrivals. This week, no sales. At *Paris*, yesterday, the 100 kilogs were 134f 50c.

SPIRITS.—At *Paris*, yesterday, 3-6 of 90 deg. first quality were 97f to 98f the hectolitre, and Montpellier of 86 deg. 135f.

COMMERCIAL AND MISCELLANEOUS NEWS.

We have advices from Calcutta to the 23rd of November. One report says:—Little business has been transacted in our produce market, the holidays interfering with the usual routine of business. Native dealers continue to hold firm at the high prices already quoted. The last fortnight passed off rather quietly for almost all kinds of import. Piece goods, owing to the recent advices from England, have been firmly maintained by importers. Money is still abundant, and can be easily obtained at previous rates, say 4 to 5 per cent., but there seems every probability of an increased demand in a few weeks, when the indigo and other produce comes more freely to market. Trade is, however, at present, miserably dull, and the same large balances remain unemployed in the Bank of Bengal and the Bazaar as reported in our last.

A statement of receipts and expenditure of the general revenue of Tasmania from the 1st of January to 31st December, 1859, has been laid upon the table of the House of Assembly by the colonial treasurer. The receipts during the year have been 312,047*l* 10s 10d. The expenditure has been 307,109*l* 0s 6d, leaving a balance in hand of 5,298*l* 10s 4d.

The *Melbourne Herald* publishes a comprehensive analysis of the statistics of Victoria. In less than a quarter of a century the population has risen from 170 to 530,000 souls, of whom 335,000 are males, and 195,000 females. The Government has sold 3,000,000 of acres of land, at an average price of 2*l* 10s per acre, and has realised by that sale between 7,000,000*l* and 8,000,000*l* sterling, the whole of which large sum has been laid out in endeavours to improve the colony. On the 200,000 acres of town and suburban land we have fixed property to the value of between 60,000,000*l* and 70,000,000*l* sterling, and of the 2,800,000 acres of country land we have about 1,500,000 acres of enclosed, and 300 000 acres under tillage. Our yield of grain last year was, in round numbers, 4,000,000 of bushels, which, at 5s per bushel, would be equal to 1,000,000*l* sterling, and our other agricultural and horticultural produce would raise up that to 2,500,000*l* sterling. Over our unsold lands roam 6,000,000 of sheep, 700,000 head of horned cattle, 70,000 horses, and sundry other stock, from which the pastoral tenants of the crown, besides enriching themselves, furnish us with exportable and consumable produce—with wool, tallow, hides, and skins for export, and with sheep, cattle, and pigs for slaughter—to the value of between 3,500,000*l* and 4,000,000*l* sterling. In less than ten years, with a *bona fide* gold mining population, never exceeding 60,000 to 80,000 souls, and now believed to be much less, owing to the withdrawal of the people to other pursuits, without a corresponding increase by immigration, we have raised between 22,000,000 and 23,000,000 ounces of gold, valued at between 90,000,000*l* and 95,000,000*l* sterling, which has stimulated every branch of trade and industry in the colony, and otherwise tended to enrich it. We began with a gold export of less than 600,000*l* in 1851, and raised it to more than 10,000,000*l* in 1852. We dropped it to between 9,000,000*l* and 10,000,000*l* in 1854, and raised it to 11,000,000*l* and upwards in 1855, and continued at that rate until 1858. We then came down to 9,000,000*l*, or thereabouts, in 1859, and this year it will in all probability not be much less.

The report of Mr Buchanan, the chief agent for the superintendence of emigration to Canada, giving an account of the emigration of last year, has just been issued from the Colonial Office, where it has been lying ever since last February. It states the nationality of the arrivals direct from Europe during the year, 8,778 in number; 2,610 were English, 1,248 Irish, 1,787 Scotch, 1,100 Germans and Poles, 1,751 Norwegians. The Norwegians make the voyage in vessels of their own country direct. Nearly all of them proceed to the Western States. Balancing emigration against immigration, it is calculated that Canada added only 6,300 to its own population during the year. A high value is attached to the emigration from Norway, because, independently of the large amount of money capital it introduces in the aggregate, it is distinguished by its orderly and industrious character. There was a falling off in the Norwegian arrivals in 1859 to 1,751 in place of 2,656 (the number in 1858). But the emigration from the United Kingdom to Canada has also, we all know, greatly diminished of late. In the five years 1850-54 56,600 arrived direct from England; in the five years 1855-59 40,865; from Scotland, in the first period, 26,589; in the second, 13,093; from Ireland, in the first period, 86,918; in the second, only 9,380.

An account, pursuant to the Act 8 and 9 Vict., cap. 38, of the amount of bank notes authorised by law to be issued by the several banks of issue in Scotland, and the average amount of bank notes in circulation, and of coin held, during the four weeks ending Saturday, the 15th day of December, 1860:—

COTTON.

NEW YORK, December 11.

The following is a statement of the week's sales here and at the chief Southern ports, at latest telegraphic dates, with the closing prices f.o.b., with freight in sterling at current exchange:—

	Sales.	Closing.	Middling.	Freight.	F.o.b
New Orleans...Dec. 10	40000	nominal ...	9¾c ...	¼d equal to	6.16d
Mobile 8	12000	— ...	9¾c ...	9-16d —	6.86d
Charleston 8	8000	— ...	9¾c ...	9-16d —	6.11d
Savannah 7	4000	— ...	9¾c ...	¼d —	6.04d
New York 11	2500	— — Upl.	9¾c ...	¼d —	6.92d
Total.....	66500 bales			Average	6.02d

New York Market.—There is no improvement to note in this market. The same dull inactivity, occasioned by the financial difficulties, continues to rule, and business remains at a stand. There is no disposition to touch the staple, and the principal movement is in sending forward on consignment, holders finding it impossible to realise. The home trade merely purchase to supply immediate wants. Prices are entirely nominal. Middling Uplands is quoted 9¾c to 10c, with sales of about 2,500 bales for the week.

The following is a statement of the movements of cotton for the

last week, and since 1st September last, compared with the five preceding years :—

	Receipts. Week's Receipts. bales	Receipts. Since 1st Sept. bales	Exports for the Week. To Great Britain. bales	Exports for the Week. To France. bales	Exports for the Week. To other For. Pts bales
1860-61	99000	1294000	62000	11000	10000
1859-60	195000	1595000	81000	10000	6000
1858-59	132000	1355000	51000	23000	7000
1857-58	112000	726000	40000	11000	5000
1856-57	129000	1076000	39000	13000	6000
1855-56	144000	1108000	60000	22000	18000

	Exports since First September. To Great Britain. bales	To France. bales	To other For. Pts. bales	Total. bales	Stock. bales
1860-61	445000	115000	69000	629000	721000
1859-60	596000	140000	70000	806000	762000
1858-59	369000	182000	72000	623000	644000
1857-58	263000	67000	43000	373000	379000
1856-57	211000	102000	48000	361000	550000
1855-56	387000	136000	94000	617000	464000

Thus the receipts show a decrease of 301,000 bales from those of last year, and a decrease of 61,000 from 1858-9, and the exports exhibit the following results :—

	To G. Britain.	To France.	To other F.P.	Total.	Stock.
Compared with last year	Dec. 151000	Dec. 25000	Dec. 1000	Dec. 177000	Dec. 91000
Compared with 1858-9	Dec. 76000	Dec. 67000	Dec. 8000	Inc. 6000	Inc. 27000

Southern Markets by Telegraph.—Business at the South continues in the same unsettled condition, and prices are nominal and irregular. Sterling exchange has again become unsaleable, except at extreme low rates, and buyers have, therefore, great difficulty in operating, even at present prices. The week's sales at New Orleans have been 40,000 bales, and the nominal quotation for middling is 9¾c to 10c, while sterling exchange has fluctuated from 90 to 97 per cent. during the week. Sight exchange on New York is quoted 1¼ per cent. discount at the close. At Mobile the week's business has been confined to 12,000 bales, and middling is nominally quoted 9½c, with sterling exchange at about 98 per cent. The suspension of the Charleston banks afforded some relief in that market, and prices already show an improvement—middling being now quoted 9¾c to 10c, with sales of 8,000 bales for the week.

Receipts.—The decrease in receipts is already assuming a serious aspect. By the above tables it will be seen that the week's deliveries at all ports fall far short of the corresponding week in any of the five previous years, and, as compared with last year, show a deficiency of nearly 100,000 bales—the figures being 99,000 bales, against 195,000. The total receipts are now 1,294,000 bales, and the decrease is swelled to 301,000 bales. By telegraph for the succeeding week, the joint receipts at New Orleans and Mobile amount to 81,000 bales, against 100,000 same week last year, while the receipts at Charleston and Savannah have fallen to about one-third of last year's at this time.

Exports.—The exports this week amount to 83,000 bales, against 108,000 in the corresponding week last year. Of this, 62,000 bales are for Great Britain against 81,000, and the total deficiency already amounts to 151,000 bales. To France the total clearances are 115,000 bales against 140,000—a deficiency of 25,000 bales—while other foreign ports have thus far taken equal to last year: 69,000 bales against 70,000. The purchases of the home trade amount to 222,000 bales, against 172,000 last year. The number of vessels now loading at the South is 100 to Great Britain, against the same number last year; 30 to France, against 37; and 28 to other foreign ports, against 23.

Crop, &c.—The supply of cotton from the present crop becomes a matter of more and more uncertainty as the political and financial disturbances increase. The deliveries at the ports have already been seriously restricted, and there is a deficiency to-day, including telegraph dates, of nearly 350,000 bales from last year. It is, therefore, impossible to measure the result on the whole crop should these influences continue to operate through the winter. The opinion is freely expressed that planters will not readily market their crops in face of the deteriorated value, and a reduction of crop estimates from this cause has becomes quite general at the South. Calculations for the future supply to England must be based upon the stock now in Liverpool, the quantity known to be at sea, and the stock already in our ports; but not upon our future receipts at the ports, as they will be governed entirely by political and financial developments.—*From Messrs Neill Bros. and Co.'s Circular, forwarded by Mr Ollerenshaw, of Manchester.*

The past has been a broken week as regards business, but the demand has been good from all classes of buyers. The sales have been large on the active days, and owing to the prospect of restricted supplies from America, holders have obtained a further advance. Our quotations are raised in all but the best qualities ¼d, and in these ⅛d per lb. Egyptian have been more saleable, and command full rates. Brazil are rather higher, but we cannot quote much change. East India are ⅛d per lb dearer. The sales to-day are 12,000 bales. The market is firm, and rather tending upwards. The reported export amounts to 6,130 bales, consisting of 1,710 American, and 4,420 East India. N.B.—No business will be transacted in the cotton market on Tuesday next, the 1st proximo.

MARKETS IN THE MANUFACTURING DISTRICTS.

There has been a moderate, but by no means active, demand for goods in the manufacturing districts, this week, and prices, generally, have been well supported. The stocks on hand are very moderate for the time of year. The inquiry for all kinds of iron has been much restricted; nevertheless, the quotations have ruled steady. The coal trade has continued active, at extreme rates.

Manchester, Dec. 27.—Under the impetus of a rising cotton market, we have to report a general enhancement of prices for our staples. Considering that only two whole days of business have yet passed this week, the business done has been of a fair and promising character. Yarns of all descriptions are held for high rates, transactions in them have not fully developed themselves, but the extraordinary amount of contracts held in this department is a decisive element in their favour. The margin for weaving has been accordingly further reduced, and makers of cloth have been unwilling to offer their productions. Eastern shirtings have brought 1½d, and for standard makes 3d per piece more than last week. Some large sales have been made of 9-8, 72 reed, shirtings and printers for South America and other markets, which have advanced rates 3d per piece and upwards.

Bradford.—Prices of all classes of wool are exceedingly firm, and for the deep-grown sorts even harder than a week ago. Noils and brokes are taken into consumption as produced, the finer qualities excepted. The home trade is taking an average quantity of lustre yarns into consumption, but Coburg wefts continue very depressed. Prices, notwithstanding, are still well supported. Manufacturers will be well employed, and a good trade is doing in prices.

Leeds.—The inquiries were chiefly for spring goods, but a few parcels of heavy fabrics for immediate use were sold, the severity of the weather having caused a great demand for such.

Leicester.—Very little has been doing this week in the hosiery trade. Besides being a dull time of the year, the annual holidays impede business. At Loughborough and other country districts business remains quiet, and many of the stockingers are unemployed. The wool market continues firm at high currencies. There is no material change in yarns, which, however, remain firm.

Nottingham.—There is nothing now to report in the state of the lace trade. The hosiery trade remains exceedingly dull. The Christmas holidays have also interfered with business. The framework knitters are very partially engaged; there are numbers out of work. Manufacturers for the most part finish to order, and thus keep down stock. Yarns are stiff in price.

Rochdale.—The flannel market has been thinly attended. Manufacturers are running their machinery full time, and the amount of Government and other orders on hand is large. Lancashire flannels are quiet, but there is a better demand for Welsh. Light union goods, as well as Yorkshire, are quiet, but dyed goods are active. Prices of both goods and wool are firm.

Belfast.—Another week of quiet has passed off, giving greater bulk to the previous accumulations of white goods. Houses under contract with the American firms are partially busy in the filling up of such orders, thus giving a slight feeling of life to the trade; but beyond such evidences of activity there is little to note either as to the home or the foreign departments of the manufacture.

Birmingham.—The trade of this town may be regarded as all but over for the year. During the past week business has been extremely dull, much more so than is usually the case, for it almost invariably happens that manufacturers are pushed at the last to get their orders executed before quarter day; but this year trade has been so languid for a long time, the bulk of the manufacturers having barely sufficient orders to keep their usual complement of workpeople fully employed, that at no time within the last three months have there been many orders beforehand on the books.

The Bankers' Gazette.

BANK RETURNS AND MONEY MARKET.

BANK OF ENGLAND.

(From the Gazette.)

An Account, pursuant to the Act 7th and 8th Victoria, cap. 32, for the week ending on Wednesday, the 26th day of December, 1860.

ISSUE DEPARTMENT.

	£		£
Notes issued	26,568,575	Government Debt	11,015 100
		Other Securities	3,459,900
		Gold Coin and Bullion	10,639,853
		Silver Bullion	1,453,722
	26,568.575		26,568,575

BANKING DEPARTMENT.

	£		£
Proprietors' Capital	14,553,000	Government Securities (including Dead Weight Annuity)	9 540,273
Rest	3,194 424	Other Securities	20,522,372
Public Deposits, including Exchequer, Savings Banks, Commissioners of National Debt, and Dividend Accounts	7 361,356	Notes	6,924,675
		Gold and Silver Coin	704,544
Other Deposits	11,972,295		
Seven Day and other Bills	610,189		
	37,691,264		37,691,264

Dated the 27th December, 1860. M. MARSHALL, Chief Cashier.

THE OLD FORM.

The above Bank accounts would, if made out in the old form, present the following result:—

Liabilities.	£	Assets.	£
Circulation (including Bank post bills)	20,254,689	Securities	29,984,645
Public Deposits	7,361,356	Coin and Bullion	12,798,119
Private Deposits	11,972,295		
	39,588,340		42,782,764

The balance of Assets above Liabilities being 3,194,424*l*, as stated in the above account under the head Rest.

FRIDAY NIGHT.

The preceding accounts, compared with those of last week, exhibit—

A decrease of Circulation of	£95,457
A decrease of Public Deposits of	23,485
An increase of Other Deposits of	212,475
No change in the amount of Government Securities.	
An increase of Other Securities of	636,782
A decrease of Bullion of	533,151
An increase of Rest of	10,098
A decrease of Reserve of	479,556

The present Bank return is most unfavourable. There is a decrease in bullion of 533,151*l*, a decrease in the reserve of 479,556*l*, and an increase in the other securities of 636,782*l*. It seems extraordinary with such a Bank return that the rate of discount was not raised on Thursday last.

Subjoined is our usual weekly table, affording a comparative view of the Bank returns, the Bank rate of discount, the price of Consols, the price of wheat, and the leading exchanges, during a period of four years, corresponding with the present date, as well as ten years back, viz., in 1850:—

At corresponding dates with the present week	1850.	1857.	1858.	1859.	1860.
Circulation, including bank post bills	£ 19,825,901	£ 20,142 975	£ 20,823,120	£ 21,532,078	£ 20,254,689
Public deposits	11,022,817	7,443,613	9,806,029	9,804,730	7,361,356
Other deposits	9,147,039	15 072,971	12 963,618	13,071,410	11,972,295
Government securities	14,233,252	7,541,491	10,808,591	10,925,157	9,540,273
Other securities	14,359,608	27,299 815	16,956,153	19 907,580	20,522 372
Reserve of notes & coin	10,389,931	6,614,391	13 831,750	10,456,579	7,628,619
Coin and bullion	14,963,681	11,454 961	18,967,100	16 810,054	12,798,119
Bank rate of discount	2 p. c.	8 p. c.	2½ p. c.	2½ p. c.	5 p. c.
Price of Consols	97⅛ xd	94 xd	96¾ xd	95⅝ xd	92⅛ xd
Average price of wheat	38s 10d	47s 5d	40s 0d	43s 6d	52s 6d
Exchange on Paris (shrt)	24 95 25	25 20 30	25 10 15	25 10 15	25 15 22½
— Amsterdam ditto	11 15½ 18	11 16	11 15 15½	11 13½ 13¾	11 15½
— Hamburg (3 months)	13 6 6½	13 7⅛ 8	13 6½ 7	13 5 5½	13 6½ 6¾

In 1857, the journals were filled with the details of the relief of Lucknow. The Bank of France had reduced the rate of discount from 6 to 5 per cent. The Bank of England considered it prudent to keep their rate at 8 per cent. for a few days longer, but the terms in the open market were only 7 per cent. The over-issue of 2,000,000*l* of notes had been cancelled.

In 1858, the issue of the first million of Victoria Government Bonds had been announced. Remittances of gold were being made on account of the Chilian loan, but the bullion in the Bank stood at a very high point. The political world were to all appearance unconscious that the French Emperor was about to address the Austrian Ambassador in terms which led to the disruption of the peace of Europe.

In 1859, the publication of the pamphlet "The Pope and the Congress" created a great sensation throughout Europe. Money, although at only 2½ per cent., was in great demand. French funds were falling in consequence of doubts being thrown on the assembling of the proposed Congress.

The amount of the "other" deposits, as compared with the "other" securities, showed, in 1850, a deficiency of 5,312,569*l*; in 1857, a deficiency of 12,226,844*l*; in 1858, a deficiency of 4,046,535*l*; and in 1859, a deficiency of 6,836,170*l*. In 1860, the deficiency is 8,550,077*l*.

Discount and Money Market.—The demand for discount for the last two days has been very great, both at the Bank of England and in Lombard street. The rate is fully 5 per cent. At this period of the year the demand for money is always more or less active, but the demand generally ceases when the money which is now being paid into the Exchequer comes out in the shape of dividends; but there are causes this year at work which lead us to anticipate that a very active demand for capital is likely to continue.

In the first place, the peace which has been concluded with China will greatly extend our trade with that country, and already, in anticipation, Manchester goods by to day's advices show an improvement in price.

Secondly, the high prices of corn and cotton will cause imports to continue, especially from the United States; and, should the Secession movement continue, it is more than probable that the orders for our manufactured goods will fall off, and, consequently, the balance of trade will be against this country.

The bullion already sent to the United States amounts to about 1,600,000*l*. This no doubt will have the effect of raising the exchange, and also causing the prices of securities in America to approximate with those in this country, where they are considerably higher. The last quotation of the exchange was about 102 for first-class paper, and at all prices from 102 down to 95 for paper not first-class,—but we understand that it was very difficult to negotiate bills on England.

Of course this state of affairs cannot be supposed likely to last without giving rise to the most serious apprehensions, when it is considered that the par of exchange is 109,—and we have no doubt these *apprehensions* have something to do with the present stringency of the money market.

Another cause of disturbance is the New Turkish Loan. Messrs Mirès and Co. have published a letter extending the time for subscriptions for it until the 5th of January, and stating that 120,620 bonds have already been subscribed for: this would be equivalent to 2,412,400*l* stock, or about 1,400,000*l* money. It is stated, and there is no doubt of the fact, that bills have been drawn on M. Mirès and Co. from Constantinople, at three months' date, for a considerable amount, and these bills have been forwarded here as remittances, or to be negotiated. There are also bills drawn by the "Union Financière" of Constantinople on highly respectable Greek firms, which have also appeared in the discount market, and which are readily taken by the Bank and the discount houses, being first-class paper. We mention these facts because we think we discern something like real apprehensions arising as to the future of the money market.

There is another cause which has created a demand for money, and that is the making provision by the different railways for the deposit of 10 per cent. on the capital of any new lines or extensions for which Parliamentary notices have been given, which has to be lodged by the 15th of January, and these new lines are stated this year to amount to nearly 7,000,000*l*. The deposit may be lodged either in money, the public funds, or Exchequer bills.

These causes, coupled with the fact that large loans are required by Austria, India, France, Russia, and Turkey, forbid a hope that we shall have a cheap money market for the present.

The demand for money in the Stock Exchange has been very active on Government securities at 5 per cent., and several applications have been made at the Bank.

English Funds.—The funds have been very depressed: there is no doubt that the state of the money market has been the principal cause: the fall, however, which has taken place in French and Austrian funds has had a considerable influence, coupled with sales by the Bank broker.

Consols, which in the early part of the week were at 92⅞, have receded to 92⅝ ½, at which price they close this afternoon. The French funds close 67.75, and Austrian funds are reported to have fallen 4 per cent.

The demand for money on the Stock Exchange has been very considerable, the rate being fully 5 per cent. Exchequer bills are, however, rather better, but this may pro-

bably arise from the purchase by the railways for the purpose of depositing them with the Board of Trade for their new lines or extensions. The price to-day is 4 discount to par.

Reduced and New Three per Cents. are 92 to ¼.

Foreign Funds.—Turkish Bonds have been heavy in consequence of the supposed failure of the new loan. If, however, the failure would only cause the Turkish Government to curtail their expenditure and reform their wretched financial system, there would be more cause for a rise than a fall in Turkish Bonds in consequence of the failure of a loan on terms so ruinous to Turkey.

The fall in the French funds is attributed to the speculators for a rise being compelled to sell a large quantity of stock bought for the purpose of supporting the new Turkish loan, but we also believe that the prospect of a new French loan has something to do with the depression.

Turkish Bonds of 1858 have been as low as 56 to ½, and close 56½ to 7. The old loan closes 70 to ½.

Mexican Bonds have been well supported, in consequence of the Government being about to take up their cause. We understand, however, that communications will have to be made to the British Admiral, and also with our Ambassador in Mexico, before any definitive plan of obtaining redress is adopted.

Subjoined is our usual list of the highest and lowest prices of Consols every day, and the closing prices of the principal English and foreign stocks last Friday and this day:—

Railways.—The fortnightly settlement in railways took place to-day, and shows that a good deal of stock is held on speculation, the continuation of Midland, Lancashire and Yorkshire, Berwicks, and York and North Midland having risen to ½ per cent. On other shares the continuation was moderate.

Subjoined is our usual list of the closing prices of the principal railway shares last Friday and this day:—

Railways.

	Closing prices last Friday.	Closing prices this day.

Great India Peninsular	97½ 8½	95 6 x in
Great Western of Canada	11 ½	11 ½

The market has been flat, in sympathy with Consols. The great feature has been the fall in Lombardo-Venetian shares to 1½ to ⅝ discount, in consequence of the depressed state of the Vienna Bourse.

Bullion.—We subjoin Messrs Pixley, Abell, and Langley's circular, which gives an account of the bullion transactions of the week, and also those in India Government loan notes:—

Gold.—During the past week our market has been exceedingly quiet, and we have scarcely any feature of interest to report upon, beyond the continuation of the export of gold to the United States, the Australasian having taken 170,000*l* to New York; this brings the total amount sent out up to 1,482,000*l*, and further amounts will be forwarded by the America. About 24,000*l* in bar gold has been withdrawn from the Bank, and the Massilia takes 56,655*l* to Bombay.

Silver.—We have to report a very quiet market; buyers are awaiting the arrival of the letters from China before operating to any extent. The Massilia takes 225,380*l* to Bombay.

Mexican Dollars.—There is not anything doing in dollars. The China letters are expected to be delivered on the 28th instant, and it will then be seen if any business can be done.

Exchange on India for Bank's 60 days' sight drafts on Bombay and Calcutta is 2s to 2s 0¼d. Bills with documents 1s 11⅞d to 2d. Bank 60 days' sight drafts on Madras, 1s 11⅞d to 2s.

India Government Loan Notes do not meet with much attention. Prices are flat, with very little doing; we quote 5½ per Cents., 101; 5 per Cents., 95; 4 per Cents., 80 to 81.

Quotations for Bullion.—Gold—Bar gold, 77s 9d per oz std; bar gold, fine, 77s 11d per oz. std; bar gold, refinable, 78s per oz std. Silver—Bar silver, 5s 1⅝d per oz std, last price; bar silver, containing 5 grs gold, 5s 1⅝d per oz std; fine cake silver, 5s 6⅞d per oz; Mexican dollars, 5s 2¼d per oz, last price; Spanish dollars (Carolus), 6s 2d per oz, last price.

Failures.—A meeting of creditors of Mr Henry Bateman, timber merchant, who suspended about a fortnight ago, took place on Thursday. It appears that Mr Bateman has been carrying on two businesses—the one by himself, the red wood business, and the other, the white wood, which is said to have been very profitable, in conjunction with Mr Browning. Supposing the two estates to be kept distinct, the former will show 18,194*l* liabilities, and 7,787*l* assets, exclusive of household furniture and a policy of insurance, or less than 10s in the pound; while the latter will have 32,917*l* against liabilities of 37,220*l*, or fully 17s 6d in the pound. The first estate will also be charged with present and future claims on underwriting account, for the arrangement of which negotiations are now in progress. The amount due from Messrs Piper, exclusive of the guarantee shown in the balance sheet, formerly 16,000*l* or 17,000*l*, but now reduced to about 8,000*l*, represented by bills receivable, is likewise included in this account. The main point discussed was whether in fact Mr Browning and Mr Bateman were partners, and that in consequence the two estates should be merged into one. The solicitors present, Messrs Lawrance, Lioklater, Hollams, and others, were unanimously of opinion that the two businesses were entirely distinct, and that the respective creditors were entitled only to the assets of the estate upon which they claimed. After a long conversation, however, it was resolved, at the instance of the more important red wood creditors, to adjourn, to lay the case before counsel. In the meantime arrangements were made for provisionally liquidating the estate. There appears little doubt that the white wood creditors will ultimately be paid in full.

Miscellaneous.—The following are the chief points in the correspondence which has taken place between Mr David Robertson, M.P., Chairman of the Committee of Mexican Bondholders, and Lord John Russell, by which it will be seen that at last our Government are about to take measures to obtain redress for the robbery committed by the authorities in Mexico of the bondholders' funds, amounting to 200,000*l* sterling, which had been placed under the seal of the British Ambassador for safety:—

Dec. 15, 1860.

Your Lordship and your Lordship's predecessor well know the difficulties with which the creditors of the South American States have had to contend. But it is very gratifying to consider that Chili, Peru, and Buenos Ayres have acknowledged their national debts, and have resumed and now continue to pay their dividends as regularly and faithfully as any of the great States of Europe.

This has been mainly accomplished through the good offices of your Lordship's predecessors at the Foreign Office of England and her representatives abroad under its direction.

Mexico, though the wealthiest of the great States of America, has been the last to meet her public engagements, though, in order to enable her to do so more readily, her English bondholders had the generosity to consent to take 3 per cent., instead of 5 per cent.

interest, but under a solemn promise that the reduced dividends should be regularly paid.

I need not remind your Lordship of their faithless conduct for some years past, and of the ill-usage experienced by British subjects in this matter, as well as many others; but it remained for the present Government of Mexico to perpetrate the most unheard-of outrage that perhaps ever has been committed in open day upon the property of British subjects, and in the presence of the British Consul, and regardless of locks and keys, by which it was secured, and stamped by our English Minister at his residence in Mexico, and handed over, on his temporary retirement from it, to the protection of our British Consul, whose power was set at naught and his protest unheeded and held as worthless.

It is not for me to presume to say what course your Lordship may, in your wisdom, think proper to take to recover this property, but, as a body of ill-used Englishmen, we feel confident that we shall not seek in vain at your Lordship's hands for immediate redress through Her Majesty's Government from the Government of Mexico, and instant restitution of that of which we have been so scandalously robbed.

Our Vice-Chairman, Mr M'Garel, will also have the honour of addressing your Lordship with a fuller statement than I have the means at hand of now making.—I have the honour to remain, my Lord, your most obedient servant, DAVID ROBERTSON.

The Right Hon. Lord John Russell.

Foreign Office, Dec. 21, 1860.

SIR,—I am directed by Lord John Russell to acknowledge the receipt of your letter of the 15th inst., respecting the recent robbery by the Mexican authorities of the funds belonging to the bondholders, which were deposited in the city of Mexico, and I am to state in reply that Her Majesty's Government will take such measures as shall appear to them calculated to obtain redress.—I am, Sir, &c., E. HAMMOND.

David Robertson, Esq.

Mr M'Garel's letter to Lord John Russell of the 13th of December, enclosed Mr Whitehead's letter of the 17th of November, which contained a full statement of the particulars of the robbery, earnestly requesting redress for the present and security against future outrage; in reply to which they are assured that Her Majesty's Government will use their best efforts to obtain reparation for the present act, and their influence to establish such a Government in Mexico as shall respect British persons and property, when only the general redress desired can, in Lord John Russell's opinion, be obtained.

We understand that Government are now in communication with the Red Sea and India Telegraph Company, in order to ascertain the Company's views with regard to the best means of re-establishing the telegraphic communication with India.

With regard to the first preference bonds of the Grand Trunk Railway of Canada, a statement has been issued by Messrs Ashurst and Co., solicitors for one of the large holders, as to the course intended to be pursued to protect the rights of their client. The object is to obtain in the first instance a clear and concurrent specification of those rights, and then as far as possible to avoid everything that would lead to litigation or confusion calculated to create difficulties in keeping the line in operation. Messrs Baring and Glyn, the judgment creditors on this side, have, it is stated, sent out instructions to their agents in Canada to act in concert with the agents of Messrs Ashurst, and to take steps to protect the property in case of attack by judgment creditors in Canada.

The report of the Great Northern Copper Mining Company of South Australia states that the accounts received from the mines corroborate the opinions originally expressed with regard to them; that 50 mining emigrants have been sent out, and that consignments of ore have already been received, the proceeds of which, together with 13,991*l* in hand, will be fully adequate to meet all present requirements of the undertaking.

At a meeting of the Canada Company on the 27th (Mr C. Franks in the chair), a dividend was declared at the proposed rate of 2*l* 10s per share, free of income tax. It was stated that the business of the Company is making satisfactory progress, the large quantity of land converted into freehold by the lessee settlers, and the favourable prices obtained for the new leases, showing the good results of the abundant harvests during the last two seasons. The wheat crop this year is believed to have been the largest ever known, exceeding even that of 1859, which was 16 per cent. above the average of 20 years preceding. Only about a third has as yet been brought to market, and the realisation of the remainder is expected to give an important impulse to trade, and has already tended to relieve the previous pressure for money. The railway and harbour works at Goderich are proceeding satisfactorily, and have increased the demand for property in the district. The comparative statement of the operations of the Company, from the 1st of January to the 30th of November, 1860, shows that the lands sold during that period were 1,392 acres, and leased, 30,709 acres, being an increase respectively of 300 and 7,333 acres. The average price was 53s 1d—an advance of 5s 9d. The land converted into freeholds, exclusive of town and park lots, was 56,217 acres, against 36,839 in 1859. The total receipts were 79,082*l* currency, being an augmentation of 27,594*l*. The balance in hand in London is 26,044*l*.

The accounts from Paris state that such applications as have been received for the Turkish loan are principally from the provinces, and that latterly they have come in slowly. Notice has been given that the London list will close on the 5th of January.

Owing to the authority given by M. Mirès to the Turkish Government to draw in anticipation for a certain sum on account of the new loan, a rather numerous supply of bills, at three months' date, drawn upon him by financial houses at Constantinople, appears to have been remitted to London within the last few days.

A telegram received announces that the first section (about 30 miles) of the Smyrna and Aidin Railway was opened on Monday last, the 24th inst.

Some fictitious bills have been put in circulation at St. Petersburg, and probably other continental cities, purporting to be drawn by Jonas Simmonds and Co., and accepted by Hamilton, Kelly, and Co., of St Mary-Axe. There are no such houses in existence.

A proposition had been made to the local Parliament of New South Wales for the appropriation of the sum of 4,000,000*l*, to be raised by loan for the construction of 1,218 miles of railway, namely:—

	£
Extension from Singleton to Tenterfield, about 308 miles	924,000
Extension from Mudgee to Northern line, about 142 miles	426,000
Extension from Mudgee to Wellington, about 50 miles	150,000
Extension from Tenterfield to Grafton, about 115 miles	345,000
Extension from Blacktown to Windsor and Richmond, about 17 miles	51,000
Extension from Penrith to Wellington, about 175 miles	525,000
Extension from Picton to Albury, about 326 miles	978,000
Extension from Eden to Cooma, about 85 miles	255,000
Towards improvement of mountain passes, and construction of bridges	146,000
Rolling stock	200,000
Total	4,000,000

The cost of construction being only about 3,000*l* per mile, according to a plan of Sir William Dennison, who is an advocate of cheap railways by the adoption of the existing roads.

At length an undertaking which has been so long required is about to be established, viz., a direct first-class Auxiliary Steam Line to India, by means of a Company entitled "The East India and London Shipping Company." The fact is, that such a Company is indispensable asan auxiliary for the conveyance of goods and passengers between London and the East, and supported as it will be by the great firms trading with the East, and supplying as it would the public with a comfortable, economical, and regular mode of transport, without repeatedly changing their conveyance, it ought to prove with good management a lucrative undertaking.

COMPARATIVE EXCHANGES.

The quotation of gold at Paris is about 1½ per mille premium, and the short exchange on London is 25.17½ per 1*l* sterling. On comparing these rates with the English mint price of 3*l* 17s 10½d per ounce for standard gold, it appears that gold is rather more than 1-10th per cent. dearer in Paris than in London.

By advices from Hamburg the price of gold is 424 per mark, and the short exchange on London is 13.4 per 1*l* sterling. Standard gold at the English Mint price is, therefore, about 2-10ths per cent. dearer in Hamburg than in London.

The course of exchange at New York on London for bills at 60 days' sight is 100 to 102 per cent., which, when compared with the Mint par between the two countries, shows that the exchange is against England, and at this rate there is a profit on the exportation of gold to the United States. For some descriptions of bills even lower rates than the above were quoted at New York.

MAILS TO BE DESPATCHED

This evening, to America (Boston line), Newfoundland, and Bermuda, by British packet, via Queenstown.
On Tuesday evening, to America (New York), by United States packet, via Liverpool.
On Wednesday morning, to West Indies and Pacific.
On Thursday evening, to India (Bombay line), via Marseilles; to Canada and United States, by Canadian packet, via Londonderry; to Constantinople, by French packet.
On Friday morning, to India (Calcutta line), China, &c., via Southampton.
On Saturday evening, to Cape of Good Hope; to America (New York line), by British packet, via Queenstown.

MAILS ARRIVED.

LATEST DATES.

On the 22nd inst., PENINSULA, per steam ship Sultan, via Southampton—Lisbon, 17th; and Oporto and Vigo, 18th inst.
On the 22nd, UNITED STATES, per steam ship Arabia, via Queenstown—Boston, 12th; and Halifax, 13th inst.
On the 25th, MEDITERRANEAN, per steam ship Ellora, via Southampton—Alexandria, 11th; Malta, 15th; and Gibraltar, 20th inst.
On the 28th, CAPE OF GOOD HOPE, per steam ship Celt, via Plymouth—Cape, Nov. 21; St Helena, 30; and Ascension, Dec. 4.

COMMERCIAL EPITOME.

FRIDAY NIGHT.

Scarcely any English wheat was on offer at Mark lane, to-day, coastwise or by land-carriage. Had really good samples been on offer, 1s to 2s per quarter more money, compared with Monday, would have been readily paid for them. Foreign wheat moved off slowly, on former terms. Barley, malt, oats, beans, peas, and flour commanded very full prices. The severity of the weather operates seriously against landing grain now afloat in the river. This week's imports from abroad are liberal, viz., 29,010 quarters of wheat, 23,730 barley, 19,340 oats, 40 sacks and 11,190 barrels of flour.

At Liverpool, this morning, wheat was in request, at 1d to 2d per cental more money. Flour advanced 6d to 1s per barrel.

Advices from Alexandria to the 11th inst., state that produce, generally, was in request, at very full prices. Wheat realised 34s 6d to 38s 10d; beans, 27s 6d to 29s 6d; Indian corn, 28s to 28s 10d; and barley, 22s 6d to 24s per quarter.

In four days (the extent of this week's business) the transactions in the Liverpool cotton market have amounted to 72,000 bales, including 46,000 bales to spinners, 20,000 bales on speculation, and 6,000 bales for export. Quotations are ⅛d to ¼d per lb above last week's prices. To-day's sales amount to 12,000 bales, the market closing very firm. In the London market, 2,800 bales have been sold this week at again rather dearer rates.

Owing to the holidays, no public sales of produce have been held this week. Privately, the transactions have been on a very limited scale.

The tea market has been in a most inactive state, and to force sales, arising from the steady shipments from China, and the prospect of heavy arrivals, lower rates must be submitted to.

The following commercial intelligence is dated Hong Kong, Nov. 16:—

Canton Silk—Settlements are very trifling. Stock about 80 bales. Quotations:—Loongkong, 450 dols; re-reeled Kumchuck, 490 dols; Kumchuck, 435 dols; Mahton, 190 to 210 dols; Kowkong, 420 duls. Tea—During the fortnight a considerable business has been done in congou, and again at irregular rates. Dealers are firm, owing to the heavy loss they are incurring, and the feeling is in favour therefore of no material decline, though, of course, such is dependent on supplies and the advices of the home market. The total supply for the season is still estimated not to exceed 400 chops. Country Greens—One chop of fine Moyune is down, and is likely to be taken at extreme rates. Price is likely to regulate the supply, and it is considered probable that a good deal may be diverted to this market, though it will be late in arriving. Settlements reported are as follows:—Congou, 52 chops; oonams, at 23 to 26 taels; oopacks, at 25½ to 30 taels; souchong, 2 chops, at 39 to 41 taels; flowery pekoe, 100 chests, at 56 taels. Canton Teas—Congou, 2,000 half-chests, at 18 to 23 taels; scented orange pekoe, 6,000 boxes, at 17 to 34 taels; scented caper, 10,000 boxes, at 14½ to 17½ taels; gunpowder and Imperial, 4,400 packages, at 18 to 34 taels; twankay and skin, 1,500 chests, at 15½ to 16 taels; ponchong, 3,000 half-chests, at 13½ to 23 taels. Stocks are as follows:—Congou, 81 chops; souchong, 11 chops; oolong, 1,500 half-chests; flavoury pekoe, 450 chests; plain caper, 3,000 boxes. Country Green—Gunpowder, 800 half-chests; young hyson, 2,500 half-chests. Market generally firm. Foochow advices are to the 16th inst. Tea—During the past fortnight a good business has been done, at a decline on last quotations. The chief feature in the settlements is that of 14 chops Ningchow, at 21.24 taels, short price, leaving nine in the market. These quotations show a decline of 2 taels on the offers made on arrival. Holders show little inclination to lower rates, though supplies have been heavy, and in excess of requirements. Future supplies are expected to be ample; the extent thereof, however, is likely to be affected by the course of the market during the month. Oolongs

—The demand has been moderate, and stocks are somewhat increased: the quality, however, is low and inferior. Souchongs, Pekoes and Scented Teas—Sales are small, and prices remain firm. On comparing prices with those current on the 20th ult., congou shows a decline of 1 tael, Oo'ongs rather easier, other kinds unaltered. Sales reported from the 20th of October to the 5th of November are—Congou, 20,800 chests, at from 9 to 24 taels short; souchong, 1,070 chests, from 22 to 26 taels short; oolong, 8,290 half-chests, from 16 to 23.5 taels short; pekoe, 1,260 chests from 28.5 to 48 taels short; scented teas, 2,900 boxes, from 22 to 36 taels short. Stocks on the 6th of Nov.—Congou, 118,000 chests; souchong, 1,000 chests; oolongs, 9,500 half-chests; pekoe, 1,000 chests; scented kinds, 4,000 boxes. Shanghai advices are to the 7th inst. Silk—Settlements during the fortnight amount to 6,000 bales, making total settlements for the season 46,000 bales. Stock estimated at 8,000 to 9,000 bales. Owing to the scarcity of good No. 3, Tsatlees have advanced 10 taels; inferior remains much as before. Quotations are:—Tsatlee, No. ½, none; No. 3, 390 95 taels; No. 4, 370 75 taels; inferior, 320.55 taels, Taysaam—No. 1, 350 taels; No. 2, 330 taels; No. 3, 310 taels; No. 4, 295 taels; inferior, 250 280 taels. Total export of silk from China to Europe is 44,757 bales, against 30,251 bales to same time last year, or an increase for this season of 7,429 bales. Tea—The business done has been very small, and arrivals are principally contract teas. At Ningpo receipts are unimportant, and the quantity on the market very moderate. Common kinds are slightly lower. Settlements during the fortnight, including contracts, are as follows:—Congou Ningchow, 900 chests, at 30 taels, duty paid; Innchunki and Hohow, 2,200 chests, at 22 to 24 taels, duty paid. Japan (all kinds of black), 1,200 chests. Pekoe, 400 chests, at 40 taels, duty paid. Total 4,700 chests. Green Teas—Settlements amount to 4,100 half-chests China growth, and 3,200 half-chests Japan, shipped chiefly to the United States. Correct quotations cannot be given, but they are supposed to be 15 per cent. over last season. About 8,000 packages Fychow country tees have reached Ningpo, and musters of some 3,000 shown on the market here. Prices asked are fully 20 per cent. above those ruling at same time last season. No sales reported. The total purchases from the 1st of July to date are:—Congou—Ningchow and Oopsich, 7,400 chests, against last year 93,900 chests; Innchunki and Hohow, 11,600 chests, against last year 45,000 chests; Shanghai, fired, 6,700 chests, against last year 3,500 chests; Japan (excepting green), 3,100 chests; souchong, 800 chests, against last year 3,600 chests; pekoe, 900 chests, against last year 10,600 chests. Total black, 30,500 chests, against last year 10,600 chests. Total green—Japan, 11,400 half-chests, against last season *nil*; China, 34,300 half-chests, against last season 192,000 half-chests. Stock estimated as follows:—Black, 10,000 chests, against last season 50,000 chests; green, 7,000 half-chests, against last season 130,000 half-chests; Japan, unprepared, 14,000 packages. Departures have been: five vessels for London and Liverpool—one full and two on the berth; two vessels on the berth for New York. Total export of tea from China to Great Britain is 39,302,600 lbs, against 34,227,200 lbs to same time last year, or an increase for this season of 5,075,400 lbs. To the United States the export is 12,967,700 lbs, against 11,714,800 lbs last year, or an increase of 1,182,900 lbs for this season.

We have received the following communication from Messrs Volkart Brothers, of Ceylon, in reference to the state of the coffee market to the 29th November:—

The weather has been unusually favourable for the preparation and shipment of produce; the exports of the present season's coffee crop to date are as follows:—

PLANTATION COFFEE.

To Great Britain .....cwts	40,458	against last year,	cwts	33,613
Foreign Ports	...	—	—	1,262
Australia and India.....	4,428	—	—	...
	44,886			34,871

NATIVE COFFEE.

To Great Britain.....cwts	14,419	against last year,	cwts	16,025
Foreign Ports.....	1,496	—	—	822
Australia and India.....	2,198	—	—	...
	18,113			16,847

The crop of plantation coffee still comes to hand very slowly, the want of rain in many districts causing the berries to hang back, whilst in other parts the scarcity of the means of transport causes considerable delay in the despatch of coffee to Colombo. The shortness of the crop of native coffee is now placed beyond any doubt, and in spite of the increased price paid for the article, dealers find a difficulty in fulfilling contracts. The advance established is 1s to 1s 6d. Plantation coffee, mountain, 11s 6d to 11s 9d per bhl: native coffee, unpicked, 43s to 43s 3d; ditto, picked and dried, 46s per cwt: cinnamon, plantation, 9d to 10d; ditto, inferior, 6d to 7½d per lb.

Sugar has commanded rather more attention; but the transactions have continued trifling. Coffee and cocoa have ruled heavy; but rather more disposition has been shown to operate in rice.

Saltpetre, spirits, metals, and oils have been almost nominal.

To-day, tallow has ruled heavy at 60s for P.Y.C. on the spot; 60s January to March; 58s 6d April to June; and 57s 6d October to December.

Advices from New York to the 11th inst. are by no means favourable. There was no essential change in the money market. The *New York Courier and Inquirer* remarks,—

With large exports to Europe, and nearly all orders countermanded for foreign goods, it is obvious that the balance of trade must for some time remain largely in our favour, and draw specie from Europe. We annex the closing quotations:—On London, 60 days' bankers' bills, 103 to 103¼ ditto, commercial bills, 101 to 102; ditto, with bills of lading, 99 to 100; ditto, Southern and Canada bank bills, 103 to 103¼; ditto, short sight, bankers' bills, 105¾ to 106.

The following is a comparative statement of the condition of the banks of New York for the weeks ending—

	Loans. dols.	Specie. dols.	Circulation. dols.	Deposits. dols.
Dec. 1 ...	129,537,459	18,541,762	8,805,944	80,722,718

CORN.

AMERICAN GRAIN AND FLOUR MARKETS.

NEW YORK, Dec 11.—Flour firm, but prices generally unchanged; superfine State and Western, 4.35 dols to 4 50 dols; extra State, 4.55 dols to 4.65 dols; round hoop Ohio, 4.80 dols to 4.85 dols; Southern mixed to good, 4.50 dols to 4.95 dols. Wheat firm, with little export demand; Milwaukee Club, 1.03 dol to 1.05 dol; red winter Western, held at 1.15 dol: buyers offer 1.12 dol; white Western held at 1.23 dol to 1.25 dol; buyers demand a reduction; white Michigan, 1.28 dol to 1.30 dol. Corn steady; mixed Western, 58c to 59½c. Freights to Liverpool lower; flour, 3s to 3s 4½d; grain, 12½d to 13½d in bulk and ship's bags.

LONDON MARKETS.

STATE OF THE CORN TRADE FOR THE WEEK.

MARK LANE, FRIDAY EVENING.

The whole of the markets held this week have been very scantily supplied with home-grown wheat, chiefly in poor condition. Notwithstanding that the supplies of foreign produce are seasonably large, English wheats have moved off freely, at a further advance in the quotations of from 1s to 2s per quarter. The demand for foreign wheat has not been quite so active; nevertheless the currencies have improved 1s to 2s per quarter, with great firmness on the part of holders. There has been a good consumptive inquiry for all descriptions of barley at quite previous rates. Malt, too, has commanded full prices. Oats have realised rather more money; whilst beans, peas, and flour have sold at quite last week's currency.

Advices at hand from New York, state that next to nothing was doing either in wheat or flour for export purposes. In prices, however, very little change was reported. The stocks in warehouse had somewhat increased; but, for the time of year, they were only moderate. Throughout the Continent, wheat has commanded rather more attention for spring shipment, at very full prices. In barley and other articles, the transactions have been on a very moderate scale.

Judging from the poor condition in which the new English wheats are still coming to hand, and the prospect of limited importations from abroad during the winter months, it would appear that wheat is likely to rule higher in price than it now is. Flour, too, will, no doubt, command more money. As regards other articles, present rates are considered safe.

In Scotland, the wheat trade has ruled steady, and, in some instances, the quotations have had an upward tendency. Other articles have commanded quite as much money as of late.

The Irish markets have been moderately well supplied with produce. On the whole, the trade has ruled firm, and, in some instances, the currencies have had an upward tendency.

Scarcely any English wheat was on offer in to-day's market. Good samples, if on sale, would have produced fully 1s per quarter above Monday's rates. There was a moderate inquiry for foreign wheat, at very full prices. Barley, oats, beans, peas, and flour sold at extreme currencies.

Mr E. Rainford reports the state of the floating trade as follows:—Prevalent adverse winds have limited the arrivals off coast for orders since this day week to 9, consisting of 4 wheat, 1 flour, 2 maize, and 2 barley, viz.:—Wheat, 2 cargoes from Nantes, 1 Paimbœuf, 1 Sables; flour, 1 Nantes; maize, 1 New York, 1 Sulina; barley, 2 Nantes. Of these, all but the maize were previously disposed of. Owners of grain afloat are very firm, at improving prices, which to some extent checks business, and consequently transactions since this day week have been limited, viz.:—Wheat, on passage, Sandomirka, October shipments, at 61s and 63s per 480 lbs; now shipping, Egyptian Saide, 44s per imperial quarter; for prompt shipment, Sandomirka, at 62s per 480 lbs; to be shipped in May or June, 1861, Marianople or Berdianski, 2 cargoes, at 55s per 492 lbs. Maize, arrived, Foxanian, part discoloured and injured by heat, at 39s 4½d per 480 lbs; on passage, Galatz, 2 cargoes (in Greek vessels), at 40s per 492 lbs; Ibraila, 2 cargoes at 38s 9d, and 1 at 39s per 480 lbs. Barley, arrived, Ibraila, at 30s 9d; on passage, Berdianski, December shipment at 29s 9d, both per 400 lbs.

The London averages announced this week are:—

COLONIAL AND FOREIGN PRODUCE MARKETS.

TRANSACTIONS OF THE WEEK.

Mincing Lane, Friday Evening.

In consequence of the Christmas holidays the produce markets have been thinly attended, and the transactions are upon a very limited scale.

Sugar.—Partial inquiries have been made especially for the low qualities, and a few contracts were reported by private contract, including native brown Madras at 35s 6d, and low brown Mauritius at 33s 6d. A cargo of Havana, No. 9, has sold at 26s 3d per cwt, for Bristol.

Imports and Deliveries of Sugar for the United Kingdom during the last four years (including foreign refined), with Stocks on hand at the close.

ADDITIONAL NOTICES.

REFINED SUGAR.—In Dutch crushed a few sales have been made this week of V.O. at 33s 6d barrels, f.o.b. Rotterdam.

GREEN FRUIT.—A brisk demand, owing to Christmas holidays. Some cargoes oranges from St Michael's and Terceira, sold by Keeling and Hunt at public sale, went at an advance of 3s to 5s per box. Lemons improved in value, owing to the limited stock on hand. Spanish nuts selling freely, at 38s per barrel; Barcelons, 35s per bag. Para cleared off the market.

DRY FRUIT.—The market is closed: no alteration in prices.

ENGLISH WOOL.—The trade continues in the same quiet state as for some weeks past. The present stock, however, in the hands of the staplers is so unusually light that there is no pressure on the market, and prices are firm at the late quotations.

COLONIAL WOOL.—The market remains firm, but with nothing doing, as usual at this season.

FLAX.—But little doing. High prices are demanded for the small stock of Russian and Egyptian left in this market.

HEMP.—Nothing doing, but holders are not pressing their goods.

COTTON.—Sales of cotton wool from Friday, 21st December, to Thursday, 27th, inclusive:—1,800 bales Surat, 4¼d to 4⅝d for ordinary to middling Oomrawattee; 5¼d for fully good fair Dholiera; 5¼d for good fair Broach: 1,000 bales Madras, 5d to 5⅞d for middling fair to very good Tinnivelly; 4⅝d for good fair Western. The demand continues good, and, considering the small quantity offering, a fair amount of business has been transacted. Prices of Surat have again slightly advanced; Tinnivelly and Western Madras are fully ⅛d per lb higher, the market closing with great firmness.

SILK.—No change since last Friday.

TOBACCO.—Business has been principally of a limited character, at steady prices. Some inquiry has been made for fine and ordinary sorts for exportation.

LEATHER AND HIDES.—Very little business has been doing in leather during the past week: the few transactions that have taken place are at former prices. At the public sales last week—none are held this week—there were very few buyers of salted hides; none of River Plate. Of Australian, 6,450 were sold at 3¾d to 5d; all the Capes at a slight reduction. Of East India kips, about 60,000 out of 100,000 found buyers, at former rates, for the best qualities; the inferior descriptions were a shade lower.

TALLOW.—Official market letter issued this evening:—

	s	d
Town tallow	61	0
Fat by ditto	3	2
Yellow Russian	61	6
Melted stuff	43	0
Rough ditto	26	0
Greaves	18	0
Good dregs	7	0

Imports this week 215 casks.

METROPOLITAN CATTLE MARKET.

THURSDAY, Dec. 27.—A very limited supply of beasts was on offer in to-day's market, and all kinds sold readily at an advance in the quotations of 2d per 8 lbs. The best Scots, &c., realised 5s per 8 lbs. We were very scantily supplied with sheep, and the mutton trade was somewhat active at full currencies. A few very superior Downs were worth 6s per 8 lbs. Calves were in limited supply and steady request at extreme rates,

Per 8 lbs to sink the offal.

	s	d	s	d		s	d	s	d

POTATO MARKET.

WATERSIDE, Thursday, Dec. 27.—Limited supplies of potatoes, principally by land conveyance, have come to hand since our last report, and trade continues dull at barely the annexed rates:—York Regents, from 120s to 140s; York Flukes, 140s to 150s; Scotch Regents, 115s to 130s; Cups, 90 to 100s; Dunbar ditto, 150s to 160s; French, 95s to 100s; Belgian, 90s to 95s per ton.

HOP MARKET.

BOROUGH, Monday, Dec. 24.—Our market, as usual at this period of the year, is quiet. Prices are firm. Mid and East Kent, 6*l*, 14*l*, 18*l*; Weald of Kents, 4*l*, 8*l*, 14*l*; Sussex, 5*l*, 7*l*, 9*l*; Yearlings, 5*l*, 7*l* 7s, 9*l* 10s.

FRIDAY, Dec. 28.—The market continues in the same quiet state as for some days past, usually the case at this period of the year.

COAL MARKET.

FRIDAY, Dec. 28.—Walls End Hengh Hall 24s—Cassop 25s—Eden Main 24s—Acorn Close 24s—Holywell 18s 6d—Tanfield Moor Butes 18s—West Hartley 17s 6d—Straker's Hartley 17s 6d—Clarke's Hartley 17s 6d—Davidson's Hartley 17s 6d—Benton Hartley 16s 9d—Howard's Hartley 17s 6d—Lambert's Hartley 17s 6d. Ships at market, 32.

HAY MARKETS.—THURSDAY.

SMITHFIELD.—Meadow hay, 2*l* 0s to 5*l* 10s; clover, 3*l* 0s to 5*l* 15s; and straw, 1*l* 10s to 1*l* 16s per load. Trade firm.

CUMBERLAND.—Meadow hay, 2*l* 5s to 5*l* 12s; clover, 3*l* 5s to 5*l* 15s; and straw, 1*l* 10s to 1*l* 16s per load. A steady demand.

WHITECHAPEL.—Meadow hay, 2*l* 0s to 5*l* 10s; clover, 3*l* 0s to 5*l* 15s, and straw, 1*l* 10s to 1*l* 16s per load. Supply short. Trade firm.

LIVERPOOL MARKETS.

CORN.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, Dec 28.—There was a moderate attendance at to-day's market, and wheat was in good consumptive demand at an advance of 1d to 2d per cental. Flour in moderate request at 6d to 1s per barrel dearer; sacks without change. Indian corn in limited demand, at 39s 9d to 40s for mixed, and 40s to 41s Galatz, Beans 6d dearer. Other articles a turn dearer.

METALS.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, Dec. 28.—The market for manufactured iron has been excessively dull during the past week both for Staffordshire and Welsh iron; but at the preliminary meeting of Staffordshire ironmasters just held, it was resolved that the prices ruling during the past quarter should remain unaltered. Scotch pig iron is very flat, with a tendency towards lower prices. Little doing in copper or lead, or indeed in any metals at present.

The Gazette.

TUESDAY, Dec. 25.

BANKRUPTCIES ANNULLED.

W. Burgess, formerly of Cambridge street, Pimlico, dealer in candles.
E. B. Bowman, Highbury New Park, Islington, and Alma villas, Dalston, apothecary.
W. Thomas, Cardiff, Glamorganshire, publican.

The Railway Monitor.

RAILWAY CALLS FOR JANUARY.

Subjoined is a statement of the railway calls falling due in the month of January. The total appears considerable, but more than half of it accrues upon shares in the Portuguese railways, of which only a small number are held in England.

EPITOME OF RAILWAY NEWS.

TRAFFIC RETURNS.—The traffic returns of railways in the United Kingdom for the week ending Dec. 15 amounted to 502,160*l*, and for the corresponding week of last year to 463,860*l*, showing an increase of 38,300*l*. The gross receipts of the eight railways having their termini in the metropolis amounted to 209,255*l*, and for the corresponding week of 1859 to 199,417*l*, showing an increase of 9,838*l*. The increase on the Eastern Counties Railway amounted to 1,092*l*; on the Great Western to 2,431*l*; on the London and North-Western to 4,357*l*; on the London and Blackwall to 128*l*; on the London, Brighton, and South Coast to 1,712*l*; on the London and South-Western to 2,550*l*; and on the South-Eastern to 635*l*; total 12,905*l*. But from this must be deducted 3,067*l*, the decrease on the Great Northern, leaving the increase as above, 9,838*l*. The receipts on the other lines in the United Kingdom amounted to 292,905*l*, and for the corresponding week of last year to 264,443*l*, showing an increase of 28,462*l*, which, added to the increase on the metropolitan lines, makes the total increase 38,300*l*, as compared with the corresponding week of 1859.

LONDON AND NORTH-WESTERN.—A special general meeting of this Company was held on Thursday at the Euston station, the Marquis of Chandos in the chair. The Chairman said the business was of a formal character. One resolution he had to propose was,—"That the capital stock, to the extent of 208,125*l*, to be called London and North Western Consolidated Stock (Warrington and Stockport), be now created, that the same and so much thereof as may be required be issued to the shareholders of the Warrington and Stockport Railway, in accordance with the Warrington and Stockport Railway Leasing Act, 1859." This resolution was necessary to carry out arrangements sanctioned at a special meeting of the company held in April 1859, in reference to agreements with the Great Northern Railway Company giving them access to Liverpool. Those arrangements were afterwards confirmed by Act of Parliament. It became necessary to create 208,125*l* of London and North-Western stock to take the place of the Warrington and Stockport Company's stock in the proportion of 9*l* 10*s* of the former company's stock to 10*l* of the latter company's stock. The motion was carried.

RAILWAY AND MINING SHARE MARKET.

LONDON.

WEDNESDAY, Dec. 26.—In the railway market, the general transactions were very limited, the dealers being chiefly occupied with the fortnightly settlement, commencing to-day. The stocks principally supplied were Lancashire and Yorkshire and North-Eastern descriptions, and the final quotations in both cases showed a decline. South-Eastern, on the other hand, was firm at an advance of ¾ per cent., and Midland, North British, and Sheffield likewise improved ¼ to ½. The market was steady at the close. In the colonial market, Grand Trunk securities were firmer, the stock closing at 22½ to 24, ordinary bonds 48 to 50, and preference 77 to 79. Great Western of Canada shares are also higher at 11 to ¼. The only change of importance in foreign descriptions was a reduction of an eighth in Lombardo-Venetian. Mines were dull, and occasionally flat.

THURSDAY, Dec. 27.—The further progress of the settlement again shows an increased supply of some railway stocks, including Midland, Lancashire and Yorkshire, and North-Eastern descriptions, which, with the fall in Consols, caused the market to-day to close with a heavy tendency. Although the present prices were for the new account in January, they were in several cases lower than yesterday, South-Eastern, Midland, and Lancashire and Yorkshire being especially heavy. Great Northern and Sheffield, on the other hand, slightly improved. No movement of importance took place in the colonial market. The principal change in foreign descriptions was a fall in South Austrian and Lombardo-Venetian to ¼ to ½ dis. In American railway securities there was a slight improvement in the shares of the Illinois Central and New York and Erie. Mines were inactive and rather unsteady.

FRIDAY, Dec. 28.—This was "settling day" in the railway share market. Manchester and Sheffield and South-Eastern stocks were rather more offered, whilst Great Western, Lancashire and Yorkshire, and London and North-Western showed much firmness. The market generally did not respond to the heaviness of the funds, notwithstanding the inactivity of business.

EDINBURGH	Union street lane.
GLASGOW	St Vincent street.
PARIS	279 Rue St Honoré.

Messrs ALLSOPP and SONS take the opportunity of announcing to private families that their Ales, so strongly recommended by the medical profession, may be procured in Bottles and Casks, and on Draught, from all the most respectable wine and beer merchants and licensed victuallers, on "ALLSOPP'S PALE ALE" being especially asked for.

When in bottle, the genuineness of the table can be ascertained by its having "ALLSOPP and SONS" written across it upon red and white ground striped.

The Brewery, Burton-on-Trent, April 30, 1860.

DINNEFORD'S

PURE FLUID MAGNESIA

has been for many years sanctioned by the most eminent of the Medical Profession, as an excellent remedy for acidities, heartburn, headache, gout, and indigestion. As a mild aperient it is admirably adapted for delicate females, particularly during pregnancy; and it prevents the food of infants from turning sour during digestion. Combined with the Acidulated Lemon Syrup, it forms an effervescing aperient draught which is highly agreeable and efficacious.

Prepare by DINNEFORD and CO., Dispensing Chemists (and General Agents for the Improved Horse Hair Gloves and Belts), 172 New Bond street, London, and sold by all respectable Chemists throughout the empire.

STRENGTH AND HEALTH WITHOUT MEDICINE.

One of the most delicious preparations of the present day, and warmly recommended by all the first physicians, is the

LENTILLA PURA,

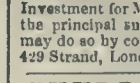
obtained from the celebrated vegetable Pulse called 'Ervalens' (or Lentils), and, combined with other pure ingredients so as to form a delicious, feeding, and strengthening compound. It is a food fitted for all persons, whether in health or sickness, and is admirably adapted for infants and young children. Constipation, and its numerous maladies, including indigestion, debility, coughs, &c., &c., are wholly averted by the use of the LENTILLA PURA. Testimonials from patients, and the first physicians and surgeons of the day. This celebrated food is sold in canisters, viz.: 1 lb at 2s; 2 lbs at 4s; 12 lbs at 18s; 24 lbs, 32s 6d. All is super-refined in purity.

The 12-lb and 24-lb canisters sent free on receipt of P. O. Order, by Theodore Pliny, 30 Brooksby street, Barnsbury, N.

Sold by all grocers and chemists throughout the kingdom.

NEW YEAR'S GIFTS.

—THE MOST UNIQUE PRESENT is RIMMEL'S GUINEA MAGIC VINE, each grape of which is a bottle of scent. On show, with 1,000 other elegant novelties, from 6d upwards, at Rimmel's, Perfumer, 96 Strand; 24 Cornhill; and Crystal Palace.



TRUSTEES, SOLICITORS, AND

OTHERS desiring to meet with a well-secured Investment for Money, yielding a liberal Rate of Interest, the principal sum being withdrawable on short notice, may do so by communicating with THOMAS H. BAYLIS, 429 Strand, London.

CHUBB'S PATENT SAFES

—the most secure against Fire and Thieves.—CHUBB'S FIRE-PROOF STRONG ROOM DOORS. CHUBB'S PATENT DETECTOR and STREET-DOOR LATCHES. CHUBB'S CASH and DEED BOXES. Illustrated Price-list gratis and post free.

CHUBB and SON, 57 St Paul's churchyard, London; 28 Lord street, Liverpool; 16 Market street, Manchester; and Wolverhampton.

OVERLAND ROUTE.

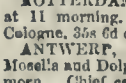
—COMMUNICATION by STEAM to INDIA, AUSTRALIA, &c., via Egypt.—The PENINSULAR and ORIENTAL STEAM NAVIGATION COMPANY BOOK PASSENGERS and receive Cargo and Parcels for Gibraltar, Malta, Egypt, Aden, Ceylon, Madras, Calcutta, the Straits, and China, by their steamers leaving Southampton on the 4th and 20th of every month; for Gibraltar, Malta, Egypt, Aden, and Bombay, by those of the 12th and 27th of each month; and for Mauritius, Reunion, King George's Sound, Melbourne, and Sydney by the steamers leaving Southampton on the 20th of every month.—For further particulars apply at the Company's offices, 122 Leadenhall street, London, E. C., or Oriental place, Southampton.

NOTICE.—The Steamers call at Cork Harbour, on both outward and homeward passages, to land and receive Mails.

BRITISH AND NORTH AMERICAN ROYAL MAIL

STEAM SHIPS, appointed by the Admiralty to sail between LIVERPOOL and NEW YORK direct, and between LIVERPOOL and BOSTON, the Boston ships only calling at HALIFAX to land and receive passengers and Her Majesty's mails. The following, or other vessels, are appointed to sail from Liverpool:—

ASIA, for NEW YORK direct, Saturday, January 5.
NIAGARA, for BOSTON, Saturday, January 12.
*ARABIA, for NEW YORK direct, Saturday Jan. 19.



*Taking Passengers and Goods for Nassau and Havana, to be transferred at New York on board the R.M.S.S. Karnak.

CANADA, for BOSTON, Saturday, January 26.

Passage money, including steward's fee and provisions, but without wines or liquors, which can be obtained on board:—To Halifax and Boston, chief cabin, Twenty-two Pounds; second cabin, Sixteen Pounds. To New York, chief cabin, Twenty-six Pounds; second cabin, Eighteen Pounds. Freight to Halifax, Boston, and New York, £3 per ton and 5 per cent. primage. Small parcels, 5s each and upwards. These steam ships have accommodation for a limited number of second cabin passengers.

For passage or other information, apply to J. B. Foord, 52 Old Broad street, London; D. Currie, Havre, and 12 Place de la Bourse, Paris; G. and J. Burns, Buchanan street, Glasgow; D. and C. M'Iver, Queenstown; or D. and C. M'Iver, 8 Water street, Liverpool.

During the present severe weather, application should be made at the chief office for the departure of the Company's vessels to Hamburg, Harburg, Rotterdam, and Antwerp.

PIANOFORTES.—CRAMER, BEALE, and CO. Every description on sale or hire, New and Second-hand. Lists gratis, post free.—201 Regent street.

VOLUNTEER PIPE.—RIFLE BORE.—The most delightful, economical, and permanent medium for the enjoyment of tobacco ever invented. This new pipe only to be had of the patentee. Sample pipe in case sent post free for 23 stamps.—EDWARD PILLINER, 53 Great Queen street, London, W.C.

HOLLOWAY'S PILLS.—Youthful Infirmities.—From causes scarcely perceptible at first, the young become prematurely enervated and debilitated; they lose alike their looks, energy, and confidence. The general cause of this melancholy state is a disordered stomach, which Holloway's Pills will regulate. By improving digestion and purifying the blood they work wonders. They act so kindly, yet so certainly, upon every organ necessary for healthy digestion, that the nervous system soon recovers, and the wonted good spirits speedily return with strength, vivacity, and vigour. The most delicate may safely take Holloway's Pills; they cause no violent effects upon the system, but gradually accomplish their end without much restriction in diet or pleasure. The composition of these pills secures them from doing mischief.

PERFECT FREEDOM FROM Coughs in ten minutes is secured by DR LOCOCK'S PULMONIC WAFERS. From Mr T. Johnson, chemist, Leek.—An elderly gentleman in this town, labouring under a severe cold and cough, obtained from me a box of "Dr Locock's Pulmonic Wafers," from which he derived so much benefit that he now recommends them to all. I could, if necessary, furnish you with numerous respectable testimonials from persons who have derived special benefit from their use. (Signed) T. JOHNSON.—Dr Locock's Pulmonic Wafers give instant relief and a rapid cure of asthma, consumption, coughs, and all disorders of the breath and lungs. They have a most pleasant taste. Price 1s 1½d, 2s 9d, and 11s per box. Sold by all medicine vendors.

KEATING'S COUGH LOZENGES.—Statistics show that 50,000 persons annually fall victims to Pulmonary Disorders, including Consumption, Diseases of the Chest, and the Respiratory Organs. Prevention is at all times better than cure; he, therefore, prepared, during the wet and wintry season, with a supply of KEATING'S COUGH LOZENGES, which possess the virtue of averting, as well as of curing a Cough or Cold; they are good alike for the young or for the aged.

RESTORATION OF VOICE BY KEATING'S COUGH LOZENGES. Glasgow.

SIR,—I have great pleasure in informing you of the great good your excellent COUGH LOZENGES have done me. In December, 1843, I caught a severe cold from riding two or three miles, one very wet night, which settled in my lungs, and quite took away my voice, so that I could not speak above a whisper from that time until December last. I tried all kinds of medicines, but they were of no avail. I was then advised to try your Lozenges, which I did only to please my friends, but before I had finished a 2s 9d tin, my voice, to my great joy, came back as strong as ever.—I am, Sir, yours respectfully, JAMES MARTIN.

THOMAS KEATING, Esq

Prepared and Sold in Boxes, 1s 1½d; and Tins, 2s 9d, 4s 6d, and 10s 6d each, by Thomas Keating, chemist, &c., 76 St Paul's Churchyard, London. Retail by all Druggists, &c.

NO MORE PILLS OR ANY other Physic.—For Constipation, Indigestion (Dyspepsia), Palpitation, Nervous, Bilious, and Liver Complaints, Debility, Dropsy, Epilepsy, Paralysis, Cough, Asthma, Consumption, Bronchitis, Sore Throat, Fevers.

DR BARRY'S delicious Health-restoring REVALENTA ARABICA FOOD, which, at a few pence per day, saves fifty times its cost in medicine, and cures without purging or any of the uncertainties, annoyances, and ruinous expenses incurred by medicine, cod liver oil, or visits to distant climates.

Certificate No. 36,118.—We find it the safest remedy Andrew Ure, M.D., F.R.S.; Dr Harvey; Dr Wurzer Dr Shorland; Dr Campbell.

We extract a few out of 56,000 cures:—

Cure No. 1,771.—Lord Stuart de Decies of many years' dyspepsia.——Cure No. 49,832.—"Of fifty years' indescribable agony from dyspepsia, nervousness, asthma, cough, constipation, flatulency, spasms, sickness and vomiting." Maria Joly, of Lynn, Norfolk.——Cure No. 47,121.—Miss Elizabeth Jacobs, of extreme nervousness, indigestion, gatherings, low spirits, and nervous fancies.——Cure No. 54,816.—The Rev. James T. Campbell, Syderstone Rectory, near Fakenham, Norfolk, of indigestion and liver complaints.——Cure No 56,814.—Sir Samuel Laxton, Leicester, of two years' diarrhœa.——Cure No. 180—Mr W. Reeves, 181 Fleet street, London, of 25 years' nervousness, constipation, indigestion, and debility.——Cure No. 4,028. Eight years' dyspepsia, nervousness, debility, with cramps, spasms, and nausea." Rev. John W. Flavel, Riddington Rectory, Norfolk.——Cure No. 3,906.—"Thirteen years' cough, indigestion, and general debility." James Porter, Athol street, Perth.——Cure No. 58,314—Miss Elizabeth Yeoman, Gatenere, near Liverpool, of ten years' dyspepsia and all the horrors of nervous irritability."——Cure No. 46,270.—Mr James Roberts, timber merchant, of Frimley, Surrey, of 30 years' diseased lungs, spitting of blood, liver derangement, partial deafness.

Similar testimonials from 56,000 patients who can be referred to.

The food is sold in canisters, 1 lb, 2s 9d; 2 lbs, 4s 6d; 12 lbs, 22s; 24 lbs, 40s. Super-refined quality, 5 lbs, 22s; 10 lbs, 35s. The 10 lb, 12 lb, and 24 lb canisters carriage free, on receipt of post-office order by Barry Du Barry and Co., 77 Regent street, London; Fortnum, Mason, and Co., 182 Piccadilly; also at 60 Gracechurch street, 4 Cheapside, 330 Strand, 63 and 150 Oxford street, London; and all grocers and chemists.

FIRST-CLASS EDUCATION, at the Royal Continental Collegiate Institution, Bushey heath, Herts.—In addition to all its qualities as a first-rate classical (preparatory to Harrow and Eton) and commercial school, it is also highly recommended for a thorough French education, and as preferable to going abroad. Some of the parents who are continually visiting France, and whose sons have scarcely been two years at this school, are most happy to assure those parents who are desirous that their children should acquire a thorough knowledge of the French language, without wishing them to neglect their English and classical education, that their sons speak far better and more grammatically than any of the sons of their friends who have spent two or three years in schools in France merely for the purpose of acquiring that language. No corporal punishment. Terms inclusive, and vary according to age and requirements, from £40, £50, to £60 per annum. Not one case of illness has occurred since the school has been established.—Address, stating age and requirements, Professor Vellère (late of the Harrow Preparatory School), Bushey heath, Herts. The pupils wear a uniform very elegant and becoming, but optional to parents.

DR BUCHAN'S PATENT SUGAR-COATED VEGETABLE PILLS, VEGETABLE SKIN OINTMENT, and CONCENTRATED VEGETABLE ESSENCE, for Purifying the Blood, Regulating the Bowels, and Removing Vitiated Humours, Bilious and Liver Complaints, Rheumatism, Gout, Scorbutic Affections, Costiveness, Skin Eruptions, deep-seated Ulcers, and all Diseases of the Nervous System, from whatever cause, &c., affording at once a new lease of life to the sickly and aged of both sexes, whilst in addition imparting a beautiful and clear complexion, so anxiously sought for by all. Proved by the sworn testimonies made before the Lord Mayor of London, and sitting Magistrates. Sold by Buchan and Co., Patentees, 22 Newman street, Oxford street, London, W., and all chemists in town and country. Prices:—Pills, per box, 1s 1½d, 2s 9d, and 11s; Ointment, per pot, 1s 1½d, and 2s 9d; Essence, per bottle, 11s, or family bottle containing four times that quantity, 33s. Agents:—Barclay, 75 Farringdon street; J. Sanger, 150 Oxford street; Hannay, 63 Oxford street; Butler, 4 Cheapside; Hooper, 43 King William street, London Bridge; R. Howden, 78 Gracechurch street; Prout, 229 Strand, &c., &c.

Just published, gratis, or post free for one stamp, to be had of all agents, and at 22 Newman street, Extracts from Dr Buchan's Work, entitled BUCHAN'S DOMESTIC MEDICINES, being a Book of Reference, containing instructions for the cure of every ailment incidental to man, woman, or child.

A BOON TO NERVOUS SUFFERERS.—Twenty Thousand Copies of a Medical Book for gratuitous circulation. HENRY SMITH, Doctor of Medicine of the Royal University of Jena, &c., who has devoted fifteen years to the study and treatment of Nervous Debility, Loss of Memory, Dimness of Sight, Lassitude, and Indigestion, will send free, for the benefit of Nervous Sufferers, a copy of the New Medical Guide, containing his highly successful mode of treatment, with necessary instructions by which sufferers may obtain a cure. Post free on receipt of a stamped directed envelope. Address Dr Henry Smith, 8 Burton crescent, Tavistock square, London, W.C.

RUPTURES.—BY ROYAL LETTERS PATENT

WHITE'S MOC-MAIN LEVER TRUSS is allowed by upwards of 200 Medical Gentlemen to be the most effective invention in the curative treatment of HERNIA. The use of the steel spring, so often hurtful in its effects, is here avoided, a soft bandage being worn round the body while the requisite resisting power is supplied by the MOC-MAIN PAD and PATENT LEVER, fitting with so much ease and closeness that it cannot be detected, and may be worn during sleep. A descriptive circular may be had, and the Truss (which cannot fail to fit) forwarded by post, on the circumference of the body two inches below the hips being sent to the Manufacturer.

Mr WHITE, 228 Piccadilly, London.

Price of a single Truss 16s, 21s, 26s 6d and 31s 6d; Postage, 1s. Double ditto, 31s 6d, 42s, and 52s 6d; postage, 1s 8d. Post-office orders to be made payable to John White, Post-office, Piccadilly.

ELASTIC STOCKINGS KNEE CAPS, &c., for VARICOSE VEINS, and all cases of WEAKNESS and SWELLING of the LEGS, SPRAINS, &c. They are porous, light of texture, and inexpensive, and are drawn on like an ordinary stocking. Price from 7s 6d to 16s each; postage, 6d

WHITE, MANUFACTURER, 228 Piccadilly, London

VALUABLE INFORMATION.—GRATUITOUS EDITIONS of the following LECTURES, delivered at the Royal Institute of Anatomy Science, and Medicine, 369 Oxford street, London, by W. B. MARSTON, the Principal, are being issued, with plain directions for SELF-TREATMENT and CURE in each of them.

No. I.—NERVOUS DEBILITY (the result of youthful error), loss of memory, shortness of breath, dimness of sight, exhaustion, and general incapacity. Addressed specially to Young Men.

No. II. MARRIAGE; Its Obligations and Impediments. Addressed to those who contemplate Marriage, and to the Married who desire Children.

No. III.—THE BRAHMIN'S ELIXIR OF LIFE: Its History—Secret Remedies of the Hindoos no Fable—Full Particulars of this Extraordinary Specific—Its Amazing Powers as a Reinvigorator of the Impaired Functions, and in all Cases of Nervous Debility.

No. IV.—THE DISEASES INFLICTED UPON MANKIND BY THE GREAT SOCIAL EVIL. With a simple means of complete Cure without Mercury.

Each Lecture, neatly printed and bound, will be sent GRATIS, on receipt of two stamps to prepay postage, or THE WHOLE FOUR, BOUND TOGETHER, with numerous additions, and full directions for SELF-TREATMENT and CURE, 160 pages, 8vo, post free, for Six Stamps. Address, Treasurer, Royal Institute, 369 Oxford street, London.

DEANE'S TWO-HOLE BLACK PENS which are unequalled for their durability and easy action, are adopted by the gentlemen of the Stock Exchange, and the principal bankers, merchants, and public companies of the city of London, besides several of Her Majesty's judges, the most eminent counsel, and the reverend the clergy. Their cheapness and popularity has induced many unprincipled people to put forth imitations of the genuine articles, which are equally useless to the purchaser, and disgraceful to the vender. The public are therefore cautioned, and respectfully requested not to purchase any as DEANE'S GENUINE TWO-HOLE BLACK PENS, unless each pen is stamped

"O. and J. Deane, London Bridge,"

and the box, which contains exactly twelve dozen, has thereon a variously coloured label, inscribed

"O. and J. DEANE'S Two-Hole Black Pens, 46 King William street, London bridge."

DR ROBERT ROWE ON INDIGESTION.

This day is published, price 2s 6d, the fifteenth edition,

NERVOUS DISEASES, Liver and Stomach Complaints, Low Spirits, General Debility, and Diseases of Warm Climates; the Result of Thirty Years' Practice.

By G. ROBERT ROWE, M.D.

"Dr Rowe claims with justice a priority of authorship, while he yields to none in his treatment. The value of this work is enhanced by its practical nature."—LANCET.

"We have no hesitation in placing this work among the first ranks. We entertain a high opinion of its value."—MEDICAL TIMES.

"This is a clever and useful work; contains much that is worthy of attention, and should be read by all martyrs to indigestion and other ills."—TIMES.

Also, by the same Author, 2nd edition, price 4s 6d, On some of the Important Diseases of Females and Children.

London: J. Churchill, and to be had of all booksellers.

A New Edition of

THE PHILOSOPHY OF MARRIAGE. By JOSEPH KAHN, Graduate in Medicine, Surgery, and Midwifery, in the Royal and Imperial Universities of Vienna, Erlangen, &c., &c.

This popular work (which has been translated into four different languages) has now gone through forty-one Editions of 10,000 each, and is designed to impart accurate knowledge on subjects which involve the means of securing moral and physical happiness.

Price One Shilling, or free by post (in an envelope) for eighteen stamps.

J. Allen, 20 Warwick lane, Paternoster row; or from the Author's address, 17 Harley street, Cavendish square, W.

Just published, 71st thousand, price 1s, post free for 13 stamps. Sold by Mann, 39 Cornhill, or direct from the Author.

DR LA'MERT ON SPERMATORRHŒA; an Original Essay on the Treatment and Cure of NERVOUS and PHYSICAL DEBILITY, resulting from pernicious habits contracted in Youth, excesses in Manhood, or residence in Tropical Climates. With Cases and Engravings from Life, representing the various Organs in Health and Disease.

CONTENTS.

SECTION I.—The Physiology of the Generative Organs.

SECTION II.—Puberty—Manhood—The Morals of Generative Physiology—True and False Morality.

SECTION III.—Marriage in its Moral, and Physical Relations—Happy and Unhappy Unions—How to secure Healthy Offspring.

SECTION IV.—Youthful Abuse—The Secret Causes of Nervous Debility, Impotence in Man, and Sterility in Man and Woman.

SECTION V.—Spermatorrhœa, or Chronic Impotence: its History, Causes, and Moral Consequences—The Sterility of Age.

Dr LA'MERT, Honorary Member of the London Hospital Medical Society, Registered Licentiate of the Royal Society of Apothecaries, &c., is the only legally qualified practitioner who, for 20 years, has devoted his attention to the treatment of these disorders, which are so frequently aggravated by the unskilfulness of ignorant empirics, either self-styled physicians or surgeons, sometimes assuming names of eminent medical men, &c. At home for consultation daily, from Ten till Two, and from Six till Eight.

37 Bedford square, London.

TO THE NERVOUS AND DEBILITATED.

Just published, the 125th thousand, with numerous plates, in a sealed envelope, price 1s, sold by all booksellers, or post paid, by the Author, for 12 stamps,

MANHOOD: THE CAUSE AND CURE of PREMATURE DECLINE, with Plain Directions for Perfect Restoration to Health and Vigour. By Dr J. L. CURTIS, 15 Albemarle street, Piccadilly, London.

CONTENTS.

INTRODUCTORY CHAPTER on the Physiological Structure and Functions of the Reproductive Organs.

CHAPTER II.—Causes of Spermatorrhœa and Impotence; Early Vicious Indulgences; Dangers of Neglect.

CHAPTER III.—A Review of the Disqualifications of Marriage; whether resulting from the Youthful Abuse, the Follies of Maturity, the Effects of Climate, or Infection.

CHAPTER IV.—Plan of Treatment, Medical and Moral, with observations on a new and successful mode of detecting Spermatorrhœa and other Urethral discharges by microscopic examination.

CHAPTER V. and VI. on the modern Treatment of Gonorrhœa and Syphilis.

The Book concludes with numerous interesting cases, to which is added the Author's receipt of a preventive Lotion

Mr CURTIS, author of the above Medical Treatise, may be consulted from 10 till 3, and 6 till 8. Sundays from 10 till 1.

Sold by Piper and Co., 23 Paternoster row and Mann, 39 Cornhill, London

HUBBUCK'S PATENT WHITE ZINC PAINT.

By their process, which is patented, Pure White Zinc Paint is cheaper than White Lead. It is the most durable and beautiful paint known, and does not stain or discolour with the London atmosphere.

CHEAPNESS.—Two hundred-weight of this Paint, with six gallons of Oil, covers as much surface as three hundred-weight of White Lead and twelve gallons of Oil. It is cheaper in the first instance, as well as desirable on every consideration.

ADULTERATIONS.—Prejudice is caused by some Paint Grinders selling Zinc Paint adulterated with Sulphate of Barytes, some even to the extent of thirty per cent. Whether this is sold under the name of "Improved Zinc Paint," or is candidly sold as Number Two or Three qualities, no Painter can produce good work with it. He naturally condemns Zinc Paint altogether.

That Painters have never seen the best Zinc Paint is evident, or they would not use any other paint for their best work. To prevent the prejudice which the inferior article must produce, each Cask of Pure White Zinc is stamped

"HUBBUCK, LONDON, PATENT."

THOMAS HUBBUCK and SON, WHITE LEAD, OIL, PAINT and VARNISH WORKS, 24 LIME STREET.

FIRST OF THE KIND Manufactured and Patented in the United Kingdom and France, as explained with Engravings in THE ILLUSTRATED LONDON NEWS, of May 26th. Supplied by BROWN and POLSON, to Her Majesty the Queen, by order from Buckingham Palace. It is in great favour wherever it has been made known, for Puddings, Blancmange, &c., preferred to the best arrow root, and especially suited to the delicacy of Children and Invalids.—BROWN and POLSON, Manufacturers and Purveyors to Her Majesty: Paisley, Manchester, Dublin, and London.

JULLIEN FUND.

Committee Room—50 New Bond street.

The Committee of the Jullien Fund, fearing that the subscriptions have been materially checked by the unfortunate death of Mons. Jullien, desire to explain that a widow and others, members of his family, can be protected from want only by the kind aid of those who appreciate the great services rendered by the late lamented maestro to the cause of the musical education of the English people.

The Committee confidently appeal to that benevolence for which their countryman are so distinguished, for such prompt and liberal additions to the subscription list as shall enable them to do some justice to the memory of M. Jullien, and at the same time afford adequate relief to his bereaved family.

COMMITTEE for the DISTRIBUTION of the JULLIEN FUND.

Mr John Mitchel — Mr W. Duncan Davison
Mr W. R. Sams — Mr Jules Benedict
Mr Thomas Chappell — Mr A. Blumenthal

HONORARY TREASURERS.

Mr John Mitchell, 33 Old Bond street
Mr T. Chappell, 50 New Bond street

London and County Bank, Hanover square

Who, as well as the honorary treasurers have kindly consented to receive subscriptions.

April, 25th, 1860.

SALE OF LAMPS, CHANDELIERS, AND GAS FITTINGS.

TUCKER and SON having purchased of Messrs Pearce and Son (of Ludgate hill) their entire stock of Lamps, Gas Chandeliers, &c., (on their relinquishing that branch of their business to devote exclusive attention to the China and Glass Trade) have distributed it among their three Show Rooms as under; and being goods of first-rate quality, and offered to the public at a reduction of one-third from their usual price, to insure their immediate realisation, they must command the attention of purchasers.

City Show Rooms, 36 King William street (4 doors from London Bridge); Central do., 190 Strand (opposite St Clement's church, and near Temple Bar).

TUCKER and SON—Established 43 years. Manufactory, Essex Works, W.C.—November, 1860.

DUTY OFF MODERATOR LAMPS.—J. Schlossmacher's celebrated Manufactore. Burner of every Lamp stamped J. S. The duty being now off, and J. S. being enabled by machinery to reduce the prices of his Lamps to the charges of other makers for their commonest qualities, the full benefit of both reductions is given to the public through his London Agents, TUCKER and SON, at their Establishments, as under:—

Central Show Rooms, 190 Strand (near Temple Bar); City Show Rooms, 36 King William street (4 doors from London Bridge). Established 43 years.

Engravings free by Post.

Corner of Tottenham Court road and Euston road.

Country Establishments:
Thornton's buildings, Bridge street, Bradford, Yorkshire.
Fargate, Sheffield.

EXTRACTS FROM THE PRESS referring to the new Branch Establishment of E. MOSES and SON, at the corner of Tottenham Court road and Euston road.

"Upon each floor, there are small apartments called the 'trying-on rooms,' affording customers an opportunity of avoiding the guess-work which has hitherto prevailed in ready-made emporiums, and everywhere immense mirrors are placed in which the buyer may satisfy himself with the fit and shape of the garment which he proposes to purchase."—STANDARD.

"On the whole, the new establishment of Messrs E. Moses and Son is decidedly the most complete of its class in the Metropolis."—MORNING HERALD.

"The whole exterior of the building presents a noble aspect. It combines an appearance of lightness and solidity, grace, and strength."—ILLUSTRATED NEWS OF THE WORLD.

"The interior arrangements are in a corresponding scale of elegance, whilst convenience and comfort have not been lost sight of.....Nothing, in fact, that goes to constitute the completeness of an organised whole can be said to have been omitted."—DAILY NEWS.

"Like skilful logicians, they laid down the solid premises of their trade syllogism in the Minories; they next constructed their middle term in Oxford street; and they have just now brought out their conclusion to Tottenham Court road."—EXPRESS.

E. MOSES and SON, Merchant Tailors, Woollen Drapers, Hatters, Hosiers, Boot and Shoe Makers, and General Outfitters.

London Houses:

N.B. Should any article not be approved of, it will be exchanged, or the money returned.

E. MOSES and SON'S rules for self-measurement and lists of prices, with pamphlet on the Ready-made Clothing System (Past and Present), gratis on application, or post free.

The Establishments are closed every Friday evening at sunset until Saturday sunset, when business is resumed until 11 o'clock.

KEATING'S COD LIVER OIL. Just Imported. The Pale from Newfoundland, and the Light Brown from Norway. The supplies of the present season have never been surpassed, the fish being unusually fine, and the oil nearly tasteless. Professors Taylor and Thompson, of Guy's and St Thomas's Hospitals, have analysed, and pronounced the PALE NEWFOUNDLAND OIL the best and most desirable for invalids of very delicate constitution. The Light Brown being more economical in price, is brought within the reach of all classes. NO HIGHER PRICE NEED BE PAID than the following:—Light Brown, 1s 8d per pint, or 3s per quart. Pale, 1s 6d half-pints, 2s 6d pints, 4s 6d quarts, or in five-pint bottles, 10s 6d, imperial measure, at 79 St Paul's Churchyard.

MEDICAL REFEREE—Samuel Solly, Esq F.R.S.

NOTICE.—The usual fifteen days allowed for payment of Fire Premiums falling due at Christmas will expire on 9th January.

Fire and Life Assurances may be effected with this Corporation on advantageous terms.

In the Life Department, assurances are granted with participation in Profits, or, at lower Premiums, without such participation.

The Reversionary Bonus on British Policies has averaged nearly 2 per cent. per annum on the sum assured, or 48 per cent. upon the Premium paid.

Equivalent reductions have been made in the Premiums payable by persons who preferred that form of Bonus.

The future divisions of Profit will take place every Five Years.

Any sum not exceeding £15,000 may be insured on one Life.

This Corporation affords to the Assured—

Liberal participation in Profits,—with exemption from the Liabilities of partnership.

A rate of Bonus equal to the average returns of Mutual Societies,—with the guarantee of a large Invested Capital-Stock.

The advantages of modern practice,—with the security of an Office whose resources have been tested by the experience of nearly a Century and a half.

The Corporation have always allowed the Assured to serve in the Militia, Yeomanry, or Volunteer Corps, within the United Kingdom, free of charge.

Current or Floating Accounts (balanced half-yearly, on the 30th June and 31st December) opened with Individuals and Firms, bearing interest when the minimum monthly balance at credit is not less than £100 at the rate of two per cent per annum. When the balance falls below £100, a moderate Commission is charged, according to the nature of the account.

Deposits in sums of not less than £100 are received, repayable on 10 days' notice, at 1 per cent. below the Bank of England minimum rate of discount, rising and falling therewith, but not to exceed five per cent. per annum

Deposits for Fixed Periods are received at Interest, particulars of which may be obtained at the Bank.

Sales and Purchases effected in British and Foreign Securities, in East India Stock and Loans, and Army, Navy, and Civil Pay and Pensions realised.

Bills issued at the Exchange of the day, and free of any extra charge, on the Branches of the Bank.

Approved Bills drawn against Funds, or upon Parties in India, purchased.

Bills payable in India sent out for collection.

Circular Notes, payable at the principal Cities of Europe, granted.

Interest on Indian Government Securities drawn, and the equivalent paid to parties interested, without charge.—By order of the Board,

WILLIAM SHIPMAN, Officiating General Manager
Hours of business, 10 to 4; Saturdays, 10 to 3.

COMMERCIAL BANKING

COMPANY of SYDNEY, NEW SOUTH WALES:
Incorporated by Act of the Colonial Legislature.
London Office, No. 33 Cornhill.

LONDON BOARD.

John Gilchrist, Esq.
Frederick Parbury, Esq.
Edwin Brett, Esq.

The London Board of Directors grant Letters of Credit payable on demand, and Bills of Exchange at thirty days' sight, on the Sydney office, and on the following branches of the Bank in the Colony of New South Wales, viz.:—

Albury	Goulburn	Maryborough	Shoalhaven
Cooma	Kiama	Morpeth	Wollongong
Eden	Maitland	Queanbeyan	Yass

They also negotiate approved Drafts on the Australian Colonies, forward Bills for Collection, and transact every description of banking business with Australia, on the most favourable terms, through the above-named establishments of the Bank in New South Wales, and its agents in Victoria, South Australia, and Tasmania.

EDWIN BRETT, Manager.
No. 33 Cornhill, London, E.C., July, 1860.

EXTENSIVE SHIP BUILDING

WORKS and DRY DOCK at GREENOCK, with Accommodation suitable for an Engineering Establishment.—For SALE, by Private Bargain, in whole, or in lots, the Ship Building Premises at Greenock, belonging to Messrs John Scott and Sons, and for upwards of a century occupied by their firm, containing about 57,000 square yards of ground, bounded on the east by the public harbour, on the west by the property of the Harbour Trustees of Greenock, and having a frontage to the sea of about 950 feet.

There are spacious Building Slips, and the plan of the works admits of the rapid execution of repairs.

There is a Tidal Basin capable of containing vessels of a large class when under repairs.

The Dry Dock entering from the basin is 300 feet in length, with Gates of 45 feet in width, and an average depth on the sill at ordinary spring tides of about 15 feet. The dock could be enlarged at a comparatively small expense. The entrance and pier heads of the dock have been recently substantially rebuilt and improved. There is a condensing pumping engine with boiler. Besides the tidal basin, there is an inlet from the Sea, forming a convenient and economical means of discharging coal, timber, iron, &c.

A substantial Quay Wall is constructed round the basin, and along about 500 feet of the sea frontage.

The buildings consist of a large moulding loft, saw mill, stoves, mast house, boat house, joiners' shops, smith, chain and anchor makers' shops, sheds, block of substantially built stores, with rigging loft and buildings for forge, &c., &c. There are also offices, drawing rooms, &c., and an extensive range of dwelling houses.

The tools comprehend large and powerful hydraulic chain testing machine, furnaces, punching and cutting machines, and tools requisite for iron ship building. There are several steam engines of from 10 to 30 H.P. for driving the machinery, fan blasts, &c.

The Harbour Trustees are in progress of laying down rails encircling the quays and harbours of Greenock, which will give direct land carriage from the works to any part of the Kingdom.

The depth of water in the Victoria Harbour of Greenock, and the powerful crane, proved to 70 tons, erected there, afford the greatest facilities for fitting and repairing ships, and shipping and for unshipping engines and machinery. Coal and iron are delivered at the works as cheap as at any place on the Clyde, and the river affords from thence an easy and uninterrupted navigation seawards for the largest ships afloat or building. Labour and house rents are moderate.

The establishment is fitted for constructing and repairing all kinds of vessels, and several of H.M. ships and those of the Royal Mail, the P. and O., and other leading Steam Navigation Companies have been built there.

Facilities will, if desired, be afforded for payment of the price.

For further particulars apply at the works, to Messrs John Scott and Sons, who will treat for a sale of the whole or part.

Greenock, 14th December, 1860.

ALLEN'S PATENT

PORTMANTEAUS and TRAVELLING BAGS, with Square Opening; Ladies' Dress Trunks; Dressing Bags, with silver fittings; Despatch Boxes, Writing and Dressing Cases, and 500 other articles, for home or continental travelling. CANADA LANDED CREDIT COMPANY.

Incorporated by Act of the Parliament of Canada.
Capital, £100,000.
PRESIDENT—Lewis Moffatt, Esq.
VICE-PRESIDENT—W. P. Howland, Esq., M.P.P.
DIRECTORS.

The Hon. G. W. Allan, M.L.C.	Thomas D. Harris, Esq.
R. D. Chatterton, Esq.	Lewis Moffatt, Esq.
The Hon. Malcolm Cameron, M.L.C.	William M'Master, Esq.
Richard L. Denison, Esq.	Samuel Sprenll, Esq
Charles Donaldson, Esq.	Mr Sheriff Smith Collingwood.
W. P. Howland, Esq., M.P.P.	E. W. Thomson, Esq.

BANKERS—Messrs Smith, Payne, and Smiths, London.

The Company are prepared to receive loans against their debentures of £50, £100, and £1,000 sterling, for periods of five, seven, or ten years, bearing interest at 6 per cent. per annum, both principal and interest being made payable in London.

The amount received is invested in and secured by mortgages of freehold land in Canada West, of ample value.

The Company by its charter is always first mortgagee.

The evils, uncertainties, and delays of the old mortgage system are avoided by the lender.

He has no care or anxiety as to the character of the borrower, or the value of the land mortgaged.

The Company assumes all responsibilities and guarantees the payment of interest to the day, viz., 1st January and 1st July.

Investors incur no risk as in a railway or similar undertaking; the Company's profits beforehand being well ascertained and sure.

The half-yearly returns of business done, made to the Government of Canada, prospectuses, and further information, may be had at Messrs Brunton and Son's, Stock Brokers, Auction Mart chambers, Bartholomew lane, London.

CANADA LANDED CREDIT COMPANY.

Notice is hereby given, that the Half-yearly Interest on the Company's Debentures will be paid on and after the 1st January, on presentation of the coupons at the banking house of Messrs Smith, Payne, and Smiths.
BRUNTON and SON.

TEMPORARY OFFICES—9 Mincing lane, London.

The Directors of the East India and London Shipping Company (Limited) have succeeded in purchasing the auxiliary screw steamships Golden Fleece, Jason, Queen of the South, Lady Jocelyn, Calcutta, Indiana, and Hydaspes, at about one-third of their cost, for the purpose of opening a monthly communication between London, Madras, and Calcutta.

The want of a direct first-class auxiliary steam line to India, especially for families and invalids, has been long known and felt, and such a line must command a sure trade for both passengers and cargo; ample proof of which is rendered in the following document, signed by the principal East India merchants, banking firms, exporters and importers, colonial brokers, wholesale warehousemen, manufacturers and shippers, and others interested in East Indian commerce and intercourse:—

(Copy.)

"We, the undersigned merchants and others, interested in commercial intercourse with the East Indies, consider that regular monthly communication, out and home, with Madras and Calcutta, by such first-class auxiliary steam clipper ships as were formerly employed in conveying goods and passengers on that route, has now become indispensable to the trade between London and the East.

66 Queen street, London, 23rd August, 1860.

MESSRS R. WOTHERSPOON and CO., 46 Dunlop street, Glasgow.

DEAR SIRS,—I have, as requested, to-day visited the Royal Laundry, with reference to the advertisement of the Nottingham firm, who state that their starch has been used for many years in the Royal Laundry, and have been assured by Mr Thompson, the superintendent, that none but yourselves have any right to state that they supply starch to Her Majesty's Laundry, as no other starch is there used, nor has been used for some years, but the Glenfield Patent Starch. I have been further assured that your starch continues to give complete satisfaction, and that though trial has been made of samples of various starches, none of these have been found nearly equal in quality to the Glenfield.—I am, dear Sirs, your obedient servant. WM. BLACK.

MR LEWIS AND SON,

113 Strand.—The Royal Lewisian Systems of Writing, Arithmetic, Bookkeeping, and Shorthand, as taught for upwards of fifty years by Mr Lewis, the real inventor and first teacher of those world-renowned and only infallible systems, insures perfection in any of the above branches after a few easy and interesting lessons Persons unable to take the lessons may obtain the inventor's works for self-instruction at his only Institution, 113 Strand.
